According to forensic ballistic expert opinion No. 3/237 dated 7 April 2023, it was established that, among the military clothing items belonging to Mahammad Bilal oglu Mammadov and submitted for examination, one military field-type tunic, one military field-type warm jacket, one pair of military field-type trousers, one military field-type belt, another pair of military field-type trousers, one pair of underpants, one military field-type T-shirt, one pair of boots, one pair of socks and one neck covering contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused

by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic genetic expert opinion No. 22/598R dated 21 September 2022, it was established that the biological samples taken from the unidentified body conditionally referred to as “Unknown-1” belonged to a male person and, with a probability of 99.99%, belonged to Mahammad Bilal oglu Mammadov.

According to forensic medical expert opinion No. 38 dated 14 September 2022, it was established that the injuries sustained by Erkin Adalat oglu Huseynov — acute blood loss; haemoperitoneum, namely the accumulation of free blood in the abdominal cavity; a blind wound of the right half of the chest penetrating into the abdominal cavity and accompanied by injury to the abdominal-cavity organs; and through-and-through wounds of the upper-arm region accompanied by an open multifragmentary fracture of the right humerus — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/214 dated 10 April 2023, it was established that, among the military clothing items belonging to Erkin Adalat oglu Huseynov and submitted for examination, one military tunic, one pair of military trousers, one warm undershirt, one pair of warm under-trousers and one T-shirt contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 39 dated 14 September 2022, it was established that the injuries sustained by Ismayil Maharram oglu Budagli — a large open wound of the hairy part of the head, accompanied by defective multifragmentary open fractures of the cranial vault and skull base bones, a displaced closed fracture of the nasal bone, and diffuse crushing and destruction of brain tissue; multiple blind wounds of the right upper arm, accompanied by multifragmentary open fractures of the right humerus, radius and ulna and acute blood loss; and multiple blind wounds of the soft tissues of the right gluteal, right thigh and right lower-leg regions, accompanied by acute blood loss — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to the opinion of the forensic ballistics examination dated 03.04.2023, No. 3/193, it was determined that one armored vest, one military tunic, one pair of military trousers, one woolen jacket, one undershirt, one T-shirt, and one boot belonging to Budagli Ismayil Maharram oglu, among the military clothing items submitted for examination, had the damage indicated in the examination section of the opinion, which is characteristic of damage caused by the impact of a bullet fired from a firearm or by shrapnel from an explosion.

According to forensic medical expert opinion No. 40 dated 13 September 2022, it was established that the injuries sustained by Ravil Mubariz oglu Humbatov — acute blood loss;

traumatic amputation of the head, neck and left upper limb, accompanied by crushing and destruction of brain tissue; traumatic amputation of the right upper limb at the level of the wrist joint, accompanied by acute blood loss;

Page 467

and multiple blind wounds of the soft tissues of the right upper arm, anterior chest wall and left thigh region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/236 dated 7 April 2023, it was established that, among the military clothing items belonging to Ravil Mubariz oglu Humbatov and submitted for examination, one tunic, one pair of trousers, one woollen jacket, one pair of civilian sports trousers, one T-shirt, one pair of civilian underpants, one pair of military field-type trousers, one pair of grey sports trousers and one pair of dark-grey civilian underpants contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic genetic expert opinion No. 22/597R dated 21 September 2022, it was established that the biological samples taken from the unidentified body conditionally referred to as “Unknown-1” belonged to a male person and, with a probability of 99.99%, belonged to Ravil Mubariz oglu Humbatov.

According to forensic medical expert opinion No. 41 dated 14 September 2022, it was established that the injuries sustained by Khagan Dashgin oglu Gurbanov — a blind wound of the right frontal region penetrating into the cranial cavity, accompanied by a defective multifragmentary open fracture of the frontal bone and diffuse injury to brain tissue; blind wounds of the soft tissues of the left frontal-parietal region and the outer surface of the right hip joint; and bruising of the left lumbar region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/218 dated 10 April 2023, it was established that, among the military clothing items belonging to Khagan Dashgin oglu Gurbanov and submitted for examination, one military field-type tunic, one pair of military field-type trousers, one field-type shirt, one pair of underpants, one pair of socks and one pair of boots contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 42 dated 15 September 2022, it was established that the injuries sustained by Saddam Rafiq oglu Huseynov — a blind wound of the left frontal region penetrating into the cranial cavity, accompanied by a defective multifragmentary open fracture of the frontal bone and diffuse trauma of brain tissue; a blind wound of the lumbar region penetrating into the abdominal cavity, accompanied by a

multifragmentary open fracture of the fourth lumbar vertebra, acute blood loss and injury to the abdominal-cavity organs; a blind wound of the left upper-arm region, accompanied by a multifragmentary open fracture of the humerus and acute blood loss; multiple blind wounds of the soft tissues of the left shoulder, left upper arm, both thighs and both lower legs, accompanied by acute blood loss; and multiple abrasions of both forearms, the left lumbar region and both lower-leg regions, accompanied by subcutaneous bruising — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

Page 468

According to forensic medical expert opinion No. 44 dated 15 September 2022, it was established that the injuries sustained by Turan Tarlan oglu Maharramov — a blind wound of the right parietal region penetrating into the cranial cavity, accompanied by a defective multifragmentary open fracture of the parietal bone and diffuse injury to brain tissue, as well as a haematoma of the left cheek region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/221 dated 10 April 2023, it was established that, among the military clothing items belonging to Turan Tarlan oglu Maharramov and submitted for examination, one military field-type tunic, one pair of military field-type trousers, one military field-type shirt, one pair of underpants, one pair of civilian sports trousers, one shirt, one pair of socks, one pair of gloves and one pair of boots contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 43 dated 15 September 2022, it was established that the injuries sustained by Elmir Abdul oglu Huseynov — a blind wound of the right occipital-parietal region penetrating into the cranial cavity, accompanied by defective multifragmentary open fractures of the occipital and parietal bones and diffuse injury to brain tissue; a blind wound of the soft tissues of the left occipital-parietal region; and multiple abrasions of the left eyebrow, nose and chin regions — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic medical expert opinion No. 45 dated 15 September 2022, it was established that the injuries sustained by Umid Vugar oglu Imamguliyev — a through-and-through wound of the left shoulder girdle penetrating into the thoracic cavity, with the entry opening located in the left shoulder-girdle region and the exit opening in the right scapular region, accompanied by acute blood loss, haemopneumothorax, namely the accumulation of free blood and air in the thoracic cavity, and injury to the thoracic-cavity organs — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/215 dated 10 April 2023, it was established that, among the military clothing items belonging to Umid Vugar oglu Imamguliyev and submitted for examination, one pair of military field-type trousers, one pair of khaki-coloured underpants, one pair of boots and one pair of socks contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 46 dated 15 September 2022, it was established that the injuries sustained by Safiyar Elshan oglu Mammadov — acute blood loss; right-sided haemopneumothorax, namely the accumulation of free blood and air in the thoracic cavity; multiple injuries to the organs of the thoracic cavity; blind wounds of the right shoulder girdle and right axillary region penetrating into the thoracic cavity, accompanied by open displaced fractures of the right upper arm and of the third, fourth and fifth ribs on the right; haemoperitoneum, namely the accumulation of free blood in the abdominal cavity; and blind wounds of the right lumbar region penetrating into the abdominal cavity, accompanied by multiple injuries to the abdominal-cavity organs — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

Page 469

According to forensic ballistic expert opinion No. 3/252 dated 7 April 2023, it was established that, among the military clothing items belonging to Safiyar Elshan oglu Mammadov and submitted for examination, one military field-type warm overcoat and one khaki-coloured tunic contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 47 dated 13 September 2022, it was established that the injuries sustained by Polad Seyran oglu Shirinov — a blind wound of the left lateral wall of the chest penetrating into the abdominal cavity, accompanied by an open multifragmentary fracture of the tenth rib on the left, acute blood loss and injury to the abdominal-cavity organs; a through-and-through wound of the left elbow region, with the entry opening in the left elbow region and the exit opening on the inner surface of the lower third of the left upper arm, accompanied by acute blood loss; a blind wound of the right lower-leg region, accompanied by an open multifragmentary fracture of the fibula; and an abrasion of the lumbar region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/217 dated 10 April 2023, it was established that, among the military clothing items belonging to Polad Seyran oglu Shirinov and submitted for examination, one military warm overcoat, one long-sleeved shirt, one civilian long-sleeved shirt and one civilian short-sleeved shirt contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been

caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 48 dated 15 September 2022, it was established that the injuries sustained by Gadim Ilgar oglu Khalilov — acute blood loss; haemoperitoneum, namely the accumulation of free blood in the abdominal cavity; and a blind wound of the right supracoxal region penetrating into the abdominal and pelvic cavities, accompanied by multiple injuries to the abdominal and pelvic organs — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/246 dated 7 April 2023, it was established that, among the military clothing items belonging to Gadim Ilgar oglu Khalilov and submitted for examination, one military-type warm overcoat, one field-type pair of trousers, one pair of civilian underpants, one pair of boots and one pair of socks contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 49 dated 15 September 2022, it was established that the injuries sustained by Elur Sadaqat oglu Samadov — a through-and-through wound of the right thigh region, with the entry opening on the inner surface of the middle third of the right thigh and the exit opening on the outer surface of the upper third of the right thigh, accompanied by acute blood loss and injury to the right femoral artery; and multiple superficial wounds of both lower-leg regions — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/220 dated 10 April 2023, it was established that, among the military clothing items belonging to Elur Sadaqat oglu Samadov and submitted for examination, one pair of military field-type trousers and one pair of underpants contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 50 dated 13 September 2022, it was established that the injuries sustained by Zohrab Azad oglu Karimov — fractures of the nasal bone, the left maxilla and the sphenoid bone, and blind wounds of the nasal region penetrating into the cranial cavity, accompanied by diffuse trauma of brain tissue — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

Page 470

According to forensic ballistic expert opinion No. 3/251 dated 7 April 2023, it was established that, among the military clothing items belonging to Zohrab Azad oglu Karimov

and submitted for examination, one military field-type overcoat, one military field-type tunic, one pair of military trousers, one military jacket, one camouflage-coloured military short-sleeved T-shirt, one pair of civilian-type underpants and one pair of socks contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 51 dated 15 September 2022, it was established that the injuries sustained by Namiq Aghammad oglu Mammadli — a through-and-through wound of the right lower-leg region, with the entry opening on the outer surface of the upper third of the right lower leg and the exit opening on the inner surface of the lower third of the right thigh, accompanied by acute blood loss and injury to the right femoral artery; and multiple abrasions of the nose, neck, both upper arms, both thighs, both lower legs, the anterior and posterior walls of the chest, and the right lateral wall of the abdomen — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/245 dated 5 April 2023, it was established that, among the military clothing items belonging to Namiq Aghammad oglu Mammadli and submitted for examination, one military field-type shirt, one pair of military field-type trousers, one pair of underpants, one pair of boots, one pair of socks and one short-sleeved shirt contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 52 dated 14 September 2022, it was established that the injuries sustained by Farid Giyas oglu Latifov — a blind wound of the right half of the anterior wall of the chest penetrating into the thoracic cavity, accompanied by acute blood loss and injury to the thoracic-cavity organs; a through-and-through wound of the right gluteal region, with the entry opening in the lower outer quadrant of the right gluteal region and the exit opening on the inner surface of the lower third of the right thigh, accompanied by acute blood loss; a through-and-through wound of the left lower-leg region, with the entry opening on the anterior surface of the lower third of the left lower leg and the exit opening on the outer surface of the lower third of the left lower leg, accompanied by open fragmentary fractures of the tibia and fibula and acute blood loss; a through-and-through wound of the scrotum, with the entry opening in the lower part of the scrotum and the exit opening in the left half of the scrotum, accompanied by crushing and destruction of the left testicle; and wounds of the dorsal surface of the right hand — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/216 dated 10 April 2023, it was established that, among the military clothing items belonging to Farid Giyas oglu Latifov and submitted for examination, one military warm overcoat, one military field-type shirt, one pair of military field-type trousers, one military T-shirt, one pair of underpants, one left sock and

one right glove contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 53 dated 15 September 2022, it was established that the injuries sustained by Huseynali Hikmat oglu Nabiyev — a through-and-through wound with the entry opening in the right hip region and the exit opening in the left lateral wall of the chest, accompanied by acute blood loss and multiple injuries to the diaphragm and the thoracic and abdominal-cavity organs; a through-and-through wound with entry and exit openings on the posterior surface of the upper third of the right upper arm, accompanied by acute blood loss and an open fragmentary fracture of the right humerus; a through-and-through wound with the entry opening in the right gluteal region and the exit opening in the left gluteal region, accompanied by acute blood loss;

blind wounds of the right shoulder and both thigh regions, accompanied by acute blood loss; and abrasions of the posterior wall of the chest and lumbar region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/244 dated 7 April 2023, it was established that, among the military clothing items belonging to Huseynali Hikmat oglu Nabiyev and submitted for examination, one shirt, one pair of trousers, one long-sleeved undershirt, one pair of black civilian sports trousers and one pair of underpants contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 54 dated 15 September 2022, it was established that the injuries sustained by Asim Rasim oglu Gafarli — acute blood loss; a blind wound of the right lower-leg region, accompanied by injury to the major vessels of the right lower leg and open multifragmentary fractures of the right tibia and fibula; and a superficial wound of the right hip region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/248 dated 7 April 2023, it was established that, among the military clothing items belonging to Asim Rasim oglu Gafarli and submitted for examination, one pair of trousers, one shirt and one T-shirt contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 55 dated 15 September 2022, it was established that the injuries sustained by Shair Jamaladdinovich Heydarov — acute blood

loss; blind wounds of both gluteal regions, the perineum, the right lower leg and the right foot, accompanied by injury to the major vessels of the right lower-leg region and the pelvic organs, and open fragmentary fractures of the right femur, pelvis, right tibia, right fibula and the first metatarsal bone — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/219 dated 10 April 2023, it was established that, among the military clothing items belonging to Shair Jamaladdinovich Heydarov and submitted for examination, one pair of military field-type trousers, one pair of underpants, one boot and one pair of socks contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 56 dated 16 September 2022, it was established that the injuries sustained by Sadiq Rashad oglu Isayev — a through-and-through wound of the right parietal region penetrating into the cranial cavity, with the entry opening in the right parietal region and the exit opening in the parieto-occipital region, accompanied by defective multifragmentary open fractures of the parietal and occipital bones and diffuse injury to brain tissue — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/211 dated 10 April 2023, it was established that, among the military clothing items belonging to Sadiq Rashad oglu Isayev and submitted for examination, one military field-type warm jacket, one pair of military field-type trousers, one pair of khaki-coloured underpants, one pair of boots and one pair of socks contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 57 dated 16 September 2022, it was established that the injuries sustained by Turxan Idris oglu Suleymanov —

a through-and-through wound of the left half of the face penetrating into the cranial cavity, with the entry opening in the left half of the face and the exit opening in the occipital region, accompanied by defective multifragmentary open fractures of the cranial vault and skull base and diffuse injury to brain tissue; and multiple abrasions of the anterior wall of the chest, the right and left lateral walls of the abdomen, the scapular region, lumbar region and both hip regions — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/233 dated 10 April 2023, it was established that, among the military clothing items belonging to Turxan Idris oglu

Suleymanov and submitted for examination, one military field-type tunic, one pair of military field-type trousers, one field-type shirt, one pair of black underpants, one pair of boots and one pair of socks contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 58 dated 16 September 2022, it was established that the injuries sustained by Vusal Bakhtiyar oglu Malikov — a through-and-through wound of the right thigh region, with the entry opening on the outer surface of the upper third of the right thigh and the exit opening in the right gluteal region, accompanied by acute blood loss and injury to the femoral artery; and blind wounds of the right lower-leg region, accompanied by an open multifragmentary fracture of the tibia and acute blood loss — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/205 dated 6 April 2023, it was established that, among the military clothing items belonging to Vusal Bakhtiyar oglu Malikov and submitted for examination, one pair of military trousers contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 59 dated 16 September 2022, it was established that the injuries sustained by Nihad Nijat oglu Verdiyev — a blind wound of the facial region penetrating into the cranial cavity, accompanied by multiple defective open fractures of the skull and facial-skeleton bones and diffuse crushing and destruction of brain tissue; a blind wound of the left shoulder region penetrating into the thoracic cavity, accompanied by open fragmentary fractures of the left clavicle and the first, second, third and fourth ribs on the left, acute blood loss and injuries to the thoracic-cavity organs; blind wounds of the right suprabrachial region and the outer surface of the right shoulder joint, accompanied by acute blood loss and open multifragmentary fractures of the right humerus; a blind wound of the left thigh region, accompanied by acute blood loss and an open multifragmentary fracture of the left femur; a blind wound of the left popliteal region, accompanied by acute blood loss and open fragmentary fractures of the left tibia and fibula; a through-and-through wound of the right medial ankle region, with the entry opening in the right medial ankle region and the exit opening in the right lateral ankle region, accompanied by open fragmentary fractures of the right tibia and fibula; traumatic amputation of the left upper arm at the level of the lower third, accompanied by acute blood loss and defective multifragmentary open fractures of the left humerus, radius and ulna; and multiple blind wounds of the soft tissues of both lower legs, the left gluteal region and the left thigh region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/206 dated 6 April 2023, it was established that, among the military clothing items belonging to Nihad Nijat oglu Verdiyev

and submitted for examination, one military tunic, one pair of military trousers, one woollen jacket, one undershirt, one pair of underpants, one neck covering, one cap, one sock and the left boot contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

Page 473

According to forensic medical expert opinion No. 60 dated 16 September 2022, it was established that the injuries sustained by Seyfaddin Mahmud oglu Muradov — acute blood loss; blind wounds of the right gluteal, right thigh and right lower-leg regions, accompanied by open multifragmentary fractures of the right femur, right lower-leg and right tibial bones; multiple blind wounds of the soft tissues of the occipital, right temporal, frontal, right lateral neck, right posterior chest wall, right lateral chest wall, right lateral abdominal wall, lumbar, right gluteal, right thigh and right lower-leg regions, accompanied by acute blood loss; and complete traumatic amputation of the right lower limb at the level of the upper third of the lower leg — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/208 dated 6 April 2023, it was established that, among the military clothing items belonging to Seyfaddin Mahmud oglu Muradov and submitted for examination, one military field-type tunic, one pair of military field-type trousers, one military field-type woollen shirt, one military field-type shirt and one pair of black underpants contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 61 dated 16 September 2022, it was established that the injuries sustained by Kenan Mahmud oglu Nasibov — a through-and-through wound of the right temporal region penetrating into the cranial cavity, with the entry opening in the right temporal region and the exit opening in the left parieto-occipital region, accompanied by fragmentary open fractures of the cranial vault and skull base and diffuse injury to brain tissue; a through-and-through wound of the right retroauricular region penetrating into the cranial cavity, with the entry opening in the right retroauricular region and the exit opening in the occipital region, accompanied by fragmentary open fractures of the cranial vault and skull base and diffuse injury to brain tissue; a through-and-through wound of the right orbital region penetrating into the cranial cavity, with the entry opening in the right orbit and the exit opening in the left parieto-occipital region, accompanied by fragmentary open fractures of the cranial vault and skull base, diffuse injury to brain tissue and crushing and destruction of the right eyeball; a through-and-through wound of the right supraclavicular region penetrating into the thoracic cavity, with the entry opening in the right supraclavicular region and the exit opening in the left scapular region, accompanied by an open fragmentary fracture of the left scapula, acute blood loss and injury to the thoracic-cavity organs; a blind wound of the left shoulder girdle penetrating into the thoracic cavity, accompanied by open fragmentary fractures of the left clavicle and left humerus, acute blood

loss and injury to the thoracic-cavity organs; and injuries of the left lower-leg region — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/234 dated 7 April 2023, it was established that, among the military clothing items belonging to Kenan Mahmud oglu Nasibov and submitted for examination, one pair of shorts and one pair of boots contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 63 dated 16 September 2022, it was established that the injuries sustained by Maftun Seymur oglu Ahmadzade — a through-and-through wound of the left shoulder region, with the entry opening in the left shoulder region and the exit opening in the left lumbar region, accompanied by acute blood loss and multiple injuries to the thoracic and abdominal-cavity organs; a through-and-through wound of the right lower-leg region, with the entry opening on the inner surface of the middle third of the right lower leg and the exit opening on the anterior-outer surface of the middle third of the right lower leg, accompanied by acute blood loss and open multifragmentary fractures of the right tibia and right fibula; and a superficial wound of the inner surface of the middle third of the left lower leg —

Page 474

were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/210 dated 7 April 2023, it was established that, among the military clothing items belonging to Maftun Seymur oglu Ahmadzade and submitted for examination, one military field-type tunic and one military field-type short-sleeved shirt contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 62 dated 16 September 2022, it was established that the injuries sustained by Isa Rahim oglu Kalbiyev — a blind wound of the right frontal-parietal region penetrating into the cranial cavity, accompanied by multifragmentary open fractures of the cranial vault and skull base and diffuse trauma of brain tissue — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/231 dated 7 April 2023, it was established that the hooded mask belonging to Isa Rahim oglu Kalbiyev and submitted for examination contained the damage indicated in the research part of the expert opinion. The

said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 65 dated 16 September 2022, it was established that the injuries sustained by Farid Vahid oglu Guliyev — a blind wound of the right half of the anterior chest wall penetrating into the thoracic cavity, accompanied by open multifragmentary fractures of the second and third ribs, acute blood loss and injury to the thoracic-cavity organs; another blind wound of the right half of the anterior chest wall penetrating into the thoracic cavity, accompanied by open multifragmentary fractures of the first and second ribs, acute blood loss and injury to the thoracic-cavity organs; and multiple blind wounds of the soft tissues of the right eye fissure, lower lip region and right half of the face — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/232 dated 7 April 2023, it was established that the long-sleeved shirt and short-sleeved shirt belonging to Farid Vahid oglu Guliyev and submitted for examination contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 64 dated 16 September 2022, it was established that the injuries sustained by Gorkhmaz Isgandar oglu Isgandarov — a through-and-through wound of the neck region, with the entry opening on the anterior surface of the right half of the neck and the exit opening on the anterior surface of the left half of the neck, accompanied by acute blood loss and injuries to the major vessels of the neck and the trachea; a through-and-through wound of the left foot, with the entry opening on the outer surface of the left foot and the exit opening on the inner surface of the left foot, accompanied by acute blood loss; and blind wounds of the right suprascapular region and the right lateral wall of the chest penetrating into the thoracic cavity, accompanied by acute blood loss, an open displaced fracture of the third right rib and multiple injuries to the thoracic-cavity organs — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/209 dated 10 April 2023, it was established that, among the military clothing items belonging to Gorkhmaz Isgandar oglu Isgandarov and submitted for examination, one tunic, one short-sleeved military T-shirt, one undershirt, one warm undershirt, one left sock and one left boot contained the damage indicated in the research part of the expert opinion.

The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 66 dated 17 September 2022, it was established that the injuries sustained by Jamil Anar oglu Gurbanzade — a blind wound of the neck region, accompanied by acute blood loss and multiple injuries to the major vessels of the neck and thoracic-cavity organs; and superficial wounds of the anterior surfaces of both lower legs and both knee joints — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/230 dated 10 April 2023, it was established that, among the military clothing items belonging to Jamil Anar oglu Gurbanzade and submitted for examination, one military field-type tunic, one military field-type sweater and one military neck covering contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 67 dated 17 September 2022, it was established that the injuries sustained by Rashad Alizamin oglu Ganbarli — a blind wound of the right lower-leg region, accompanied by acute blood loss, open multifragmentary fractures of the right tibia and right fibula, and injury to the right lower-leg artery and vein; a blind wound of the right foot region, accompanied by acute blood loss and open multifragmentary fractures of the second and third right metatarsal bones; and multiple blind wounds of the soft tissues of the lumbar region, both gluteal regions, right thigh, right lower leg and right foot — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/207 dated 6 April 2023, it was established that, among the military clothing items belonging to Rashad Alizamin oglu Ganbarli and submitted for examination, one pair of military trousers, one long-sleeved undershirt, one short-sleeved undershirt, one pair of sports trousers, one sports jacket, one pair of underpants and the right boot contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 18 dated 15 September 2022, it was established that the injury sustained by Farid Kamaladdin oglu Mehbali — incomplete amputation of the upper third of the left forearm, hanging on a skin flap — was sustained during life and, by degree, was classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/1289 dated 24 November 2022, it was established that, among the military clothing items belonging to Farid Kamaladdin oglu Mehbali and submitted for examination, one military tunic with a hood and one long-sleeved undershirt contained damage of the number and size indicated in the research part of the expert opinion. Based on the shape, size and morphological structure of the damage, as well as the detection around the damage of explosive substances, namely TNT, and gunpowder

particles, the examined damage is characteristic of having been caused by fragments as a result of an explosion, from the centre of the explosion, in different directions.

According to forensic medical expert opinion No. 15 dated 13 September 2022, it was established that the injuries sustained by Azer Mustafa oglu Mammadov — incomplete traumatic amputation of the left upper arm at the level of the middle-lower third, hanging on a flap of soft tissue, and shrapnel wounds of the left upper limb and the left half of the chest, resulting in injury to the lower lobe of the left lung and left-sided haemopneumothorax — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion Nos. 3/1296 and 3/1297 dated 24 November 2022, it was established that the one cartridge submitted for examination was a factory-made 7.62 × 54 mm calibre cartridge intended for use in weapons of the corresponding calibre, namely SVD, Mosin, PK and PKM weapons, and other rifled combat firearms of the corresponding calibre. It is considered ammunition and is suitable for use, namely for firing.

According to forensic medical expert opinion No. 70 dated 27 September 2022, it was established that the injuries sustained by Elvin Elchin oglu Abdullayev were as follows: a through-and-through wound of the head, with the entry opening located in the upper third of the right half of the neck and the exit opening in the left frontal-parietal region, accompanied by fractures of the skull and facial-skeleton bones and diffuse trauma of brain tissue; a through-and-through wound of the posterior surface of the right elbow joint, with the entry opening located on the posterior surface of the right elbow joint and the exit opening on the outer surface of the middle third of the right upper arm, accompanied by multifragmentary displaced open fractures of the humerus and ulna; a through-and-through wound of the right forearm region, with the entry opening on the posterior surface of the middle third of the right forearm and the exit opening on the anterior-inner surface of the middle third of the right forearm, accompanied by acute bleeding; another through-and-through wound of the right forearm region, with the entry opening on the posterior surface of the middle third of the right forearm and the exit opening on the anterior-inner surface of the middle third of the right forearm, accompanied by acute bleeding; a through-and-through wound of the soft tissues of the outer surface of the lower third of the left upper arm; a through-and-through wound of the left hand, with the entry opening on the dorsal surface of the left hand in the projection of the second metacarpal bone and the exit opening on the dorsal surface of the left hand in the projection of the third and fourth metacarpal bones, accompanied by acute bleeding and multifragmentary open fractures of the third and fourth metacarpal bones; a through-and-through wound of the epigastric region, with the entry opening in the epigastric region and the exit opening in the right lumbar region, accompanied by acute bleeding and multiple injuries to the abdominal-cavity organs; a through-and-through wound of the right half of the chest, with the entry opening on the posterior surface of the right half of the chest in the projection of the tenth rib and the exit opening on the right lateral surface of the chest in the projection of the ninth rib, accompanied by acute bleeding, fractures of the ninth and tenth

ribs and multiple injuries to the thoracic-cavity organs; a through-and-through wound of the posterior surface of the chest, with the entry opening on the posterior surface of the chest at the level of the thoracic vertebrae, 1.5 centimetres to the right of the midline, and the exit opening on the left lateral wall of the abdomen, 0.2 centimetres from the lower edge of the costal arch, accompanied by acute bleeding and multiple injuries to the thoracic and abdominal-cavity organs; a through-and-through wound of the right thigh accompanied by acute blood loss; four through-and-through wounds of the left thigh region accompanied by acute blood loss and multifragmentary open fractures of the femur; and a through-and-through wound of the left lower-leg region accompanied by acute blood loss. These injuries were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/240 dated 7 April 2023, it was established that, among the military clothing items belonging to Elvin Elchin oglu Abdullayev and submitted for examination, one military field-type tunic, one yellow woollen sweater, one yellow short-sleeved T-shirt, one pair of military field-type trousers and one pair of yellow warm under-trousers contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 21 dated 14 September 2022, it was established that the injuries sustained by Nahid Huseynagha oglu Mammadov — one through-and-through firearm gunshot wound of the head, entering from the middle of the forehead region and exiting from the right posterior parietal-temporal border, accompanied along the wound channel by crushing and destruction of brain tissue and multifragmentary fractures of the cranial vault bones — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

Page 477

According to forensic ballistic expert opinion No. 3/1291 dated 24 November 2022, it was established that, among the items submitted for examination and belonging to Nahid Huseynagha oglu Mammadov, one tunic with a hood, one short-sleeved shirt, one military-type pair of trousers and one pair of underpants contained damage of the number and size indicated in the research part of the expert opinion. Based on the shape, size and morphological structure of the damage, as well as the detection around the damage of explosive substance, namely TNT, and gunpowder particles, the examined damage is characteristic of having been caused by fragments as a result of an explosion, from the centre of the explosion, in different directions.

According to forensic medical expert opinion No. 14 dated 17 September 2022, it was established that the injuries sustained by Eshgin Nasib oglu Omarov — incomplete traumatic amputation of the torso at the level of the fifth lumbar vertebra, hanging on a flap of skin; open fragmentary fractures of the fourth and fifth lumbar vertebrae; multiple injuries to the abdominal and pelvic-cavity organs; complete traumatic detachment of the right lower limb

at the level of the hip joint; incomplete traumatic detachment of the left lower limb at the level of the hip joint, hanging on a flap of soft tissue; and multiple superficial wounds of the nasal region, anterior abdominal wall, left upper arm, anterior surface of the left wrist-joint region and anterior surfaces of both thighs — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic medical expert opinion No. 69 dated 17 September 2022, it was established that the injuries sustained by Nicat Malik oglu Garazade — a through-and-through wound of the left temporal-occipital region penetrating into the cranial and oral cavities, with the entry opening located in the left temporal-occipital region and the exit opening on the outer surface of the right half of the upper third of the neck, accompanied by open fragmentary fractures of the left temporal bone, left occipital bone, sphenoid bone, ethmoid bone and the third cervical vertebra, and injury to the brain and spinal cord; and through-and-through wounds of the left lower-leg region, with the entry opening on the posterior surface of the upper third of the left lower leg and the exit opening on the anterior surface of the upper third of the left lower leg, accompanied by an open fragmentary fracture of the left tibia and acute blood loss — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/228 dated 10 April 2023, it was established that one pair of military field-type trousers belonging to Nicat Malik oglu Garazade and submitted for examination contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 17 dated 13 September 2022, it was established that the injuries sustained by Ulvi Asadulla oglu Nasirov — one through-and-through firearm gunshot wound of the chest, entering from the projection of the fourth rib along the posterior axillary line on the right half of the posterior surface of the chest and exiting from the left supraclavicular region, accompanied along the wound channel by injury to both lungs; and firearm gunshot wounds of the outer surface of the right ankle joint, accompanied by an open multifragmentary fracture of the calcaneus — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion Nos. 3/1294 and 3/1295 dated 24 November 2022, it was established that the one cartridge case submitted for examination was a part of a factory-made 7.62 mm calibre cartridge, considered ammunition and intended for use in “AKM” and “AKMS” automatic firearms and “SKS” carbines of the corresponding calibre, separated as a result of firing. The cartridge case is suitable for identification examination.

According to forensic medical expert opinion No. 19 dated 15 September 2022, it was established that the injuries sustained by Elshan Sahib oglu Babazade —

one through-and-through gunshot wound of the chest, entering from the left half of the posterior surface of the chest, along the mid-scapular line at the level of the seventh rib, and exiting from the left half of the anterior surface of the chest in the subclavicular region, accompanied by a fracture of the second left rib and injuries to the thoracic-cavity organs — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/1288 dated 24 November 2022, it was established that, among the military clothing items belonging to Elshan Sahib oglu Babazade and submitted for examination, one military tunic with a hood and one short-sleeved undershirt contained damage of the number and size indicated in the research part of the expert opinion. Although no incompletely burned gunpowder particles, as an additional factor of firing, or copper-metal traces were detected around the damage, based on the shape, size and morphological structure of the damage, the injuries on the rear parts of the military tunic with a hood and the short-sleeved undershirt are entry injuries, while the injuries on the front parts of the military tunic with a hood and the short-sleeved undershirt are exit injuries. They are characteristic of having been caused from back to front, from a distance of more than one metre, by the impact of a 5.45 mm diameter bullet as a result of a shot fired from a rifled firearm.

According to forensic medical expert opinion No. 68 dated 17 September 2022, it was established that the injuries sustained by Royal Atdukhan oglu Balashzade — a through-and-through wound of the head, with the entry opening located in the right eyebrow region and the exit opening in the right retroauricular region, accompanied by open fragmentary fractures of the cranial-skeleton bones and diffuse trauma of brain tissue — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/229 dated 10 April 2023, it was established that one mask belonging to Royal Atdukhan oglu Balashzade and submitted for examination contained the damage indicated in the research part of the expert opinion. The said damage is characteristic of having been caused by the impact of a bullet as a result of a shot fired from a firearm, or by fragments as a result of an explosion.

According to forensic medical expert opinion No. 16 dated 13 September 2022, it was established that the injuries sustained by Shamistan Abdulagha oglu Sadikhov — a large two-dimensional shrapnel wound beginning on the inner surface of the upper third of the left thigh and extending to the outer surface of the lower third and the outer quadrant of the left buttock, accompanied by an open multifragmentary fracture of the femur and injury to the deep veins and femoral artery; incomplete amputation of various areas of the second, third, fourth and fifth fingers of the left hand, hanging on a flap of soft tissue; injury to the tendons and metacarpal bones of the left hand; and multiple blind shrapnel wounds of the face, both

upper limbs and abdominal regions — were sustained during life and, by degree, were classified as causing serious harm to health, and at present resulted in death.

According to forensic ballistic expert opinion No. 3/1290 dated 24 November 2022, it was established that one short-sleeved undershirt, one sleeveless T-shirt, one pair of military trousers with a belt and one pair of underpants belonging to Shamistan Abdulagha oglu Sadikhov and submitted for examination contained damage of the number and size indicated in the research part of the expert opinion. Based on the shape, size and morphological structure of the damage, as well as the detection around the damage of explosive substance, namely TNT, and gunpowder particles, the examined damage is characteristic of having been caused by fragments as a result of an explosion, from the centre of the explosion, in different directions. Such damage could have been formed under the circumstances described in the descriptive part of the decision. No damage characteristic of having been caused by fragments as a result of an explosion was found on the one pair of soldier's boots and one pair of socks submitted for examination.

According to forensic medical expert opinion No. **20 dated 14 September 2022**, it was established that the injury sustained by **Rustamov Farid Nofal oglu** consisted of one through-and-through firearm bullet wound of the head, entering through the lateral portion of the left eyebrow and exiting through the right temporal region, accompanied along the wound channel by crushing and destruction of the brain tissue and comminuted fractures of the bones of the cranial vault…

Page 479

…The injury was life-threatening and, by degree, was classified as grievous harm to health. It subsequently resulted in death.

According to forensic ballistic expert opinion No. **3/1292 dated 24 November 2022**, damage of the type, dimensions and quantity specified in the examination section of the expert opinion was found on the following clothing belonging to **Rustamov Farid Nofal oglu**:

- one hooded tunic;
- one short-sleeved undershirt;
- one pair of military-type trousers;
- one pair of underpants;
- one pair of socks.

Based on the form, dimensions and morphological structure of the damage, as well as on the discovery around it of explosive substance in the form of TNT and particles of gunpowder, the damage is characteristic of having been caused by fragments during an explosion, at the centre of the explosion and travelling in various directions.

According to forensic medical expert opinion No. **22 dated 14 September 2022**, it was established that the injury sustained by **Rahimov Tabriz Rahim oglu** consisted of one

through-and-through firearm bullet wound of the abdominal cavity, entering the left lumbar region at the level of the third lumbar vertebra and exiting through the anterior abdominal wall along the linea alba near the inguinal region, accompanied by injuries to the abdominal organs.

The injury was life-threatening and, by degree, was classified as grievous harm to health. It subsequently resulted in death.

According to forensic ballistic expert opinion No. **3/1293 dated 24 November 2022**, damage of the type, dimensions and quantity specified in the examination section of the expert opinion was found on the following clothing belonging to **Rahimov Tabriz Rahim oglu**:

- one sleeveless undershirt;
- one pair of military trousers;
- one pair of underpants.

Notwithstanding the absence around the damage of incompletely burned gunpowder particles constituting an additional factor of firing and of copper-metal traces, based on the form, dimensions and morphological structure of the damage:

- the damage on the rear part of the sleeveless undershirt constitutes entrance damage;
- the damage on the front parts of the military trousers and underpants constitutes exit damage.

The damage is characteristic of having been caused by a bullet with a diameter of **5.45 millimetres**, fired from a rifled firearm from a distance exceeding one metre and travelling from back to front.

According to forensic medical expert opinion No. **20 dated 17 September 2022**, it was established that the injuries sustained by **Qurbanov Yusif Asif oglu** were:

- traumatic separation of the right lower limb at the level of the upper one-third of the thigh;
- extensive soft-tissue defects of the right upper arm, left thigh and left lower leg;
- multiple shrapnel wounds of the right forearm, the anterior surface of the torso at the boundary between the thorax and abdomen, the scrotum and the external genital organ;
- traumatic-hemorrhagic shock of the fourth degree, resulting in acute multiple-organ failure involving the cardiovascular system, lungs, kidneys and liver.

The injuries were life-threatening and, by degree, were classified as grievous harm to health. They subsequently resulted in death.

According to forensic medical expert opinion No. **56 dated 26 April 2024**, the injuries sustained by **Allahverdiyev Rahim Qashqay oglu**—lacerated and crushed wounds of the third finger of the right hand accompanied by an intra-articular open fracture of the head of

the middle phalanx, followed by secondary surgical treatment of the wounds and immobilisation of the hand—are, by degree, classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **1011 dated 26 April 2024**, the injuries sustained by **Mammadli Nahid Alik oglu**—blast injury, hardened skin scars remaining after primary surgical treatment of multiple blind shrapnel wounds of both lower limbs, and a metal fragment constituting a foreign body in the soft tissues—were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, are classified as bodily injuries causing minor harm to health.

According to the opinion of the forensic medical expert No. 1016 dated 26.04.2024, it was determined that the injuries suffered by Nurmammadov Adem Elchin oglu - blast trauma, hardened skin scars after primary surgical treatment of wounds caused by blind shrapnel wounds to the soft tissues of the left arm, right knee, and upper 1/3 of the calf -

were caused by the impact of primary or secondary shrapnel resulting from the explosion of any explosive substance, and in terms of degree, they generally refer to minor harm to health.

According to forensic medical expert opinion No. **870 dated 26 April 2024**, it was established that the injuries sustained by **Abbasov Nurlan Ruslan oglu** were:

- a firearm injury;
- a hardened skin scar remaining after a right-sided orchiectomy performed because of a through-and-through bullet wound of the right testicle;
- a second-degree left-sided varicocele;
- a small cyst of the left epididymis.

The injuries were caused by a shot fired from a firearm and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **53 dated 26 April 2024**, it was established that the injuries sustained by **Aliyev Novruz Murvat oglu** were:

- blast trauma;
- a lacerated and abraded wound of the left eyebrow region;
- a condition following surgery performed because of a subconjunctival hemorrhage of the left eye.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **129 dated 1 March 2024**, it was established that the injuries sustained by **Budagov Salman Marifat oglu**—an open shrapnel fracture of the right humerus accompanied by defects of the soft tissues and bone, as well as injury to the right radial nerve—are classified as grievous harm to health.

According to forensic medical expert opinion No. **50 dated 26 April 2024**, it was established that the injury sustained by **Aliyev Emil Ehtiram oglu** was a hardened skin scar remaining after a tangential firearm bullet wound of the frontal region.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **51 dated 26 April 2024**, it was established that the injuries sustained by **Hasanov Eltakin Alik oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- a condition following concussion of the brain;
- a condition following blind shrapnel wounds of the right half of the forehead and the left supraorbital region.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **851 dated 26 April 2024**, it was established that the injuries sustained by **Alyarov Mahir Fazil oglu** were:

- barotrauma;
- a condition following left-sided acute cochlear neuritis;
- a secondary post-traumatic perforation scar of the left tympanic membrane;
- left-sided mixed-type hearing loss;
- perception of whispered speech at a distance of one metre in the left ear and six metres in the right ear.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **1009 dated 26 April 2024**, it was established that the injuries sustained by **Sofiyev Kenan Vidadi oglu** were:

- a previous closed craniocerebral trauma;
- residual asthenoneurotic manifestations following concussion of the brain;

- vegetative-vascular instability following closed craniocerebral trauma and concussion, accompanied by persistent symptoms;
- bilateral chronic cochlear neuritis;
- bilateral sensorineural hearing loss;
- perception of whispered speech at a distance of 4.5 metres in both ears.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

Page 481

According to forensic medical expert opinion No. **70 dated 26 April 2024**, it was established that the injuries sustained by **Javadli Kamran Khaladdin oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- a condition following concussion of the brain.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **72 dated 26 April 2024**, it was established that the injuries sustained by **Hajizada Amrah Taleh oglu** were:

- blast trauma;
- a hardened skin scar remaining after primary surgical treatment of a blind shrapnel wound of the soft tissues of the medial surface of the left knee region;
- a foreign body, namely a metal fragment, that had not been removed.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **26 dated 11 January 2024**, it was established that the injuries sustained by **Aliyev Ilknur Shahin oglu** were:

- closed craniocerebral trauma in the form of concussion of the brain;
- post-traumatic neuropathy of the left median and radial nerves and of the left sural and saphenous nerves;
- multiple blind shrapnel wounds of the occipital region;
- the left shoulder girdle;
- the left half of the projection of the body of the mandible;
- the lateral surface of the upper one-third of the left upper arm;
- the posterior surface of the middle one-third of the left forearm;

- the dorsal surface of the left hand;
- the lower lateral quadrant of the left gluteal region;
- the posterior surfaces of the middle and lower one-thirds of the left thigh;
- the anteromedial surface of the lower one-third of the right thigh;
- the lateral surfaces of the upper and lower one-thirds of the left lower leg;
- the posterior surface of the lower one-third of the left lower leg;
- the dorsal surface of the left foot in the projection of the fourth metatarsal bone;
- the posterior and lateral surfaces of the middle one-third of the right lower leg;
- the plantar surface of the right foot.

Taken together, by degree, the injuries are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **117 dated 26 April 2024**, it was established that the injury sustained by **Zohrabov Namiq Asgar oglu** was a tangential shrapnel wound of the soft tissues of the right inguinal region.

The injury was caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **64 dated 26 April 2024**, it was established that the injuries sustained by **Abbasov Sehram Maharram oglu** were:

- blast trauma;
- a hardened skin scar remaining after the primary and secondary surgical treatment of a blind shrapnel wound of the right scapular region.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **1693 dated 5 December 2022**, it was established that the injuries sustained by **Manafov Ravan Aziz oglu**—shrapnel wounds of the soft tissues of the right thigh, left forearm and right lower-leg regions—are, taken together, classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **814 dated 26 April 2024**, it was established that the injury sustained by **Osmanov Shohrat Nasib oglu** was traumatic neuropathy of the head and neck regions.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **57 dated 26 April 2024**, it was established that the injuries sustained by **Abdullayev Ramin Etibar oglu** were:

- a through-and-through bullet wound of the soft tissues of the lower one-third of the right lower leg;
- a condition following primary surgical treatment of an abraded wound of the anterior surface of the right forearm and of the first finger of the right hand.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties…

Page 482

…and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **980 dated 26 April 2024**, it was established that the injuries sustained by **Ibrahimov Nerman Sabir oglu** were:

- blast trauma;
- hardened skin scars remaining after surgical treatment of a blind shrapnel wound of the left thigh region and removal of a foreign body.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **115 dated 26 April 2024**, it was established that the injury sustained by **Mamizade Tabriz Isa oglu** was a tangential shrapnel wound of the posterior nasal region.

The injury was caused by a shot fired from a firearm, as well as by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties. By degree, it is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **114 dated 26 April 2024**, it was established that the injuries sustained by **Mammadov Razil Raqil oglu** were:

- restricted mobility of the left ankle joint;
- an abraded wound of the lateral surface of the upper one-third of the right lower leg;
- post-traumatic headache.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **423 dated 29 February 2022**, it was established that the injuries sustained by **Nabiyev Nadir Iqor oglu** were:

- blast trauma;
- traumatic separation of the first toe of the left foot at the level of the metatarsophalangeal joint;
- closed, comminuted, intra-articular and slightly displaced fractures of the distal metaphyses of the bones of the left lower leg;
- open, comminuted and displaced fractures of the bases of the second and third metatarsal bones of the left foot;
- an open, comminuted and displaced fracture of the head of the fourth metacarpal bone of the left hand;
- closed and slightly displaced fractures of a metacarpal bone of the right hand;
- multiple shrapnel wounds accompanied by lacerations of the medial surface of the right foot, the posterior and medial surfaces of the left hand and forearm, the plantar surfaces of the second and third toes of the left foot, the left thigh, the medial surfaces of the lower one-third of the right upper arm, the lateral half of the gluteal region and the left eyebrow region.

Since the injuries caused permanent loss of not less than one-third of working capacity, they are classified as grievous harm to health.

According to forensic medical expert opinion No. **1176 dated 26 April 2024**, it was established that the injury sustained by **Abbasov Nicat Abulfat oglu**—a blind shrapnel wound of the chin region—was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **896 dated 26 April 2024**, it was established that the injuries sustained by **Aliyev Ujal Habil oglu** were:

- mine-blast trauma;
- a wound of the left heel region accompanied by a soft-tissue defect;
- open, comminuted, defect-producing fractures of the calcaneus, cuboid and navicular bones;
- a condition following primary surgical treatment of the wounds;
- a condition following secondary surgical treatment of the wounds;
- fixation of the calcaneus with Kirschner wires;
- a condition following surgery involving the placement of a VAC device;
- satisfactorily consolidated fractures;
- post-traumatic deformity of the calcaneus;
- osteoarthrosis of the ankle and subtalar joints;
- post-traumatic claw-like deformity of the left foot, rendering the use of standard-issue military footwear impossible;

- residual manifestations of post-traumatic neuropathy of the left peroneal and tibial nerves;
- moderate impairment of limb function.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

Page 483

According to forensic medical expert opinion No. **66/MES dated 26 April 2024**, it was established that the injuries sustained by **Jamalov Shukur Aghaverdi oglu** were:

- blast trauma;
- a hardened skin scar remaining after primary surgical treatment of a blind shrapnel wound of the soft tissues of the anterior surface of the left forearm.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **126 dated 26 April 2024**, it was established that the injuries sustained by **Shafiyev Muslum Ramil oglu** were:

- post-traumatic headache;
- tension-type headache;
- an acute respiratory disease of mild severity.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **55 dated 26 April 2024**, it was established that the injuries sustained by **Huseynov Panah Surkhay oglu** were:

- blast trauma;
- a condition following barotrauma of the left ear;
- perception of whispered speech at a distance of three metres in the left ear and six metres in the right ear.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **54 dated 26 April 2024**, it was established that the injuries sustained by **Abdullayev Orkhan Ulvi oglu** were:

- blast trauma;
- hardened skin scars remaining after blind shrapnel wounds of both hands, the right forearm and right elbow joint, the left upper arm, the left inguinal region and the left thigh.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **1177 dated 26 April 2024**, it was established that the injuries sustained by **Huseynov Bahman Bakhtiyar oglu** were:

- blunt trauma to the knee and head;
- closed craniocerebral trauma.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **59 dated 26 April 2024**, it was established that the injuries sustained by **Mammadzada Murad Rahim oglu** were:

- blast trauma;
- a hardened skin scar remaining after primary surgical treatment of a lacerated wound of the left cheek region and a blind shrapnel wound of the left half of the neck.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **58 dated 26 April 2024**, it was established that the injuries sustained by **Mirzayev Rustam Vagif oglu** were:

- blast trauma;
- a hardened skin scar remaining after primary surgical treatment of a blind shrapnel wound of the left hand.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **52 dated 26 April 2024**, it was established that the injury sustained by **Sheydayev Elshad Saleh oglu** was a tangential firearm bullet wound of the right elbow region.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties…

…and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **48 dated 26 April 2024**, it was established that the injuries sustained by **Khasiyev Alasgar Hasan oglu** were:

- blast trauma;
- a non-consolidated skin scar remaining after primary surgical treatment and removal of a foreign body in connection with a blind shrapnel wound of the soft tissues of the left scapular region.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **833 dated 26 April 2024**, it was established that the injuries sustained by **Tahirli Halay Malik oglu** were:

- blast trauma;
- a tangential shrapnel wound of the lower one-third of the right thigh.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **890 dated 26 April 2024**, it was established that the injuries sustained by **Javadov Natiq Shahin oglu** were:

- **F06.3, F07.2**—consequences of a closed craniocerebral trauma and concussion sustained as a result of blast trauma, manifested by a moderately expressed organic affective, depressive disorder, post-concussion syndrome and behavioural disorders;
- **F43.1**—a moderately expressed prolonged post-traumatic stress disorder;
- consequences of closed craniocerebral trauma and concussion in the form of post-traumatic encephalopathy, manifested by persistent autonomic vascular instability, chronic cephalgia, insomnia syndrome and cognitive deficit;
- moderate impairment of the functions of the central nervous system;
- barotrauma;
- right-sided chronic cochlear neuritis;
- persistent right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of four metres in the right ear and six metres in the left ear;
- hardened skin scars remaining after a tangential bullet wound of the parietal region, a through-and-through bullet wound of the first finger of the left hand, a tangential bullet wound of the lower one-third of the left forearm and a through-and-through bullet wound of the soft tissues of the scapular region.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **99 dated 26 April 2024**, it was established that the injuries sustained by **Shukurlu Ugur Vasif oglu** were:

- military combat blast trauma;
- barotrauma;
- left-sided post-traumatic perforative otitis media;
- a post-traumatic scar of the cornea of the left eye;
- visual acuity of 1.0;
- a foreign body in the distal portion of the left thigh.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **1181 dated 26 April 2024**, it was established that the injuries sustained by **Mammadli Elvin Hafiz oglu** were:

- blast trauma;
- barotrauma;
- closed craniocerebral trauma;
- concussion of the brain.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **235 dated 14 March 2024**, it was established that the injuries sustained by **Mehdiyev Sanan Sadraddin oglu** were:

- blast trauma;
- left-sided acute cochlear neuritis;
- a blind shrapnel wound of the left side of the neck;
- shrapnel wounds of the right and left parapharyngeal regions;
- an injury to the left radiocarpal region…

According to forensic medical expert opinion No. **235 dated 14 March 2024**, it was established that the injuries sustained by **Mehdiyev Sanan Sadraddin oglu** were:

- blast trauma;
- left-sided acute cochlear neuritis;
- a blind shrapnel wound of the left side of the neck;
- shrapnel wounds of the right and left parapharyngeal regions;

- a small blind shrapnel wound of the left radiocarpal region;
- a foreign body;
- simple myopic astigmatism of the left eye.

By degree, the injuries are classified as bodily injuries causing less serious harm to health.

Page 485

According to forensic medical expert opinion No. **90 dated 26 April 2024**, it was established that the injury sustained by **Yusifov Mehdi Fuzuli oglu** was a firearm wound traversing the soft tissues of the right upper arm.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **104 dated 26 April 2024**, it was established that the injuries sustained by **Huseynov Jeyhun Faramaz oglu** were:

- closed craniocerebral trauma;
- concussion of the brain;
- right-sided tubo-otitis associated with barotrauma.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **100 dated 26 April 2024**, it was established that the injuries sustained by **Rajabov Sakhavat Togrul oglu** were:

- injuries connected with a firearm wound;
- a fracture of the upper one-third of the right humerus;
- a fracture of the right third rib;
- a fracture of the right scapula;
- rupture of the acromioclavicular ligament;
- laceration of the upper lobe of the right lung;
- right-sided hemopneumothorax;
- contusion of the right lung;
- foreign bodies in the soft tissues of the right scapular region.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **101 dated 26 April 2024**, it was established that the injuries sustained by **Zeynalov Tural Nail oglu** were:

- a through-and-through bullet wound of the upper one-third of the left lower leg;
- an open, comminuted and displaced fracture of the proximal metaphysis of the left tibia;
- an extensive subcutaneous hematoma;
- traumatic shock;
- post-hemorrhagic anemia;
- a mild neurotic reaction;
- deviation of the nasal septum accompanied by slight impairment of breathing.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **78 dated 26 April 2024**, it was established that the injuries sustained by **Shukurov Mahmud Sabir oglu** were:

- a firearm injury;
- right-sided second-degree sensorineural hearing loss;
- left-sided third-degree sensorineural hearing loss.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **102 dated 26 January 2023**, it was established that the injuries sustained by **Rzazada Kenan Feyyaz oglu** were:

- right-sided chronic cochlear neuritis;
- right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of five metres in the right ear and six metres in the left ear.

By degree, the injuries are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **905 dated 26 April 2024**, it was established that the injuries sustained by **Bayramov Azad Ziyaddin oglu** were:

- **F43.1** — a moderately expressed prolonged post-traumatic stress disorder;
- a hardened skin scar remaining after a tangential bullet wound of the parietal region.

The injury was caused by a shot fired from a firearm and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **494 dated 6 March 2024**, it was established that the injuries sustained by **Quliyev Sakhavat Rahil oglu** were:

- blast trauma;

- blind shrapnel wounds of the third finger of the right hand and of the soft tissues of both lower limbs…

Page 486

…closed craniocerebral trauma and a condition following concussion of the brain.

By degree, the injuries are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **63 dated 26 April 2024**, it was established that the injuries sustained by **Yusifov Yusif Subhi oglu** were:

- blast trauma;
- a condition following primary surgical treatment of blind shrapnel wounds of the left lateral wall of the thorax and the soft tissues of both lower limbs.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **875 dated 26 April 2024**, it was established that the injuries sustained by **Hajiyev Ruzi Deyanat oglu** were:

- blast trauma;
- hardened skin scars remaining after blind shrapnel wounds of the right scapular and lumbar regions;
- a foreign body, namely a metal fragment, in the soft tissues of the thorax.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **73 dated 26 April 2024**, it was established that the injuries sustained by **Shikhaliyev Ali Fagan oglu** were:

- blast trauma;
- blind shrapnel wounds of the right upper arm, both thigh and lower-leg regions, and the right forearm.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **841 dated 26 April 2024**, it was established that the injuries sustained by **Quliyev Sayyad Kamal oglu** were:

- blast trauma;

- primary surgical treatment of wounds caused by a blind shrapnel wound of the left thigh;
- secondary surgical treatment of the wounds;
- hardened skin scars remaining after partial removal of foreign bodies;
- a foreign body in the soft tissues;
- functional impairment.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **997 dated 26 April 2024**, it was established that the injury sustained by **Khankishiyev Arzuman Fakhraddin oglu** was a grade 3-a tear of the posterior horn of the medial meniscus of the left knee joint.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **119 dated 26 April 2024**, it was established that **Eyvazov Elvin Dashdamir oglu** had post-traumatic headache.

The injury was caused by a blunt mechanical impact and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **122 dated 26 April 2024**, it was established that **Qayibov Mammad Valeh oglu** had been diagnosed with post-traumatic back pain.

The injury was caused by a blunt mechanical impact. The time of its occurrence corresponds to 13 September 2022, and it could have arisen during a road traffic accident. By degree, it is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **968 dated 26 April 2024**, it was established that the injuries sustained by **Aliyev Nabi Akif oglu** were:

- blast trauma;
- an open, comminuted and displaced fracture of the left humerus;
- a wound accompanied by a soft-tissue defect;
- multiple blind shrapnel wounds of various regions of the body;
- primary surgical treatment of the wounds;
- removal of the **G. A. Ilizarov apparatus** from the left humerus…

…closed repositioning of the fracture fragments; acute shortening performed because of an open defect-producing fracture of the upper arm; fixation with a monolateral external fixator; and a consolidating fracture following surgery.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **701 dated 26 April 2024**, it was established that the injuries sustained by **Latifzada Zamiq Rzaqulu oglu** were:

- blast trauma;
- a blind shrapnel wound of the upper one-third of the left lower leg accompanied by an extensive soft-tissue defect;
- a condition following primary surgical treatment of the wound and osteosynthesis using the **G. A. Ilizarov method**in connection with open, comminuted, defect-producing, intra-articular and displaced fractures of the metaphyses of the left lower-leg bones;
- secondary surgical treatment of the wounds;
- necrectomy;
- removal of a foreign body;
- placement of gentamicin-containing cement;
- installation of a VAC device;
- open reduction of the fracture fragments;
- reassembly of the G. A. Ilizarov apparatus;
- adequately united fractures following osteoplastic surgery using an allograft;
- a large defect of the proximal metaphysis of the tibia accompanied by osteogenesis;
- osteoarthrosis of the left knee joint;
- arthromyogenic contracture.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **60 dated 26 April 2024**, it was established that the injury sustained by **Mammadov Muraz Shahniyar oglu** was a condition following primary surgical treatment of a through-and-through firearm bullet wound of the soft tissues of the lower one-third of the right thigh.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **62 dated 26 April 2024**, it was established that the injury sustained by **Qaribov Yavar Firuz oglu** was a condition following surgical treatment of a blind shrapnel wound of the left scapular region.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **67/MES dated 26 April 2024**, it was established that the injuries sustained by **Aljanov Vahid Faiq oglu** were:

- blast trauma;
- a condition following surgery to remove a fragment from a blind shrapnel wound of the left knee region.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **828 dated 26 April 2024**, it was established that the injuries sustained by **Shikhaliyev Elmir Rovshan oglu** were:

- blast trauma;
- extensive wounds with soft-tissue defects involving the left foot, lower leg and thigh;
- multiple blind shrapnel wounds of the perineal and gluteal regions and of the anterior and posterior surfaces of the right foot;
- a condition following primary surgical treatment of wounds caused by open, comminuted and defect-producing fractures of the navicular bone and the first, second, third, fourth and fifth metatarsal bones of the left foot;
- debridement of the wounds;
- removal of necrotic fragments of the first metatarsal bone;
- secondary surgical treatment of the wounds;
- a defect of the first metatarsal bone following autodermoplasty;
- united fractures of the second through fourth metatarsal bones;
- scar-and-tendon contractures of the first through fifth toes;
- post-traumatic deformity of the left foot making it impossible to use standard-issue military footwear;
- easily traumatised keloid scars of the left thigh, lower leg and foot, preventing the wearing of standard military uniform and footwear;
- contracture of the left ankle joint;
- multiple foreign bodies of various sizes, namely metal fragments, in the soft tissues;
- residual effects of post-traumatic neuropathy of the left peroneal, tibial and sural nerves, accompanied by deep distal paresis of the limb and sensory…

…disturbances;

- moderate impairment of limb function;
- a previous closed craniocerebral trauma;
- asthenoneurotic manifestations following concussion of the brain.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **836 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Abdullazada Nurlan Elkhan oglu** were:

- a moderately expressed organic affective disorder accompanied by depressive symptoms;
- a moderately expressed prolonged post-traumatic stress disorder with a history of suicide attempts;
- functional seizures;
- closed craniocerebral trauma;
- residual effects of concussion in the form of post-traumatic encephalopathy manifested by persistent autonomic vascular instability and cephalgic and insomnia syndromes;
- right-sided chronic cochlear neuritis;
- right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of four metres in the right ear and six metres in the left ear;
- blast trauma;
- a hardened skin scar remaining after primary surgical treatment and removal of a foreign body in connection with a blind foreign-body wound of the soft tissues of the right parietal region.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **859 dated 26 April 2024**, it was established that the injuries sustained by **Anarajabov Ramazan Elshad oglu** were:

- blast trauma;
- a skin scar remaining after a shrapnel wound of the lower one-third of the left thigh;
- a foreign body, namely a metal fragment, in the soft tissues.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **2317 dated 15 December 2023**, it was established that the injuries sustained by **Musayev Ravan Shafahat oglu** were:

- a through-and-through bullet wound of the second finger of the right hand;
- a through-and-through bullet wound of the soft tissues of the third finger.

By degree, the injuries are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **449 dated 25 December 2023**, it was established that the injuries sustained by **Ananyev Nazim Roman oglu** consisted of scar tissue remaining after non-penetrating shrapnel wounds of the right half of the lumbar region and the posterior surface of the thorax.

By degree, the injuries are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **123 dated 26 April 2024**, it was established that **Feyzullayev Kenan Mahmud oglu** had post-traumatic headache.

The injury was caused by the blast wave generated by the explosion of a projectile fired from a firearm and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **974 dated 26 April 2024**, it was established that the injury sustained by **Jafarov Teymur Mahammadrasul oglu** was a skin scar remaining after a shrapnel wound of the left shoulder region.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **397 dated 16 February 2024**, it was established that the injuries sustained by **Hasanov Jeyhun Ramiz oglu** were:

- injury to the transverse colon caused by a wound entering through the left lateral wall of the abdomen and penetrating the abdominal cavity;
- multiple blind shrapnel wounds of the soft tissues of the left forearm, left thigh and left gluteal region.

By degree, the injuries are classified as grievous harm to health.

Page 489

According to forensic medical expert opinion No. **805 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Ibrahimli Umid Mikayil oglu** were:

- a moderately expressed post-traumatic stress disorder that had reached the stage of compensation;
- blast trauma;

- hardened skin scars remaining after blind shrapnel wounds of the soft tissues of the left upper limb, left knee joint and right hand;
- foreign bodies in the soft tissues;
- a foreign body in the soft tissues of the left ascending ramus of the mandible;
- a foreign body in the soft tissues of the external nose.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **913 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Karimov Allahverdi Ilyas oglu** were:

- a moderately expressed prolonged post-traumatic stress disorder accompanied by depressive manifestations and suicidal thoughts;
- post-traumatic neuropathy of the right tibial nerve and the superficial branch of the peroneal nerve, accompanied by sensory and motor disturbances;
- moderate impairment of limb function;
- closed displaced fractures of the distal metaphyses of the right lower-leg bones;
- adequately united fractures following reduction of an external dislocation of the foot and plaster immobilisation;
- myogenic contracture of the ankle joint;
- hardened skin scars remaining after incised wounds of both forearms.

The injuries were caused by a shot fired from a firearm, as well as by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **29 dated 26 April 2024**, it was established that the injuries sustained by **Mammadov Alham Qalandar oglu**, as diagnosed on 26 October 2022 by the Military Medical Commission of the Central Military Polyclinic of the Ministry of Defence, were:

- blast trauma;
- blind shrapnel wounds of the left upper limb, left thigh region and external nose;
- asthenoneurotic manifestations of somatogenic origin;
- deviation of the nasal septum causing moderate impairment of nasal breathing.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **808 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Musayev Nurlan Hafiz oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- persistent autonomic vascular instability and other focal neurological signs resulting from concussion of the brain;
- slight impairment of the functions of the central nervous system;
- asthenoneurotic manifestations following closed craniocerebral trauma and concussion;
- barotrauma;
- right-sided chronic cochlear neuritis;
- right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of four metres in the right ear and six metres in the left ear;
- foreign bodies, namely metal fragments, in the right eyebrow and right upper eyelid;
- visual acuity of the right eye of 1.0;
- a hardened skin scar remaining after a blind shrapnel wound of the lateral surface of the upper one-third of the right upper arm.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **42 dated 26 April 2024**, it was established that the injuries sustained by **Qarayeva Suleyman Faiq oglu** were:

- closed craniocerebral trauma and concussion of the brain associated with blast trauma;
- left-sided acute cochlear neuritis associated with barotrauma.

The injuries were caused by the blast wave resulting from a shot fired from a firearm and, taken together, by degree, are classified as bodily injuries causing less serious harm to health.

Page 490

According to forensic medical expert opinion No. **104 dated 29 March 2024**, it was established that the injuries sustained by **Safarov Etibar Sahib oglu** were:

- blast trauma;
- a blind shrapnel wound entering the cranial cavity through the left frontal region;
- contusions of both frontal lobes and the left temporal lobe of the brain;
- an intraparenchymal hematoma.

By degree, the injuries are classified as grievous harm to health.

According to forensic medical expert opinion No. **869 dated 26 April 2024**, it was established that the injuries sustained by **Abbasli Vusal Fazil oglu** were:

- blast trauma;
- blind shrapnel wounds of the head, face, right shoulder and left upper arm.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **829 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Shikhliyev Ruslan Zahir oglu** were:

- blast trauma;
- left-sided chronic cochlear neuritis;
- persistent left-sided sensorineural hearing loss;
- perception of whispered speech at a distance of five metres in the left ear and six metres in the right ear;
- a hardened skin scar remaining after a blind shrapnel wound of the right elbow region;
- a foreign body in the soft tissues.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **120 dated 26 April 2024**, it was established that the injury sustained by **Soltanov Tural Rahil oglu** was a blind shrapnel wound of the left earlobe.

The injury was caused by a fragment generated by the explosion of a projectile fired from a firearm and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **47 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Taghiyev Elvin Ibad oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- a condition following concussion of the brain;
- a condition following primary and secondary surgical treatment of blind shrapnel wounds of the right upper limb, right gluteal region and left thigh;
- a condition following surgery to remove a foreign body.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **125 dated 26 April 2024**, it was established that the injuries sustained by **Abdullayev Yuksel Bashrat oglu** were:

- blast injury;
- contusion of the soft tissues of the right half of the lumbar region.

The injuries were caused by the blast wave generated by the explosion of a firearm projectile and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **894 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Aghja Hamid Isa oglu** were:

- an open displaced fracture of the distal metaphysis of the bones of the left lower leg;
- outward dislocation of the foot;
- a condition following primary surgical treatment of incised wounds of the medial and lateral surfaces of the ankle joint;
- reduction of the dislocation;
- immobilisation with a plaster splint;
- closed repositioning of the fracture fragments;
- satisfactorily united fractures following surgery involving osteosynthesis with Kirschner wires;
- cicatricial and myogenic contracture of the ankle joint accompanied by moderate functional impairment;
- post-traumatic neuropathy of the left peroneal and tibial nerves, accompanied by sensory and motor disturbances and moderate functional impairment.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

Page 491

According to forensic medical expert opinion No. **866 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Abbasli Murad Adalat oglu** were:

- blast trauma;
- a blind shrapnel wound of the left half of the thorax penetrating the thoracic cavity and accompanied by left-sided hemopneumothorax, injury to the left lung, displaced comminuted fractures of the left second and third ribs and the left scapula, and an open fracture of the transverse process of the second thoracic vertebra;
- skin scars remaining after primary surgical treatment of the wounds, left-sided thoracentesis, drainage of the left pleural cavity by the Bülau method and surgery to remove foreign bodies from the neck and left scapular regions;
- foreign bodies, namely metal fragments, in the left scapula;
- simple myopic astigmatism of both eyes, Em and M 0.75 D, with visual acuity of 1.0.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **1006 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Abdulhasimli Ibrahim Habil oglu** were:

- barotrauma;
- a condition following right-sided acute cochlear neuritis;
- right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of three metres in the right ear and six metres in the left ear.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **27 dated 13 February 2024**, it was established that the injuries and conditions sustained by **Aslanov Ali Zargam oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- a condition following concussion of the brain;
- blind shrapnel wounds of both lower limbs;
- shrapnel wounds of the soft tissues of the right thigh, left thigh, right lower leg and left lower leg;
- an organic personality disorder;
- dissociative episodes;
- functional seizures.

By degree, the injuries are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **824 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Bashirov Rashan Zafar oglu** were:

- blast trauma;
- a blind shrapnel wound of the occipital region penetrating the cranial cavity;
- a condition following decompressive trepanation of the left occipital-parietal-temporal region, evacuation of an intraparenchymal hematoma and removal of bone fragments, performed because of contusion of the left occipital lobe of the brain, an intraparenchymal hematoma and foreign bodies consisting of bone and metal fragments;
- a foreign body, namely a metal fragment, remaining in the cranial cavity following surgery;

- a bone defect of the cranial vault measuring **153 square centimetres**, which had not been replaced with plastic material;
- a blind shrapnel wound of the left half of the thorax penetrating the thoracic cavity and accompanied by left-sided hemopneumothorax and a fracture of the left third rib;
- a hardened skin scar remaining after thoracentesis, drainage of the left pleural cavity by the Bülau method and primary surgical treatment of the wound;
- moderate restrictive ventilatory impairment of external respiratory function;
- a foreign body, namely a metal fragment, in the tissues of the left half of the thorax;
- a blind shrapnel wound of the left hand;
- ankylosis following primary surgical treatment of an open fracture of the proximal interphalangeal joint of the third finger;
- intraosseous foreign bodies, namely metal fragments;
- residual effects of a previous open craniocerebral trauma and contusion of the left occipital lobe, resulting in post-traumatic encephalopathy manifested by cephalgic syndrome, insomnia and persistent autonomic vascular instability;
- residual post-traumatic neuropathy of the left long thoracic nerve, accompanied by slight functional impairment.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **58 dated 26 February 2024**, it was established that the injuries sustained by **Ismayilov Rabil Nayyub oglu** were…

Page 492

…a closed craniocerebral trauma accompanied by concussion of the brain and right-sided acute cochlear neuritis resulting from barotrauma.

Taken together, by degree, the injuries are classified as bodily injuries causing minor harm to health in the form of a short-term impairment of health.

According to forensic medical expert opinion No. **910 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Muradli Mahammad Fikrat oglu** were:

- blast trauma;
- blind shrapnel wounds of the lateral surface of the lower one-third of the left forearm and of the right hand;
- an open, comminuted, displaced and defect-producing fracture of the lower one-third of the shaft of the left radius;
- a defectively healing fracture following primary surgical treatment, immobilisation with plaster, installation of an external fixator and subsequent remounting of the external fixator;

- foreign bodies, namely metal fragments, in the soft tissues;
- a retained metal construction;
- supination contracture of the elbow joint;
- arthrogenic contracture of the left radiocarpal joint;
- a moderately expressed organic affective disorder;
- depressive episodes;
- dissociative episodes;
- foreign bodies, namely metal fragments, remaining after a blind shrapnel wound of the left half of the face;
- a previous closed craniocerebral trauma;
- autonomic vascular instability and asthenoneurotic manifestations following concussion of the brain;
- barotrauma;
- a dry perforation of the left tympanic membrane;
- left-sided conductive hearing loss;
- perception of whispered speech at a distance of six metres in the right ear and 4.5 metres in the left ear.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **72 dated 2 March 2024**, it was established that the injuries and conditions sustained by **Nasirov Talat Habib oglu** were:

- a closed craniocerebral trauma accompanied by concussion of the brain;
- bilateral cochlear neuritis resulting in a reduction in the perception of whispered speech to a distance of five metres;
- post-traumatic neuropathy of the right tibial and left peroneal nerves resulting from blind shrapnel wounds of the right gluteal region, both thighs and both lower-leg regions;
- a blind shrapnel wound of the soft tissues of the right scapular region.

Taken together, by degree, the injuries are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **1170 dated 26 April 2024**, it was established that the injuries sustained by **Safarli Sanan Elshad oglu** were:

- blast trauma;
- a closed craniocerebral trauma;
- concussion of the brain.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **838 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Nuraliyev Ruslan Yalchin oglu** were:

- an old, satisfactorily united fracture of the middle phalanx of the fifth finger of the left hand;
- ankylosis of the interphalangeal joint;
- simple myopic astigmatism of both eyes, Em and M 1 D, resulting in a reduction of visual acuity to 0.8, corrected to 1.0;
- second-degree alimentary-constitutional obesity, with a body mass index of 31.5.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **895 dated 26 April 2024**, it was established that the injury sustained by **Abbasov Ruslan Shahban oglu** was a hardened skin scar remaining after a shrapnel wound of the medial surfaces at the junction of the middle and upper thirds of both thighs.

The injury was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **110 dated 26 April 2024**, it was established that the injuries sustained by **Hasanov Hakim Nusraddin oglu** were

blast trauma; a previous closed craniocerebral trauma; autonomic vascular instability following concussion of the brain; barotrauma; bilateral chronic cochlear neuritis; and persistent bilateral severe sensorineural hearing loss.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **1172 dated 26 April 2024**, it was established that the injuries sustained by **Orucov Shahin Azizkhan oglu** were:

- a closed craniocerebral trauma;
- concussion of the brain.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **877 dated 26 April 2024**, it was established that the injuries sustained by **Baghirov Neymat Seymur oglu** were:

- a through-and-through bullet wound of the right foot;
- an open, non-displaced fracture of the right cuboid bone;
- a hardened skin scar and a satisfactorily united fracture following primary surgical treatment and immobilisation with a plaster splint;
- no impairment of function.

The injuries were caused by a shot fired from a firearm and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **912 dated 26 April 2024**, it was established that the injuries sustained by **Ahmadzada Ahmad Tellman oglu** were:

- a firearm injury;
- post-traumatic neuropathy of the right axillary nerve, resulting in slight impairment of the function of the limb;
- a through-and-through bullet wound of the right shoulder girdle;
- healed perforating, non-displaced intra-articular fractures involving the anatomical neck and head of the right humerus and the glenoid process of the scapula, following immobilisation with a plaster splint;
- osteoarthrosis of the shoulder joint.

The injuries were caused by a shot fired from a firearm and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **39 dated 26 April 2024**, it was established that the injury sustained by **Aliyev Amrah Sabir oglu** was a through-and-through firearm bullet wound of the soft tissues of the left hip region.

The injury was caused by the impact of a bullet fired from a firearm and is consistent with having arisen on **13 September 2022** and under the circumstances stated in the medical document. By degree, it is classified as bodily injury causing less serious harm to health.

According to forensic medical expert opinion No. **69 dated 26 April 2024**, it was established that the injuries sustained by **Asgarli Kamil Hasanqulu oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- a condition following concussion of the brain.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **990 dated 26 April 2024**, it was established that the injuries sustained by **Hajiyev Khayal Alovsat oglu** consisted of blast injuries, namely:

- non-consolidated skin scars remaining after blind shrapnel wounds of the right radiocarpal joint, the right thigh and the right lower leg;
- foreign bodies, namely metal fragments, in the soft tissues.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **822 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Huseynov Nicat Ramiz oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- a severely expressed organic affective disorder following concussion of the brain;
- a moderately expressed prolonged post-traumatic stress disorder accompanied by suicidal thoughts;
- a previous closed craniocerebral trauma sustained as a result of blast trauma;
- consequences of concussion of the brain in the form of

post-traumatic encephalopathy manifested by persistent autonomic vascular instability, chronic cephalgic and insomnia syndromes and cognitive deficit;

- moderate impairment of the functions of the central nervous system.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **1015 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Qasimov Gunduz Intizam oglu** were:

- a previous closed craniocerebral trauma;
- asthenoneurotic manifestations following concussion of the brain;
- blast trauma;
- a previous closed craniocerebral trauma;

- autonomic vascular instability following concussion of the brain;
- blast trauma;
- a condition following right-sided acute cochlear neuritis;
- right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of five metres in the right ear and six metres in the left ear.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **943 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Qasimov Safar Sakhavat oglu** were:

- a hardened skin scar remaining after primary surgical treatment of a through-and-through bullet wound of the soft tissues of the middle one-third of the left thigh;
- residual signs of post-traumatic neuropathy of the sensory territory of the left femoral nerve;
- no impairment of function.

The injuries were caused by a shot fired from a firearm and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **25 dated 26 April 2024**, it was established that, on **5 October 2022**, **Salimov Javidan Nadir oglu** was certified by the Military Medical Commission of the Central Military Polyclinic of the Ministry of Defence with the following diagnosis:

- blast trauma;
- shrapnel wounds of the soft tissues of the right thigh, left knee and left lower-leg regions.

The recorded injuries were caused by blast trauma and shrapnel wounds and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **969 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Adishli Nariman Jamil oglu** were:

- a through-and-through bullet wound of the left foot;
- healed fractures of the third and fifth metatarsal bones following open fractures;
- a fracture of the fourth metatarsal bone accompanied by a marginal bone defect;
- barotrauma;
- a condition following left-sided acute cochlear neuritis;
- left-sided sensorineural hearing loss;

- perception of whispered speech at a distance of five metres in the left ear and six metres in the right ear;
- hypermetropia of both eyes, **Hm 1.0 D**, resulting in a reduction of visual acuity to 0.8, corrected to 1.0;
- secondary partial adentia, namely the absence of teeth Nos. **14, 36 and 46**.

The injuries were caused by a shot fired from a firearm, as well as by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **826 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Aghayev Ramiz Ehtimad oglu** were:

- a firearm injury;
- consequences of post-traumatic neuropathy of the right peroneal and tibial nerves, accompanied by distal paresis of the limb and moderate impairment of function;
- a through-and-through firearm wound of the right ankle-joint region;
- open, comminuted and displaced fractures of the metaphysis of the right tibia, the calcaneus, talus, cuboid, lateral cuneiform and navicular bones;
- hardened skin scars, satisfactorily united fractures and osteoporosis following primary surgical treatment of the wounds, fixation of the fracture fragments with Kirschner wires and secondary surgical treatment;
- contracture of the

Page 495

ankle joint, Sudeck atrophy and pain syndrome;

- a firearm injury;
- consequences of post-traumatic neuropathy of the peroneal and sural branches of the sciatic nerve, manifested by sensory and motor disturbances and a persistent pain syndrome;
- moderate impairment of the function of the limb;
- a firearm injury;
- hardened skin scars remaining after primary surgical treatment of wounds and removal of a foreign body, namely a bullet, in connection with a blind bullet wound of the posterior surface of the right knee-joint region;
- a foreign body, namely a metal fragment, in the soft tissues;
- a small ganglion cyst in the region of the proximal tibiofibular joint of the right knee;
- instability and contracture of the knee joint accompanied by moderate impairment of function.

The injuries were caused by shots fired from a firearm, as well as by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **844 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Aliyev Kenan Shahin oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- persistent autonomic vascular instability following concussion of the brain;
- hardened skin scars remaining after incised wounds of the palmar surface of the left hand, the left wrist region and the anterior surface of the middle and lower one-thirds of the left forearm.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **1174 dated 26 April 2024**, it was established that the injuries sustained by **Jabbarov Peyman Bayram oglu** were:

- shrapnel wounds of the right wrist region and the right knee region;
- a closed craniocerebral trauma.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **2437 dated 27 January 2023**, it was established that the injuries and conditions sustained by **Jafarov Ravan Namizad oglu** were:

- a tangential bullet wound of the soft tissues of the left knee joint, resulting in myogenic contracture and instability of that joint;
- a through-and-through bullet wound of the right great toe, resulting in a fracture of its proximal phalanx;
- blind shrapnel wounds of the soft tissues of the right lower leg and the left upper-arm region caused by shots fired from a firearm;
- a closed craniocerebral trauma accompanied by autonomic vascular instability and asthenoneurotic manifestations following concussion of the brain.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **863 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Aliyev Zahid Mazahir oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- persistent autonomic vascular instability following concussion of the brain;
- barotrauma;
- right-sided chronic cochlear neuritis;
- right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of five metres in the right ear and six metres in the left ear;
- blast trauma;
- a hardened skin scar remaining after primary surgical treatment of a tangential bullet wound of the left half of the anterior wall of the thorax and abdomen that did not penetrate the cavities.

The injuries were caused by a shot fired from a firearm, as well as by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **35 dated 26 April 2024**, it was established that the injuries sustained by **Azimli Elburus Faday oglu** were

Page 496

right-sided acute cochlear neuritis associated with barotrauma and contusion of the soft tissues of the right knee-joint region associated with blast trauma.

The injuries were caused by a shot fired from a firearm, as well as by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **986 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Hamidli Ibrahim Sabir oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- autonomic vascular instability following concussion of the brain;
- multiple blind shrapnel wounds of both lower limbs;
- a shrapnel wound accompanied by a soft-tissue defect on the anterior surface of the lower one-third of the right thigh;
- a hardened skin scar remaining after primary surgical treatment of the wounds and surgical closure of the skin and subcutaneous wound with a flap;
- barotrauma;
- a condition following left-sided acute cochlear neuritis.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **150 dated 25 January 2024**, it was established that the injuries and conditions sustained by **Huseynov Ariz Arif oglu** were:

- barotrauma;
- right-sided acute cochlear neuritis;
- severe right-sided sensorineural hearing loss;
- post-traumatic stress disorder;
- an organic dissociative disorder;
- autonomic vascular instability;
- a closed craniocerebral trauma;
- concussion of the brain;
- a blind shrapnel wound of the left lower leg.

Taken together, by degree, the injuries are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **31 dated 10 January 2023**, it was established that the injuries sustained by **Huseynov Afrayil Jabrayil oglu** were:

- multiple shrapnel wounds of the anterior surface of the thorax, the neck, the left upper limb, the left thigh, the left lower leg and the right foot;
- an open fracture of the distal phalanx of the third finger of the left hand.

By degree, the injuries are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **985 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Huseynov Ismayil Boyukkishi oglu** were:

- blast trauma;
- hardened skin scars remaining after primary and secondary surgical treatment of blind and through-and-through shrapnel wounds of both lower limbs;
- foreign bodies, namely metal fragments, in the soft tissues;
- barotrauma;
- a condition following bilateral acute cochlear neuritis;
- bilateral sensorineural hearing loss;
- perception of whispered speech at a distance of six metres in the right ear and 5.5 metres in the left ear;
- hardened elastic skin scars remaining after a blind shrapnel wound of the left temporal region.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **37 dated 26 April 2024**, it was established that the injuries sustained by **Ismayil Sakhavat Dayanat oglu** were:

- blast trauma;
- a closed craniocerebral trauma;
- concussion of the brain;
- small shrapnel wounds of the soft tissues of the left axillary region and the left thigh.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **991 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Mammadov Ehtiram Hasan oglu** were:

- barotrauma;
- right-sided chronic cochlear neuritis;
- right-sided sensorineural hearing loss;
- perception of whispered speech at a distance of five metres in the right ear and six metres in the left ear;
- blast trauma;
- a previous closed craniocerebral trauma;
- autonomic vascular dystonia following concussion of the brain.

Page 497

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **837 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Nehmatli Kenan Elman oglu** were:

- blast trauma;
- a blind shrapnel wound of the left half of the thorax penetrating the pleural cavity and accompanied by left-sided hemopneumothorax;
- a hardened skin scar remaining after left-sided thoracentesis and drainage of the pleural cavity by the Bülau method;
- a mixed-type moderate ventilatory impairment of external respiratory function, with a predominance of restrictive changes;

- shrapnel wounds of the left hand and scapular region;
- avulsion of a small portion of the edge of the proximal phalanx of the fourth finger of the left hand;
- satisfactorily united fractures of the scapula and head of the humerus;
- hardened skin scars;
- foreign bodies, namely metal fragments, in the soft tissues;
- foreign bodies, namely metal fragments, in the soft tissues of the left half of the abdominal cavity;
- barotrauma;
- bilateral cochlear neuritis;
- bilateral sensorineural hearing loss;
- perception of whispered speech at a distance of three metres in the left ear and four metres in the right ear;
- residual manifestations of post-traumatic neuropathy of the left median nerve accompanied by slight functional impairment;
- a previous closed craniocerebral trauma sustained as a result of blast trauma;
- autonomic vascular instability following concussion of the brain;
- a blind shrapnel wound of the soft tissues of the left temporal region and upper-lip region.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **2451 dated 27 December 2023**, it was established that the injuries sustained by **Pirverdiyev Qarib Hafiz oglu** were:

- a blind shrapnel wound of the soft tissues of the lower one-third of the left half of the neck;
- a foreign body in the soft tissues of the left supraclavicular region.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **27 dated 26 April 2024**, it was established that, on **23 September 2022**, **Qazakhov Azer Elman oglu** was certified by the Military Medical Commission of the Central Military Polyclinic of the Ministry of Defence with the diagnosis of a through-and-through firearm wound of the soft tissues of the right foot.

The injury was caused by a firearm bullet and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **886 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Qocayev Zahid Vilayat oglu** were:

- blast trauma;
- blind shrapnel wounds of various regions of the body;
- an open, comminuted and displaced fracture of the lower one-third of the shaft of the right tibia;
- a satisfactorily united fracture following primary surgical treatment of the wounds, osteosynthesis of the lower-leg bones using the G. A. Ilizarov method and subsequent removal of the apparatus;
- hardened skin scars;
- foreign bodies, namely metal fragments, in the soft tissues;
- cicatricial and tendon-related contracture of the ankle joint;
- autonomic vascular dystonia.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **295 dated 2 February 2024**, it was established that the injuries sustained by **Quliyev Mehman Bahruz oglu** were:

- a blind shrapnel wound of the right cheek region;
- a small foreign body in the soft tissues;
- complete loss of vision in the right eye.

Page 498

Because the injuries resulted in permanent loss of more than one-third of general working capacity, they are classified as grievous harm to health.

According to forensic medical expert opinion No. **30 dated 16 January 2024**, it was established that the injuries and conditions sustained by **Sadiqov Zaur Mubariz oglu** were:

- a previous closed craniocerebral trauma;
- autonomic vascular instability and asthenoneurotic manifestations following concussion of the brain;
- hardened skin scars remaining after blind shrapnel wounds of the left thigh, left knee, proximal phalanx of the first finger of the left hand and the soft tissues of the left half of the thorax;
- a foreign body, namely a metal fragment, in the soft tissues of the left half of the thorax;
- blast trauma;
- a foreign body, namely a metal fragment, in the right periorbital region;
- a scar in the left eyebrow region;
- a fracture of the mandible.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **803 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Seyidov Anar Javanshir oglu** were:

- a moderately expressed persistent personality change;
- dissociative manifestations;
- post-traumatic neuropathy of the left sural nerve, accompanied by sensory and motor disturbances;
- moderate functional impairment;
- encephalopathy manifested by tension-type headaches and intracranial hypertension;
- simple myopic astigmatism of the right eye, Em and M 1 D, resulting in a reduction of visual acuity to 0.8, corrected to 1.0;
- a hardened skin scar remaining after a blind shrapnel wound of the soft tissues of the anterior surface of the left half of the thorax that did not penetrate the cavity;
- a foreign body, namely a metal fragment, in the soft tissues of the left axillary region.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **804 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Shirinov Rasim Habil oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;
- a moderately expressed organic dissociative disorder following concussion of the brain;
- a moderately expressed prolonged post-traumatic stress disorder;
- autonomic vascular instability following a closed craniocerebral trauma and concussion;
- a hardened skin scar remaining after a blind shrapnel wound of the middle one-third of the left lower leg;
- a foreign body, namely a metal fragment, in the soft tissues;
- a hardened skin scar remaining after a shrapnel wound of the chin region.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **967 dated 26 April 2024**, it was established that the injuries sustained by **Balakishiyev Balakishi Samad oglu** were:

- blast trauma;

- a through-and-through shrapnel wound of the right foot;
- open, comminuted and displaced fractures of the shafts of the third, fourth and fifth metatarsal bones;
- a wound accompanied by a soft-tissue defect on the dorsal surface of the foot;
- satisfactorily united fractures and hardened skin scars following primary and secondary surgical treatment and immobilisation with a plaster splint.

The injuries were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **831 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Jafarov Elmir Shamshir oglu** were:

- **F06.3 and F07.2** — a previous closed craniocerebral trauma sustained as a result of blast trauma;
- a moderately expressed organic affective depressive disorder following concussion of the brain;
- post-concussion syndrome;
- autonomic vascular instability;
- behavioural disorders;

Page 499

- **F43.1** — a moderately expressed prolonged post-traumatic stress disorder;
- a previous closed craniocerebral trauma sustained as a result of blast trauma;
- consequences of concussion of the brain in the form of post-traumatic encephalopathy, manifested by persistent autonomic vascular instability, chronic cephalgic and insomnia syndromes and cognitive deficit;
- moderate impairment of the functions of the central nervous system;
- hardened skin scars remaining after abraded and lacerated wounds of the dorsal surface of the right hand and the anterior surfaces of the left thigh and left lower leg.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **818 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Alizade Shamkhal Shakir oglu** were:

- blast trauma;
- traumatic amputation of the left thigh at the level of the lower one-third;
- blind shrapnel wounds of various regions of the body;
- amputation of the left thigh at the level of the middle one-third;

- an open and displaced fracture of the right patella;
- a healed fracture following primary surgical treatment of the wounds of the right lower limb and plaster immobilisation;
- foreign bodies in the soft tissues;
- contracture of the right knee joint accompanied by moderate functional impairment;
- a previous closed craniocerebral trauma;
- autonomic vascular instability following concussion of the brain;
- deformity of the left eyeball resulting from multiple shrapnel wounds of the left periorbital region and the cornea of the left eye;
- blast trauma;
- a shrapnel wound of the right half of the lower lip accompanied by a soft-tissue defect;
- blind and through-and-through shrapnel wounds of the right half of the upper lip;
- a hardened skin scar remaining after primary and secondary surgical treatment of the wounds and removal of fragments.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **116 dated 26 April 2024**, it was established that the injuries sustained by **Mammadov Emin Ahmad oglu** were:

- blast trauma;
- an unhealed skin scar and an unremoved foreign body, namely a fragment, remaining after blind shrapnel wounds of the soft tissues of the middle one-third of the right upper arm and the posterior surface of the right lower leg.

The injuries were caused by fragments generated by the explosion of a hand grenade and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **68 dated 26 April 2024**, it was established that, on **30 September 2022**, **Mammadov Qalib Habib oglu** was certified by the Military Medical Commission of Military Hospital No. 230 with the diagnosis:

“Blast trauma. Blind shrapnel wounds of the soft tissues of the posterior surface of the thorax not penetrating the pleural cavity, and of the left thigh and left gluteal regions; hardened skin scars and an unremoved foreign body, namely a fragment.”

The injuries had a blunt-wound mechanism and could have been caused by fragments during an explosion. By degree, they are classified as bodily injuries causing less serious harm to health.

According to forensic medical expert opinion No. **887 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Rahimov Yusif Mehman oglu** were:

- blast trauma;
- a penetrating injury of the right eye;
- leakage of the intraocular contents;
- hyphema;
- hemophthalmos;
- traumatic aphakia;
- an extensive scleral defect;
- a blind shrapnel wound of the right infraorbital region;
- a condition following primary surgical treatment of comminuted fractures of the lower wall of the orbit and fixation with a metal plate;
- subatrophy, namely phthisis, of the right eye following fixation with a metal plate;
- mixed astigmatism of the left eye, Hm 0.5 D and M 1.0 D, resulting in a reduction of visual acuity in the left eye to 0.6;

Page 500

- visual acuity in the left eye corrected to 1.0;
- visual acuity of zero in the right eye;
- blast trauma;
- a previous closed craniocerebral trauma;
- autonomic vascular instability and asthenoneurotic manifestations following concussion of the brain;
- blast trauma;
- a foreign body, namely a metal fragment, in the soft tissues of the left clavicular region;
- blast trauma;
- a united fracture following open reduction and internal fixation with a mini-plate of the fracture fragments of the lower wall of the right orbit;
- a foreign body, namely a metal plate, in the soft tissues of the upper lip;
- numerous small foreign bodies, namely metal fragments, in the soft tissues of the right orbit;
- impairment of jaw function.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, because they resulted in permanent loss of a significant degree, namely **35 per cent**, of general working capacity, are classified as grievous harm to health.

According to forensic medical expert opinion No. **857 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Badalov Asadulla Rovshan oglu** were:

- blast trauma;
- a previous closed craniocerebral trauma;

- asthenoneurotic manifestations following concussion of the brain;
- autonomic vascular instability following a previous closed craniocerebral trauma and concussion;
- barotrauma;
- a condition following left-sided acute cochlear neuritis;
- left-sided sensorineural hearing loss;
- perception of whispered speech at a distance of three metres in the left ear and six metres in the right ear.

The injuries were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **127 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Bayramov Huseyn Vugar oglu** were:

- post-traumatic headache;
- an acute respiratory disease of mild severity.

The injuries were caused by a shot fired from a firearm and by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as bodily injuries causing minor harm to health.

According to forensic medical expert opinion No. **909 dated 26 April 2024**, it was established that the injuries sustained by **Ahmadov Sadiq Asgar oglu** were:

- mine-blast trauma;
- traumatic amputation of the left lower leg at the level of the lower one-third;
- blind shrapnel wounds of various regions of the body;
- a condition following primary surgical treatment of the wounds;
- re-amputation of the left lower leg.

The injuries were caused by the blast wave generated by the explosion of a substance possessing explosive properties and, by degree, are classified as grievous harm to health.

According to forensic medical expert opinion No. **880 dated 26 April 2024**, it was established that the injury sustained by **Amanullayev Rashad Aghajan oglu** was a hardened skin scar remaining after a blind firearm bullet wound of the soft tissues of the middle one-third of the left upper arm.

The injury was caused by a shot fired from a firearm and, by degree, is classified as bodily injury causing minor harm to health.

According to forensic medical expert opinion No. **883 dated 26 April 2024**, it was established that the injuries and conditions sustained by **Isgandarov Nicat Hidayat oglu** were:

- a firearm injury;
- a wound of the forehead not penetrating the cranial cavity;
- an open craniocerebral trauma;
- a small contusion of the right frontal lobe of the brain;
- a bone defect of the frontal bone measuring **14.9 square centimetres**;
- a through-and-through firearm wound involving the right half of the face, the right eyeball and the forehead without penetrating the cranial cavity;
- comminuted bone defects of all walls of the right orbit and of the anterior and posterior walls of the right maxillary and frontal sinuses;
- comminuted fractures of the right zygomatic bone and an avulsion fracture of the right coronoid process of the mandible;
- reconstruction of the margins and lower wall of the orbit using a mini-plate.

Following open reduction and internal fixation of the fracture fragments using mini-plates, the bone

Page 501

fractures with bone defects; mature skin scars remaining after the primary and secondary surgical treatment of the wounds caused by post-traumatic injury to the lower margin of the right parotid gland; a moderate impairment of the masticatory function; an open craniocerebral injury sustained as a result of a gunshot wound; post-traumatic encephalopathy following contusion of the right frontal lobe of the brain, manifested by persistent autonomic vascular instability, cephalgic and insomnia syndromes; residual effects of post-traumatic neuropathy of the right facial nerve resulting in paralysis of the facial muscles; astheno-neurotic manifestations following an open craniocerebral injury and contusion of the right frontal lobe of the brain sustained as a result of a gunshot wound; a penetrating gunshot (bullet) wound of the right eyeball and forehead not penetrating the cranial cavity, evisceration of the right eye, and the condition following implantation of a silicone sphere; and, with visual acuity of the left eye being Vis OS = 0.8, bilateral chronic cochlear neuritis resulting from blast trauma, severe bilateral sensorineural hearing loss, inability to hear whispered speech with the right ear and the ability to hear it with the left ear from a distance of 4 metres—are characteristic of injuries caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments generated by the explosion of any substance possessing explosive properties, and, according to their severity, constitute serious harm to health.

According to forensic medical expert opinion No. 36 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Ayyub Valiaddin oglu**—a through-and-through wound of the soft tissues of the upper one-third of the right upper arm and a blind bullet

wound of its lower one-third—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 937 dated 26 April 2024, it was established that the injury sustained by **Musayev Omar Binnat oglu**—a blind gunshot bullet wound of the left gluteal region, with a mature skin scar remaining after the primary surgical treatment of the wound—was caused by the impact of a projectile or bullet fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 31 dated 2 February 2022, it was established that the injuries sustained by **Novruzlu Mustafa Namig oglu**—traumatic amputation of the left foot at the level of the tarsometatarsal joint, open displaced intra-articular fractures of the distal metaphyses of the left tibia and fibula, and an avulsion fracture of the margin of the navicular bone—resulted in a permanent loss of not less than one-third of his general capacity for work and, therefore, constitute **serious harm to health**.

According to forensic medical expert opinion No. 801 dated 26 April 2024, it was established that the injuries sustained by **Rahimzada Ruhid Oktay oglu**—a through-and-through shrapnel wound of the right foot accompanied by an open, comminuted and displaced fracture of the fifth metatarsal bone, a mature skin scar and a malunited fracture with functional impairment following primary surgical treatment of the wound and immobilisation with a plaster splint—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 843 dated 26 April 2024, it was established that the injuries sustained by **Shamkhalli Shamkhal Fakhraddin oglu**—a gunshot wound; a penetrating wound of the left half of the chest; injury to the left lung; a bullet wound accompanied by left-sided haemopneumothorax, for which left-sided thoracentesis and drainage of the pleural cavity by the Bülau method were performed; a mature skin scar following primary surgical treatment of the wounds; fibrosis of the lower lobe of the left lung; left-sided pleural adhesions; and mixed-type impairment of the external respiratory function of the lungs—

—together with moderate ventilatory impairment, were caused by a shot fired from a firearm and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 1018 dated 26 April 2024, it was established that the injuries sustained by **Novruzov Samir Mubariz oglu**—blast trauma; a closed craniocerebral injury sustained as a result of the blast trauma; autonomic vascular instability following concussion of the brain; barotrauma; left-sided chronic cochlear neuritis resulting in sensorineural hearing loss, with whispered speech heard from a distance of 4

metres by the right ear and 6 metres by the left ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1003 dated 26 April 2024, it was established that the injuries sustained by **Rustamov Asgar Elman oglu**—a mature skin scar remaining after the primary surgical treatment of a blind shrapnel wound to the soft tissues of the right scapular region, and a foreign body in the soft tissues in the form of a metal fragment—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 827 dated 26 April 2024, it was established that the injuries sustained by **Abbasov Vugar Nofal oglu**—a gunshot wound; post-traumatic neuropathy of the right ulnar nerve resulting in slight impairment of the limb's function; a through-and-through bullet wound of the lower one-third of the right forearm; an open marginal avulsion fracture of the distal one-third of the shaft of the right ulna; and a consolidated fracture following primary surgical treatment of the wounds and immobilisation with a plaster splint—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 823 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Vusal Yusif oglu**—a gunshot wound; post-traumatic neuropathy of the right axillary nerve resulting in slight impairment of the limb's function; a through-and-through gunshot wound of the right shoulder girdle; an open, comminuted and displaced fracture of the glenoid cavity of the right scapula; a non-displaced fracture of the upper portion of the right fourth rib; and a consolidated fracture following primary surgical treatment of the wounds—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 891 dated 26 April 2024, it was established that the injuries sustained by **Bashirov Rashad Joshgun oglu**—blast trauma; intravitreal haemorrhage of the right eye; foreign bodies within the eye and in the periorbital region, for which pars plana vitrectomy, laser photocoagulation, removal of the foreign body and SF6 gas tamponade were performed; post-operative retinopathy; subcapsular cataract of the lens; intraorbital and periorbital foreign bodies of the left eye; uncorrected reduction of visual acuity to 0.08 in the right eye and 0.8 in the left eye; a closed craniocerebral injury sustained as a result of blast trauma; autonomic vascular instability following concussion of the brain; a closed craniocerebral injury sustained as a result of blast trauma; astheno-neurotic manifestations following concussion of the brain; foreign bodies in the soft tissues of the left half of the head in the form of metal fragments; a mature skin scar remaining after a lacerated wound of the left supraorbital region; and a foreign body in the soft tissues of the left

zygomatic region in the form of a metal fragment following a blind shrapnel wound caused by blast trauma—were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties—

Page 503

—by the impact of primary or secondary fragments, including the blast wave, and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 825 dated 26 April 2024, it was established that the injuries sustained by **Damirov Isag Faig oglu**—blast injury; traumatic amputation of the left fifth metacarpal bone at the level of its middle one-third; a wound with an extensive soft-tissue defect on the palmar surface; a stump remaining after primary surgical treatment of the wound; flexion contracture of the fourth finger caused by a scar-related adhesion of the tendon sheath; and slight impairment of the function of the hand—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 815 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Kanan Arif oglu**—a closed craniocerebral injury sustained as a result of blast trauma; a mildly expressed organic dissociative disorder following concussion of the brain; post-concussion syndrome and behavioural disorders; and a moderately expressed prolonged post-traumatic stress disorder—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 874 dated 26 April 2024, it was established that the injuries sustained by **Fatullazada Suleyman Alijan oglu**—a healing marginal avulsion fracture at the base of the proximal phalanx of the first toe of the left foot and foreign bodies in the soft tissues in the form of metal fragments—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 43 dated 26 April 2024, it was established that the injuries sustained by **Hasanov Elnur Elchin oglu**—astheno-neurotic manifestations and persistent autonomic vascular instability associated with blast trauma; a closed craniocerebral injury and concussion of the brain; right-sided acute cochlear neuritis associated with barotrauma; and blind shrapnel wounds of both lower extremities—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 46 dated 26 April 2024, it was established that the injuries sustained by **Ismayilov Rasat Salman oglu**—multiple blind shrapnel wounds to various regions of the body; comminuted fractures of the scaphoid and medial

cuneiform bones of the left foot, for which primary surgical treatment of the wounds, surgical removal of some of the foreign bodies in the form of metal fragments, and immobilisation with a plaster splint were performed—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 845 dated 26 April 2024, it was established that the injuries sustained by **Mustafayev Isgandar Osman oglu**—a closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; blast trauma; blind shrapnel wounds of the left hand, left foot and right thigh; injury to the extensor tendon of the fourth finger of the left hand; mature skin scars remaining after primary surgical treatment of the wounds, fasciotomy of the dorsal surfaces of the left hand and left foot, tenorrhaphy and secondary surgical treatment of the wounds; foreign bodies in the soft tissues in the form of metal fragments; and early-stage osteoarthritis of both knee joints—

—degeneration of the posterior horn of the medial meniscus of the right knee joint; right-sided Grade I patellar chondromalacia; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; barotrauma; left-sided chronic cochlear neuritis; dry perforation of the left tympanic membrane; left-sided severe mixed hearing loss, with whispered speech heard from a distance of 6 metres by the right ear and 3 metres by the left ear; a mature skin scar remaining after primary surgical treatment of a blind shrapnel wound of the submandibular region; blind shrapnel wounds of both periorbital regions sustained as a result of blast trauma; a mature skin scar on the left upper eyelid; a foreign body in the left periorbital region in the form of a metal fragment; post-traumatic keratopathy of the left eye; and an uncorrectable reduction of visual acuity to 0.9 in the right eye and 0.8 in the left eye as a result of congestion of the anterior optic disc—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 830 dated 26 April 2024, it was established that the injuries sustained by **Nasibov Vusal Alimusa oglu**—blast trauma; a closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic affective (depressive) disorder following concussion of the brain; a moderately expressed prolonged post-traumatic stress disorder; a closed craniocerebral injury sustained as a result of blast trauma; autonomic vascular instability following concussion of the brain; right-sided chronic cochlear neuritis resulting from barotrauma; tinnitus; the ability to hear whispered speech from a distance of 5 metres by the right ear and 6 metres by the left ear; and mature skin scars remaining after shrapnel wounds of the left upper arm and left forearm—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 28 dated 26 April 2024, it was established that the injuries sustained by **Nazarov Allahshukur Seyidamir oglu**—a condition following a blind shrapnel wound of the right thigh, as certified on 23 September 2022 by the Military Medical Commission of the Central Military Polyclinic of the Ministry of Defence—resulted from blast trauma and a shrapnel wound and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 2064 dated 3 November 2023, it was established that the injuries sustained by **Orujov Murad Shamil oglu**—a blind shrapnel wound penetrating from the left side of the lumbar region into the abdominal cavity, accompanied by injury to the small intestine and the lower pole of the right kidney, a subcapsular haematoma and the presence of a foreign body in the form of a fragment; shrapnel wounds extending from the lumbar and both gluteal regions toward the lower extremities; and multiple through-and-through shrapnel wounds resulting in displaced comminuted fractures of the second and third metatarsal bones of the right foot and the proximal phalanx of the first toe—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 65/MES dated 26 April 2024, it was established that the injury sustained by **Pirverdiyev Seyran Rashad oglu**—a condition following primary surgical treatment of a through-and-through gunshot wound of the soft tissues of the left foot, as certified on 30 September 2022 by the Military Medical Commission of Military Hospital No. 230—is consistent, in view of its acute mechanism of formation, with having been sustained under the circumstances and at the time stated in the opinion, namely on 15 September 2022 as a result of a gunshot wound, and, according to its severity, constitutes **minor harm to health**.

Page 505

According to forensic medical expert opinion No. 33 dated 26 April 2024, it was established that the injury sustained by **Rahimov Osman Yashar oglu**—a through-and-through gunshot bullet wound of the soft tissues of the inner surface of the middle one-third of the right thigh, as certified on 26 September 2022 by the Military Medical Commission of the Central Military Polyclinic—was caused by a gunshot bullet wound and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 17 dated 24 January 2024, it was established that the injuries sustained by **Rzayev Oruj Anvar oglu**—a through-and-through, open, comminuted and displaced fracture of the lower one-third of the right humerus—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 1178 dated 26 April 2024, it was established that the injuries sustained by **Sadixov Panah Sulduz oglu**—a closed craniocerebral injury and blind shrapnel wounds of both extremities—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 96 dated 19 January 2024, it was established that the injuries sustained by **Safarov Iman Kamaladdin oglu**—a blind shrapnel wound of the right side of the chest wall penetrating the thoracic cavity and accompanied by right-sided pneumothorax; slight impairment of the functions of the abdomen and the right upper extremity; shrapnel wounds of the soft tissues of the right half of the chest, the right abdominal wall, the right shoulder girdle and the right thigh, with a metal fragment present; a closed craniocerebral injury resulting in autonomic vascular instability following concussion of the brain; right-sided chronic cochlear neuritis; post-traumatic secondary repair of the right tympanic membrane; right-sided mixed hearing loss; and barotrauma resulting in whispered speech being heard from a distance of 4 metres by the right ear and 6 metres by the left ear—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 26 dated 26 April 2024, it was established that the injuries sustained by **Suleymanov Javid Farhad oglu**—a tangential shrapnel wound of the left cheek and the left mastoid region, as certified on 28 September 2022 by the Military Medical Commission of the Central Military Polyclinic of the Ministry of Defence—resulted from blast trauma and a shrapnel wound and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1001 dated 26 April 2024, it was established that the injuries sustained by **Suleymanov Garib Elzam oglu**—skin scars remaining after a bullet wound of the lower one-third of the left thigh—were caused by a projectile fired from a firearm and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 832 dated 26 April 2024, it was established that the injuries sustained by **Sultanov Sanan Islam oglu**—three to four millimetre metal fragments in the soft tissues of the right thigh; an incompletely matured transverse skin scar measuring 10 centimetres on the anterior surface of the lower one-third of the right thigh; and simple myopic astigmatism of the right eye, Em and M 1 D, resulting in visual acuity of 0.6, improving to 1.0 with correction, with visual acuity of the left eye being 1.0—were caused by the impact of primary—

—or secondary fragments and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 124 dated 26 April 2024, it was established that the injury sustained by **Tagizada Mahammad Elman oglu** consisted of post-traumatic headache. The injury was caused by the impact of the shock wave generated by the explosion of a projectile fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 885 dated 26 April 2024, it was established that the injuries sustained by **Tahmazov Elshad Fakhraddin oglu**—blast trauma; a closed craniocerebral injury; a mildly expressed organic emotional-labile disorder following concussion of the brain; a mildly expressed prolonged post-traumatic stress disorder; the consequences of a closed craniocerebral injury and concussion of the brain in the form of post-traumatic encephalopathy manifested by diffuse neurological signs, persistent autonomic vascular dystonia, and cephalgic and insomnia syndromes; blind shrapnel wounds of both eyebrow arches; simple myopic astigmatism of the right eye, Em and M 1.0 D, with visual acuity of 1.0 in the right eye and 1.0 in the left eye—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 40 dated 26 April 2024, it was established that the injuries sustained by **Xankishiyev Mirdamat Latif oglu**—bilateral acute cochlear neuritis associated with barotrauma and Grade II degeneration of the posterior horn of the medial meniscus resulting in restriction of movement of the right knee joint—were caused by the impact of the blast wave resulting from a shot fired from a firearm and, taken together, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 48 dated 23 January 2024, it was established that the injury sustained by **Xeyrullayev Vagif Murad oglu**—a through-and-through gunshot bullet wound accompanied by an open comminuted fracture of the upper one-third of the right humerus, with an entry wound on the anterior-inner surface and an exit wound on the posterior-outer surface of the upper one-third of the right upper arm—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **serious harm to health**.

According to forensic medical expert opinion No. 38 dated 26 April 2024, it was established that the injury sustained by **Zakariyayev Sayyad Ulfat oglu**—a through-and-through gunshot wound of the soft tissues of the left shoulder girdle—was caused by the impact of a bullet fired from a firearm, is consistent with having been sustained under the circumstances and on the date stated in the medical document, namely 13 September 2022, and, according to its severity, constitutes **less serious harm to health**.

According to forensic medical expert opinion No. 975 dated 26 April 2024, it was established that the injuries sustained by **Alasgarov Orkhan Javanshir oglu**—a closed craniocerebral injury and autonomic vascular dystonia—were caused by a shot fired from a firearm, as well

as by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 76 dated 5 February 2024, it was established that the injuries sustained by **Mustafayev Kanan Etibar oglu**—a gunshot wound causing blindness as a result of destruction of the right eyeball, followed by removal of the eye; two shrapnel wounds on the right side of the forehead; and one shrapnel wound between the eyebrows—were caused by primary—

Page 507

—or secondary fragments and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 821 dated 26 April 2024, it was established that the injuries sustained by **Huseynaliyev Elvin Fazil oglu**—a through-and-through gunshot wound of the palmar surface of the left hand; oblique, open, displaced comminuted fractures of the bases of the second, third and fourth metacarpal bones, the shaft of the middle phalanx of the fifth finger, and the trapezium and trapezoid bones; extensive wounds of the palmar surface involving defects of the soft tissues, tendons and nerves, for which primary and secondary surgical treatment of the wounds, fixation of the fracture fragments with metal pins, repair of the common digital nerves using a sural nerve autograft, placement of Hunter prostheses in the flexor tendons, and canalisation of the tendon sheaths of the first, second, third and fourth fingers with silicone tubes were performed; infected wounds following those surgical procedures; removal of the silicone prosthesis and surgical debridement of the wounds due to a foreign body in the soft tissues in the form of a metal fragment; adequately united fractures of the middle phalanges of the third, fourth and fifth fingers following surgery; defects of the flexor tendons of the first through fifth fingers; extension contractures of the first through fifth fingers; cicatricial muscular contracture of the radiocarpal joint; residual effects of a gunshot injury involving traumatic damage to the left median nerve and the palmar surface of the hand, resulting in motor and trophic disorders and moderate functional impairment; a previous closed craniocerebral injury; autonomic vascular instability and astheno-neurotic manifestations following concussion of the brain; right-sided chronic cochlear neuritis; right-sided severe sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by the right ear and 6 metres by the left ear—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 2287 dated 11 December 2023, it was established that the injuries sustained by **Qasimov Ibarat Maharram oglu**—a through-and-through bullet wound of the soft tissues of the posterior surface of the left shoulder girdle, and a through-and-through bullet wound of the soft tissues of the left hand resulting in complete transection of the branch of the left ulnar nerve extending to the fourth and fifth fingers—were caused by the impact of primary or secondary fragments generated by the

explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 984 dated 26 April 2024, it was established that the injuries sustained by **Huseynov Mushvig Nizami oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; and post-concussion autonomic vascular dystonia—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 983 dated 26 April 2024, it was established that the injuries sustained by **Huseynov Rauf Firudin oglu**—blunt trauma, abrasions and haematomas of various regions of the body—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1025 dated 26 April 2024, it was established that the injuries sustained by **Abbasov Ilham Fikrat oglu**—a Grade I sprain of the anterior cruciate ligament of the right knee joint; Grade II degeneration of the posterior horn of the medial meniscus; Grade I degeneration of the posterior horn of the lateral meniscus; and post-traumatic synovitis—were caused by a blunt mechanism, through the impact of a hard blunt object, and, taken together, constitute **less serious harm to health**.

Page 508

According to forensic medical expert opinion No. 1024 dated 26 April 2024, it was established that the injuries sustained by **Aghchayev Bayram Ilyas oglu**—blast trauma; a closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1032 dated 26 April 2024, it was established that the injuries sustained by **Karimov Umid Ramazan oglu**—a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; barotrauma; bilateral cochlear neuritis; bilateral sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by both ears—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 918 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Tural Asgar oglu**—blast trauma; a blind shrapnel wound of the anterior abdominal wall penetrating the abdominal cavity, accompanied by injuries to the small intestine and transverse colon and internal bleeding, for which laparotomy, exploration of the abdominal cavity, resection of the injured portions of the small

and large intestines—13 centimetres of the large intestine and 6 centimetres of the small intestine—formation of a side-to-side entero-enteroanastomosis, creation of an end colostomy, relaparotomy, closure of the end colostomy, resection of 10 centimetres of the large intestine, formation of a colo-colonic anastomosis, sanitation and drainage of the abdominal cavity were performed; mature post-operative skin scars; no impairment of the intestinal evacuation function; a closed craniocerebral injury; autonomic vascular instability and astheno-neurotic manifestations following concussion of the brain; bilateral chronic cochlear neuritis; and persistent severe bilateral sensorineural hearing loss, with whispered speech heard from a distance of 5.5 metres by both ears—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 06 dated 26 April 2024, it was established that the injuries sustained by **Asgarov Zaman Elman oglu**—blunt trauma to the head accompanied by post-traumatic headache, and a skin scar in the left calf region resulting from the impact of a hard blunt object—are consistent with having been sustained under the circumstances and on the date stated in the medical document, namely 15 September 2022, and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 889 dated 26 April 2024, it was established that the injuries sustained by **Imranzada Nazir Suleyman oglu**—a previous closed craniocerebral injury; post-traumatic encephalopathy following concussion of the brain, manifested by frequently recurring seizures, persistent autonomic vascular instability, and chronic cephalgic and insomnia syndromes; a gunshot wound; post-traumatic neuropathy of the right median and ulnar nerves resulting in moderate impairment of the limb’s function; a severely expressed organic personality disorder accompanied by frequent decompensations, depressive manifestations and reduced cognitive function; and a mature skin scar following primary and secondary surgical treatment of a through-and-through gunshot wound of the soft tissues of the middle one-third of the right forearm and a tangential gunshot wound of the middle one-third of the right upper arm—were caused by a shot fired from a firearm, as well as by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

Page 509

According to forensic medical expert opinion No. 1834 dated 13 October 2022, it was established that the injuries sustained by **Ismayilov Abdulla Rafig oglu**—a closed craniocerebral injury accompanied by concussion of the brain, resulting in a moderately expressed organic affective (depressive) disorder, autonomic vascular instability and a moderately expressed prolonged post-traumatic stress disorder; and blind shrapnel wounds of the right scapular region, right shoulder, right half of the face, right upper extremity, right lower leg and plantar region, as well as the left medial malleolar region—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 939 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Ali Habil oglu**—blast trauma; mature skin scars remaining after shrapnel wounds of the right lower leg and right knee regions; and foreign bodies in the soft tissues in the form of metal fragments—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 812 dated 26 April 2024, it was established that the injuries sustained by **Niyazaliyev Niyaz Asgar oglu**—blast trauma; a closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic affective (depressive) disorder following concussion of the brain, accompanied by post-concussion syndrome; a moderately expressed prolonged post-traumatic stress disorder; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; mature skin scars remaining after primary surgical treatment of blind shrapnel wounds of the anterior surfaces of the middle one-third of both thighs; and foreign bodies in the soft tissues in the form of metal fragments—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 2091 dated 6 November 2023, it was established that the injuries sustained by **Qadirli Khazar Elman oglu**—a closed craniocerebral injury accompanied by concussion of the brain, resulting in a moderately expressed organic affective (depressive) disorder and post-traumatic stress disorder; post-traumatic neuropathy of the left peroneal nerve; shrapnel wounds of the facial region, left hand, left lower leg and left foot; fractures of the second, third and fifth metatarsal bones of the left foot; and barotrauma of the left ear accompanied by left-sided chronic cochlear neuritis resulting in persistent severe left-sided sensorineural hearing loss, with whispered speech heard by the left ear from a distance of 4.5 metres—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 835 dated 26 April 2024, it was established that the injuries sustained by **Yunsurov Yusif Vidadi oglu**—blast trauma; corneal opacities remaining after removal of multiple foreign bodies in the form of metal fragments from the conjunctiva of the lower fornices of both eyes and from the upper eyelid; a slight skin scar of the upper eyelid; traumatic retinopathy resulting in reduction of visual acuity to 0.7 in the right eye and 0.6 in the left eye, without correction; mature skin scars following primary surgical treatment of shrapnel wounds of the right upper and right lower extremities sustained as a result of blast trauma; a condition following primary surgical treatment of blind shrapnel wounds of the left and right cheeks, the left half of the lower lip and the tip of the tongue; and small foreign bodies in the soft tissues—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 01 dated 26 April 2024, it was established that the injuries sustained by **Allahyarov Rasim Shaynali oglu**—blast trauma; a previous closed craniocerebral injury; a condition following concussion of the brain; and barotrauma accompanied by left-sided chronic cochlear neuritis—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 2069 dated 3 November 2023, it was established that the injuries sustained by **Hasanov Rustam Mahir oglu**—post-traumatic encephalopathy accompanied by frequently recurring epileptic seizures; a mildly expressed organic affective disorder; post-concussion syndrome; a mildly expressed prolonged post-traumatic stress disorder; a closed craniocerebral injury accompanied by concussion of the brain; multiple shrapnel wounds of the soft tissues of both lower extremities; and a lacerated wound of the lower one-third of the right forearm—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 1180 dated 26 April 2024, it was established that the injuries sustained by **Shukurov Umud Alimammad oglu**—blast trauma; barotrauma; a closed craniocerebral injury; and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1030 dated 26 April 2024, it was established that the injuries sustained by **Maharramov Sadig Ahliman oglu**—blast trauma; a previous closed craniocerebral injury; and post-traumatic encephalopathy following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 805 dated 12 October 2023, it was established that the injury sustained by **Aghayev Agshin Kamran oglu**—a through-and-through gunshot bullet wound of the soft tissues of the left gluteal region—constitutes, according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 963 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Zeynal Ramiz oglu**—a condition following primary surgical treatment of a blind shrapnel wound of the soft tissues of the posterior wall of the chest not penetrating the thoracic cavity—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 1909 dated 19 October 2023, it was established that the injury sustained by **Mehdiyev Yusif Kamal oglu**—a blind shrapnel wound of the soft tissues of the right lower leg—constitutes, according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 961 dated 26 April 2024, it was established that the injury sustained by **Mustafayev Ahliyar Eldaniz oglu**—a bullet wound of the right upper arm—was caused by the impact of a projectile fired from a firearm and, according to its severity, constitutes **less serious harm to health**.

According to forensic medical expert opinion No. 235 dated 29 July 2023, it was established that the injuries sustained by **Quliyev Ulvi Babak oglu**—amputation of the distal portion of the right foot at the level of the metatarsal bones and a contused wound of the anterior surface of the right lower leg—constitute, according to their severity, **less serious harm to health**.

Page 511

According to forensic medical expert opinion No. 408 dated 2 August 2023, it was established that the injuries sustained by **Hacibalayev Mahammad Vagif oglu**—barotrauma and bilateral acute cochlear neuritis—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 236 dated 29 July 2023, it was established that the injuries sustained by **Lazgiyev Javid Nazim oglu**—a closed craniocerebral injury accompanied by concussion of the brain and bilateral cochlear neuritis, and a tear of the meniscus of the right knee joint—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 772 dated 5 August 2023, it was established that the injuries sustained by **Ismayilov Ulvi Samir oglu**—a closed craniocerebral injury and a shrapnel wound of the left temporal region—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 1710 dated 9 October 2023, it was established that the injuries sustained by **Heydarov Alakbar Adil oglu**—barotrauma of both ears accompanied by bilateral acute cochlear neuritis—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 1794 dated 12 October 2023, it was established that the injuries sustained by **Sultanov Javanshir Azer oglu**—barotrauma of both ears accompanied by bilateral acute cochlear neuritis, and a horizontal tear of the posterior horn of the medial meniscus of the left knee joint caused by the impact of the blast wave generated by the explosion of a projectile possessing explosive properties—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 865 dated 26 April 2024, it was established that the injuries sustained by **Abdulazizov Elnur Abdulaziz oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; barotrauma; a condition following right-sided acute cochlear neuritis; right-sided severe sensorineural hearing loss, with whispered speech heard from a distance of 3 metres by the right ear and 6 metres by the left ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 941 dated 26 April 2024, it was established that the injuries sustained by **Musayev Mardan Urfat oglu**—blast trauma and right-sided chronic tubo-otitis—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 936 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Vugar Zahid oglu**—a previous closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 945 dated 26 April 2024, it was established that the injuries sustained by **Bakhshaliyev Nizami Fizuli oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

Page 512

According to forensic medical expert opinion No. 907 dated 26 April 2024, it was established that the injuries sustained by **Abishov Tofig Yavar oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 957 dated 26 April 2024, it was established that the injuries sustained by **Qurbanov Elman Khanlar oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 927 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Anar Zakir oglu**—a previous closed craniocerebral injury, autonomic vascular instability and astheno-neurotic manifestations following concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 995 dated 26 April 2024, it was established that the injuries sustained by **Xankishiyev Ceyhun Khansuvar oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 958 dated 26 April 2024, it was established that the injuries sustained by **Salmanov Bakhtiyar Qardashkhan oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 962 dated 26 April 2024, it was established that the injuries sustained by **Shukurov Sohbat Ilgar oglu**—blast trauma; a closed craniocerebral injury; and acute cochlear neuritis—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 13 dated 26 April 2024, it was established that the injuries sustained by **Quliyev Ramil Fazil oglu**—a previous closed craniocerebral injury; a condition following concussion of the brain; barotrauma; and bilateral acute cochlear neuritis, as certified on 7 October 2022 by the Military Medical Commission of the Central Military Polyclinic of the Ministry of Defence—resulted from blast trauma and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 938 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Aliyar Zamir oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 952 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Sanan Tahir oglu** were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties—

—by the impact of the blast wave and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 977 dated 26 April 2024, it was established that the injuries sustained by **Balakishiyev Agshin Hakim oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 993 dated 26 April 2024, it was established that the injuries sustained by **Yusupov Vasif Akif oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 944 dated 26 April 2024, it was established that the injuries sustained by **Qasimov Rahman Alican oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 942 dated 26 April 2024, it was established that the injuries sustained by **Qaribov Qasim Suleyman oglu**—a previous closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1017 dated 26 April 2024, it was established that the injuries sustained by **Nabiyev Anar Aydin oglu**—a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; a gunshot wound; a blind bullet wound penetrating from the anterior abdominal wall into the abdominal cavity, for which laparotomy and cholecystectomy, suturing of the intestinal wounds, and removal of the foreign body in the form of a bullet from the abdominal cavity were performed; and a mature post-operative skin scar—were caused by a shot fired from a firearm, as well as by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 842 dated 26 April 2024, it was established that the injuries sustained by **Musayev Ulvin Khudayar oglu**—blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; barotrauma; a condition following right-sided acute cochlear neuritis; right-sided

sensorineural hearing loss; and the ability to hear whispered speech from a distance of 5 metres by the right ear and 6 metres by the left ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 954 dated 26 April 2024, it was established that the injuries sustained by **Talibli Javidan Elizamin oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

Page 514

According to forensic medical expert opinion No. 998 dated 26 April 2024, it was established that the injuries sustained by **Shahbazov Alihuseyn Iqbal oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 948 dated 26 April 2024, it was established that the injuries sustained by **Sayilli Huseynbala Ildirim oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1004 dated 26 April 2024, it was established that the injuries sustained by **Qurbanov Qurban Shafi oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 947 dated 26 April 2024, it was established that the injuries sustained by **Qarazada Ali Ramil oglu**—a closed craniocerebral injury and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 852 dated 26 April 2024, it was established that the injuries sustained by **Ahmadov Khazri Vagif oglu**—a previous closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance

possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 950 dated 26 April 2024, it was established that the injuries sustained by **Kasamanli Maqsud Shahin oglu**—a closed craniocerebral injury and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 2292 dated 12 December 2023, it was established that the injury sustained by **Karimov Anar Mahman oglu**—a closed craniocerebral injury accompanied by concussion of the brain—constitutes, according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 982 dated 26 April 2024, it was established that the injuries sustained by **Ibrahimov Ahmad Akif oglu**—mature skin scars remaining after shrapnel wounds of the lower one-third of the right upper arm and the upper one-third of the left lower leg, and foreign bodies in the soft tissues in the form of metal fragments—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 849 dated 26 April 2024, it was established that the injuries sustained by **Abdullayev Akif Davud oglu**—an S84.7 gunshot wound; residual effects of post-traumatic neuropathy of the left tibial and peroneal nerves resulting in distal paresis of the limb and moderate impairment of its function; a gunshot wound; and—

—primary and secondary surgical treatment of wounds caused by a soft-tissue defect of the left lower extremity, with a skin scar remaining after an autodermoplasty operation—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 585 dated 26 September 2023, it was established that the injuries sustained by **Abdullayev Samir Aladdin oglu**—blind shrapnel wounds of both eyeballs; traumatic cataract; visual acuity of 0.01 in the right eye and 0.5 in the left eye—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 544 dated 25 September 2023, it was established that the injuries sustained by **Aghakarimov Seymur Narbala oglu**—foreign bodies in the form of fragments in the soft tissues of the left upper arm and right lower leg; and malformed scar tissue resulting from multiple lacerated and incised wounds of the lower posterior portion of the left upper arm, the upper anterior and middle anterior portions of the

left lower leg, and the inner lower portion of the right lower leg—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 2293 dated 12 December 2023, it was established that the injuries sustained by **Allahmanov Ulvi Suleyman oglu**—blind shrapnel wounds of the left thigh and right knee regions; multiple blind shrapnel wounds of the soft tissues of the left lower extremity resulting in myogenic-arthrogenic contracture of the knee joint; a closed craniocerebral injury accompanied by concussion of the brain and autonomic vascular instability; and barotrauma of the right ear accompanied by right-sided chronic cochlear neuritis—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 2321 dated 18 December 2023, it was established that the injuries sustained by **Arzumanov Nariman Murad oglu**—right-sided acute cochlear neuritis, barotrauma of the right ear, and a closed craniocerebral injury accompanied by concussion of the brain—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 878 dated 26 April 2024, it was established that the injuries sustained by **Bayramov Firuddin Ibadat oglu**—through-and-through bullet wounds of the right lower leg and left thigh; an open, comminuted and displaced fracture of the middle one-third of the shaft of the left tibia, for which primary surgical treatment of the wounds, repositioning of the fracture fragments using the Q.A. Ilizarov method, secondary surgical treatment of the wounds, and removal of the Q.A. Ilizarov apparatus were performed; a fracture united with deformity; myogenic contracture of the lower leg; a simple liver cyst; and astheno-neurotic manifestations of somatogenic origin—were caused by a shot fired from a firearm and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 11 dated 26 April 2024, it was established that the injury sustained by **Jabbarov Tarlan Ismat oglu**—a through-and-through bullet wound of the soft tissues of the left suprascapular region, as certified on 14 September 2022 by the Military Medical Commission of the Central Military Polyclinic of the Ministry of Defence—was caused by a gunshot bullet wound and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 347 dated 28 September 2023, it was established that the injuries sustained by **Aliyev Elnur Bayram oglu**—a post-traumatic haematoma accompanied by sprain of the ligaments of the right lower ankle joint and infiltrative inflammatory changes—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 102 dated 21 December 2023, it was established that the injuries sustained by **Aliyev Mirad Elchin oglu**—a closed cranio—

—cerebral injury; burn marks in the right heel region; and scar tissue in the right lower-leg region—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 2311 dated 14 December 2023, it was established that the injuries sustained by **Asgarov Farid Mehman oglu**—a tangential shrapnel wound of the soft tissues of the right scapular region; a closed craniocerebral injury accompanied by concussion of the brain; a blind shrapnel wound of the soft tissues of the lower one-third of the right forearm; a moderately expressed organic dissociative disorder following concussion of the brain; prolonged post-traumatic stress disorder; persistent autonomic vascular instability; and post-traumatic encephalopathy manifested by chronic cephalgic and insomnia syndromes and cognitive deficit—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 810 dated 12 October 2023, it was established that the injury sustained by **Eyyubov Vusal Amiraslan oglu**—a blind gunshot wound of the outer surface of the upper one-third of the left thigh—constitutes, according to its severity, **less serious harm to health**.

According to forensic medical expert opinion No. 1020 dated 26 April 2024, it was established that the injuries sustained by **Hamidli Sabir Samid oglu**—blast trauma and a condition following primary surgical treatment of a lacerated wound of the posterior surface of the left lower leg—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 689 dated 12 October 2023, it was established that the injuries sustained by **Hamidzada Afiq Shamil oglu**—displaced fractures of the left tibia, the second metatarsal bone of the left foot, and the proximal phalanx of the first toe of the left foot—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 899 dated 26 April 2024, it was established that the injuries sustained by **Humbatov Rufat Bakhtiyar oglu**—a closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic dissociative disorder following concussion of the brain; a moderately expressed prolonged post-traumatic stress disorder; the consequences of a closed craniocerebral injury and concussion of the brain in the form of post-traumatic encephalopathy manifested by persistent autonomic vascular instability, chronic cephalgic and insomnia syndromes; post-traumatic neuropathy of the right radial nerve resulting in moderate impairment of the limb’s function and mild amyotrophy; a through-and-through shrapnel wound of the right forearm; an extensive soft-tissue defect in the middle one-third of the right forearm; open, comminuted fractures with bone defects of the middle one-third of the shafts of the forearm bones, for which primary surgical treatment of the wounds, immobilisation of the right upper extremity with a plaster splint, open reduction of the forearm bones and osteosynthesis using an external fixation device were performed; subsequent removal of the external fixation device due to non-union; united fractures following plate-and-screw osteosynthesis; amyotrophy of the right forearm

muscles; a three-centimetre shortening of the right upper extremity; an unreduced contracture of the radiocarpal and elbow joints in pronation-supination—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 44 dated 26 April 2024, it was established that the injuries sustained by **Ismayilov Elman Abbas oglu**—a closed craniocerebral injury and concussion of the brain accompanied by astheno-neurotic manifestations associated with blast trauma; blunt trauma to the left knee-cap region; and barotrauma accompanied by—

—right-sided acute cochlear neuritis—were caused by the impact of the blast wave generated by a shot fired from a firearm and, taken together, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 2310 dated 14 December 2023, it was established that the injury sustained by **Karimov Kamran Ruslan oglu**—a blind bullet wound of the soft tissues of the left thigh—constitutes, according to its severity, **less serious harm to health**.

According to forensic medical expert opinion No. 2394 dated 22 December 2023, it was established that the injuries sustained by **Mammadov Elgun Mahir oglu**—an open shrapnel fracture of the left humerus and post-traumatic neuropathy of the left median and ulnar nerves, together with a through-and-through gunshot wound of the left upper arm—constitute, according to their severity, **serious harm to health**.

According to forensic medical expert opinion No. 536 dated 25 September 2023, it was established that the injuries sustained by **Mammadkhanov Ilgar Khanlar oglu**—a through-and-through gunshot wound of the chest and left upper arm accompanied by injury to the left lung, left-sided pneumahaemothorax and comminuted fractures of the fourth through seventh ribs on the left—constitute, according to their severity, **serious harm to health**.

According to forensic medical expert opinion No. 671 dated 3 October 2023, it was established that the injuries sustained by **Musayev Elshad Ajdar oglu**—blast trauma; a previous closed craniocerebral injury; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability and cephalgic and insomnia syndromes; barotrauma; left-sided chronic cochlear neuritis; left-sided sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the left ear and 6 metres by the right ear; an elastic skin scar following a first-degree thermal burn caused by flame on the right half of the face; chronic discogenic lumbar radiculitis; L4–L5 intervertebral disc protrusion in remission; and simple myopia of the left eye—constitute, according to their severity, **serious harm to health**.

According to forensic medical expert opinion No. 2313 dated 15 December 2023, it was established that the injuries sustained by **Pashayev Alakbar Zulfuqar oglu**—a closed craniocerebral injury accompanied by concussion of the brain and autonomic vascular instability; bruising of the soft tissues of the lumbar region; and lacerated wounds of the right lower leg and the right half of the abdomen—constitute, taken together and according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 1033 dated 26 April 2024, it was established that the injury sustained by **Quliyev Narmaddin Azer oglu**—a condition following primary surgical treatment of a through-and-through gunshot wound of the soft tissues of the left shoulder girdle—was caused by a shot fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 203 dated 29 September 2023, it was established that the injuries sustained by **Quliyev Shirkhan Ibrahim oglu**—scar tissue in the posterior neck region, the flexural surface of the left elbow and the middle one-third of the left upper arm—constitute, according to their severity and due to impairment lasting more than three weeks, **less serious harm to health**.

According to forensic medical expert opinion No. 1007 dated 26 April 2024, it was established that the injury sustained by **Rahimov Ulvi Elshan oglu**—a tangential through-and-through gunshot wound of the inner surface of the middle one-third of the right upper arm, followed by two surgical procedures—was caused by a projectile fired from a firearm and, taken together, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 1008 dated 26 April 2024, it was established that the injuries sustained by **Rustamov Ali Arif oglu**—blast—

—trauma and mature skin scars remaining after a blind shrapnel wound of the right heel region—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1183 dated 26 April 2024, it was established that the injuries sustained by **Shahverdiyev Rahim Sadraddin oglu**—barotrauma; a closed craniocerebral injury; and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 966 dated 26 April 2024, it was established that the injury sustained by **Salahov Mirhuseyn Feyzulla oglu**—a through-and-through gunshot bullet wound of the soft tissues of the left upper arm and elbow joint region—was

caused by a projectile fired from a firearm and, according to its severity, constitutes **less serious harm to health**.

According to forensic medical expert opinion No. 1184 dated 26 April 2024, it was established that the injuries sustained by **Shikhiyev Elnur Ali oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 15 dated 26 April 2024, it was established that the injuries sustained by **Taghiyev Zamin Nizami oglu**—a through-and-through bullet wound of the right forearm and an open, slightly displaced fracture of the middle one-third of the shaft of the right ulna—were caused by the impact of a projectile fired from a firearm and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 964 dated 26 April 2024, it was established that the injury sustained by **Khalilov Tural Shirkhan oglu**—a bullet wound to the posterior surface of the chest—was caused by a projectile fired from a firearm and, taken together, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 965 dated 26 April 2024, it was established that the injuries sustained by **Yaqubov Ali Elkhan oglu**—injuries caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 953 dated 26 April 2024, it was established that the injuries sustained by **Jabiyev Elturan Rufat oglu**—a closed craniocerebral injury—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1685 dated 5 October 2023, it was established that the injury sustained by **Baghirov Nicat Bakhtiyar oglu**—barotrauma of the right ear accompanied by right-sided acute cochlear neuritis—constitutes, according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 194 dated 29 January 2023, it was established that the injuries sustained by **Dadashov Tural Aykhan oglu**—a closed craniocerebral injury accompanied by concussion of the brain and autonomic vascular instability—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 873 dated 26 April 2024, it was established that the injuries sustained by **Asgarov Niyamaddin Aladdin oglu**—

—a previous closed craniocerebral injury and a condition following concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 858 dated 26 April 2024, it was established that the injuries sustained by **Babazada Ilyas Ahmadagha oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 992 dated 26 April 2024, it was established that the injuries sustained by **Zeynalli Natig Qurban oglu** were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 850 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Farid Etibar oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 989 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Saddam Rajab oglu**—a previous closed craniocerebral injury; a condition following concussion of the brain; barotrauma; and a condition following bilateral acute cochlear neuritis—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1185 dated 26 April 2024, it was established that the injuries sustained by **Eminov Seyran Mahammad oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 238 dated 30 January 2023, it was established that the injuries sustained by **Naghiyev Eldaniz Umidvar oglu**—the consequences of concussion of the brain in the form of post-traumatic encephalopathy manifested by persistent autonomic vascular instability, separate persistent neurological signs, chronic cephalgic and insomnia syndromes, and cognitive deficit; a closed craniocerebral injury accompanied by moderate impairment of the central nervous system; and blind shrapnel wounds of the left half of the face, the palmar surface of the left hand, the

dorsal surface of the first finger, and the third fingers of the right hand—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 2338 dated 19 December 2023, it was established that the injuries sustained by **Asgarov Mehraj Qadir oglu**—a closed craniocerebral injury accompanied by concussion of the brain, resulting in a moderately expressed organic affective (depressive) disorder, post-concussion syndrome, autonomic vascular instability, behavioural disorders and prolonged post-traumatic stress disorder—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 1005 dated 26 April 2024, it was established that the injuries sustained by **Quliyev Musannif Mehman oglu**—a previous closed craniocerebral injury and astheno—

—neurotic manifestations; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; a blind shrapnel wound of the left shoulder girdle region; and a mature skin scar and foreign body in the soft tissues in the form of a metal fragment remaining after the wound—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 2337 dated 19 December 2023, it was established that the injuries sustained by **Abdullayev Eljan Elchin oglu**—a tangential shrapnel wound of the soft tissues of the dorsal surface of the third finger of the right hand; a blind shrapnel wound of the soft tissues of the inner surface of the left knee joint; a closed craniocerebral injury accompanied by concussion of the brain; a blind bullet wound of the soft tissues of the left inguinal region; a severely expressed organic affective (depressive) disorder following concussion of the brain; a moderately expressed prolonged post-traumatic stress disorder; autonomic vascular instability; chronic cephalgic and insomnia syndromes; post-traumatic encephalopathy manifested by cognitive deficit; and moderate impairment of the function of the central nervous system—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 882 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Vugar Ilgar oglu**—blast trauma; a previous closed craniocerebral injury; a mildly expressed organic personality disorder and behavioural disorders following concussion of the brain; a mildly expressed prolonged post-traumatic stress disorder; a closed craniocerebral injury sustained as a result of blast trauma; a mildly expressed organic affective disorder following concussion of the brain; specific mental symptoms; a previous closed craniocerebral injury; post-traumatic encephalopathy manifested by autonomic vascular paroxysms, cephalgic syndrome and insomnia; post-traumatic cervical myelopathy resulting in moderate impairment of the function of the right

upper extremity; right-sided glenohumeral arthrosis; and instability of both ankle joints—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 956 dated 26 April 2024, it was established that the injuries sustained by **Qudratzada Hidayat Tahir oglu**—a closed craniocerebral injury and neurotic manifestations following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 861 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Rustam Mahir oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 955 dated 26 April 2024, it was established that the injuries sustained by **Abdullayev Famil Sahib oglu**—a closed craniocerebral injury and neurotic manifestations following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

Page 521

According to forensic medical expert opinion No. 1186 dated 26 April 2024, it was established that the injuries sustained by **Fardili Fariz Eldar oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 979 dated 26 April 2024, it was established that the injuries sustained by **Huseynov Ali Rashid oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 02 dated 26 April 2024, it was established that the injuries sustained by **Aghayev Nagil Zahid oglu**—a shrapnel wound of the left hand; a fracture of the distal phalanx of the left thumb; a fracture of the fourth metacarpal bone; and foreign bodies in the soft tissues of the chest and fingers of the left hand—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, both separately and taken together, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 1187 dated 26 April 2024, it was established that the injuries sustained by **Abdiyev Amrah Shahin oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 960 dated 26 April 2024, it was established that the injuries sustained by **Qasimov Zulfu Sadraddin oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 452 dated 23 December 2023, it was established that the injury sustained by **Qardashov Umud Ahmad oglu**—concussion of the brain—constitutes, according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 953/1 dated 26 April 2024, it was established that the injuries sustained by **Teymurov Farhin Mahammad oglu**—a closed craniocerebral injury and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 934 dated 26 April 2024, it was established that the injury sustained by **Valiyev Izzat Vusal oglu**—a condition following primary surgical treatment of a through-and-through gunshot bullet wound of the soft tissues of the outer surface of the upper one-third of the left upper arm—was caused by a shot fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 05 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Orkhan Sari oglu**—blast trauma; a closed craniocerebral injury accompanied by autonomic vascular instability; and concussion of the brain—were caused by the impact of the blast wave resulting from a shot fired from a firearm, are consistent with having been sustained under the circumstances and on the date stated in the medical document, namely 14 September 2022, and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 04 dated 26 April 2024, it was established that the injuries sustained by **Ahmadov Qismat Balahmad oglu**—

—a through-and-through bullet wound of the upper one-third of the left lower leg, accompanied by a marginal fracture of the first metatarsal bone of the left foot, was identified. The stated injuries were caused by the impact of a bullet and fragments resulting

from a shot fired from a firearm and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 23 dated 26 April 2024, it was established that the injuries sustained by **Rahmanov Polad Adalat oglu**—a closed craniocerebral injury; a condition following concussion of the brain; and foreign bodies in the soft tissues of the left temporal and left cheek regions—resulted from blast trauma and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 834 dated 26 April 2024, it was established that the injuries sustained by **Khasmammadov Khalil Abbas oglu**—a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; and a satisfactorily united fracture of the head and middle one-third of the second metacarpal bone of the right hand—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 972 dated 26 April 2024, it was established that the injuries sustained by **Badalov Mahammad Miraddin oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 871 dated 26 April 2024, it was established that the injuries sustained by **Amirov Farid Taleh oglu**—a previous closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 994 dated 26 April 2024, it was established that the injuries sustained by **Yusifov Amir Suleyman oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 2357 dated 20 December 2023, it was established that the injury sustained by **Ismayilov Nurlan Nadir oglu**—a closed craniocerebral injury accompanied by concussion of the brain—constitutes, according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 864 dated 26 April 2024, it was established that the injuries sustained by **Abushov Yadulla Rahib oglu**—blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; barotrauma; a condition following bilateral acute cochlear neuritis; bilateral sensorineural

hearing loss, with whispered speech heard from a distance of 5 metres by both ears—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 08 dated 26 April 2024, it was established that the injuries sustained by **Isayev Idris Suleyman oglu**—blast trauma; a closed craniocerebral injury accompanied by autonomic vascular instability; and concussion of the brain—were caused by the impact of the blast wave resulting from a shot fired from a firearm—

Page 523

—and are consistent with having been sustained under the circumstances and on the date stated in the medical document, namely 13 September 2022; according to their severity, they constitute **less serious harm to health**.

According to forensic medical expert opinion No. 56 dated 26 April 2024, it was established that the injuries sustained by **Qlinchayev Anar Mirzali oglu**—blast trauma; a closed craniocerebral injury; autonomic vascular instability following concussion of the brain; bilateral chronic cochlear neuritis; bilateral sensorineural hearing loss; and a shrapnel wound of the anterior surface of the middle one-third of the left lower leg—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 18 dated 26 April 2024, it was established that the injuries sustained by **Mammadli Jeyhun Sadig oglu**—a closed craniocerebral injury; autonomic vascular instability following concussion of the brain; a condition following bilateral acute cochlear neuritis; and bilateral sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the right ear and 5 metres by the left ear—resulted from blast trauma and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 22 dated 26 April 2024, it was established that the injuries sustained by **Orujov Ilgar Rahman oglu**—a closed craniocerebral injury; a condition following concussion of the brain; and a blind bullet wound of the left shoulder girdle not penetrating the thoracic cavity—resulted from blast trauma and the impact of a bullet fired from a firearm and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1189 dated 26 April 2024, it was established that the injuries sustained by **Shakarov Misir Mehman oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 848 dated 26 April 2024, it was established that the injuries sustained by **Aghazada Yahya Alasgar oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1190 dated 26 April 2024, it was established that the injuries sustained by **Baghirov Tural Kamaladdin oglu**—a closed craniocerebral injury and a condition following concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 881 dated 26 April 2024, it was established that the injuries sustained by **Jamalov Jeyhun Fikrat oglu**—a brain injury; astheno-neurotic manifestations following concussion of the brain; a closed craniocerebral injury sustained as a result of blast trauma; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 876 dated 26 April 2024, it was established that the injuries sustained by **Khalilzada Ahad Chingiz oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties—

—and, according to their severity, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 09 dated 26 April 2024, it was established that the injuries sustained by **Isgandarli Kamran Suleyman oglu**—blast trauma; a closed craniocerebral injury accompanied by autonomic vascular instability and concussion of the brain; and sprain of the ligaments of the left ankle joint—were caused by the impact of the blast wave resulting from a shot fired from a firearm, are consistent with having been sustained under the circumstances and on the date stated in the medical document, namely 14 September 2022, and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 932 dated 26 April 2024, it was established that the injuries sustained by **Masiyev Islam Maharram oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1031 dated 23 December 2023, it was established that the injuries sustained by **Nuraliyev Rovshan Eyvaz oglu**—a closed craniocerebral injury and autonomic vascular instability following concussion of the brain—constitute, taken together and according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 1000 dated 26 April 2024, it was established that the injuries sustained by **Safiyev Jalal Nazim oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 20 dated 26 April 2024, it was established that the injuries sustained by **Sultanov Yagir Shahmardan oglu**—blast trauma; a closed craniocerebral injury; and astheno-neurotic manifestations following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1002 dated 26 April 2024, it was established that the injuries sustained by **Suleymanov Bahruz Akif oglu**—blast trauma; a previous closed craniocerebral injury; and post-concussion autonomic vascular dystonia—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1013 dated 26 April 2024, it was established that the injuries sustained by **Pashayev Elnur Havasat oglu**—blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; barotrauma; bilateral chronic cochlear neuritis; and tinnitus—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 19 dated 26 April 2024, it was established that the injuries sustained by **Quliyev Parviz Aydamir oglu**—a closed craniocerebral injury; astheno-neurotic manifestations and autonomic vascular instability following concussion of the brain; a through-and-through bullet wound of the lower one-third of the left upper arm and the left half of the lumbar region; an open marginal avulsion fracture of the distal metaphysis of the left humerus; and a skin scar—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties—

—by the impact of the blast wave and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 1021 dated 26 April 2024, it was established that the injuries sustained by **Asgarzada Anar Radim oglu**—a previous closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1480 dated 28 October 2022, it was established that the injury sustained by **Aliyev Ruslan Rasul oglu**—a closed craniocerebral injury accompanied by concussion of the brain—constitutes, according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 1199 dated 26 April 2024, it was established that the injuries sustained by **Eldarov Elchin Aslan oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 195 dated 29 January 2024, it was established that the injuries sustained by **Mansurov Nabi Mehman oglu**—a closed craniocerebral injury accompanied by persistent autonomic vascular instability following concussion of the brain—constitute, taken together and according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 1036 dated 26 April 2024, it was established that the injuries sustained by **Mikayilli Jamaladdin Ilyas oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1026 dated 26 April 2024, it was established that the injuries sustained by **Hasanov Boyukagha Abdulla oglu**—blast trauma; a previous closed craniocerebral injury; a condition following concussion of the brain; right-sided discogenic cervical radiculitis accompanied by sensory, motor and trophic disorders; barotrauma; and a condition following bilateral acute cochlear neuritis—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1031 dated 26 April 2024, it was established that the injuries sustained by **Ibrahimov Seymur Vali oglu**—a previous closed craniocerebral injury; autonomic vascular instability and astheno-neurotic manifestations following concussion of the brain—were caused by the impact of the blast wave generated by

the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 807 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Amin Eldar oglu**—blunt trauma to the vertex of the head, the waist and the left knee joint; contusion of the soft tissues; a lacerated wound of the dorsum of the left hand; and post-traumatic swelling of the left knee joint—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 971 dated 26 April 2024, it was established that the injuries sustained by **Bakirov Rafig Salim oglu**—a previous closed craniocerebral injury and autonomic vascular—

—instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1037 dated 26 April 2024, it was established that the injuries sustained by **Karimov Mammadtaghi Yashar oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 24 dated 10 January 2024, it was established that the injuries sustained by **Vasalov Ilkin Mammad oglu**—scar tissue remaining after surgical treatment of the left lower leg and the left foot; scar tissue in the left heel region; and open displaced fractures of the left tibia and the navicular and calcaneal bones—constitute, taken together and according to their severity, **serious harm to health posing a danger to life**.

According to forensic medical expert opinion No. 74 dated 26 April 2024, it was established that the injuries sustained by **Ilyaszada Farid Shahin oglu**—injuries caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 76 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Safa Farman oglu**—bilateral tubo-otitis—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 91 dated 26 April 2024, it was established that the injury sustained by **Shamiyev Alish Ahmad oglu**—a tangential gunshot wound of the soft tissues of the right upper arm—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 95 dated 26 April 2024, it was established that the injuries sustained by **Hasanov Saleh Namig oglu**—extensive lacerated and incised shrapnel wounds of the upper one-third of the posterior surface of the right forearm—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 96 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Farid Farhad oglu**—combat trauma; a blind shrapnel wound of the right elbow joint; incomplete dislocation of the lateral condyle of the humerus; a lacerated wound of the neck region; an arachnoid cyst of the right parietal lobe of the brain; and a condition following mild neurotic reactions associated with the events of 13 September 2022—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 103 dated 26 April 2024, it was established that the injuries sustained by **Ramazanov Tabriz Qudrat oglu**—shrapnel wounds of the dorsal surface of the right hand, the second finger of the left hand, burn areas, and multiple shrapnel wounds of the facial and scalp regions—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

Page 527

According to forensic medical expert opinion No. 79 dated 26 April 2024, it was established that the injuries sustained by **Mirzaliyev Sanan Radil oglu**—blind shrapnel wounds of both forearms and the hand regions—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 80 dated 26 April 2024, it was established that the injuries sustained by **Qurbanov Qurban Fazil oglu**—an infected shrapnel wound of the right knee region and a wound of the left forearm region—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 1200 dated 26 April 2024, it was established that the injury sustained by **Zamanov Agshin Rahim oglu**—a blind shrapnel

wound of the infraorbital region of the left eye—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 1038 dated 26 April 2024, it was established that the injuries sustained by **Talibov Hasil Matlab oglu**—right-sided tubo-otitis—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 83 dated 26 April 2024, it was established that the injuries sustained by **Amrahli Zamin Zabil oglu**—a horizontal tear of the lateral meniscus of the left knee joint—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 97 dated 26 April 2024, it was established that the injuries sustained by **Nazarov Bahruz Sattar oglu**—blast trauma; a previous closed craniocerebral injury; a condition following concussion of the brain; mild hypermetropia of both eyes with refraction of 0.5 D and visual acuity of 1.0; and a condition following peripheral chorioretinal degeneration of the left eye—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 108 dated 26 April 2024, it was established that the injuries sustained by **Zulfuqarov Israfil Elizamin oglu**—combat trauma; blind shrapnel wounds of various regions of the body; an incomplete fracture of the acromial process of the right scapula; and right-sided aerootitis—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 109 dated 26 April 2024, it was established that the injuries sustained by **Farzullayev Amrah Yashar oglu**—combat trauma; a blind shrapnel wound of the left lower leg; a chronic, non-displaced open fracture of the distal end of the fibula—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 87 dated 26 April 2024, it was established that the injuries sustained by **Ahmadov Shahin Mahir oglu**—combat trauma; a lacerated wound of the knee region of the right lower extremity; an extensive intermuscular haematoma of the thigh region; and an incomplete fracture of the anterior wall of the right kneecap—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties—

—generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 86 dated 26 April 2024, it was established that the injuries sustained by **Jabrayilov Zeynal Eldaniz oglu**—combat trauma and a blind bullet wound of the right thigh—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 88 dated 26 April 2024, it was established that the injuries sustained by **Hasanli Seymur Faday oglu**—multiple blind shrapnel wounds of the anterior surface of the left lower leg; a blind shrapnel wound of the upper one-third of the posterior surface of the right thigh; a condition following primary surgical treatment of multiple shrapnel wounds of the body; post-traumatic orchitis; and multiple foreign bodies—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 89 dated 26 April 2024, it was established that the injuries sustained by **Feyzullayev Rasul Rufat oglu**—a through-and-through bullet wound of the right foot and a displaced comminuted fracture of the first metatarsal bone of the right foot—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 94 dated 26 April 2024, it was established that the injuries sustained by **Najafli Togrul Mehdi oglu**—a through-and-through bullet wound of the right upper arm; rupture of the soft tissues and of the biceps muscle of the upper arm; and mild neurotic reactions—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 93 dated 26 April 2024, it was established that the injury sustained by **Mammadov Rahib Rovshan oglu**—a blind shrapnel wound of the left forearm—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 84 dated 26 April 2024, it was established that the injuries sustained by **Mayilli Ibrahim Rahim oglu**—barotrauma; left-sided tubo-otitis; and a lacerated and abraded wound on the inner surface of the left hand—were caused by the impact of primary or secondary fragments generated by the explosion of a substance

possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 819 dated 26 April 2024, it was established that the injuries sustained by **Azizov Khalid Ilham oglu**—blast injury; residual effects of post-traumatic neuropathy of the right ulnar nerve resulting in slight impairment of limb function; mature skin scars following shrapnel wounds of both forearms and the right elbow region; a foreign body in the right forearm in the form of a metal fragment; and a mature skin scar following a small shrapnel wound of the left half of the face—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 978 dated 26 April 2024, it was established that the injuries sustained by **Nazarli Vugar Asim oglu**—lacerated and incised wounds at the level of the proximal phalanges of the fourth and fifth fingers of the right hand—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties—

—and, according to their severity, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 973 dated 26 April 2024, it was established that the injuries sustained by **Rzaquliyev Ceyhun Hakimagha oglu**—follicular angina; barotrauma; bilateral chronic cochlear neuritis; the ability to hear whispered speech from a distance of 6 metres with both ears; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; and pyoderma of the left kidney region—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 996 dated 26 April 2024, it was established that the injuries sustained by **Samadov Ehtiram Garib oglu**—barotrauma; a condition following bilateral acute cochlear neuritis; bilateral sensorineural hearing loss, with whispered speech heard from a distance of 3.5 metres by the left ear and 4 metres by the right ear; and a skin scar following shrapnel wounds of the first, second and third fingers of the left hand and of the right subclavicular region—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 854 dated 26 April 2024, it was established that the injuries sustained by **Bashirov Rashad Elkhan oglu**—blast trauma; bilateral chronic cochlear neuritis; persistent severe bilateral sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by both ears; a mature skin scar following a blind shrapnel wound of the right knee region; and foreign bodies in the soft tissues in the form of metal

fragments—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 817 dated 26 April 2024, it was established that the injuries sustained by **Alizada Kamran Joshgun oglu**—a closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic affective (depressive) disorder following concussion of the brain; a moderately expressed prolonged post-traumatic stress disorder; a previous closed craniocerebral injury; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability, chronic cephalgic and insomnia syndromes and cognitive deficit; and mature skin scars and a foreign body in the soft tissues in the form of a metal fragment remaining after blind shrapnel wounds of the posterior surfaces of both upper arms and of the left heel region—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 1191 dated 26 April 2024, it was established that the injuries sustained by **Jabrayilov Yasin Eldaniz oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 987 dated 26 April 2024, it was established that the injuries sustained by **Hamidov Jamal Kamal oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

Page 530

According to forensic medical expert opinion No. 1119 dated 26 April 2024, it was established that the injury sustained by **Tahmazov Samir Teymur oglu**—a bullet wound of the thigh region of the left leg—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 855 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Mazahir Karim oglu**—blast trauma; barotrauma; and blunt trauma to the chest region—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1193 dated 26 April 2024, it was established that the injuries sustained by **Avazov Seymur Qocahmad oglu**—burn injuries to

the face and neck region—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1194 dated 26 April 2024, it was established that the injuries sustained by **Shakarov Ceyhun Taleh oglu**—a closed craniocerebral injury and a condition following concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1195 dated 26 April 2024, it was established that the injuries sustained by **Babayev Nabi Tofig oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1196 dated 26 April 2024, it was established that the injuries sustained by **Quliyev Rashad Murshud oglu**—a closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1198 dated 26 April 2024, it was established that the injuries sustained by **Mikayilli Asim Rauf oglu**—a closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 32 dated 26 April 2024, it was established that the injuries sustained by **Jafarov Faig Javanshir oglu**—shrapnel wounds of the head, left shoulder girdle and right lower extremity; a shrapnel wound of the left half of the chest penetrating the pleural cavity and accompanied by left-sided haemopneumothorax; barotrauma resulting in right-sided acute cochlear neuritis; a closed craniocerebral injury sustained as a result of blast trauma; and astheno-neurotic manifestations following concussion of the brain—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 911 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Shahlar Azay oglu**—blast trauma; residual effects of post-traumatic neuropathy of the left tibial and sural nerves resulting in slight impairment of limb function; a previous closed craniocerebral injury; and—

—autonomic vascular dystonia following concussion of the brain; a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; an open, slightly displaced fracture of the middle one-third of the right tibia; blind shrapnel wounds of the right lower leg, left thigh, left elbow and left forearm; sufficiently united fractures following primary surgical treatment of the wounds and osteosynthesis using the Q.A. Ilizarov method; foreign bodies in the soft tissues in the form of metal fragments; right-sided chronic cochlear neuritis resulting from barotrauma; persistent right-sided sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by the right ear and 6 metres by the left ear—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 946 dated 26 April 2024, it was established that the injuries sustained by **Safarov Zakir Javanshir oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 949 dated 26 April 2024, it was established that the injuries sustained by **Babazada Huseyn Rahim oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 919 dated 26 April 2024, it was established that the injuries sustained by **Yoldashli Kanan Bakhtiyar oglu**—a closed craniocerebral injury sustained as a result of blast trauma; a severely expressed organic personality disorder following concussion of the brain, accompanied by significant behavioural disorders, depressive manifestations, suicidal thoughts and reduced cognitive functions; a moderately expressed prolonged post-traumatic stress disorder; a through-and-through bullet wound of the right hand, left upper arm and right half of the jaw; traumatic amputation of the proximal phalanx of the first finger of the right hand at the level of its middle one-third; a fracture with a bone and soft-tissue defect of the proximal phalanx of the third finger; a lacerated wound of the lateral surface of the second finger, for which primary surgical treatment, stump formation and fixation of the third finger with Kirschner wires were performed; a stump at the level of the middle one-third of the proximal phalanx of the first finger; deformation of the proximal phalanx of the third finger with a bone defect and a united fracture, together with non-functional ankylosis; cicatricial tendon-sheath contracture of the second, third, fourth and fifth fingers; foreign bodies in the soft tissues in the form of metal fragments; a previous closed craniocerebral injury sustained as a result of blast trauma; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability and chronic cephalgic and insomnia syndromes; post-traumatic neuropathy of the right radial and median nerves, resulting in paresis of the extensor muscles

of the limb and moderate functional impairment; bilateral chronic tubo-otitis; bilateral conductive hearing loss, with whispered speech heard from a distance of 4 metres by both ears—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 951 dated 26 April 2024, it was established that the injuries sustained by **Abdulkarimov Khagani Atraf oglu**—blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—

—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 908 dated 26 April 2024, it was established that the injuries sustained by **Dadashov Elmir Idris oglu**—F06.5 organic dissociative disorder of moderate severity following a closed craniocerebral injury and concussion of the brain sustained as a result of blast trauma; F43.1 prolonged post-traumatic stress disorder of moderate severity; a previous closed craniocerebral injury; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability, chronic cephalgic and insomnia syndromes and cognitive deficit, accompanied by moderate impairment of the function of the central nervous system; right-sided chronic cochlear neuritis resulting from blast trauma; persistent severe right-sided sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by the right ear and 6 metres by the left ear; a through-and-through bullet wound of the middle one-third of the left lower leg, for which primary surgical treatment and autodermoplasty were performed due to a soft-tissue defect; and a mature skin scar following that operation—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 923 dated 26 April 2024, it was established that the injuries sustained by **Zeynalov Sahib Huseynqulu oglu**—a closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic affective (depressive) disorder following concussion of the brain, accompanied by behavioural disorders; a moderately expressed prolonged post-traumatic stress disorder; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1027 dated 26 April 2024, it was established that the injuries sustained by **Yasinov Elmaddin Ibrahim oglu**—a condition

following left-sided acute cochlear neuritis caused by blast trauma; left-sided sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the left ear and 6 metres by the right ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1192 dated 26 April 2024, it was established that the injuries sustained by **Namazov Eldaniz Furuddin oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 384 dated 23 February 2024, it was established that the injuries sustained by **Aliyev Hasan Yarmammad oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations and autonomic vascular instability following concussion of the brain; barotrauma; bilateral cochlear neuritis; persistent severe bilateral sensorineural hearing loss; blast trauma; and blind shrapnel wounds of the facial region and both cheeks—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties—

—and, taken together and according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 900 dated 26 April 2024, it was established that the injuries sustained by **Habibov Matlab Fizuli oglu**—blast trauma; traumatic amputation of the left lower leg at the level of the lower one-third; a blind shrapnel wound of the anterior surface of the neck; multiple small blind shrapnel wounds of the left half of the chest; primary surgical treatment of the wounds; stump formation; and formation of a re-amputation stump after surgery—together with a closed craniocerebral injury and autonomic vascular instability following concussion of the brain, were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 61 dated 26 April 2024, it was established that the injury sustained by **Yusifov Vugar Jalal oglu**—a condition following surgical treatment of a through-and-through bullet wound of the soft tissues of the right side of the lumbar region not penetrating the cavity—was caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 41 dated 26 April 2024, it was established that the injuries sustained by **Yusifov Samir Jahangir oglu**—blast trauma; a closed

craniocerebral injury and concussion of the brain accompanied by astheno-neurotic manifestations; sprain of the ligaments of the left radiocarpal joint; and contusion of the soft tissues of the left knee region—were caused by the impact of the blast wave generated by a shot fired from a firearm and, taken together and according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 893 dated 26 April 2024, it was established that the injuries sustained by **Javadov Ravan Shamsaddin oglu**—a through-and-through bullet wound with an extensive soft-tissue defect in the upper one-third of the left thigh; an open comminuted fracture with a bone defect in the upper one-third of the shaft of the femur; complete transection of the sciatic nerve with a defect; and a lacerated wound of the left heel region—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 816 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Maqsud Yulat oglu**—blast trauma; a penetrating wound of the left eyeball; traumatic mydriasis; traumatic cataract; haemophthalmos; primary surgical treatment of the wound due to an intraocular foreign body; aspiration of the lens; PPV; removal of the foreign body; implantation of an intraocular lens; LFK; and C3F8 gas tamponade; post-operative keratopathy and artephakia resulting in reduction of visual acuity of the left eye to the level of hand movement, without correction; two small metal fragments in the left mandibular body and angle region; one small metal fragment in the left upper lip; left-sided chronic cochlear neuritis; left-sided sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the left ear and 6 metres by the right ear; a previous closed craniocerebral injury; autonomic vascular dystonia and astheno-neurotic manifestations following concussion of the brain; mature skin scars remaining after a blind shrapnel wound of the right upper arm; foreign bodies in the soft tissues in the form of metal fragments; chronic paraproctitis; and reduction of visual acuity of the right eye to 0.3 as a result of multiple subepithelial corneal opacities following viral keratoconjunctivitis, without correction—

—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health resulting in a substantial permanent loss of not less than one-third (35%) of general capacity for work**.

According to forensic medical expert opinion No. 898 dated 26 April 2024, it was established that the injuries sustained by **Akbarov Namig Shakhsaddin oglu**—blast trauma; a penetrating wound of the right eye; a full-thickness laceration of the cornea and sclera; prolapse of intraocular contents; an intraocular foreign body; evisceration of the right eye due to a lower-eyelid defect; formation of a stump and repair of the lower-eyelid defect; a mature

skin scar of the lower eyelid; complete loss of visual acuity in the right eye, with visual acuity of the left eye being 1.0; a mature skin scar remaining after primary surgical treatment of a shrapnel wound of the soft tissues of the right zygomatic region; small foreign bodies in the soft tissues of both cheeks in the form of metal fragments; right-sided chronic cochlear neuritis; persistent severe right-sided sensorineural hearing loss, with whispered speech not heard by the right ear and heard from a distance of 6 metres by the left ear; a lacerated wound of the right auricle, for which resection and otoplastic surgery of the upper pole of the right auricle were performed, leaving a mature skin scar; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; and a skin scar remaining after a fragmented gunshot wound of the right auricle—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health resulting in a substantial permanent loss of not less than one-third (35%) of general capacity for work**.

According to forensic medical expert opinion No. 1034 dated 26 April 2024, it was established that the injuries sustained by **Rahimov Kanan Alhaddin oglu**—blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; bilateral cochlear neuritis resulting from blast trauma; bilateral sensorineural hearing loss; and the ability to hear whispered speech from a distance of 5 metres by both ears—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 118 dated 26 April 2024, it was established that the injuries sustained by **Valiyev Togrul Zakara oglu**—right-sided chronic cochlear neuritis; severe right-sided sensorineural hearing loss; and the ability to hear whispered speech from a distance of 5 metres by the right ear and 6 metres by the left ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 860 dated 26 April 2024, it was established that the injuries sustained by **Allahverdiyev Baba Yashar oglu**—a through-and-through bullet wound of the right foot and sufficiently united fractures of the second metatarsal and middle cuneiform bones—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 102 dated 26 April 2024, it was established that the injuries sustained by **Malikov Samir Inqilab oglu**—a blind shrapnel wound of the upper one-third of the left forearm resulting in post-traumatic neuropathy of the ulnar nerve, with a foreign body—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 107 dated 26 April 2024, it was established that the injuries sustained by **Jafarov Alasgar Alakbar oglu**—barotrauma; mild concussion of the brain; simple hypermetropic astigmatism of both eyes with a refraction of 0.5 D; visual acuity of 0.9, corrected to 1.0—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 105 dated 26 April 2024, it was established that the injuries sustained by **Qarayev Azizagha Sanan oglu**—combat trauma; a wound of the left upper arm causing rupture of the left brachial artery and injury to the left elbow nerve, for which primary surgical treatment and removal of the fragment were performed—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 1022 dated 26 April 2024, it was established that the injuries sustained by **Abdullayev Azer Uzeyir oglu**—post-traumatic vertebrogenic lumbalgia in remission; blunt trauma to the lumbar region; and sprain of the left knee-joint ligaments—were caused by the impact of a hard blunt object and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 45 dated 26 April 2024, it was established that the injuries sustained by **Murtuzlu Elmin Nazim oglu**—barotrauma; a condition following left-sided acute cochlear neuritis; blast trauma; a closed craniocerebral injury; and a condition following concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 892 dated 26 April 2024, it was established that the injuries sustained by **Batiyev Jeyhun Jamal oglu**—a through-and-through bullet wound of the right parietal region not penetrating the cranial cavity; an open craniocerebral injury; severe haemorrhagic contusion of the right parietal lobe of the brain; a depressed comminuted fracture of the right parietal bone; and left-sided hemiparesis, for which craniectomy of the right parietal bone, secondary surgical treatment of the wound, and removal of foreign bodies in the form of bone fragments were performed, leaving a four-centimetre unrepaired bone defect in the parietal region; the consequences of a gunshot wound and an open craniocerebral injury, manifested by severe contusion of the right parietal lobe and central paresis of the left upper extremity; moderate impairment of the function of the central nervous system; a previous closed craniocerebral injury; and astheno-neurotic manifestations following concussion of the brain—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 1029 dated 26 April 2024, it was established that the injuries sustained by **Azizov Jeyhun Azer oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 922 dated 26 April 2024, it was established that the injuries sustained by **Samadli Samad Bakhtiyar oglu**—a closed craniocerebral injury sustained as a result of blast trauma; and a moderately expressed organic personality disorder following concussion of the brain—

—together with a moderately expressed prolonged post-traumatic stress disorder; a previous closed craniocerebral injury; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability and chronic cephalgic and insomnia syndromes; bilateral chronic cochlear neuritis resulting from blast trauma; bilateral sensorineural hearing loss, with whispered speech heard from a distance of 3.5 metres by the left ear and 4.5 metres by the right ear; a small skin scar remaining after a lacerated wound of the left thumb and occipital region sustained as a result of blast trauma; sufficiently united fractures following osteosynthesis with Kirschner wires for a fracture of the right acromioclavicular joint; impaired function; a slightly displaced fracture of the anterior and lateral walls of the right frontal sinus; and non-displaced united fractures of the right zygomatic bone and the greater wing of the sphenoid bone—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 925 dated 26 April 2024, it was established that the injuries sustained by **Asgarov Qara Yashar oglu**—a sharply expressed organic personality change; recurring decompensations; severe behavioural disturbances; reduction of cognitive functions; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 98 dated 26 April 2024, it was established that the injuries sustained by **Fataliyev Rahil Mubariz oglu**—a through-and-through bullet wound of the first and second interdigital spaces of the left foot, with the condition following removal of the projectile—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 75 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Asif Ahmad oglu**—an open wound of the right eyelid and orbital region—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 914 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Vidadi Fariz oglu**—blast trauma; a previous closed craniocerebral injury; post-traumatic encephalopathy following concussion of the brain, manifested by diffuse neurological signs; astheno-neurotic manifestations following concussion of the brain; barotrauma resulting in left-sided chronic cochlear neuritis; persistent severe left-sided sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the left ear and 6 metres by the right ear—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 30 dated 16 January 2024, it was established that the injuries sustained by **Mammadrzayev Asiman Ismikhan oglu**—barotrauma; a condition following right-sided cochlear neuritis; a closed craniocerebral injury sustained as a result of blast trauma; a condition following concussion of the brain; keratopathy of both eyes resulting from blast trauma; and reduction of visual acuity to 0.4 in the right eye, uncorrected, while visual acuity of the left eye was 1.0—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity—

—and, according to their severity, constitute **less serious harm to health resulting in a prolonged impairment of health**.

According to forensic medical expert opinion No. 888 dated 26 April 2024, it was established that the injuries sustained by **Rzayev Madat Badal oglu**—F43.1 severe prolonged post-traumatic stress disorder; a depressive episode accompanied by psychotic manifestations; F06.3 and F07.2; a closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic dissociative disorder following concussion of the brain; post-concussion syndrome; autonomic vascular instability; stuttering and behavioural disorders; right-sided chronic cochlear neuritis; and persistent severe right-sided sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by the right ear and 6 metres by the left ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 86 dated 28 January 2023, it was established that the injuries sustained by **Suleymanov Elvin Elchin oglu**—bilateral chronic cochlear neuritis and bilateral sensorineural hearing loss, with whispered speech heard from a

distance of 5 metres by both ears—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 732 dated 15 December 2023, it was established that the injuries sustained by **Ahmadov Mushfig Gulbala oglu**—a penetrating gunshot wound of the abdominal cavity accompanied by paraplegia of the lower extremities and injury to the transverse colon, with damage to the first, second, third, fourth and fifth vertebrae—constitute, according to their severity, **serious harm to health**.

According to forensic medical expert opinion No. 218 dated 29 September 2023, it was established that the injuries sustained by **Muradov Ravan Rovshan oglu**—one lacerated and incised wound in the region of the upper eyelid of the right eye and the right eyebrow arch—constitute, according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 1039 dated 15 December 2023, it was established that the injury sustained by **Aghazada Asif Agshin oglu**—a lacerated and crushed wound of the dorsal surface of the left hand—constitutes, taken together and according to its severity, **minor harm to health**.

According to forensic medical expert opinion No. 1169 dated 15 December 2023, it was established that the injuries sustained by **Nabiyev Oruj Mahmud oglu**—blunt trauma to the head and chest and contusion of the left foot—constitute, taken together and according to their severity, **minor harm to health**.

According to forensic medical expert opinion No. 807/1 dated 26 April 2024, it was established that the injury sustained by **Suleymanov Ulvi Ildirim oglu**—post-traumatic contusion of the right hand—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 808/1 dated 26 April 2024, it was established that the injuries sustained by **Huseynov Elmir Shakir oglu**—blast trauma and a shrapnel wound of the right eye—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1173 dated 26 April 2024, it was established that the injuries sustained by **Alakbarov Nasib Telman oglu**—blunt trauma to the right foot and heel regions—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 853 dated 26 April 2024, it was established that the injuries sustained by **Bunyatov Ismayil Gahraman oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; a previous closed craniocerebral injury; and autonomic vascular dystonia following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 34 dated 26 April 2024, it was established that the injuries sustained by **Gonjiyev Parviz Khanbala oglu**—blast trauma; small shrapnel wounds of the soft tissues of the right upper arm and right thigh; and deviation of the nasal septum causing moderate impairment of nasal breathing—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 111 dated 26 April 2024, it was established that the injuries sustained by **Ashurov Ilham Aminagha oglu**—a blind bullet wound of the left thigh and a foreign body in the form of a bullet in the inner-posterior surface of the upper one-third of the left thigh—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 917 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Rasim Nijat oglu**—barotrauma; bilateral chronic cochlear neuritis; bilateral sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by both ears; and mature skin scars remaining after multiple incised wounds of the anterior and posterior surfaces of the left forearm—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 31 dated 26 April 2024, it was established that the injuries sustained by **Aghjabayov Tural Tabriz oglu**—blast trauma; a blind shrapnel wound of the right infraclavicular region not penetrating the thoracic cavity; multiple blind shrapnel wounds of the lower one-third of the right thigh; left-sided acute cochlear neuritis resulting from barotrauma; and deviation of the nasal septum causing slight impairment of nasal breathing—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 30 dated 26 April 2024, it was established that the injuries sustained by **Hajiyev Roman Habil oglu**—a closed, comminuted and displaced fracture of the fifth metatarsal bone of the right foot—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a

substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 915 dated 26 April 2024, it was established that the injuries sustained by **Qurbanzada Kamran Musafir oglu**—a moderately expressed organic affective disorder accompanied by depressive symptoms and suicidal thoughts; blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; left-sided chronic cochlear neuritis; tinnitus; left-sided sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the left ear and 6 metres by the right ear; simple myopic astigmatism of the left eye, Em and M 0.75 D, resulting in reduction of visual acuity to 0.5, corrected to 1.0, with visual acuity of the right eye being 1.0; and metal fragments in the soft tissues of the facial region—

—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 903 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Jabir Dunyamali oglu**—a gunshot wound; traumatic injury to the left median and ulnar nerves at the level of the lower one-third of the upper arm and to the sensory branch of the left radial nerve at the level of the first metacarpal bone, resulting in sensory and motor impairment and moderate functional impairment; a bullet wound of the left upper arm; a bleeding pseudoaneurysm of the left brachial artery, for which excision of the pseudoaneurysm and autovenoplasty were performed; and mature post-operative skin scars accompanied by slight impairment of blood circulation and function—were caused by a shot fired from a firearm and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 113 dated 26 April 2024, it was established that the injuries sustained by **Huseynov Huseyn Mazahir oglu**—lacerated wounds of the forehead, temporal region, both hands and right lower leg; contusion of the soft tissues; and tension-type headache—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 112 dated 26 April 2024, it was established that the injuries sustained by **Rzayev Kanan Asgar oglu**—blunt trauma to the lumbar-sacral region and contusion of the soft tissues—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1023 dated 26 April 2024, it was established that the injuries sustained by **Akbarov Nijat Zakir oglu**—blast trauma; a closed

craniocerebral injury; bilateral sensorineural hearing loss following cochlear neuritis, with whispered speech heard from a distance of 3 metres by the right ear and 4 metres by the left ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 862 dated 26 April 2024, it was established that the injuries sustained by **Aghalarov Orman Nazir oglu**—a condition following right-sided acute cochlear neuritis resulting from barotrauma, with whispered speech heard from a distance of 6 metres by both ears; blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; a mature skin scar remaining after a through-and-through shrapnel wound of the soft tissues of the occipital region; a horizontal tear of the lateral meniscus of the right knee joint; and a parameniscal cyst—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 24 dated 26 April 2024, it was established that the injuries sustained by **Hajiyev Haji Firidun oglu**—blast trauma; multiple small blind shrapnel wounds of both gluteal regions, both thighs and the posterior surface of the lower leg; barotrauma; right-sided chronic cochlear neuritis; severe right-sided sensorineural hearing loss; and astheno-neurotic manifestations—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

Page 540

According to forensic medical expert opinion No. 988 dated 26 April 2024, it was established that the injuries sustained by **Hasanaliyev Surat Sabir oglu**—blast trauma; a mature skin scar remaining after a shrapnel wound of the inner surface of the lower one-third of the left lower leg; and a foreign body in the soft tissues in the form of a metal fragment—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 901 dated 26 April 2024, it was established that the injuries sustained by **Idrisov Kamran Malik oglu**—blast trauma; residual effects of post-traumatic neuropathy of the right tibial and sural nerves in the form of sensory and motor disturbances, with moderate impairment of function; a previous closed craniocerebral injury; autonomic vascular instability and astheno-neurotic manifestations following concussion of the brain; barotrauma; a condition following right-sided acute cochlear neuritis; whispered speech heard from a distance of 5 metres by the right ear and 6 metres by the left ear; mature skin scars remaining after blind shrapnel wounds of the right side of the neck, right forearm, right thigh and posterior surface of the lower leg; and foreign bodies in

the soft tissues in the form of metal fragments—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 811 dated 26 April 2024, it was established that the injuries sustained by **Najafov Hidayat Ramiz oglu**—gunshot and blast wounds resulting in a through-and-through skin-defect wound of the lower one-third of the right upper arm and the middle one-third of the right forearm and lower leg; a blind bullet wound of the upper left thigh and lower one-third of the left lower leg; blind shrapnel wounds of the left knee, left lower leg, upper one-third of the right thigh, right upper arm and right forearm; a lacerated wound of the inner surface of the lower one-third of the left thigh; a lacerated wound of the right half of the scalp; open, comminuted, bone-defect, displaced fractures of the middle one-third of the shafts of the right forearm bones; open, comminuted, intra-articular, bone-defect, displaced fractures of the distal metaphyses of the left lower-leg bones, for which primary surgical treatment of the wounds, removal of the bullet, osteosynthesis of the fracture fragments by the Q.A. Ilizarov method, dismantling of the Q.A. Ilizarov apparatus on the right forearm, open repositioning of the fracture fragments, plate-and-screw osteosynthesis, removal of the Q.A. Ilizarov apparatus from the left lower leg, open repositioning of the fracture fragments and fixation with metal plates and screws were performed; malunited fractures; supination-pronation contracture of the right elbow joint following radio-ulnar synostosis; a defect of the articular surface of the tibia in the ankle joint; valgus deformity; arthrogenic and scar-related contracture; marked impairment of function; retained metal hardware; foreign bodies in the soft tissues in the form of metal fragments; a previous closed craniocerebral injury sustained as a result of blast trauma; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability and cephalgic syndrome; residual effects of post-traumatic neuropathy of the left tibial nerve, with moderate impairment of function; residual effects of post-traumatic neuropathy of the right median, ulnar and radial nerves following gunshot injury, with marked impairment of function; a previous closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic affective (depressive) disorder following concussion of the brain; bilateral chronic cochlear neuritis resulting from barotrauma; bilateral sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by the right ear and 4 metres by the left ear; a mature skin scar remaining after a gunshot wound of the external nose; and a mature skin scar following a gunshot wound of the soft tissues of the right cheek—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties—

—and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 868 dated 26 April 2024, it was established that the injuries sustained by **Abasov Ceyhun Vidadi oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 970 dated 26 April 2024, it was established that the injuries sustained by **Huseynov Parvin Mahabbat oglu**—a closed craniocerebral injury sustained as a result of blast trauma; a moderately expressed organic affective (depressive) disorder following concussion of the brain; post-concussion syndrome and behavioural disorders; moderate persistent personality changes following a catastrophe or war; a previous closed craniocerebral injury sustained as a result of blast trauma; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability, chronic cephalgic and insomnia syndromes and cognitive deficit, accompanied by moderate impairment of central nervous system function; and a mature skin scar remaining after primary surgical treatment of a shrapnel wound of the inner surface of the upper one-third of the left upper arm sustained during military trauma in the Republic of Azerbaijan—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 999 dated 26 April 2024, it was established that the injuries sustained by **Safarov Elgun Elmar oglu**—a previous closed craniocerebral injury; astheno-neurotic manifestations following concussion of the brain; a previous closed craniocerebral injury sustained as a result of blast trauma; autonomic vascular instability following concussion of the brain; barotrauma; bilateral chronic cochlear neuritis; persistent severe bilateral sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by both ears—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 867 dated 26 April 2024, it was established that the injuries sustained by **Alizada Ramil Elshan oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 856 dated 26 April 2024, it was established that the injuries sustained by **Bashirli Sanan Nazim oglu**—blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; and mature skin scars remaining after primary surgical treatment of a shrapnel wound of the right parietal region—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 1179 dated 26 April 2024, it was established that the injuries sustained by **Sultanov Ibrahim Sahib oglu**—blast trauma; multiple small blind foreign bodies and a shrapnel wound in both lower legs—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

Page 542

According to forensic medical expert opinion No. 935 dated 26 April 2024, it was established that the injuries sustained by **Naghiyev Anar Fazail oglu**—blast trauma; mature skin scars remaining after blind shrapnel wounds of the second, third and fourth fingers of the right hand, the third finger of the left hand and the lower one-third of the left lower leg; and foreign bodies in the form of metal fragments—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 847 dated 26 April 2024, it was established that the injuries sustained by **Abduljalilov Elvusal Natig oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 846 dated 26 April 2024, it was established that the injuries sustained by **Abdulkarimov Lankaran Rafig oglu**—a closed craniocerebral injury and concussion of the brain—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 981 dated 26 April 2024, it was established that the injury sustained by **Huseynov Ayaz Avaz oglu**—a skin scar in the left shoulder-girdle region—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 03 dated 26 April 2024, it was established that the injuries sustained by **Alakbarov Ibrahim Sakhavat oglu**—right-sided acute exudative otitis media and autonomic vascular dystonia following a closed craniocerebral injury accompanied by concussion of the brain—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 1019 dated 26 April 2024, it was established that the injuries sustained by **Qochuyev Firdovsi Davud oglu**—blast trauma; a

closed craniocerebral injury; and bilateral cochlear neuritis—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 916 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Rashad Bayram oglu**—F06.5 organic dissociative disorder of moderate severity following a closed craniocerebral injury and concussion of the brain sustained as a result of blast trauma; F43.1 prolonged post-traumatic stress disorder of moderate severity; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; bilateral chronic cochlear neuritis resulting from blast trauma; bilateral sensorineural hearing loss, with whispered speech heard from a distance of 4.5 metres by both ears—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 1028 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Emin Maharram oglu**—blast trauma; a previous closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—

—autonomic vascular instability; barotrauma; a condition following left-sided acute cochlear neuritis; left-sided sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the left ear and 6 metres by the right ear—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 879 dated 26 April 2024, it was established that the injuries sustained by **Birnatov Elsevar Emil oglu**—blast trauma; neuropathy of the tibial nerve; an intra-articular, non-displaced closed fracture of the right femur extending from the condyles to the shaft; an open, comminuted, non-displaced fracture of the right patella; a closed, intra-articular, comminuted and slightly displaced fracture of the proximal metaepiphysis of the right tibia; an extensive skin-defect laceration of the anterior surface of the right knee-joint region; lacerated and incised wounds of the distal one-third of the anterior surface of the left forearm; lacerated and abraded wounds of the left knee-joint region and the inner surfaces of the middle one-third of the left thigh; foreign bodies in the soft tissues of the left forearm and radiocarpal joint in the form of metal fragments; and compartment syndrome of the right lower leg, for which primary surgical treatment of the wounds was performed—resulted in a sufficiently united fracture after repeated surgical treatment of the wounds and were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties; according to their severity, they constitute **less serious harm to health**.

According to forensic medical expert opinion No. 902 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Huseyn Elbrus oglu**—a gunshot wound; post-traumatic neuropathy of the right and left sciatic nerves resulting in slight impairment of the function of the extremities; and mature skin scars remaining after through-and-through bullet wounds of the upper one-thirds of both thighs—were caused by a shot fired from a firearm and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 886 dated 26 April 2024, it was established that the injuries sustained by **Tanriverdiyev Kanan Suleyman oglu**—a gunshot wound; residual effects of post-traumatic neuropathy of the left brachial and radial nerves resulting in peripheral paresis of the proximal muscle group of the extremity; a blind gunshot bullet wound of the left shoulder girdle accompanied by an open comminuted fracture of the scapula, for which primary and secondary surgical treatment of the wounds were performed; united fractures; foreign bodies in the soft tissues in the form of metal fragments; arthrogenic contracture of the shoulder joint; moderate impairment of function; and astheno-neurotic manifestations—were caused by a shot fired from a firearm, as well as by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 906 dated 26 April 2024, it was established that the injuries sustained by **Huseynov Taleh Valeh oglu**—blast trauma; injury to the left lung penetrating the thoracic cavity through the left half of the chest; fractures of the fifth and sixth ribs on the left; left-sided haemopneumothorax; a blind shrapnel wound accompanied by injury to the soft tissues of the anterior abdominal wall, for which left-sided thoracotomy, sanitation of the thoracic cavity, drainage by the Bülau method, primary surgical treatment of the wounds and removal of foreign bodies were performed; fibrosis of the upper and lower lobes of the left lung; left-sided pleural adhesions; a stump remaining after partial resection of the fifth and sixth ribs on the left; mixed-type moderate impairment of external respiratory function; barotrauma; left-sided chronic cochlear neuritis; persistent severe left-sided sensorineural hearing loss, with whispered speech heard from a distance of 5 metres by the left ear and 6 metres by the right ear—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties—

—and, according to their severity, taken together, constitute **serious harm to health**.

According to forensic medical expert opinion No. 976 dated 26 April 2024, it was established that the injuries sustained by **Aliyev Imanbakhish Ali oglu**—a previous closed craniocerebral injury and autonomic vascular instability following concussion of the brain—were caused by the impact of the blast wave generated by the explosion of a substance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 17 dated 26 April 2024, it was established that the injuries sustained by **Musayev Ramik Rafail oglu**—blast trauma; a closed craniocerebral injury; and autonomic vascular instability following concussion of the brain—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 904 dated 26 April 2024, it was established that the injuries sustained by **Mammadov Ilkin Elchin oglu**—a closed craniocerebral injury sustained as a result of blast trauma; a severely expressed organic delusional, schizophrenia-like disorder following concussion of the brain; post-concussion syndrome; behavioural and memory disorders; a moderately expressed prolonged post-traumatic stress disorder; a previous closed craniocerebral injury; post-traumatic encephalopathy following concussion of the brain, manifested by persistent autonomic vascular instability and cephalgic and insomnia syndromes; barotrauma; bilateral chronic cochlear neuritis; persistent severe bilateral sensorineural hearing loss, with whispered speech heard from a distance of 3.5 metres by both ears; a mature skin scar remaining after primary surgical treatment of a through-and-through bullet wound of the left occipital region; and mature skin scars remaining after lacerated wounds of the anterior-outer surfaces of both upper arms and the upper one-third of the outer surface of the right forearm—were caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 77 dated 26 April 2024, it was established that the injury sustained by **Zeyniyev Royal Mubariz oglu**—tinnitus—was caused by the impact of primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 106 dated 26 April 2024, it was established that the injuries sustained by **Namazov Khayal Elman oglu**—combat trauma; a through-and-through bullet wound of the posterior surface of the neck; and acute respiratory disease in the recovery stage—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 86 dated 26 April 2024, it was established that the injuries sustained by **Qarayev Bahram Yajar oglu**—combat trauma; a blind bullet wound of the right thigh; and an incomplete fracture of the right femur, for which removal of the bullet and primary surgical treatment of the wound were performed—were caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 92 dated 26 April 2024, it was established that the injury sustained by **Mammadli Novruz Ilgar oglu**—a blind bullet wound of the lateral surface of the left thigh—was caused by the impact of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 198 dated 5 April 2023, it was established that the injuries sustained by **Musayev Asim Isa oglu**—open wounds of the lower one-third of the left thigh accompanied by injury to the popliteal artery, vein and nerves—constitute, taken together and according to their severity, **serious harm to health**.

According to forensic medical expert opinion No. 13 dated 29 September 2022, it was established, upon examination of the body of **Maharramov Elnur Narbala oglu**, that the injuries found on the body—complete traumatic amputation of the right lower extremity at the level of the upper one-third of the lower leg, with the incompletely detached limb hanging by a flap of skin; damage to the external genital organ; multiple blind shrapnel wounds of the soft tissues of the interdigital region, the dorsum of the left hand, the left thigh, both knee joints, the left lower leg and the left ankle-joint region—were characteristic of injuries caused by the blast wave and fragments generated by the explosion of military ordnance possessing explosive properties. Acute blood loss developed as a result of those injuries and caused his death.

According to forensic medical expert opinion No. 743 dated 22 December 2022, it was established that the injuries sustained by **Aslanov Ali Zarqam oglu**—a closed craniocerebral injury accompanied by concussion of the brain; multiple blind wounds of the soft tissues of both thighs and lower legs; and foreign bodies in the soft tissues in the form of metal fragments—were characteristic of injuries caused by the blast wave and fragments generated by the explosion of military ordnance possessing explosive properties. It was not excluded that they had been sustained on 14 September 2022 under the circumstances stated; according to their severity, taken together, they constitute **less serious harm to health requiring prolonged treatment**.

According to forensic ballistic expert opinions Nos. 1/3492 and 1/3493 dated 23 November 2022, the articles of military clothing belonging to **Huseynli Rasad Ramiz oglu** bore damage in the number and dimensions stated in the examination section of the opinion. Taking into account the form, dimensions and morphological structure of the damage, the presence of fully burnt propellant particles constituting an additional factor of a shot around the damage, and visible traces of copper, the damage located on the back of the clothing constituted an entrance defect, while the damage located on its front constituted an exit defect. The damage was characteristic of having been caused by multiple shots from a rifled firearm, by the impact of a bullet approximately 7 millimetres in diameter travelling from back to front, fired from a distance exceeding 1 metre. It was not established that the bullet was discharged as a

result of a shot fired from a weapon aimed at and pressed directly against the right side and chest.

According to forensic medical expert opinion No. 24 dated 16 October 2022, it was established during examination of the body of **Huseynli Rashad Ramiz oglu** that there was a multiple gunshot bullet wound of the body surface, accompanied by fractures of the third and fourth ribs on the left, fractures of the second metacarpal bone of the right hand, fractures of the third, fourth and fifth metacarpal bones of the left hand, injuries to the organs of the thoracic and abdominal cavities, and massive internal and external bleeding. His death resulted from traumatic-haemorrhagic shock that developed due to the injuries to the thoracic and abdominal organs caused by the gunshot wound sustained on 15 September 2022.

According to forensic medical expert opinion No. 1679 dated 14 December 2022, it was established that the injuries sustained by **S.T. Rajabov**—laceration of the upper lobe of the right lung; right-sided haemopneumothorax; right-sided lung contusion; fracture of the upper one-third of the right humerus; fracture of the right third rib; fracture of the right scapula; and rupture of the coracoclavicular ligament, accompanied by a through-and-through wound of the shoulder-scapular region—

—constitute, taken together and according to their severity, **serious harm to health**.

According to forensic medical expert opinion No. 571 dated 23 September 2022, it was established that the injuries sustained by **Alizada Aydin Aghamoghlan oglu**—Grade II traumatic-haemorrhagic shock; open, comminuted and bone-defect fractures of the calcaneus, talus, navicular, lateral cuneiform and cuboid bones; displaced fractures of the shaft of the first metatarsal bone, the base and head of the fourth metatarsal bone, and the shaft of the fifth metatarsal bone—were characteristic of injuries caused by the blast wave generated by the explosion of military ordnance possessing explosive properties and by secondary fragments of primary and blunt origin, and, according to their severity, constitute **serious harm to health**.

According to forensic ballistic expert opinion No. 3/1413 dated 2 November 2022, the right shoe of a pair bore a soot trace from a shot and traces of an explosive substance, including TNT, as well as fully burnt smokeless propellant particles constituting an additional factor of a shot. Taking into account the torn, incised and fragmented condition of the shoe and the form, location, dimensions and morphological structure of the damage, it was characteristic of damage caused by the explosion of an explosive projectile from a short distance near the centre of the explosion, travelling from below upward. The damage could have been caused under the circumstances shown in the descriptive section of the opinion. **The damage resulted from the impact of an anti-personnel mine; however, it was not possible to determine the type of explosive substance or the specific make of mine that caused it.**

According to forensic medical expert opinion No. 666 dated 24 November 2022, it was established that the injury sustained by **Amanullayev Rashad Aghajan oglu**—a through-and-through wound of the soft tissues of the left upper arm, accompanied by temporary impairment of elbow-joint function—was characteristic of having been caused by the impact of a bullet fired from a firearm. It was not excluded that the injury had been sustained at the time and under the circumstances specified in the descriptive section of the opinion and, according to its severity, constitutes **less serious harm to health**.

According to forensic medical expert opinion No. 658 dated 24 November 2022, it was established that the injury sustained by **Rahimzada Ruhid Oktay oglu**—a through-and-through wound of the right foot accompanied by an open, comminuted and displaced fracture of the shaft of the fifth metatarsal bone—was characteristic of having been caused by the impact of a bullet fired from a firearm and, according to its severity, constitutes **less serious harm to health**.

According to forensic medical expert opinion No. 616 dated 28 October 2022, it was established that the injuries sustained by **Javadov Ravan Shamsaddin oglu**—Grade II–III traumatic haemorrhagic shock; an open, comminuted, displaced fracture with a defect of the femoral shaft; injury to the sciatic nerve; a through-and-through wound of the left thigh region accompanied by an extensive soft-tissue defect; and a through-and-through wound of the soft tissues of the lower one-third of the left lower leg—were characteristic of having been caused by the impact of a bullet fired from a firearm and, according to their severity, constitute **serious harm to health**.

According to forensic trace-evidence expert opinion No. 3/1507 dated 24 November 2022, the items of military clothing belonging to **Amanullayev Rashad Aghajan oglu** bore no damage characteristic of having been caused by the impact of a bullet fired from a firearm.

According to forensic trace-evidence expert opinion No. 3/1509 dated 24 November 2022, the military field-type trousers and military field-type undershirt belonging to **Javadov Ravan Shamsaddin oglu** bore damage in the number and dimensions stated in the examination section of the opinion. Based on the form, dimensions and morphological structure of the damage, and the faintly visible traces of copper around it, the defect on the rear portion of those garments was an entrance defect and was characteristic of having been caused by the impact of a bullet approximately 7 millimetres in diameter, fired from a rifled firearm and travelling from back to front from a distance exceeding 1 metre.

Page 547

No damage characteristic of having been caused by the impact of a bullet fired from a firearm was detected on the pair of military boots, pair of socks, military cap, military sweater, military undershirt, underwear, the fragment bearing the word “Komando,” or the khaki-coloured fragment submitted for examination.

According to forensic trace-evidence expert opinion No. 3/1508 dated 24 November 2022, the military jacket, military tunic, undershirt, military sweater, military belt and trousers belonging to **Rahimzada Ruhid Oktay oglu**, submitted for examination, bore no damage characteristic of having been caused by the impact of a bullet fired from a firearm.

The right shoe belonging to **Rahimzada Ruhid Oktay oglu** bore damage in the number and dimensions stated in the examination section of the opinion. Based on the form, dimensions and morphological structure of the damage and the faintly visible trace of copper around it, the damage on the lower portion of the shoe was an entrance defect and was characteristic of having been caused by a bullet approximately 5 millimetres in diameter, fired from a rifled firearm in a direction from below upward.

According to forensic biological expert opinion No. 71-mtb dated 24 November 2022, the submitted document established that **Rahimzada Ruhid Oktay oglu** had blood group B (III). Human blood was detected on the jacket and one shoe, and only the “B” antigen was obtained during blood-group testing; therefore, the bloodstain could have belonged to a person with blood group B (III), including **Rahimzada Ruhid Oktay oglu**.

According to additional forensic biological expert opinion No. 73-mtb dated 25 November 2022, **Rahimzada Ruhid Oktay oglu** had blood group B (III). Human blood was detected on the belt submitted for examination, and only the “A” antigen was obtained during blood-group testing; therefore, the bloodstain could have belonged to a person with blood group A (II). Since **Rahimzada Ruhid Oktay oglu** had blood group B alpha (III), the possibility that the human blood detected on the belt was his was excluded.

According to forensic medical expert opinion No. 596 dated 24 October 2022, the injury sustained by **Aliyev Sabuhi Vahid oglu**—a through-and-through wound of the soft tissues of the inner surface of the middle one-third of the left thigh—was characteristic of having been caused by the impact of a bullet fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 619 dated 10 November 2022, the injury sustained by **Namazaliyev Firuddin Rafayil oglu**—a through-and-through wound of the soft tissues of the upper one-third of the right thigh, with the entrance opening located on the anterior-inner surface of the upper one-third of the right thigh and the exit opening located in the lower-outer quadrant of the right gluteal region, directed from front to back and slightly upward—was characteristic of having been caused by the impact of a bullet fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to ballistic expert opinions Nos. 1/3405 and 1/3415 dated 10 November 2022, the military trousers and underwear belonging to **Sabuhi Aliyev**, as well as the military trousers belonging to **Firudin Namazaliyev**, bore damage in the number and dimensions stated in the examination section of the opinion. The defect on the rear-left portion of the left leg of the military trousers and underwear belonging to Sabuhi Aliyev constituted an entrance defect

and was characteristic of having been caused by the impact of a 7-millimetre bullet containing copper, fired once and travelling from back to front.

By a decision dated 15 December 2022 on the classification of material evidence, the following items were placed in the evidence storage room of the Special Investigation Department: the belt, trousers, jacket, one pair of boots and one pair of socks worn by **Firudin Namazaliyev** at the time of the incident; one bullet lodged in **Sabuhi Aliyev's** trousers; and the trousers, long-sleeved undershirt and underwear worn by Sabuhi Aliyev at the time of the incident.

According to forensic medical expert opinion No. 588 dated 3 November 2022, the injuries sustained by **N.H. Isgandarov**—with an entrance opening in the region of the right angle of the jaw—

—and an exit opening centrally located in the frontal region; Grade I–II traumatic haemorrhagic shock; an open craniocerebral injury accompanied by destruction of the right eye resulting in loss of vision; contusion of the frontal lobe of the brain; damage to the lower wall of the main sinus, the frontal bone, the anterior and posterior walls of the frontal sinus, the inner, outer, upper and lower walls of the right orbit, the right zygomatic bone, the anterior and posterior walls of the right maxillary sinus, the lower jaw bone and the right lower posterior alveolar ridge, together with a through-and-through wound of the head—were characteristic of having been caused by a shot fired from a firearm in a direction from below upward and from right to left. The abrasion of the right supraclavicular region accompanied by blood infiltration was characteristic of having been caused by the impact of a hard blunt object. The injuries, taken together, constitute **serious harm to health resulting in a permanent loss of more than one-third of general capacity for work**.

According to forensic medical expert opinion No. 600 dated 9 October 2022, the injuries sustained by **N.A. Abishov**—Grade I–II traumatic haemorrhagic shock; lacerated wounds of the plantar region of the right foot accompanied by open, comminuted and displaced fractures of the base of the third metatarsal bone, the shaft of the fifth metatarsal bone, the distal metaphysis of the tibia, and the navicular and cuboid bones; and lacerated wounds of the right hand—were characteristic of injuries caused by the blast wave and by primary and blunt secondary fragments generated by the explosion of military ordnance possessing explosive properties and, taken together, constitute **serious harm to health**.

According to forensic explosive-technical expert opinion No. 3/1505 dated 24 November 2022, the right shoe and sock bore damage. Despite the presence of TNT traces on the shoe and sock, fully burnt smokeless propellant particles, and the torn and lacerated condition of the items, the form, location, dimensions and morphological structure of the damage indicated that it could have been caused by the explosion of an explosive projectile under the circumstances described in the decision, from a short distance near the centre of the explosion, with the blast impact directed from below upward. However, because no crime-

scene inspection had been conducted, it was not possible to determine the duration of the explosion or the specific type and make of the mine or fragments that caused the damage. Fully burnt smokeless propellant particles, namely nitroglycerin, were also detected on the pair of shoes and socks.

According to forensic medical expert opinion No. 01 dated 19 January 2023, examination of **Nurullayev Nurali Yusif oglu** established traumatic amputation of the right lower leg at the level of its lower one-third. The injury was caused by fragments generated by the explosion of military ordnance possessing explosive properties. It was not excluded that it had been sustained on 9 December 2022 and, according to its severity, constitutes **serious harm to health resulting in a permanent loss of more than one-third of general capacity for work**.

According to forensic ballistic expert opinion No. 3/72 dated 13 February 2023, the military trousers, thermal underwear, right military boot and what was presumed to be the right sock submitted for examination bore damage. Based on the form, dimensions and morphological structure of the damage, the presence on their surface of TNT and fully burnt smokeless propellant particles, the damage was characteristic of having been caused by fragments at the centre of an explosion, travelling from below upward. The damage could also have been caused under the circumstances described in the decision by the explosion of an anti-personnel mine.

According to forensic medical expert opinion No. 604 dated 10 October 2022, during examination of **Malikov Ismayil Shikhi oglu**, it was established that the right lower extremity had been amputated at the level of the middle one-third of the lower leg, accompanied by Grade II–III traumatic haemorrhagic shock, as well as—

Page 549

—traumatic amputation of the right lower extremity at the level of the middle one-third of the lower leg; contusion and lacerated wounds of the soft tissues of the middle one-third of the left lower leg. These injuries were characteristic of having been caused by the blast wave generated by the explosion of military ordnance possessing explosive properties and by primary and blunt secondary fragments. It was not excluded that they had been sustained on 10 October 2022 and, according to their severity, they constitute **serious harm to health**.

The stated injury—“amputation of the right lower extremity at the level of the middle one-third of the lower leg”—constitutes **serious harm to health resulting in a permanent loss of more than one-third (50%) of general capacity for work**.

According to forensic ballistic expert opinion No. 3/1559 dated 1 December 2022, the garments belonging to **Malikov Ismayil Shikhi oglu** bore traces of explosive substances and damage whose form, morphological structure and traces surrounding them indicated that they had been caused by fragments resulting from the explosion of an explosive projectile near the centre of the explosion, travelling from the left side.

According to forensic medical expert opinion No. 1155 dated 28 November 2022, the injury sustained by **Z.F. Seyfullayev**—an open fracture of the left calcaneus—was caused by fragments and a blast wave generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **less serious harm to health resulting in a prolonged impairment of health**.

According to forensic ballistic expert opinions Nos. 3/1696 and 3/1702 dated 27 December 2022, 19 stone fragments and 14 industrially manufactured metal fragments, prepared without the use of special equipment, were of a specific design and made of high-quality material, which indicated that the metal fragments constituted parts of industrially manufactured projectiles or bullets. Since the industrial markings on the fragments had not been preserved, it was not possible to determine the specific projectile or bullet from which they originated or the time of their manufacture. However, taking into account the fragmented condition of the objects, their structural features and visual appearance, it was not excluded that they were fragments of a TMH-model anti-personnel pressure mine with a tripwire triggering mechanism.

Traces of explosive substances were found on the surface of the military field-type trousers belonging to **Alikhanov Aydin Ashrafovich**. Based on the form and morphological structure of the damage and the presence of soot traces around it, the damage was characteristic of having been caused by fragments generated by the explosion of an explosive projectile at the centre of the explosion, travelling from the left side. Traces of explosive substances—TNT, nitro compounds, sulphides and active chlorine ions—were detected on the surfaces of the 19 submitted objects.

According to forensic medical expert opinion No. 1587 dated 20 November 2022, the injuries sustained by **T.Z. Nabiyev**—a closed craniocerebral injury; traumatic amputation of the left foot at the level of the Chopart joint; and multiple shrapnel wounds of both lower extremities—were caused by the blast wave and fragments generated by the explosion of an explosive projectile. The time and circumstances of their occurrence were consistent with those stated in the descriptive section of the decision and, according to their severity, constitute **serious harm to health resulting in a permanent loss of forty per cent (40%) of general capacity for work**.

According to forensic medical expert opinion No. 1588 dated 29 December 2022, the injuries sustained by **A.A. Alikhanov**—reduction of visual acuity of the left eye to 0.2–0.3; a lacerated wound of the upper eyelid; haematoma; contusion of the eyeball; a non-penetrating wound of the cornea; subconjunctival haemorrhage; and multiple wounds of the parietal region, right auricle, facial region, right hand and both lower legs—were caused by the impact of fragments generated by the explosion of an explosive projectile—

—and, according to their severity, taken together, constitute **less serious harm to health resulting in a prolonged impairment of health**.

According to forensic medical expert opinion No. 18 dated 15 December 2022, **Hummatov Zohrab Mammad oglu** sustained injuries constituting serious harm to health, namely: "damage to the major blood vessels; incomplete traumatic amputation of the left lower extremity at the level of the knee joint accompanied by acute blood loss, with the limb hanging on a flap of skin at the level of the lower one-third of the thigh; displaced closed fractures of the fifth through seventh ribs on the left; multiple blind wounds of the right eyebrow, left frontal region, face, anterior surface of the right side of the chest, anterior abdominal wall, right upper arm, right elbow-joint region, both forearms, first and second fingers of the left hand, palmar surface of the right hand, right knee-joint region and right lower leg; and thermal burn wounds of both zygomatic regions and the right lower leg." The injuries were caused by the impact of a hard blunt object. It was not excluded that they had been sustained on 14 December 2022 under the circumstances described above and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 772 dated 15 December 2022, **Akhundov Rza Yusif oglu** sustained an abrasion of the frontal region. It was caused by the impact of a hard blunt object. It was not excluded that it had been sustained on 14 December 2022 under the circumstances described above, and the degree of severity was not determined.

According to forensic medical expert opinion No. 766 dated 15 December 2022, **Shirinov Murad Isa oglu** sustained "mine-blast trauma; contusion of the soft tissues of the right knee joint; and barotrauma." The injuries were caused by the impact of a hard blunt object. It was not excluded that they had been sustained on 14 December 2022 under the circumstances described above.

According to forensic medical expert opinion No. 768 dated 15 December 2022, **Panahov Rodik Shamsaddin oglu**sustained "open, comminuted and displaced fractures of the right tibia and fibula, and multiple superficial wounds of the right temporal and zygomatic regions and the right half of the face." The injuries were caused by the impact of a hard blunt object. It was not excluded that they had been sustained on 14 December 2022 under the circumstances described above and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 770 dated 15 December 2022, **Allahverdiyev Siyasat Ziyadkhan oglu** sustained "closed displaced fractures of both calcanei; a non-displaced closed fracture of the fifth metatarsal bone of the right foot; and a wound of the right frontotemporal region." The injuries were caused by the impact of a hard blunt object. It was not excluded that they had been sustained on 14 December 2022 under the circumstances described above and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 769 dated 15 December 2022, **Balakishiyev Tofig Hajimirza oglu** sustained "an abrasion of the right auricle and a metal foreign body in the cornea of the right eye." The injuries were caused by the impact of a hard blunt object. It was not excluded that they had been sustained on 14 December 2022 under

the circumstances described above and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 771 dated 15 December 2022, **Aliyarov Sadir Heydar oglu** sustained injuries to the right lower leg and heel region, accompanied by a non-displaced fracture of the right fibula and a comminuted displaced fracture of the right calcaneus. The injuries were caused by the impact of a hard blunt object. It was not excluded that they had been sustained on 14 December 2022 under the circumstances described above and, according to their severity, constitute **less serious harm to health resulting in a prolonged impairment of health**.

According to forensic medical expert opinion No. 708 dated 19 December 2022, no injuries were detected on **Khasiyev Vidadi Aziz oglu**.

According to forensic medical expert opinion No. 767 dated 15 December 2022, no injuries were detected on **Ibishov Qabil Adalat oglu**.

According to forensic medical expert opinion No. 709 dated 19 December 2022, no injuries were detected on **Hajiyev Allahverdi Niyazi oglu**.

Page 551

According to forensic explosive-technical expert opinions Nos. 3/157 and 3/158 dated 24 February 2023, traces of TNT were detected on the clothing belonging to **Hummatov Zohrab Mammad oglu**, on the clothing belonging to **Panahov Rodik Shamsaddin oglu**, **Allahverdiyev Siyasat Ziyadkhan oglu** and **Aliyarov Sadir Heydar oglu** submitted by the Telecommunications Service MMC, as well as on metal objects taken from the scene and from the body of the deceased and in the soil collected from the explosion crater.

According to forensic medical expert opinion No. 512 dated 26 August 2022, the injuries detected on the body of **Ibayev Kamiz Mubariz oglu**—numerous small superficial wounds on the posterior surface of the neck, the anterior surface of the left half of the chest, the left upper arm and both forearms, the right radiocarpal-joint region and the dorsal surface of the right hand—were characteristic of having been caused by the impact of a hard blunt object having a high temperature. It was not excluded that the injuries had been sustained at the time and under the circumstances stated by the person examined. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 1005 dated 22 September 2022, the injuries sustained by **Aghayev Mirza Intigam oglu**—a closed craniocerebral injury accompanied by concussion of the brain—were caused by the impact of a blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health resulting in a short-term impairment of health**.

According to forensic medical expert opinion No. 1006 dated 22 September 2022, the injuries sustained by **Suleymanov Afig Ziyafat oglu**—a closed craniocerebral injury accompanied by concussion of the brain—were caused by the impact of a blast wave generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health resulting in a short-term impairment of health**.

According to forensic medical expert opinion No. 08 dated 6 March 2023, examination of the body of **Huseynov Esqin Jamil oglu** revealed one penetrating gunshot bullet wound to the head. The injury was caused by the impact of a projectile fired from a firearm. The cause of **E.J. Huseynov's** death was severe crushing and destruction of the brain tissue accompanied by fractures of the cranial bones resulting from the gunshot bullet wound.

According to forensic medical expert opinion No. 07 dated 6 March 2023, examination of the body of **Aliybayli Shahriyar Ramiz oglu** revealed one penetrating gunshot bullet wound to the head, accompanied by haemorrhage around both eyes—the "spectacle sign." The cause of **Sh.R. Aliybayli's** death was severe crushing and destruction of the brain tissue accompanied by fractures of the cranial bones resulting from the gunshot bullet wound.

According to forensic ballistic expert opinions Nos. 3/634 and 3/641 dated 11 May 2023, the submitted metal object was a bullet jacket constituting part of a cartridge designed for use in military firearms and manufactured industrially. Since the bullet jacket had been deformed, had lost its original shape and dimensions, and bore no markings characteristic of a particular weapon, it was not possible to determine the calibre of the cartridge or bullet of which it had formed part.

According to forensic medical expert opinion No. 06 dated 4 March 2023, examination of the body of **K.N. Huseynov** revealed multiple open comminuted fractures of the right femur and tibia, complete transection of the vascular and nerve bundle, traumatic incomplete amputation of the right lower extremity at the level of the lower one-third of the thigh, superficial lacerated wounds of the right forearm and dorsal surface of the right hand, and minor shrapnel wounds of the left thigh and lower-leg regions. The injuries were caused by fragments and the blast wave generated by the explosion of an anti-personnel mine possessing explosive properties. The cause of death was acute and massive blood loss resulting from traumatic incomplete amputation of the right lower extremity at the level of the lower one-third of the thigh, accompanied by multiple open comminuted fractures of the right femur and tibia and complete transection of the vascular and nerve bundle—

Page 552

—which led to acute and massive blood loss.

According to forensic ballistic expert opinions Nos. 3/632 and 3/633 dated 12 May 2023, the two submitted objects did not bear factory markings, signs, inscriptions or features permitting the precise identification of the part they had constituted before fragmentation; moreover, they were extensively deformed, broken into small fragments and had retained no fragments

of markings or inscriptions. It was not excluded that the objects were parts of a mine; however, due to their small dimensions, it was not possible to determine the make of the mine of which they had formed part. Since it was also impossible to determine the model and type of the two objects, it was not possible to establish their operating mechanism or the distance from the point of explosion at which they would have posed a real danger to human life and health.

The jacket, military field tunic, military field trousers, shirt, thermal undershirt and thermal underpants worn by **Huseynov Kamran Namiz oglu** bore damage in the number and dimensions stated in the examination section of the opinion. Based on the form, dimensions and morphological structure of the damage, as well as the presence on the clothing of soot, traces of explosive substances—TNT—and incompletely burnt propellant particles constituting an additional factor of a shot, the damage was characteristic of having been caused by fragments and the blast impact from an explosive projectile detonated at a distance close to the centre of the explosion.

According to forensic medical-biological expert opinion No. 24-MTB dated 31 May 2023, **Huseynov Kamran Namiz oglu** had blood group O alpha beta (I). Human blood was detected on the jacket, body armour, long-sleeved shirt, undershirt, military trousers, underpants, thermal underwear, one pair of socks and one pair of boots. Only the "H" antigen was obtained during blood-group testing; therefore, the bloodstains could have belonged to a person with blood group O alpha beta (I), including **Huseynov Kamran Namiz oglu**.

According to forensic medical expert opinion No. 673 dated 25 May 2023, the injuries sustained by **Karimov Royal Bakhtiyar oglu**—displaced closed fracture of the left clavicle and fibula; displaced open fractures of the first, second, third, fourth and fifth metatarsal bones of the left foot; rupture of the left deltoid ligament; dislocation of the left distal tibiofibular joint; lacerated wounds of the soft tissues of the left foot; bilateral acute cochlear neuritis; autonomic vascular instability resulting from concussion of the brain; and a shrapnel injury caused by the explosion of an anti-personnel mine possessing explosive properties—were caused by the combined impact of fragments and the blast wave and, taken together, constitute **less serious harm to health resulting in a prolonged impairment of health**.

According to forensic medical expert opinion No. 371 dated 31 May 2023, the injury sustained by **R.S. Manafov**—a penetrating gunshot bullet wound of the left half of the chest accompanied by left-sided haemopneumothorax and Grade V haemorrhagic shock—was caused by a shot fired from a firearm and constitutes **serious harm to health**.

According to forensic ballistic expert opinions Nos. 3/614 and 3/618 dated 1 May 2023, the 32 cartridge cases were parts separated during firing from industrially manufactured 7.62×39-millimetre cartridges used as military ammunition in AKM and AKMS assault rifles, SKS carbines and other compatible rifled firearms. One bullet was a component separated during firing from an industrially manufactured 5.45×39-millimetre cartridge used as military ammunition in AK-74, AK-74M, AKS-74 and AKS-74U assault rifles, RPK-74 and RPK-74M light machine guns and other compatible firearms. The submitted military jacket, olive-

coloured jacket and military undershirt bore damage. The damage was characteristic of having been caused by a 5.45-millimetre bullet fired from a rifled firearm—

Page 553

—from a distance exceeding 1 metre, travelling from front to back.

According to forensic ballistic expert opinion No. 3/631 dated 12 May 2023, the submitted military trousers with a belt and the thermal underpants bore damage. Based on the form, dimensions and morphological structure of the damage, and the absence around it of incompletely burnt smokeless propellant particles and copper traces constituting additional factors of a shot, the defect on the rear portion of the left leg of the military trousers and thermal underpants was an entrance defect, while the defect on the front portion of the left leg was an exit defect. The damage was characteristic of having been caused by a bullet approximately 7 millimetres in diameter fired from a rifled firearm from a distance exceeding 1 metre, travelling from the rear toward the front of the left trouser leg.

According to forensic medical expert opinion No. 288 dated 19 April 2023, the injury sustained by **Y.A. Ahmadov**—a gunshot bullet wound entering through the posterior-outer surface of the lower one-third of the left thigh and exiting through the anterior-outer surface of the knee-joint region—was caused by a shot fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 634 dated 30 May 2023, the injury sustained by **Aliyev Basharaddin Kamil oglu**—a penetrating gunshot bullet wound of the head entering through the right temporal region and exiting through the vertex, accompanied by comminuted fractures of the cranial-vault bones and severe crushing and destruction of the brain—was caused by a shot fired from a firearm and constitutes **serious harm to health**.

According to forensic medical expert opinion No. 570 dated 30 May 2023, the injuries sustained by **Ibrahimov Nurlan Ibrahim oglu**—a penetrating bullet wound entering from the anterior-left surface of the neck into the thoracic cavity, with injury to the trachea and right lung, fractures of the right seventh, eighth and ninth ribs and the right scapula—were caused by a shot fired from a firearm and constitute **serious harm to health**.

According to forensic medical expert opinion No. 07 dated 12 May 2023, examination of the body of **Zalov Vidadi Nizami oglu** revealed: one penetrating gunshot bullet wound of the chest entering through the submandibular region, travelling from front to back, from above downward and from left to right, and exiting on the right half of the posterior chest along the scapular line at the level of the fourth and fifth ribs, accompanied by injury to the right lung and right-sided haemopneumothorax; and a blind shrapnel wound of the left thigh. The penetrating gunshot bullet wound of the chest was caused by one shot fired from a firearm from a distance at which the additional factors of a shot had no effect. The cause of death was traumatic-haemorrhagic shock associated with right-sided haemopneumothorax resulting from the penetrating gunshot bullet wound of the chest.

According to forensic medical expert opinion No. 06 dated 12 May 2023, examination of the body of **Taghiyev Sabuhi Gunduz oglu** revealed: one penetrating gunshot bullet wound of the head entering through the left side of the waist area, travelling from front to back, relatively upward and from left to right, and exiting through the right side of the occipital region, accompanied by crushing and destruction of the brain tissue and multiple fractures of the facial skeleton, cranial-vault and skull-base bones; and one through-and-through gunshot bullet wound of the left ankle joint entering through the anterior-outer surface of the lower left leg and exiting through the posterior surface of the left ankle joint after damaging only the soft tissues. The immediate cause of death was crushing and destruction of the brain tissue accompanied by multiple fractures of the facial skeleton, cranial-vault and skull-base bones resulting from the gunshot bullet wound of the head.

Page 554

According to forensic medical expert opinion No. 00 dated 12 May 2023, examination of the body of **Hasanov Elshad Qabil oglu** revealed one penetrating gunshot bullet wound of the head entering through the left temporal region, travelling from left to right and exiting through the right temporal region, accompanied along its course by crushing and destruction of the brain tissue, multiple fractures of the cranial-vault bones and a left periorbital haematoma. The gunshot wound was consistent with having been caused by one shot fired from a firearm at a long distance, at which the additional factors of a shot had no effect. The immediate cause of death was crushing and destruction of the brain tissue accompanied by multiple fractures of the cranial-vault bones and a left periorbital haematoma resulting from the gunshot bullet wound of the cranial cavity.

According to forensic medical expert opinion No. 569 dated 1 June 2023, no visible injury or trace of injury connected with the incident described above was detected on the body of **Safarov Akbar Farhad oglu**. Determining whether the diagnosis assigned to him—“a moderately expressed dissociative reaction accompanied by mild asthenia”—was of traumatic origin falls within the competence of a forensic psychiatric examination.

According to forensic medical expert opinion No. 748 dated 14 June 2023, the injuries sustained by **Hajiyev Murad Elshan oglu**—a penetrating gunshot bullet wound of the pelvic cavity entering through the right gluteal region and exiting through the left inguinal region, accompanied by injury to the urinary bladder and the prostatic portion of the urethra and open fractures of the branches of the pubic bones—were caused by a shot fired from a firearm and, according to their severity, constitute **serious harm to health**.

According to forensic medical examination of material evidence opinion No. 26-MTB dated 21 July 2023, human blood was detected on the submitted undershirt, T-shirt, military trousers, underpants, one pair of boots and one pair of socks. Only the “A” and “B” antigens were obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group AB (IV), including **Zalov Vidadi Nizami oglu**, who had that blood group.

According to forensic medical examination of material evidence opinion No. 27-MTB dated 21 July 2023, human blood was detected on the body armour, sweater, undershirt, military trousers, underpants, one pair of socks and one pair of boots. Only the “H” antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group O alpha-beta (I), including **Taghiyev Sabuhi Gunduz oglu**, who had that blood group.

According to forensic medical examination of material evidence opinion No. 28-MTB dated 25 July 2023, human blood was detected on the jacket, body armour, sweater, undershirt, T-shirt, scarf, military trousers, underpants and one pair of boots. Only the “A” antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group A beta (II), including **Hasanov Elshad Qabil oglu**, who had that blood group.

According to forensic medical examination of material evidence opinion No. 29-MTB dated 25 July 2023, **Hajiyev Murad Elshan oglu** had blood group B (III). Human blood was detected on the body armour, undershirt, military trousers and the right boot. Only the “B” antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group B (III), including **Hajiyev Murad Elshan oglu**.

According to forensic medical examination of material evidence opinion No. 30-MTB dated 25 July 2023, human blood was detected on the military trousers, underpants, helmet and cap. Only the “B” antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group B (III), including **Aliyev Basharaddin Kamil oglu**, who had that blood group.

Page 555

According to forensic medical examination of material evidence opinion No. 31-MTB dated 25 July 2023, human blood was detected on the body armour, sweater, undershirt and one pair of boots submitted for examination. Only the “A” antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group A (II), including **Ibrahimov Nurlan Ibrahim oglu**, who had that blood group.

According to forensic medical expert opinion No. 577 dated 11 June 2023, the injury sustained by **Najafov Renat Zaur oglu**—a blind shrapnel wound of the left half of the face with a foreign body in the soft tissues—was caused by primary fragments generated by the explosion of a substance possessing explosive properties and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 580 dated 11 June 2023, no visible injury or trace of injury connected with the incident described above was detected on the body of **Safarov Akbar Farhad oglu**.

According to forensic medical expert opinion No. 579 dated 11 June 2023, the injury sustained by **Zamanov Ramish Yolchu oglu**—a through-and-through gunshot bullet wound of the lower lip—was caused by a shot fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 578 dated 11 June 2023, the injury sustained by **Rustamov Elmir Bashir oglu**—a through-and-through gunshot bullet wound of the soft tissues of the left ankle-joint region—was caused by a shot fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 722 dated 7 August 2023, the injury sustained by Captain **Safarov Shahin Elsevar oglu**—a grazing wound of the left shoulder-girdle region—was caused by a shot fired from a firearm. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 380 dated 22 May 2023, the injuries sustained by **E.R. Rahimli**—blast trauma; a closed craniocerebral injury; concussion of the brain; a contused wound of the left temporal-parietal region; and contusion of the soft tissues of the chest—were caused by the blast wave and fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 381 dated 22 May 2023, the injuries sustained by **N.O. Aliyev**—mine-blast trauma; open comminuted fractures of the right calcaneus, the neck of the talus and the second and third metatarsal bones; subluxation of the ankle joint; a displaced fracture of the medial malleolus; multiple blind shrapnel wounds of both lower legs and the right hand; and Grade II traumatic-haemorrhagic shock—constitute, according to their severity, **less serious harm to health**.

According to forensic medical expert opinion No. 379 dated 22 May 2023, the injuries sustained by **V.F. Mammadov**—compression of the body of the L5 vertebra; a comminuted displaced fracture of the right calcaneus; and a contused wound of the vertex and temporal regions—were caused by primary fragments generated by the explosion of a substance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic ballistic expert opinion No. 3-16-16/2-3/939 dated 11 July 2023, traces of explosive substances—TNT, nitro compounds, sulphides and active chlorine ions—were detected on the military jacket belonging to **Aliyev Nihad Orjali oglu**. Based on the form, dimensions and morphological structure of the damage and the presence of soot traces around it, the damage was characteristic of having been caused by fragments generated by the explosion of an explosive projectile at a distance close to the centre of the explosion, with the blast impact coming from the right. It was not excluded that the damage had been caused by an explosion under the circumstances described in the decision.

According to forensic ballistic expert opinion No. 3-16-16/2-3/943 dated 28 July 2023, the front-left lower portion of the **QAZ-3308** vehicle bearing military registration plate **E-Q62-QQ** bore damage in the number and dimensions stated in the examination section of the opinion. Based on the presence of soot and traces of an explosive substance—TNT—on the soil, as well as the nature, form, location, dimensions and morphological structure of the damage to the vehicle, the damage was characteristic of having been caused by the blast impact from the explosion of an explosive projectile at a distance close to the centre of the explosion, travelling from below upward.

According to forensic medical expert opinion No. 02 dated 13 May 2023, examination of the body of **M.M. Qarayev revealed**: injury to the right lung, main bronchus and pulmonary artery; acute blood loss; a blind wound of the right lateral wall of the chest penetrating the thoracic cavity and accompanied by right-sided haemopneumothorax; an extensive tissue defect; multiple injuries to the neurovascular bundles; crushing and tearing of the muscle tissue; a through-and-through wound of the left knee-joint region accompanied by an open comminuted fracture of the upper one-third of the fibula; numerous blind wounds of the right frontal and temporal regions, right auricle and right cheek, neck, anterior surface of the right half of the chest, right forearm, right gluteal region, both thighs and knee-joint regions and the right lower leg; and a grazing wound of the right shoulder region. The injuries were characteristic of having been caused by the blast wave and primary and secondary fragments generated by the explosion of military ordnance possessing explosive properties. The cause of **M.M. Qarayev's** death was acute blood loss resulting from injury to the right lung and pulmonary artery caused by the blind shrapnel wound penetrating the right half of the chest.

According to forensic medical expert opinion No. 01 dated 11 May 2023, examination of the body of **O.E. Novruzalizada** revealed: open comminuted fractures of the right parietal, temporal and occipital bones; a depressed open fracture of the left parietal bone; extensive subdural and subarachnoid haemorrhages in both parietal, frontal, occipital and right temporal lobes; severe crushing of the right parietal lobe of the brain; numerous crushed and lacerated wounds of both parietal, left temporal and occipital regions; a blind wound of the right parieto-occipital region; a crushed and lacerated wound of the right eyebrow region; a subcutaneous haematoma of the left temporal region; an open craniocerebral injury accompanied by haematomas around both eyes; open comminuted fractures of the nasal bones; an open marginal fracture of the right maxillary bone; lacerated wounds of the mucosal surfaces of the upper and lower lips; thermal burns of the posterior neck and right supraclavicular region; numerous superficial wounds of the left half of the face and the submandibular region; multiple lacerations of the left suprascapular region, anterior chest, left lateral abdominal wall, left supra-iliac region, right hip-joint and right thigh regions; a contused wound of the right knee-joint region accompanied by laceration; and numerous abrasions of the left lumbar region.

The stated injuries were characteristic of having been caused by flame and fragments generated by the explosion of military ordnance, as well as by the impact of the injured areas

against hard blunt objects due to the blast wave. The cause of **O.E. Novruzalizada's** death was an open craniocerebral injury accompanied by open comminuted fractures of the cranial-vault bones, severe crushing of the right parietal lobe and haemorrhage into the brain tissue.

According to forensic medical expert opinion No. 343 dated 11 May 2023, the injuries sustained by **M.V. Mahmudlu**—an open comminuted fracture of the left parietal bone; injury to the left parietal lobe and dura mater; a left-sided acute epidural haematoma; severe crushing of the brain; deep coma; Grade III traumatic-haemorrhagic shock; and a penetrating wound of the left parietal region entering the cranial cavity—were caused by a shot fired from a firearm—

—by the impact of a bullet or projectile fired from a firearm and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 333 dated 15 May 2023, the injuries sustained by **A.E. Aliyev**—two small wounds of the right upper-arm region and one small wound on the palmar surface of the right hand—were characteristic of having been caused by a blunt mechanism through the impact of a hard blunt object. It was not excluded that they had been caused by secondary fragments generated by the explosion of military ordnance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 332 dated 15 May 2023, the injury sustained by **A.N. Javadzada**—a superficial wound of the left thigh—was characteristic of having been caused by a blunt mechanism through the impact of a hard blunt object. It was not excluded that the injury had been caused by secondary fragments generated by the explosion of military ordnance possessing explosive properties. Since it did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 326 dated 12 May 2023, the injury sustained by **Z.S. Asgarov**—a blind wound of the soft tissues of the right temporal region—could have been caused by secondary fragments generated by the explosion of military ordnance possessing explosive properties and, according to its severity, constitutes **minor harm to health resulting in a short-term impairment of health**.

According to forensic medical expert opinion No. 328 dated 15 May 2023, the injuries sustained by **E.H. Qushchiyev**—a closed craniocerebral injury accompanied by concussion of the brain—could have been caused by the impact of a blast wave generated by the explosion of military ordnance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 329 dated 15 May 2023, the injuries sustained by **R.Q. Khalilov**—a closed craniocerebral injury accompanied by concussion of

the brain—could have been caused by the impact of a blast wave generated by the explosion of military ordnance possessing explosive properties and, according to their severity, constitute **minor harm to health**.

According to forensic medical expert opinion No. 359 dated 2 August 2023, during specialised medical examinations **Sanan Elchin oglu Mustafayev** was diagnosed with "blast injury; shrapnel wounds of the left lower leg and right hand; wounds subjected to primary surgical treatment due to a marginal avulsion closed fracture of the olecranon process of the right ulna; mature skin scars remaining after removal of a foreign body; an ununited fracture of the olecranon process; blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; astheno-neurotic manifestations following a previous closed craniocerebral injury and concussion of the brain; barotrauma resulting in a condition following bilateral acute cochlear neuritis."

Since specialised medical examinations had not been conducted in the days immediately following the incident, and no medical documents confirming those diagnoses by clinical and instrumental examination methods had been submitted for expert examination, it was not possible to express a definitive opinion regarding the specific mechanism and circumstances under which the injuries had been sustained, their duration or their degree of severity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/967;3/983 dated 31 July 2023, the military cloak belonging to **Muslim Mahmudlu** bore damage in the number and dimensions stated in the examination section of the opinion. Based on the absence around the damage of incompletely burnt smokeless propellant particles and copper traces constituting additional factors of a shot, and taking into account its form, dimensions and morphological structure, the defect on the front-left portion of the military cloak was an entrance defect, while the defect on the rear portion was an exit defect. It was characteristic of having been caused by a bullet fired from a rifled firearm from a distance exceeding 1 metre and travelling from front to back.

Page 558

The military clothing submitted for examination—body armour, a sweater, trousers with a belt, one pair of boots and one pair of socks—bore damage characteristic of having been caused both by fragments generated by an explosion and by the impact of a bullet fired from a firearm. No particles of explosive substances, including TNT, were detected on the surfaces of the clothing. However, incompletely burnt smokeless propellant particles constituting an additional factor of a shot were detected on them.

The black jacket and military sweater belonging to **Orkhan Novruzalizada** bore damage in the number and dimensions stated in the examination section of the opinion. Based on the form, dimensions and morphological structure of the damage and the presence of incompletely burnt smokeless propellant particles, the damage was characteristic of having been caused by fragments generated by an explosion at a distance close to its centre,

travelling from rear to front. It was also considered possible that some of the damage had been caused by fragments generated both by an explosion and by a firearm discharge.

According to forensic medical expert opinion No. 325 dated 12 May 2023, the injuries sustained by **M.V. Maksudlu**—Grade III–IV traumatic-haemorrhagic shock; bilateral haemopneumothorax, involving the accumulation of free air and blood in the thoracic cavities; internal abdominal bleeding; injuries to the liver, small intestine and diaphragm; blind wounds penetrating the thoracic and abdominal cavities; a through-and-through wound of the soft tissues of the left half of the chest; a superficial wound of the left parietal region; bilateral chronic cochlear neuritis; right-sided sensorineural hearing loss; and barotrauma accompanied by post-traumatic dry perforation of the left tympanic membrane—were characteristic of having been caused by the blast wave and primary and secondary fragments generated by the explosion of an explosive projectile and constitute **serious harm to health**.

According to forensic medical expert opinion No. 430 dated 29 June 2023, the injuries sustained by **V.A. Orujzada**—multiple abrasions of the right forearm and an incised wound on the dorsal surface of the second finger of the right hand—were characteristic of having been caused by a blunt mechanism through the impact of a hard blunt object. It was not excluded that they had been caused by secondary fragments generated by the explosion of military ordnance possessing explosive properties. Since they did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 327 dated 12 May 2023, the injuries sustained by **T.F. Mehraliyev**—a blind wound of the right upper-arm region and lumbar region; a foreign body in the soft tissues; and superficial wounds of the right axillary region and left shoulder-joint region—were characteristic of having been caused by primary fragments and secondary fragments of blunt origin generated by the explosion of an explosive projectile and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 546 dated 10 August 2023, the injuries sustained by **Z.A. Sadigov**—a closed craniocerebral injury accompanied by concussion of the brain; left-sided acute cochlear neuritis; sensorineural hearing loss with the ability to hear whispered speech with the left ear reduced to a distance of 3 metres; barotrauma; and blunt trauma to the left eye accompanied by lacerations of the upper and lower eyelids—could have been caused by the blast wave and a blunt mechanism, including secondary fragments generated by the explosion of a projectile, and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 335 dated 15 May 2023, the injuries sustained by **T.Z. Ismayilov**—blind wounds of the occipital region, the fourth finger of the right hand, the right knee-joint region and the left knee-joint region—could have been caused by primary fragments and secondary fragments of blunt origin generated by the explosion of a projectile and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 331 dated 15 May 2023, the injuries sustained by **R.A. Nazirov**—bilateral chronic cochlear neuritis; persistent sensorineural hearing loss, with whispered speech heard from a distance of 4 metres by the right ear and 3 metres by the left ear; barotrauma; a blind wound of the soft tissues of the left thigh; contusion of the soft tissues of the lumbar-sacral region; and superficial wounds of the second finger of the right hand—could have been caused by the blast wave and by primary and secondary fragments generated by the explosion of military ordnance possessing explosive properties and, taken together, constitute **minor harm to health**.

According to forensic medical expert opinion No. 334 dated 15 May 2023, the injury sustained by **T.S. Salahli**—a contused and lacerated wound of the right thigh accompanied by abrasions around the wound—could have been caused by the blast wave and secondary fragments of blunt origin generated by the explosion of a projectile and, according to its severity, constitutes **minor harm to health**.

According to forensic medical expert opinion No. 330 dated 15 May 2023, no visible injury or trace of injury connected with the incident described above was detected on the body of **I.N. Mammadov** during examination. According to the medical documents, including an extract from the "Register of Outpatients" of Military Unit No. 524, no injury was detected during his specialised medical examination at Military Unit No. 524 on 15 May 2023, and he was diagnosed as **"practically healthy."**

According to the forensic medical expert opinion No. K/362 dated 12 October 2023, based on the submitted medical documents and examination findings, **Sanan Elchin oglu Mustafayev** had pathologies diagnosed as "blast injury; shrapnel wounds of the left lower leg and right hand; mature skin scars following primary surgical treatment of wounds caused by a marginal avulsion closed fracture of the olecranon process of the right ulna and removal of a foreign body; an ununited fracture of the olecranon process; blast trauma; a previous closed craniocerebral injury; autonomic vascular instability following concussion of the brain; astheno-neurotic manifestations following a previous closed craniocerebral injury and concussion of the brain; and a condition following bilateral acute cochlear neuritis resulting from barotrauma."

The stated pathologies were caused during the blast injury by the impact of a firearm projectile and by the shock wave generated during detonation and, according to their severity, taken together, constitute **less serious harm to health resulting in a prolonged impairment of health**. The "marginal avulsion closed fracture of the olecranon process of the right ulna" was caused by a blunt mechanism through the impact of a hard blunt object, and it was considered probable that it had been sustained when the injured area struck a hard blunt object during the blast wave.

According to forensic medical expert opinion No. 486 dated 21 July 2023, no visible injury or trace of injury connected with the incident described above was detected on the body of **Aliyev Novruz Hagverdi oglu** during examination. However, according to the medical documents, including an extract from the "Register of Injuries" of Military Unit No. 172, he

had been diagnosed with “blunt trauma to the right elbow joint” during a medical examination on 10 June 2023. Since the concept of blunt trauma is general in nature and no objective signs were detected during either the initial medical examination or the forensic medical examination, it was not presently assessed as an injury from a forensic medical perspective.

According to forensic medical expert opinion No. 477 dated 6 July 2023, the injuries sustained by **A.S. Bakirov**—through-and-through bullet wounds of the soft tissues of the left forearm and left lower leg—were caused by two shots fired from a firearm. It was not excluded that they had been sustained on the date and under the circumstances stated in the decision and, according to their severity, taken together, constitute **minor harm to health resulting in a short-term impairment of health**.

Page 560

According to forensic ballistic and chemical expert opinion No. 3-16-16/2-3/1161 dated 22 August 2023, the military trousers bore damage in the number and dimensions stated in the examination section of the opinion. Despite the absence around the damage of incompletely burnt smokeless propellant particles and copper traces constituting additional factors of a shot, based on the form, dimensions and morphological structure of the damage, the defect on the rear lower outer portion of the left trouser leg was an entrance defect, while the defect on the rear lower inner portion of the left trouser leg was an exit defect. The damage was characteristic of having been caused by a bullet approximately 5 millimetres in diameter, fired from a rifled firearm from a distance exceeding 2 metres and travelling from left to right.

No damage characteristic of having been caused by a bullet fired from a firearm, nor any incompletely burnt smokeless propellant particles constituting an additional factor of a shot, were detected on the military belt or the upper part of the military boot.

According to forensic biological expert opinion No. 47-MTB dated 5 September 2023, **Bakirov Ali Shukur oglu** had blood group A (II). Human blood was detected on the trousers and the right boot. Only the “A” antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group A (II), including **Bakirov Ali Shukur oglu**.

According to forensic medical expert opinion No. 856 dated 15 September 2023, the injury sustained by **H.A. Abdullayev**—a through-and-through gunshot bullet wound of the right scapular region and the posterior surface of the lower one-third of the right upper arm—was caused by a shot fired from a firearm and, according to its severity, constitutes **minor harm to health**.

According to forensic trace-evidence expert opinion No. 3-16-16/2-3/1147 dated 18 August 2023, the submitted military body armour and short-sleeved undershirt bore damage in the number and dimensions stated in the examination section of the opinion. Despite the absence

around the damage of incompletely burnt smokeless propellant particles and copper traces constituting additional factors of a shot, based on its form, dimensions and morphological structure, the defects on the anterior-lower portion of the right arm section of the military body armour and on the anterior-upper portion of the right sleeve of the short-sleeved undershirt were entrance defects, while the defects on the posterior portion of the right arm section of the body armour and on the posterior-upper portion of the right sleeve of the undershirt were exit defects. The damage was characteristic of having been caused by a 5.45-millimetre bullet fired from a rifled firearm and travelling from right to left.

According to forensic medical expert opinion No. 827 dated 6 September 2023, the injuries sustained by **X.Q. Habibov**—blast injury; lacerated and incised wounds of the outer surface of the upper one-third of the right forearm, the bridge of the nose, the right frontal, temporal and parietal regions, the right hand, the anterior abdominal wall and the lower one-third of the right thigh; mature skin scars remaining after primary surgical treatment of the wounds; a foreign body retained in the right thigh; post-traumatic keratitis of the right eye; compound myopic astigmatism with refraction along the axes of M 0.75 D and M 0.50 D, resulting in reduction of visual acuity to 0.4, corrected to 0.7; and acute right-sided cochlear neuritis resulting from blast trauma caused by a mine explosion—were caused by the impact of the blast wave and primary fragments and, taken together, constitute **minor harm to health**.

According to comprehensive forensic ballistic, trace-evidence and chemical expert opinions Nos. 3-16-16/2-3/1469 and 3/1477 dated 19 October 2023, the three submitted metal fragments were extensively fragmented as a result of an explosion and bore no factory markings permitting precise identification. Therefore, it was not possible to determine whether they constituted parts of a particular explosive projectile or mine. It was considered possible that the mine used in the explosion was an anti-tank mine with a metal casing intended to be activated by the tracks of tanks and other tracked vehicles or by the wheels of freight vehicles and installed in tank-dangerous directions, on roads and in areas accessible to vehicles. Based on the metal objects found at the site of the explosion, the explosive device was likely—

—an anti-tank mine of the **TM-62M, TM-62P2, TM-62P3, TM-62T or TM-62B** type.

According to forensic medical expert opinion No. 777 dated 16 November 2023, the injuries sustained by **R.I. Nazarov**—injury to the right maxillary bone; penetrating and blind wounds of the right cheek extending into the oral cavity; multiple metal foreign bodies in the soft tissues; a blind wound of the left forearm; and a superficial wound of the nasal region—could have been caused by secondary fragments generated when a bullet or projectile fired from a firearm struck a hard obstacle and, according to their severity, constitute **less serious harm to health**.

According to comprehensive forensic ballistic, trace-evidence and chemical expert opinions Nos. 3-16-16/2-3/1525 and 3/2528 dated 27 October 2023, the trousers, short-sleeved

undershirt and pair of military boots belonging to **Nazarov Ramiz Ismat oglu**, as well as the **Truvelo** sniper rifle bearing No. 3432, bore no damage characteristic of having been caused by a bullet fired from a firearm.

Incompletely burnt propellant particles constituting an additional factor of a shot were detected on the trousers, short-sleeved undershirt, pair of military boots and the **Truvelo** sniper rifle bearing No. 3432.

According to forensic medical-biological expert opinion No. 69/MTB dated 14 November 2023, **Nazarov Ramiz Ismat oglu** had blood group A (II). Human blood was detected on the submitted short-sleeved undershirt, military trousers and pair of boots. Only the "A" antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group A (II), including **Nazarov Ramiz Ismat oglu**. No blood-like stains were detected on the **Truvelo** sniper rifle bearing No. 3432.

According to forensic medical expert opinion No. 594 dated 27 September 2023, the injuries sustained by **Alisoy Mammad Chapay oglu**—multiple blind wounds of the occipital and left temporal regions, left cheek, neck, right thigh and both lower legs; a foreign body in the soft tissues and contusion; lacerations of the right periorbital region accompanied by severe haemorrhage into the sclera; and a superficial wound of the left temporal region—were caused by the blast wave and primary and blunt secondary fragments generated by the explosion of a firearm projectile and, taken together, constitute **minor harm to health resulting in a short-term impairment of health**.

According to forensic medical expert opinion No. 593 dated 18 September 2023, the injuries sustained by **Aliyev Ulfat Novruz oglu**—slight left-sided haemothorax; injury to the tissue of the left lung; and a blind wound of the posterior chest penetrating the thoracic cavity and containing a metal foreign body—were caused by fragments generated by the explosion of military ordnance possessing explosive properties and, according to their severity, constitute **serious harm to health**.

According to forensic medical expert opinion No. 595 dated 27 September 2023, the injuries sustained by **Eyvazov Maharram Jeyhun oglu**—blind wounds of the soft tissues of the left upper arm, thigh and lower leg—were caused by fragments generated by the explosion of military ordnance possessing explosive properties and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 596 dated 4 October 2023, the injuries sustained by **Taghiyev Mahammad Ramiz oglu**—a through-and-through gunshot wound with an entrance opening in the left temporal region and an exit opening in the left cheek region; resulting neuropathy of the left facial nerve; an open, comminuted and displaced fracture of the ascending ramus of the left mandible; a through-and-through wound of the soft tissues of the left temporal and periauricular regions; and metal foreign bodies in the soft tissues—were caused by a shot fired from a firearm and, according to their severity, constitute **less serious harm to health**.

According to forensic medical expert opinion No. 764 dated 15 November 2023, **Qasimov Gunduz Intizam oglu** sustained no injuries causing harm to health.

Page 562

According to forensic medical expert opinion No. 608 dated 29 September 2023, the injuries sustained by **Ismayilov Yunis Panah oglu**—moderate post-haemorrhagic anaemia; traumatic avulsion of the right lower extremity at the level of the middle one-third of the lower leg, resulting in loss of the limb at the level of the upper one-third of the lower leg and accompanied by Grade I traumatic-haemorrhagic shock; right-sided pneumothorax; abrasions of the first and fifth fingers of the right hand; a lacerated wound of the left knee-joint region; and a deep lacerated wound—were characteristic of having been caused by the blast wave and primary and blunt secondary fragments generated by the explosion of military ordnance possessing explosive properties. The injuries resulted in a permanent loss of more than one-third—**60 per cent**—of general capacity for work and therefore constitute **serious harm to health**.

According to forensic medical-biological expert opinion No. 67-MTB dated 19 October 2023, **Ismayilov Yunis Panah oglu** had blood group A (II). Human blood was detected on the jacket, woollen jacket, shirt, military trousers, underpants and the left boot. Only the “A” antigen was obtained during blood-group testing. Accordingly, the bloodstains could have belonged to a person with blood group A (II), including **Ismayilov Yunis Panah oglu**.

According to forensic medical expert opinion No. 1350 dated 27 September 2023, the injuries sustained by **X.M. Eminov**—complete traumatic avulsion of the left foot at the level of the ankle joint accompanied by an extensive soft-tissue defect; open displaced fractures of the lower one-third of the bones of the right lower leg and of the metatarsal bones; closed displaced fractures of the first and fifth toes of the right foot; multiple blind shrapnel wounds of various regions of the body; blind wounds of both periorbital regions; traumatic keratopathy of the left eye; and Grade II–III traumatic-haemorrhagic shock—were caused by the combined impact of fragments and the blast wave generated by the explosion of a projectile possessing explosive properties and, taken together, constitute **serious harm to health**.

According to forensic ballistic and trace-evidence expert opinions Nos. 3-16-16/2-3/1514 and 3/1729 dated 27 October 2023, a mine is an explosive device intended to be concealed underground, on the surface or in various objects and to explode when personnel, vehicles or tanks pass over it, thereby killing, disabling or destroying them. Unlike anti-tank mines designed for use against vehicles, anti-personnel mines are designed for use against people. An anti-personnel mine may be classified as either a blast mine or a fragmentation mine.

The explosion that occurred on 10 September 2023 could have resulted from the detonation of an industrially manufactured **PMN-model blast-type anti-personnel mine**. The total mass of a PMN mine is 550 grams, of which approximately 200 grams consists of TNT explosive. The PMN mine is fitted with a detonator and is placed in the ground manually.

Pressure of between 8 and 25 kilograms is sufficient to activate it. When weight is applied to its pressure plate, the firing mechanism is actuated and the mine detonates immediately.

When a PMN mine explodes, the affected parts are fragmented into small pieces under the impact of the resulting shock wave and high temperature, and a crater approximately 30 centimetres deep is formed in the ground. A PMN mine poses a real danger to human life and health within an approximate radius of 25 metres from the point of explosion.

The submitted T-shirt, military field trousers, black sock and left boot belonging to **Eminov Khayyam Mahal oglu** bore damage in the number and dimensions stated in the examination section. Based on the presence of traces of explosive substances—TNT—and incompletely burnt smokeless propellant particles constituting an additional factor of a shot, as well as the form, dimensions and morphological structure of the damage—

Page 563

—based on the foregoing, the stated damage was characteristic of having been caused by fragments generated by the explosion of an explosive projectile at a distance close to the centre of the explosion and by the impact of the blast wave. It was possible that all of the damage had been sustained under the circumstances described in the decision. No damage characteristic of having been caused by a bullet as a result of a shot fired from a firearm was detected on the submitted cord or on the right trouser leg.

According to forensic medical expert opinion No. 05 dated 20 September 2023, examination of the body of **Isayev Ismayil Charkaz oglu** revealed: open haemopneumothorax; injuries to the lungs and soft tissues; multiple open fractures with bone defects of the left clavicle, the left first and second ribs and the right third and ninth ribs; a through-and-through wound of the chest; and blind wounds of the right upper arm accompanied by multiple open fractures with bone defects of the humerus. The injuries were caused by bullets as a result of at least two shots fired from a firearm. The cause of death was traumatic-haemorrhagic shock associated with the open haemopneumothorax, injuries to the lungs and soft tissues, multiple open fractures with bone defects of the left clavicle, the left first and second ribs and the right third and ninth ribs, the through-and-through wound of the chest and the blind wounds of the right upper arm accompanied by multiple open fractures with bone defects of the humerus.

According to forensic medical expert opinion No. 06 dated 20 September 2023, examination of the body of **Zamanli Ahmad Azad oglu** revealed: injuries to the brain; a through-and-through wound of the cranial cavity accompanied by multiple open fractures with bone defects of the cranial-vault bones; a perforating and grazing wound involving the palmar surface of the second finger of the right hand and the area between the third and fourth fingers of the right hand. The through-and-through wound of the cranial cavity was caused by one bullet fired from a firearm, while the remaining injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties. The cause of death was the through-and-through wound of the cranial cavity accompanied by injury to the brain and multiple open fractures with bone defects of the cranial-vault bones.

According to forensic medical expert opinion No. 07 dated 20 September 2023, examination of the body of **Janbakhishov Khayal Kheyrulla oglu** revealed: numerous extensive tissue-defect wounds of the head and torso penetrating the cranial and thoracic cavities, both upper and lower extremities and the left buttock; injury to the brain; complete destruction of the left eyeball; and multiple open fractures with bone defects of the facial-skeleton bones extending to the skull base, the ribs and the left femur. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the sustained injuries, namely the numerous extensive tissue-defect wounds of the head and torso penetrating the cranial and thoracic cavities, both upper and lower extremities and the left buttock; injury to the brain; complete destruction of the left eyeball; and multiple open fractures with bone defects of the facial-skeleton bones extending to the skull base, the ribs and the left femur.

According to forensic medical expert opinion No. 08 dated 20 September 2023, examination of the body of **Isgandarov Murad Alagha oglu** revealed: injuries to the pelvic-cavity organs caused by a wound penetrating the pelvic cavity; an open fracture of the right pelvic bone; and extensive tissue-defect wounds of the right gluteal region, left gluteal region, right inguinal region, right upper arm and right thigh. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was acute blood loss associated with the injuries sustained, namely injury to the pelvic-cavity organs caused by the penetrating wound, the open fracture of the right pelvic bone and the extensive tissue-defect wounds of the right gluteal region, right upper arm, left gluteal region, right inguinal region and right thigh.

Page 564

According to forensic medical expert opinion No. 39 dated 20 September 2023, examination of the body of **Khanaliyev Ismayil Ziyad oglu** revealed: crushing and destruction of the brain; a through-and-through wound of the cranial cavity accompanied by multiple open fractures of the cranial-vault bones; traumatic amputations of both lower extremities at the level of the lower legs; numerous crushed and lacerated wounds of the body; and first- and second-degree thermal burn wounds of both hands. The through-and-through wound of the cranial cavity was caused by a shot fired from a firearm from the first zone of close range, approximately 5 centimetres from the muzzle, while the remaining injuries were caused by fragments, flame and the blast wave generated by the explosion of military ordnance possessing explosive properties. The direct cause of death was the crushing and destruction of the brain and the through-and-through gunshot bullet wound of the cranial cavity accompanied by multiple open fractures of the cranial-vault bones.

According to forensic medical expert opinion No. 10 dated 20 September 2023, examination of the body of **Hamidli Mikayil Vugar oglu** revealed: numerous extensive tissue-defect wounds of the forehead, lower jaw and lower-lip regions; the right lateral and right posterior surfaces of the chest; the anterior-inner surface of the upper one-third of the left forearm; both forearms and the area including both hands; the anterior-inner surface of the lower one-

third of the left thigh; the anterior, outer and posterior portions of the right thigh; the posterior surface of the right lower leg; and the anterior surfaces of both lower extremities; multiple open fractures of the bones forming the left elbow joint and of the right femur and lower-leg bones; and traumatic loss of the anterior incisors of the upper jaw. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was acute blood loss associated with the foregoing injuries, namely the numerous extensive tissue-defect wounds of the forehead, lower jaw and lower-lip regions; the right lateral and right posterior surfaces of the chest; the anterior-inner surface of the upper one-third of the left forearm; both forearms and the area including both hands; the anterior-inner surface of the lower one-third of the left thigh; the anterior, outer and posterior portions of the right thigh; the posterior surface of the right lower leg; and the anterior surfaces of both lower extremities; the multiple open fractures of the bones forming the left elbow joint and of the right femur and lower-leg bones; and the traumatic loss of the anterior incisors of the upper jaw.

According to forensic medical expert opinion No. 12 dated 20 September 2023, examination of the body of **Abbasov Ruslan Abilfat oglu** revealed: a through-and-through wound of the left side of the chest penetrating the thoracic and abdominal cavities and accompanied by injuries to the organs of those cavities; tissue-defect wounds of the left lateral surface and left posterior surface of the chest and of the left lateral surface of the abdomen; and multiple open fractures of the left fifth and fourth ribs, the right tenth and eleventh ribs and the tenth thoracic vertebra. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was acute blood loss associated with the foregoing injuries, namely the through-and-through wound of the left side of the chest penetrating the thoracic and abdominal cavities and accompanied by injuries to the organs of those cavities; the tissue-defect wounds of the left lateral surface and left posterior surface of the chest and of the left lateral surface of the abdomen; and the multiple open fractures of the left fifth and fourth ribs, the right tenth and eleventh ribs and the tenth thoracic vertebra.

According to forensic medical expert opinion No. 14 dated 20 September 2023, examination of the body of **Khanmammadov Huseyn Mayis oglu** revealed: crushing and destruction of the brain; a wound of the frontal region accompanied by a multiple open fracture of the frontal bone; and numerous extensive tissue-defect wounds involving the left side of the face, the left lateral surface of the neck, the posterior surface of the upper one-third of the right forearm, the anterior-inner surface of the right hand, the anterior-inner surfaces of both thighs, the anterior surface of the right lower leg and the posterior surface of the left lower leg. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was the wound of the frontal region accompanied by crushing and destruction of the brain and a multiple open fracture of the frontal bone.

According to forensic medical expert opinion No. 13 dated 20 September 2023, examination of the body of **Mirzayev Sanan Vugar oglu** revealed: acute blood loss; a fracture of the left ninth rib; left-sided haemopneumothorax, consisting of an accumulation of blood and free air in the thoracic cavity; a through-and-through wound of the chest entering through the posterior-lateral surface of the left side of the chest and projecting over the eleventh rib along the posterior axillary line, and exiting through the left side of the lower one-third of the neck after penetrating the thoracic cavity; and a through-and-through gunshot wound of the soft tissues of the left upper arm, with the entrance and exit openings located on the outer surface of the lower one-third of the left upper arm. The injuries were characteristic of having been caused by a shot fired from a firearm. The cause of death was traumatic-haemorrhagic shock resulting from the gunshot bullet wounds.

According to forensic medical expert opinion No. 09 dated 20 September 2023, examination of the body of **Qarayev Elmin Rafat oglu** revealed: acute blood loss; left-sided haemopneumothorax, consisting of an accumulation of blood and free air in the thoracic cavity; multiple injuries to the thoracic-cavity organs; a blind wound penetrating the left axillary region and thoracic cavity; multiple fractures of the teeth of the lower jaw and a blind wound of the facial region accompanied by crushing and destruction of the lower lip; a blind wound of the submandibular region accompanied by acute blood loss; blind wounds of the left upper-arm region, the outer surface of the middle one-third of the left upper arm, the posterior surface of the left forearm, the left axillary region, the left gluteal region, the outer surface of the upper one-third of the left thigh, the left knee region and the posterior-outer surface of the left lower leg; and a grazing gunshot bullet wound of the dorsal surface of the left hand. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the impact of primary fragments and secondary fragments produced through blunt and sharp mechanisms. The cause of death was traumatic-haemorrhagic shock that developed in connection with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 11 dated 20 September 2023, examination of the body of **Huseynzada Mirmusa Vugar oglu** revealed: acute blood loss; multiple displaced open fractures of the left femur, left patella and left lower-leg bones; traumatic avulsion of the left lower extremity at the level of the upper one-third of the lower leg, accompanied by damage to the main vessels of the left lower extremity; and numerous superficial wounds of the anterior surface of the middle one-third of the right forearm and the anterior-inner surface of the right thigh. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and by primary fragments and secondary fragments generated through a blunt mechanism. The cause of death was traumatic-haemorrhagic shock that developed in connection with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 16 dated 20 September 2023, examination of the body of **Mammadov Royal Asif oglu** revealed: destruction of the brain and left eyeball; a through-and-through wound of the cranial cavity accompanied by multiple open

fractures with bone defects of the cranial-vault bones and injury to the soft tissues; a through-and-through wound of the right thigh accompanied by multiple open fractures with bone defects of the femur; and a grazing wound of the right forearm accompanied by injury to the soft tissues. The injuries were caused by bullets as a result of at least three shots fired from a firearm. The cause of death was the through-and-through wound of the cranial cavity accompanied by destruction of the brain and multiple open fractures with bone defects of the cranial-vault bones.

According to forensic medical expert opinion No. 15 dated 20 September 2023, examination of the body of **Khalilli Mahammad Ilgar oglu** revealed: multiple displaced open fractures of the frontal, parietal and occipital bones; diffuse injury to the brain tissue; and a through-and-through wound penetrating the cranial cavity, with the entrance opening located in the right occipital region and the exit opening located in the left frontal region. The injury was caused by a shot fired from a firearm—

Page 566

—and was characteristic, by its degree of severity, of injuries constituting **serious harm to health posing a danger to life**. The injury resulted in death. The cause of death was diffuse trauma to the brain tissue associated with the penetrating gunshot bullet wound of the head described above.

According to forensic medical expert opinion No. 17 dated 20 September 2023, examination of the body of **Mammadov Tural Suleyman oglu** revealed a through-and-through wound of the thoracic cavity accompanied by injury to the organs of the thoracic cavity and open haemopneumothorax. The stated injury was caused by the impact of a bullet fired from a firearm. The cause of death was acute blood loss associated with the through-and-through wound of the thoracic cavity, accompanied by injury to the thoracic organs and open haemopneumothorax, located on the outer surface of the right shoulder joint.

According to forensic medical expert opinion No. 19 dated 20 September 2023, examination of the body of **Qafarov Savalan Isfandiyar oglu** revealed crushing and destruction of the brain in the occipital region; a through-and-through wound of the cranial cavity accompanied by a multiple open fracture with a bone defect of the occipital bone; and a grazing wound of the upper left cheek. The through-and-through wound of the cranial cavity was caused by the impact of a bullet fired from a firearm. The cause of death was crushing and destruction of the brain associated with the through-and-through wound of the cranial cavity.

According to forensic medical expert opinion No. 18 dated 20 September 2023, examination of the body of **Aliyev Sarkhan Rabil oglu** revealed injuries to the soft tissues and through-and-through wounds of both thighs, accompanied by multiple open fractures with bone defects of the right and left femurs. The stated injuries were caused by the impact of bullets as a result of two shots fired from a firearm. The cause of death was traumatic-haemorrhagic shock associated with the through-and-through wounds of both thighs, accompanied by

injuries to the soft tissues and multiple open fractures with bone defects of the right and left femurs.

According to forensic medical expert opinion No. 20 dated 20 September 2023, examination of the body of **Balabeyli Eljan Vasif oglu** revealed destruction of the brain; a blind wound penetrating the cranial cavity accompanied by multiple open fractures with bone defects of the cranial-vault and skull-base bones; a grazing wound of the left eyelid; and abrasions on the anterior-inner surface of the right thigh. The blind wound penetrating the cranial cavity was caused by one bullet fired from a firearm, while the remaining injuries were caused by the impact of hard blunt objects. By their degree of severity, the penetrating blind wound of the cranial cavity constituted **serious harm to health posing a danger to life**. The cause of death was destruction of the brain associated with the blind wound penetrating the cranial cavity and accompanied by multiple open fractures with bone defects of the cranial-vault and skull-base bones.

According to forensic medical expert opinion No. 21 dated 20 September 2023, examination of the body of **Nasibov Agshin Vasif oglu** revealed displaced closed fractures of the left fourth, fifth and sixth ribs; haemorrhage into the root of the lung; injury to the left lung; left-sided closed haemopneumothorax, consisting of an accumulation of free blood and air in the thoracic cavity; and closed blunt trauma to the chest and abdomen accompanied by diffuse haemorrhage into the soft tissues of the posterior chest. The abrasions on the left temple, left shoulder girdle and posterior surface of the chest were caused by a blunt mechanism through the impact of a hard blunt object. The cause of death was asphyxia resulting from compression of the chest caused by the displaced closed fractures of the fourth, fifth and sixth ribs, haemorrhage into the root of the lung, injury to the left lung, left-sided closed haemopneumothorax and the closed blunt trauma to the chest and abdomen accompanied by diffuse haemorrhage into the soft tissues of the posterior chest.

Page 567

According to forensic medical expert opinion No. 22 dated 20 September 2023, examination of the body of **Teymurov Rasul Yusif oglu** revealed decapitation; multiple displaced open fractures of the jawbone and the third cervical vertebra; a through-and-through wound of the head and neck, with the entrance opening located in the left cheek region and the exit opening in the upper one-third of the posterior neck along the midline at the projection of the third cervical vertebra, penetrating the oral cavity and spinal canal; and multiple abrasions of the root of the nose, the posterior surface of the distal phalanx of the fifth finger of the left hand and the left knee region. The through-and-through wound of the head and neck, which caused serious harm to health posing a danger to life, resulted in death. The abrasions of the root of the nose, the posterior surface of the distal phalanx of the fifth finger of the left hand and the left knee region were caused by a blunt mechanism through the impact of a hard blunt object, while the remaining injury was caused by a shot fired from a firearm. Multiple irregularly shaped abrasions, the largest measuring 3 × 1.7 centimetres, with uneven contours, a dry surface and located slightly below the surrounding skin level, were also detected in both

shoulder regions. Those abrasions were characteristic of having been caused by friction of the injured area against a hard blunt object. The cause of death was injury to the cervical portion of the spinal cord associated with the through-and-through wound of the head and neck.

According to forensic medical expert opinion No. 25 dated 20 September 2023, examination of the body of **Aliyev Shahriyar Bakhtiyar oglu** revealed numerous wounds with extensive tissue defects on the right side of the lower back, face, neck, right anterior chest, right anterior abdomen, right posterior-lateral chest, around the right elbow joint, on the anterior surface of the right thigh, the anterior and outer surfaces of the left thigh, and the anterior, outer and inner surfaces of the right lower leg, penetrating the abdominal cavity and accompanied by injury to the abdominal organs. The injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties and by the blast wave. The cause of death was acute blood loss associated with the numerous wounds described above, including those penetrating the abdominal cavity and accompanied by injury to the abdominal organs.

According to forensic medical expert opinion No. 23 dated 20 September 2023, examination of the body of **Qasimli Nijat Elsan oglu** revealed a blind wound of the posterior surface of the upper one-third of the left lower leg accompanied by multiple displaced open fractures of the tibia and fibula and injury to the principal vessels of the left lower leg at the level of its upper one-third; and abrasions on the right palm, left shoulder girdle and both waist regions. The blind wound of the posterior surface of the upper one-third of the left lower leg was caused by the primary blast wave generated by the explosion of military ordnance and by secondary fragments produced through a blunt mechanism. The cause of death was developing traumatic-haemorrhagic shock associated with the blind wound of the posterior surface of the upper one-third of the left lower leg.

According to forensic medical expert opinion No. 24 dated 20 September 2023, examination of the body of **Samadov Elchin Akif oglu** revealed multiple wounds with extensive tissue defects on the vertex, upper lip, face, neck, chest, abdomen, anterior surface of the left upper arm, anterior and posterior surfaces of the left forearm, dorsal surface of the left hand, outer surface of the right upper arm, right forearm, inner surface of the lower one-third of the right thigh, anterior, outer and inner surfaces of the left thigh and anterior-inner surface of the right lower leg; crushing and destruction of the brain; multiple open fractures of the cranial and facial bones and the left femur; traumatic amputations of the distal phalanges of the first, second and third fingers together with the metacarpal bones of the fourth and fifth fingers of the left hand; and traumatic amputations at the level of the palmar surfaces of the second, third and fourth fingers of the right hand—

—were revealed. The stated injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties and by the blast wave. The immediate cause of death was crushing and destruction of the brain associated with the foregoing

injuries, namely the numerous wounds with extensive tissue defects in the vertex, upper lip, face, neck, chest and abdominal regions; the anterior surface of the left upper arm; the anterior and posterior surfaces of the left forearm; the dorsal surface of the left hand; the outer surface of the right upper arm; the right forearm; the inner surface of the lower one-third of the right thigh; the anterior, outer and inner surfaces of the left thigh; the anterior-inner surface of the right lower leg; the multiple open fractures of the cranial and facial bones and the left femur; and the traumatic amputations of the distal phalanges of the first, second and third fingers together with the metacarpal bones of the fourth and fifth fingers of the left hand and of the second, third and fourth fingers of the right hand at the level of their palmar surfaces.

According to forensic medical expert opinion No. 26 dated 20 September 2023, examination of the body of **Aghjabayov Tural Tabriz oglu** revealed numerous penetrating wounds with extensive tissue defects involving the left gluteal region, the posterior surface of the left shoulder joint, the left scapular region, the inner surfaces of the left upper arm and forearm, the outer surface of the left hip joint, the anterior and inner surfaces of the left lower leg, and the posterior and inner surfaces of the right lower leg; multiple open fractures with bone defects of the left tibia and fibula; and first- and second-degree thermal burn injuries involving the forehead and face, the right hand, the left upper extremity and the anterior surface of the right lower leg. The injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties, by flame and by the blast wave. The cause of death was traumatic-haemorrhagic shock associated with the injuries described above, including the numerous penetrating wounds with extensive tissue defects, the multiple open fractures with bone defects of the left tibia and fibula and the first- and second-degree thermal burns.

According to forensic medical expert opinion No. 27 dated 20 September 2023, examination of the body of **Karimov Elnur Adil oglu** revealed abrasions involving the forehead, face and the anterior and lateral surfaces of the neck; multiple lacerated and incised wounds with large defects involving the posterior-outer and inner surfaces of the middle one-third of the left forearm, the posterior surface of the left radiocarpal joint, the anterior and outer surfaces of the left thigh, the inner surface of the right thigh, the right knee region and the posterior surface of the right lower leg; and multiple open fractures of the left femur and right lower-leg bones. The injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties and by the blast wave. The cause of death was traumatic-haemorrhagic shock associated with the numerous penetrating wounds involving the body’s soft and muscular tissues and accompanied by extensive defects, as well as with the multiple open fractures of the left femur and right lower-leg bones.

According to forensic medical expert opinion No. 32 dated 20 September 2023, examination of the body of **Mehdizada Mirpasha Yaqub oglu** revealed a multiple open fracture of the right femur; extensive lacerated and incised wounds with tissue defects on the posterior surfaces of both thighs, the right gluteal region and the left lower-leg region; and superficial wounds of the forehead, the left upper eyelid, the anterior projection of the nasal bridge and

the left nasal wing. The injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties and by the blast wave. The cause of death was acute blood loss associated with the multiple open fracture of the right femur and the extensive lacerated and incised wounds with tissue defects on the posterior surfaces of both thighs, the right gluteal region and the left lower-leg region.

According to forensic medical expert opinion No. 28 dated 20 September 2023, examination of the body of **Mammadaliyev Niyazi Samir oglu** revealed crushing and destruction of the brain; injury to the organs of the thoracic cavity; open haemopneumothorax; and a fracture of the frontal bone extending to the skull base—

Page 569

—accompanied by a bone defect penetrating the cranial cavity in the frontal region; multiple wounds penetrating the thoracic cavity through the right posterior surface of the chest, the posterior surface of the lower one-third of the right upper arm, the right gluteal region, the outer surface of the middle one-third of the right thigh, the anterior surface of the lower one-third of the left lower leg and the right gluteal region, accompanied by defects of the subcutaneous soft and muscular tissues. The wounds in the frontal region and on the right posterior surface of the chest were caused by two shots fired from a firearm, while the remaining injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained, namely the blind gunshot bullet wounds penetrating the cranial and thoracic cavities; crushing and destruction of the brain; injuries to the organs of the thoracic cavity; open haemopneumothorax; a fracture of the frontal bone with a defect extending to the skull base; and multiple shrapnel wounds accompanied by defects of the subcutaneous soft and muscular tissues.

According to forensic medical expert opinion No. 29 dated 20 September 2023, examination of the body of **Ibrahimli Elchin Sadig oglu** revealed open injuries to the organs of the thoracic and abdominal cavities incompatible with life; multiple open fractures with bone defects of the ribs; numerous superficial wounds on the anterior surfaces of the chest and abdomen, the left forearm from the lower one-third down to the hand, and both upper and lower extremities; abrasions of the left cheekbone and left upper eyelid; and multiple open fractures of the left forearm and metacarpal bones. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The direct cause of death was traumatic-haemorrhagic shock associated with the open injuries to the organs of the thoracic and abdominal cavities incompatible with life.

According to forensic medical expert opinion No. 30 dated 20 September 2023, examination of the body of **Bilalov Sarkhan Ismat oglu** revealed complete carbonisation of more than 90 per cent of the body, as well as thermally affected body parts placed in one hand bag and separately in an open condition and inside a white polyethylene bag marked with the numbers “1,” “2” and “3.” The injuries were characteristic of having been caused during the explosion

of a firearm projectile by general damaging factors, principally by prolonged exposure to the high temperature of the explosion gases and the secondary fire zone. According to their severity, they constituted **serious harm to health posing a danger to life**and resulted in death. The cause of death was burn shock resulting from fourth-degree thermal burns involving more than 90 per cent of the body.

According to forensic medical expert opinion No. 31 dated 20 September 2023, examination of the body of **Aghayev Jeyhun Etibar oglu** revealed acute blood loss; multiple fractures of the ribs on both sides; numerous injuries to the organs of the thoracic cavity; traumatic haemopneumothorax, consisting of an accumulation of blood and free air in the thoracic cavity; a blind wound of the left anterior and lateral chest penetrating the thoracic cavity; traumatic avulsion of both upper extremities at the level of the upper one-third of the forearms; traumatic avulsion of both lower extremities at the level of the middle one-third of the thighs; and thermal burns involving the entire body surface. The injuries were characteristic of having been caused during the explosion of a firearm projectile by flame, the blast wave and primary and secondary fragments generated through a blunt mechanism. Taken together, they bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. The cause of death was traumatic-haemorrhagic shock that developed in connection with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 34 dated 20 September 2023, examination of the body of **Shahriyarov Vusal Tabiyyat oglu** revealed acute blood loss; left-sided—

—haemopneumothorax, consisting of an accumulation of free blood and air in the thoracic cavity; and a blind wound of the anterior surface of the left shoulder joint penetrating the thoracic cavity and accompanied by injuries to the organs of the thoracic cavity. Abrasions were also detected on the right forehead and right cheekbone, the posterior surfaces of both elbow joints, the anterior surface of the left knee joint, the posterior surfaces of the right and left halves of the chest and the lumbar region. The abrasions of the right forehead and right cheekbone, the posterior surfaces of both elbow joints, the anterior surface of the left knee joint, the posterior surfaces of the right and left halves of the chest and the lumbar region were caused by a blunt mechanism through the impact of a hard blunt object, while the remaining injury—the blind wound of the anterior surface of the left shoulder joint penetrating the thoracic cavity—was caused by a bullet fired from a firearm. The cause of death was traumatic-haemorrhagic shock associated with the blind wound of the anterior surface of the left shoulder joint penetrating the thoracic cavity.

According to forensic medical expert opinion No. 33 dated 20 September 2023, examination of the body of **Alakbarov Ramal Elnur oglu** revealed a wound in the occipital region penetrating the cranial cavity; crushing and destruction of the brain; and an open comminuted fracture of the occipital bone. The injury was caused by fragments and the blast wave

generated by the explosion of military ordnance possessing explosive properties and, since it resulted in death, constitutes **serious harm to health**. The cause of death was crushing and destruction of the brain associated with the shrapnel wound of the occipital region penetrating the cranial cavity.

According to forensic medical expert opinion No. 36 dated 20 September 2023, examination of the body of **Bayramov Tapdig Namig oglu** revealed: traumatic amputations of the right upper extremity at the level of the shoulder joint, the left upper extremity at the level of the radiocarpal joint, the right lower extremity at the level of the hip joint and the left lower extremity at the level of the knee joint; fourth-degree thermal burns of the head, neck, thoracic region and left upper extremity; and lacerated wounds opening into the abdominal cavity on the anterior abdominal wall, as well as wounds of the head and scrotum. The injuries were caused by fragments, flame and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the foregoing injuries, namely the traumatic amputations of all four extremities; fourth-degree thermal burns of the head, neck, thoracic region and left upper extremity; and shrapnel wounds of the anterior abdominal wall opening into the abdominal cavity and of the head and scrotum.

According to forensic medical expert opinion No. 35 dated 20 September 2023, examination of the body of **Ahmadov Vusal Ilgar oglu** revealed acute blood loss; fractures of the left fifth through eleventh ribs; an open wound of the left anterior chest accompanied by injury to the left lung; acute blood loss; fractures of the right eighth through tenth ribs; an open wound of the right lateral chest accompanied by injury to the right lung and liver; an open wound of the left anterior abdominal wall accompanied by multiple injuries to the abdominal organs; a blind wound of the lower one-third of the left lower leg accompanied by open fractures of the tibia and fibula; traumatic amputation of the right upper extremity at the level of the upper one-third of the upper arm; and fourth-degree thermal burns involving more than 90 per cent of the body surface. The injuries were characteristic of having been caused by flame and the blast wave and by primary fragments and secondary fragments generated through a blunt mechanism during the explosion of a firearm projectile. Taken together, they bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. The cause of death was traumatic-haemorrhagic shock that developed in connection with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 37 dated 20 September 2023, examination of the body of **Jalilov Devid Raufovich** revealed circular fragmentation and destruction of the cranial-vault bones approximately 5 centimetres above the forehead, open multiple—

—fractures with bone defects of the skull-base bones; absence of brain tissue from the cranial cavity; complete fragmentation and destruction of the soft tissues of the chest, abdomen, right half of the pelvic region, right hip and thigh; traumatic amputation of the right upper

extremity slightly above the elbow; absence of the right hand due to traumatic amputation at the radiocarpal joint, with only the skin of the first finger remaining attached; opening of the thoracic, abdominal and pelvic cavities and evisceration of the organs as a result of crushed-lacerated wounds of the right lateral surfaces of the chest and abdomen; complete fragmentation and destruction of the right gluteal region, right thigh region and right lower leg to the lower one-third; contamination of the wounds with grass fragments; a wound on the inner surface of the left foot containing a flattened cartridge case-shaped metal object, broken bone fragments and a metal fragment measuring 1.2 × 0.8 centimetres; and additionally submitted crushed, fragmented and structurally unidentifiable brain tissue. The injuries were caused by the combined effects of the general damaging factors of an exploding fragmentation firearm projectile, namely multiple primary and secondary fragments, the blast wave and the gases generated by the explosion. According to their severity, they constituted **serious harm to health** and resulted in death. The cause of death was haemorrhagic-traumatic shock resulting from injuries penetrating the cranial, thoracic, abdominal and pelvic cavities and damaging the organs within those cavities.

According to forensic medical expert opinion No. 38 dated 20 September 2023, examination of the body of **Salmanov Elchin Habil oglu** revealed multiple displaced open fractures of the frontal, right temporal and occipital bones; a blind wound of the right frontotemporal region penetrating the cranial cavity and accompanied by diffuse injury to the brain tissue; a wound of the right auricle; and a grazing wound of the outer surface of the middle one-third of the left lower leg. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary fragments and secondary fragments generated through a blunt mechanism. Taken together, they bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. The cause of death was diffuse injury to the brain tissue associated with the blind wound of the right frontotemporal region penetrating the cranial cavity.

According to forensic medical expert opinion No. 41 dated 21 September 2023, examination of the body of **Abbasov Mehdi Amrah oglu** revealed deformity of the skull; a wound in the posterior portion of the skull opening into the cranial cavity; numerous extensive tissue-defect lacerated and incised wounds of the left scapular region, the posterior surface of the right half of the chest, the lumbar region, the right gluteal region, the right axillary region extending to the elbow and shoulder joints, the right lateral abdominal wall, the right inguinal region, the right thigh from the upper one-third to the upper one-third of the right lower leg, the right heel, the inner surface of the lower one-third of the left lower leg, the left plantar region, the outer surface of the right hand and the posterior surfaces of the third and fourth fingers of the left hand; traumatic amputation of the first finger of the left hand at the distal phalanx; a large fracture defect of the cranial-vault bones and right humerus; a large soft-tissue defect extending from the upper one-third of the right thigh to the upper one-third of the lower leg; a large defect of the right calcaneus; and pathological mobility in the lower one-third of the left tibia. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the foregoing injuries, including

deformity of the skull, multiple shrapnel wounds with extensive tissue defects and numerous large comminuted fractures with bone defects of the cranial and limb bones.

According to forensic medical expert opinion No. 42 dated 21 September 2023, examination of the body of **Quluzada Nihat Qasim oglu** revealed multiple fractures of the ribs with bone defects and injuries to the organs of the thoracic and abdominal cavities, accompanied by a wound of the right lateral surface of the chest—

Page 572

—and the anterior surface of the right half of the abdomen; extensive wounds with bone and soft-tissue defects extending from the upper one-third of the right upper arm to the lower one-third of the forearm; extensive tissue-defect wounds of the left hand and forearm, the right and left thighs and both lower legs; and multiple open comminuted fractures with bone defects of the bones of both lower extremities. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained, namely the multiple fractures of the ribs with bone defects; injuries to the organs of the thoracic and abdominal cavities; the wound of the right lateral surface of the chest and the anterior surface of the right half of the abdomen; the extensive wounds with bone and soft-tissue defects extending from the upper one-third of the right upper arm to the lower one-third of the forearm; the extensive tissue-defect wounds of the left hand and forearm, the right and left thighs and both lower legs; and the multiple open comminuted fractures with bone defects of the bones of both lower extremities.

According to forensic medical expert opinion No. 40 dated 21 September 2023, examination of the body of **Amirov Tural Matlab oglu** revealed acute blood loss; left-sided haemopneumothorax, consisting of an accumulation of free blood and air in the thoracic cavity; a blind wound of the left anterior surface of the chest penetrating the thoracic cavity and accompanied by injuries to the thoracic organs; acute blood loss; injury to the principal vessels of the right lower leg; a through-and-through wound of the right lower leg with an entrance opening on the anterior surface of the lower one-third and an exit opening on the posterior surface of the lower one-third; a through-and-through wound of the right thigh with entrance and exit openings on the outer surface of the upper one-third; and numerous abrasions on the dorsal surfaces of both hands, the anterior surface of the lower one-third of the left thigh, the anterior surface of the upper one-third of the left lower leg, the anterior surface of the right knee joint and the right lower-leg region. The abrasions were caused by a blunt mechanism through the impact of a hard blunt object, while the remaining injuries—the blind wound of the left anterior chest penetrating the thoracic cavity and the through-and-through wounds of the right lower leg and right thigh—were characteristic of having been caused by shots fired from a firearm. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained.

According to forensic medical expert opinion No. 43 dated 21 September 2023, examination of the body of **Khalafov Tapdig Vidadi oglu** revealed traumatic amputation of the left lower extremity at the level of the ankle joint; extensive crushed and lacerated wounds with tissue defects of the right thigh, knee joint and lower leg; and abrasions of the left temporal region, right temporal region, right eyebrow region, outer margin of the right orbit and left lateral surface of the neck. The injuries were caused by numerous fragments and the blast wave generated by the explosion of a military firearm projectile. The cause of death was acute blood loss associated with traumatic amputation of the left lower extremity at the level of the ankle joint and the extensive crushed and lacerated wounds with tissue defects of the right thigh, knee joint and lower leg.

According to forensic medical expert opinion No. 44 dated 21 September 2023, examination of the body of **Rustamov Vusal Rustam oglu** revealed multiple wounds penetrating the cranial cavity in the right frontal region; crushing and destruction of the brain tissue; multiple open comminuted fractures of the cranial-vault bones; first-degree thermal burns of the face; wounds of the left cheekbone, nose, jaw and lower-lip regions; a fracture of the mandible; complete transection of the lower lip; fractures of the teeth; traumatic amputation of the fifth finger of the left hand; multiple open comminuted fractures involving the posterior surface of the right elbow region and extending from the lower one-third of the right forearm to the third, fourth and fifth metacarpal bones; multiple wounds of the inner surface of the right thigh extending to the lower one-third and containing visible fragments of the fractured femur; and wounds of the plantar surface of the left foot—

—together with a parchment-like area caused by thermal exposure and thermal damage to the hair of the head. The injuries were caused by multiple fragments and the blast wave generated by the explosion of a firearm projectile. The cause of death was crushing and destruction of the brain tissue accompanied by multiple open comminuted fractures of the cranial-vault and skull-base bones resulting from a gunshot shrapnel wound penetrating multiple body cavities, including the cranial cavity.

According to forensic medical expert opinion No. 45 dated 21 September 2023, examination of the body of **Jafarov Oleg Gilij oglu** revealed crushing and destruction of the brain; multiple open displaced fractures with bone defects of the cranial-vault bones, right upper arm and tibia; incomplete traumatic avulsion of the right upper extremity at the level of the upper one-third of the upper arm; and numerous extensive incised-lacerated wounds with tissue defects in the right temporal region, occipital region, tip of the nose, right lateral chest, anterior surface of the right forearm, outer surface of the right thigh, inner surface of the left thigh and anterior surface of the middle one-third of the right lower leg. The injuries were caused by numerous fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was multiple shrapnel wounds of the body accompanied by crushing and destruction of the brain, fractures of the cranial-vault bones, incomplete traumatic avulsion of the right upper arm and acute blood loss.

According to forensic medical expert opinion No. 46 dated 21 September 2023, examination of the body of **Aliyev Valiyulla Elmanovich** revealed acute blood loss; multiple displaced open fractures of the tibia and fibula and the principal veins and arteries of the lower leg, accompanied by a blind wound of the posterior-outer surface of the upper one-third of the right lower leg; blind wounds of the posterior surface of the upper one-third of the left thigh, the posterior surface of the right thigh, the left gluteal region, the posterior surface of the right lower leg and the inner-posterior surface of the upper one-third of the right lower leg; and numerous superficial wounds of the right upper arm, right gluteal region and left thigh. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary and secondary fragments generated through a blunt mechanism. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained as a result of the firearm-projectile explosion, namely acute blood loss; multiple displaced open fractures of the tibia and fibula; injuries to the principal veins and arteries; and the blind wound of the posterior-outer surface of the upper one-third of the right lower leg.

According to forensic medical expert opinion No. 47 dated 21 September 2023, examination of the body of **Safarov Gokhan Ilgar oglu** revealed crushing and destruction of the brain; open fractures of the skull-base and cranial-vault bones; injuries to the parietal region, outer corner of the left eye and left cheek; haematomas of both periorbital regions, forming the “spectacle sign”; and multiple superficial crushed-lacerated wounds of the anterior surfaces of the left upper arm, forearm, thigh and lower leg. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The direct cause of death was crushing and destruction of the brain.

According to forensic medical expert opinion No. 48 dated 21 September 2023, examination of the body of **Nurmammadov Ramazan Nurahmadovich** revealed fragmentation and destruction of the outer part of the right foot extending to the third metatarsal bone, with amputation of the foot; deformity of the lower one-third of the right lower leg; complete fractures of both lower-leg bones at the level of the lower one-third; and a wound on the anterior surface of the middle one-third of the lower leg, with the wound edges and surface covered by a dark-brown parchment-like area. The injuries were characteristic of having been caused by the general damaging factors of an exploding fragmentation firearm projectile, namely multiple primary and secondary fragments. The cause of death was haemorrhagic-traumatic shock associated with fragmentation and destruction of the right lower extremity and amputation of the foot resulting from the impact of the exploding firearm projectile—

Page 574

According to forensic medical expert opinion No. 49 dated 21 September 2023, examination of the body of **Aliyev Sabuhi Tahir oglu** revealed: an open injury to the right lung; open displaced comminuted fractures of the laryngeal cartilages, hyoid bone, occipital bone, right fourth through eighth ribs and the fifth metacarpal bone of the left hand; incomplete traumatic amputations of the right upper extremity at the level of the middle one-third of the upper arm

and of the second finger of the right hand at the level of the distal phalanx; and numerous extensive crushed-lacerated wounds with tissue defects extending from the submandibular region to the lower one-third of the anterior neck, the occipital region, the right lateral and anterior surfaces of the chest, the anterior surface of the middle one-third of the right forearm, the inner and palmar surfaces of the left hand and the outer surface of the upper one-third of the right thigh. The injuries were caused by multiple fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the foregoing injuries, namely the numerous crushed-lacerated shrapnel wounds with extensive tissue defects; the open injury to the right lung; the open displaced comminuted fractures of the laryngeal cartilages, hyoid bone, occipital bone, right fourth through eighth ribs and the fifth metacarpal bone of the left hand; and the incomplete traumatic amputations of the right upper extremity at the level of the middle one-third of the upper arm and the second finger of the right hand at the level of the distal phalanx.

According to forensic medical expert opinion No. 50 dated 21 September 2023, examination of the body of **Gardashzada Elsevar Rakif oglu** revealed acute blood loss; haemoperitoneum, consisting of an accumulation of blood in the abdominal cavity; a blind wound of the left lateral abdominal wall penetrating the abdominal cavity and accompanied by multiple injuries to the abdominal organs; acute blood loss; a blind wound of the anterior-inner surface of the left forearm accompanied by multiple displaced open fractures of the radius and ulna; a blind wound of the palmar surface of the left hand accompanied by multiple displaced open fractures of the fourth and fifth metacarpal bones; traumatic avulsion of the fifth finger of the left hand; and multiple blind wounds of the posterior-outer surface of the left upper arm, posterior-inner surface of the right upper arm, anterior-inner surface of the right forearm, both gluteal regions, posterior surface of the right thigh, outer surface of the left lower leg, left heel region and the soft tissues of the left ankle joint. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary and secondary fragments generated through a blunt mechanism. Taken together, they bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. Irregular, dried, yellowish abrasions resembling parchment paper were also found on the right side of the face, right frontal region, right auricle and nasal region. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 51 dated 21 September 2023, examination of the body of **Mustafazada Vali Ceyhun oglu** revealed wounds with extensive tissue defects on the left posterior surface of the chest penetrating the thoracic cavity; the left gluteal region penetrating the pelvic cavity; the right lateral and anterior surfaces of the nose; the periorbital and cheek regions; the right shoulder region; the anterior-outer surface of the right upper arm; the anterior surface of the right forearm; the dorsal surface of the right hand; and the outer surface of the upper one-third of the left thigh; as well as multiple open comminuted fractures of the right humerus, radius and ulna. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing

explosive properties. The cause of death was acute blood loss associated with the injuries sustained, namely the wounds of the left posterior chest penetrating the thoracic cavity; the left gluteal region penetrating the pelvic cavity; the right lateral and anterior surfaces of the nose; the periorbital and cheek regions; the right shoulder region; the anterior-outer surface of the right upper arm; the anterior surface of the right forearm; the dorsal surface of the right hand; and the outer surface of the upper one-third of the left thigh—

Page 575

—together with the multiple open comminuted fractures of the right humerus, radius and ulna.

According to forensic medical expert opinion No. 52 dated 21 September 2023, examination of the body of **Zeynalli Rashid Madat oglu** revealed a wound on the right anterior surface of the chest, located vertically at the level of the middle one-third of the right clavicle along the nipple line, with an abrasion ring measuring 0.5 centimetres along the right margin and 1.3 centimetres along the upper margin; the wound penetrated the thoracic cavity and contained visible lung tissue, and its dimensions measured 2.5 × 2 centimetres. The injury was caused by the impact of a fragment generated by the explosion of a firearm projectile. The cause of death was traumatic-haemorrhagic shock resulting from the gunshot shrapnel wound penetrating the thoracic cavity and injuring the organs of the chest.

According to forensic medical expert opinion No. 53 dated 21 September 2023, examination of the body of **Akbarov Shahid Natig oglu** revealed wounds of the frontal region and right lower eyelid, accompanied by crushing and destruction of the brain and right eyeball and by open comminuted fractures with bone defects of the skull. The injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties. The direct cause of death was crushing and destruction of the brain.

According to forensic medical expert opinion No. 54 dated 21 September 2023, examination of the body of **Valizada Rashad Elshan oglu** revealed a through-and-through wound of the cranial cavity and a blind wound penetrating the abdominal cavity through the right foot; crushing and destruction of the brain; open comminuted fractures of the cranial-vault bones and of the first and second metatarsal bones of the right foot; and injuries to the organs of the abdominal cavity. The injuries were caused by shots fired from a firearm and, according to their severity, constitute **serious harm to health**. The immediate cause of death was the through-and-through wound of the cranial cavity accompanied by fractures of the cranial-vault bones and crushing and destruction of the brain.

According to forensic medical expert opinion No. 57 dated 21 September 2023, examination of the body of **Quliyev Najmaddin Natig oglu** revealed partial amputation of the head from the level above the lower lip, including the right auricle, and from the level of the upper one-third of the neck on the left side; fragmentation of the facial and cranial-vault bones into various pieces remaining attached by skin flaps; multiple puncture-type wounds of the left upper arm, left forearm and chest, and of the left lower-leg region; a dark-brown area on the

anterior-outer surface of the left thigh accompanied by peeling of the skin and exposure to thermal effects. The injuries were characteristic of having been caused by the general damaging factors of an exploding fragmentation firearm projectile, namely multiple primary and secondary fragments. According to their severity, they constituted **serious harm to health** and resulted in death. The cause of death was partial traumatic amputation of the head accompanied by crushing and destruction of the brain tissue and fragmentation of the cranial-vault and skull-base bones resulting from the impact of the exploding firearm projectile.

According to forensic medical expert opinion No. 56 dated 21 September 2023, examination of the body of **Hasanov Emral Vugar oglu** revealed acute blood loss; multiple displaced open fractures of the left eighth, ninth and tenth ribs accompanied by injury to the left lung; a blind wound of the left anterior chest penetrating the thoracic cavity; a blind wound of the left suprascapular region penetrating the spinal canal and accompanied by a displaced open comminuted fracture of the cervical vertebra; a through-and-through wound of the right hand accompanied by multiple displaced open fractures of the second, third and fourth metacarpal bones; a blind wound of the left anterior chest; a superficial wound of the anterior-outer surface of the lower one-third of the left upper arm; and multiple abrasions of the right hand, right lower leg and right thigh. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave—

Page 576

—and primary fragments and secondary fragments generated through a blunt mechanism. The cause of death was traumatic-haemorrhagic shock that developed in connection with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 55 dated 21 September 2023, examination of the body of **Ziyadov Jasarat Zaur oglu** revealed traumatic fragmentation and avulsion of the brain and cranial-vault bones; numerous extensive tissue-defect wounds involving the anterior surfaces of the left and right shoulder regions, chest and right upper arm and forearm; the middle and lower one-thirds of the left upper arm; the anterior surfaces of the upper one-third of the left forearm; the dorsal surface of the left hand; the right anterior and lateral abdominal wall; the right gluteal region extending to the lower one-third of the right lower leg; the inner surface of the left thigh; and the posterior surface of the left lower leg; as well as multiple open comminuted fractures with bone defects of the right upper arm, right forearm, first, second and third phalanges of the right hand, left elbow, left wrist, right femur and right lower-leg bones. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The direct cause of death was traumatic fragmentation and avulsion of the brain and cranial-vault bones.

According to forensic medical expert opinion No. 59 dated 21 September 2023, examination of the body of **Aslanov Sahil Ahlidman oglu** revealed acute blood loss; a blind wound of the left lumbar region penetrating the abdominal cavity and accompanied by injury to the abdominal organs; acute blood loss; a blind wound of the left gluteal region penetrating the

abdominal and pelvic cavities and accompanied by injuries to the organs of those cavities; a through-and-through wound of the left lower leg, with an entrance opening on the anterior-inner surface of the upper one-third and an exit opening on the posterior-outer surface of the middle one-third, accompanied by multiple displaced open fractures of the tibia and fibula; blind wounds of the soft tissues of the middle one-third of the left upper arm, left suprascapular region and anterior surface of the right lower leg; and a blind wound of the posterior surface of the third finger of the right hand accompanied by a multiple displaced open fracture of the distal phalanx. Taken together, the injuries bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. The blind wounds of the middle one-third of the left upper arm, left suprascapular region and anterior surface of the right lower leg, as well as the blind wound of the third finger of the right hand accompanied by the distal phalanx fracture, were caused by the blast wave and primary and secondary fragments generated through a blunt mechanism during the explosion of a firearm projectile. The remaining injuries were characteristic of having been caused by shots fired from a firearm. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained.

According to forensic medical expert opinion No. 58 dated 21 September 2023, examination of the body of **Mammadov Fizuli Bahruz oglu** revealed injuries to the organs of the thoracic cavity; open haemopneumothorax; and a through-and-through wound of the thoracic cavity accompanied by an open comminuted fracture of the left clavicle and blind wounds of the parietal region. The through-and-through wounds of the thoracic cavity were characteristic of having been caused by a projectile detached from a wooden obstacle struck by a bullet fired from a firearm. The cause of death was acute blood loss resulting from the through-and-through wound of the thoracic cavity accompanied by injuries to the organs of the thoracic cavity, open haemopneumothorax and an open comminuted fracture of the left clavicle.

According to forensic medical expert opinion No. 60 dated 21 September 2023, examination of the body of **Abbaszada Emin Faig oglu** revealed: one wound on the anterior surface of the neck at approximately the level of the thyroid cartilage penetrating the trachea; one wound on the left anterior surface of the chest over the fourth rib along the midclavicular line penetrating the thoracic cavity; one wound on the left anterior abdominal wall penetrating the abdominal cavity; one wound in the left hip-joint region; one wound on the anterior surface of the left shoulder joint; and one wound on the outer surface of the lower one-third of the left upper arm containing a metal fragment measuring 4.0 × 3.0 centimetres, with fragments of the fractured humerus visible inside—

—as well as one wound at the level of the elbow joint; two wounds on the posterior surface of the left forearm; penetration of the wounds located in the left chest into the thoracic cavity; amputation of the left lower extremity at the level of the knee joint; complete amputation of the left thigh from the proximal portion, with the distal fragment belonging to the left lower extremity; and an extensive wound involving the inner surface of the middle one-third of the

right thigh and the knee region, accompanied by defects of the skin, muscular tissue and bone. The wound edges were torn, and a small amount of soot-like deposit was present around them. The injuries were caused by the general damaging factors of an exploding fragmentation firearm projectile, namely multiple primary and secondary fragments, the blast wave and the thermal effect of the explosion gases. The cause of death was haemorrhagic-traumatic shock that developed as a result of multiple gunshot shrapnel wounds penetrating the thoracic, abdominal and pelvic cavities, injuries to the organs within those cavities and amputation of the left lower extremity.

According to forensic medical expert opinion No. 62 dated 21 September 2023, examination of the body of **Maharramov Javad Sadig oglu** revealed injuries to the organs of the thoracic cavity; open haemopneumothorax; a through-and-through wound of the left anterior chest penetrating the thoracic cavity and accompanied by a displaced comminuted fracture of the humerus; and a through-and-through wound of the left forearm. The injuries were caused by bullets as a result of two shots fired from a firearm. The cause of death was acute blood loss associated with the injuries to the thoracic organs, the open haemopneumothorax, the through-and-through wound of the left anterior chest penetrating the thoracic cavity and the displaced comminuted fracture of the humerus.

According to forensic medical expert opinion No. 63 dated 21 September 2023, examination of the body of **Nazarli Nijat Mubariz oglu** revealed traumatic fragmentation and avulsion of the brain and cranial-vault bones; multiple extensive tissue-defect wounds in the posterior neck, right subscapular region, right lateral chest, anterior surface of the left upper arm, left forearm region, posterior surface of the lower one-third of the right upper arm, anterior surface of the lower one-third of the right thigh, upper one-third of the right lower leg, lower one-third of the left lower leg, left thigh, lower-leg and right foot regions; and multiple open comminuted fractures with bone defects of the cervical vertebrae, left elbow, right lower-leg bones, and upper and lower jaws. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The direct cause of death was traumatic fragmentation and avulsion of the brain and cranial-vault bones.

According to forensic medical expert opinion No. 61 dated 21 September 2023, examination of the body of **Taghiyev Ali Azad oglu** revealed crushing and destruction of the brain; through-and-through wounds of the cranial cavity and right upper arm accompanied by multiple open fractures of the occipital, skull-base, cranial-vault and right humeral bones. The injuries were caused by bullets as a result of two shots fired from a firearm. The cause of death was crushing and destruction of the brain associated with those injuries.

According to forensic medical expert opinion No. 64 dated 21 September 2023, examination of the body of **Mikayilov Ulvi Bahruz oglu** revealed traumatic separation of the torso together with the internal organs at the level of the abdominal and pelvic regions; multiple wounds of the anterior and posterior surfaces of the upper one-third of the left forearm; and multiple large comminuted fractures with bone defects of the left upper arm, pelvis and right femur. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-

haemorrhagic shock associated with the injuries sustained, namely the traumatic separation of the torso together with the internal organs at the abdominal and pelvic levels, multiple shrapnel wounds with extensive tissue defects and the multiple large comminuted fractures with bone defects of the left upper arm, pelvis and right femur—

Page 578

—resulting in traumatic-haemorrhagic shock.

According to forensic medical expert opinion No. 65 dated 21 September 2023, examination of the body of **Qasimov Ibrahim Malikajdar oglu** revealed: injury to the pelvic-cavity organs; a blind wound of the left gluteal region penetrating the pelvic cavity and accompanied by comminuted fractures of the left pelvic and right lower-leg bones; a through-and-through wound of the right lower leg; and lacerated wounds of the left shoulder and left lower-leg regions. The blind wound penetrating the pelvic cavity in the left gluteal region and the through-and-through wound of the right lower leg were caused by two shots fired from a firearm, while the remaining injuries were caused by fragments generated by the explosion of military ordnance possessing explosive properties. The cause of death was multiple gunshot and shrapnel wounds of the body accompanied by injury to the organ penetrating the pelvic cavity, fractures of the left pelvic and right lower-leg bones, and acute blood loss.

According to forensic medical expert opinion No. 66 dated 21 September 2023, examination of the body of **Aliyev Altun Taghi oglu** revealed blind wounds penetrating the cranial cavity through the right and left halves of the head and accompanied by crushing and destruction of the brain tissue and both eyeballs, as well as multiple displaced open fractures of the cranial and facial-skeleton bones; numerous blind shrapnel wounds of the tongue, right auricle, right and anterior surfaces of the neck, both lower-lip regions, the anterior surface of the left half of the chest, the right subclavicular region, the anterior surface of the upper one-third of the right upper arm, the anterior-outer surface of the left upper arm, the left suprascapular region, the posterior-outer surface of the left forearm, the second finger of the left hand, the right lateral chest wall, the left gluteal region, the right shoulder, left upper-arm region and anterior surface of the left knee joint; and multiple abrasions of the right shoulder, left upper-arm region and anterior surface of the left knee joint. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and by primary and secondary fragments generated through a blunt mechanism. The cause of death was crushing and destruction of the brain tissue resulting from the blind shrapnel wounds of the right and left halves of the head.

According to forensic medical expert opinion No. 67 dated 21 September 2023, examination of the body of **Badalov Oruj Arif oglu** revealed extensive crushing and destruction of the brain and soft and bony tissues in the mid-parieto-occipital region; multiple open comminuted fractures of the cranial-vault and skull-base bones; absence of hair on the frontal and lateral portions of the head due to thermal exposure and singeing; a wound on the posterior surface of the left hand containing a stone fragment; extensive lacerated wounds

extending from the upper one-third of the right gluteal region to the middle one-third of the right thigh and containing exposed muscle tissue; open comminuted fractures of the right femur at the middle one-third and both right lower-leg bones at the lower one-third; and parchment-like abrasions in the right upper-arm region, posterior surface of the body and chest. The injuries were characteristic of having been caused by the general damaging factors of an exploding fragmentation firearm projectile, namely multiple primary and secondary fragments, the blast wave and the thermal effect of explosion gases. The cause of death was extensive crushing and destruction of the brain tissue accompanied by open comminuted fractures of the cranial-vault and skull-base bones resulting from blast trauma.

According to forensic medical expert opinion No. 68 dated 21 September 2023, examination of the body of **Alizada Tunjay Nijat oglu** revealed multiple extensive wounds with tissue defects in the nasal and frontal regions, inner surface of the left forearm, right gluteal region extending to the lower one-third of the right lower leg, left gluteal region, posterior surface of the left foot, right heel and dorsum of the right foot; and multiple open comminuted fractures with bone defects of the skull-base and right lower-leg bones. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties—

Page 579

—and the direct cause of death was crushing and destruction of the brain.

According to forensic medical expert opinion No. 69 dated 21 September 2023, examination of the body of **Hasanov Amin Ilgar oglu** revealed a blind wound of the right temporal region penetrating the cranial cavity and accompanied by crushing and destruction of the brain and an open comminuted fracture of the right temporal bone; and numerous incised-lacerated wounds with tissue defects in the right temporal and frontal regions, the left nasal wing, left cheek, right scapular and lumbar regions, the right lateral surface of the chest, posterior surface of the right upper arm and outer surface of the upper one-third of the right thigh. The injuries were caused by multiple fragments and the blast wave generated by the explosion of a military firearm projectile. The cause of death was the lacerated-incised wound of the right temporal region penetrating the cranial cavity and accompanied by crushing and destruction of the brain and an open comminuted fracture of the right temporal bone.

According to forensic medical expert opinion No. 70 dated 21 September 2023, examination of the body of **Hamidov Shamkhal Musa oglu** revealed: a wound on the right lateral surface of the anterior neck, located 5 centimetres below the auricle over the projection of the jugular artery and vein, from which liquid blood was discharged and which contained a thin metal fragment; injuries to the jugular artery and vein, trachea and larynx, with additional metal fragments; a carbonised wound and skin defect extending from the upper one-third of the right upper arm to the inner surface of the lower one-third, containing swollen and hardened muscle tissue; complete carbonisation of the wound margins and base and exposure of the underlying muscle tissue; dark-black discoloration and thermal hardening of the skin over the

thoracic, abdominal, right gluteal and anterior-outer surfaces of the right thigh; thermal fissures in the skin of the right inguinal region with peeling of the epidermis toward the periphery; and an extensive skin, muscle and fascial defect extending from the outer surface of the upper one-third of the left thigh to the upper one-third of the lower leg and terminating on the outer surface, accompanied by an open comminuted fracture of the lower one-third of the right femur. The injuries were characteristic of having been caused by the general damaging factors of an exploding fragmentation firearm projectile, namely multiple primary and secondary fragments, the blast wave and the thermal effect of explosion gases. The cause of death was acute haemorrhagic shock resulting from multiple gunshot shrapnel wounds of the body.

According to forensic medical expert opinion No. 71 dated 21 September 2023, examination of the body of **Aliyev Elvin Gulmammad oglu** revealed acute blood loss; multiple displaced open comminuted fractures of the ribs and lumbar vertebrae; traumatic amputation of both lower extremities accompanied by multiple injuries to the organs of the thoracic, abdominal and pelvic cavities; acute blood loss; multiple displaced open fractures of the right upper extremity; traumatic amputation of the left upper extremity at the level of the upper one-third of the forearm accompanied by injury to the principal vessels of the left forearm; and thermal burns involving the entire body surface. The injuries were characteristic of having been caused during the explosion of a firearm projectile by flame, the blast wave and primary and secondary fragments generated through a blunt mechanism. Taken together, they bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. The cause of death was traumatic-haemorrhagic shock that developed in connection with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 72 dated 21 September 2023, examination of the body of **Alibayov Alibay Mirkarim oglu** revealed complete carbonisation of the body; multiple extensive tissue-defect wounds; and open comminuted fractures with bone defects of the frontal, parietal and left lower-leg bones. The injuries were caused by fragments, flame and the blast wave generated by the explosion of military ordnance possessing explosive properties—

—and the direct cause of death was complete carbonisation of the body.

According to forensic medical expert opinion No. 73 dated 21 September 2023, examination of the body of **Qarayev Ilkin Yusif oglu** revealed: numerous extensive crushed-lacerated wounds with tissue defects throughout the body; thermal burn injuries; open injuries to the organs of the pelvic cavity; incomplete traumatic amputations of both upper extremities and complete traumatic amputation of the left lower extremity; and multiple open comminuted fractures with bone defects of the left temporal bone, mandible and right hip-joint bones. The injuries were caused by multiple fragments, flame and the blast wave generated by the explosion of military ordnance possessing explosive properties and, according to their

severity, constitute **serious harm to health**. The cause of death was traumatic-haemorrhagic shock associated with the foregoing injuries, namely the multiple extensive tissue-defect crushed-lacerated wounds; thermal burns; open injuries to the pelvic-cavity organs; incomplete traumatic amputations of both upper extremities; complete traumatic amputation of the left lower extremity; and multiple open comminuted fractures with bone defects of the left temporal bone, mandible and right hip-joint bones.

According to forensic medical expert opinion No. 74 dated 21 September 2023, examination of the body of **Qahramanov Sadig Sakit oglu** revealed a through-and-through wound of the cranial cavity accompanied by crushing and destruction of the brain and a displaced comminuted fracture of the cranial-vault bones. The injury was caused by bullets as a result of two shots fired from a firearm. The cause of death was crushing and destruction of the brain resulting from the through-and-through gunshot bullet wound of the cranial cavity.

According to forensic medical expert opinion No. 75 dated 21 September 2023, examination of the body of **Idrisov Bakhtiyar Ikhtiyar oglu** revealed acute blood loss; a fracture of the ninth rib; a through-and-through wound of the abdominal cavity with an entrance opening on the left anterior chest at the level of the ninth rib along the anterior axillary line and an exit opening in the right lateral abdominal wall, accompanied by injuries to the abdominal-cavity organs; blind wounds of the outer surface of the upper one-third of the right thigh, the outer surface of the lower one-third of the right thigh, the outer surface of the lower one-third of the right lower leg, the right gluteal region, the inner surface of the lower one-third of the right upper arm and the dorsal surface of the right hand. The through-and-through wound penetrating the abdominal cavity was caused by a shot fired from a firearm, while the remaining injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary and secondary fragments generated through a blunt mechanism. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained.

According to forensic medical expert opinion No. 76 dated 21 September 2023, examination of the body of **Qayibov Elvin Ikram oglu** revealed injuries to the organs of the thoracic cavity; open haemopneumothorax; and multiple incised wounds on the anterior chest, anterior neck, anterior-outer surface of the left upper arm, outer surfaces of the right upper arm and right forearm, dorsal surface of the right hand and the right forearm, as well as comminuted fractures of the right forearm and the second and third fingers of the right hand. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was acute blood loss associated with multiple shrapnel wounds of the body, injuries to the thoracic-cavity organs, open haemopneumothorax and comminuted fractures of the right forearm and the second and third fingers of the right hand.

According to forensic medical expert opinion No. 78 dated 21 September 2023, examination of the body of **Alishanov Aghami Mehman oglu** revealed injuries involving the distal right humerus, the proximal end of the right ulna—

—and a displaced fracture of the proximal end of the right ulna; a through-and-through gunshot wound of the right upper gluteal region involving the femur; a through-and-through wound of the rectum; and wounds of various regions of the body. The injuries were caused by numerous fragments and the blast wave generated by the explosion of a firearm projectile possessing explosive properties and constitute **serious harm to health**. The cause of death was septic shock resulting from pelvic peritonitis associated with the injuries sustained, namely the displaced fracture of the distal right humerus and proximal right ulna; the through-and-through gunshot wound of the upper-inner surface of the right gluteal region involving the femur; the through-and-through wound of the rectum; and wounds of various regions of the body.

According to forensic medical expert opinion No. 79 dated 21 September 2023, examination of the body of **Mammadov Ramil Habil oglu** revealed: a blind wound of the right temporal region penetrating the cranial cavity, accompanied by a puncture-type fracture of the right temporal bone, linear fractures of the skull-base bones, laceration of the right paraorbital region and diffuse trauma to the brain tissue; and a blind wound of the outer surface of the lower one-third of the right thigh, accompanied by acute blood loss, a fracture of the right femur and injury to the right femoral artery. The injuries were characteristic of having been caused by shots fired from a firearm. The cause of death was diffuse trauma to the brain tissue resulting from the blind gunshot bullet wound of the right temporal region penetrating the cranial cavity.

According to forensic medical expert opinion No. 77 dated 21 September 2023, examination of the body of **Mehtiyev Shahriyar Mubariz oglu** revealed crushing and destruction of the brain caused by a wound penetrating the cranial cavity in the right temporal region; numerous extensive wounds with tissue defects in the posterior neck, posterior chest, right scapular region, posterior surface of the right upper arm, anterior and posterior surfaces of the right forearm, right and left gluteal regions, right thigh and left lower-leg regions; and multiple open comminuted fractures with bone defects of the cranial-vault and right scapular bones. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The direct cause of death was crushing and destruction of the brain.

According to forensic medical expert opinion No. 80 dated 21 September 2023, examination of the body of **Hasanov Shamil Shiraslan oglu** revealed injuries to the thoracic-cavity organs and a blind wound penetrating the thoracic cavity, accompanied by open haemopneumothorax. The injury was caused by bullets as a result of two shots fired from a firearm. The cause of death was acute blood loss resulting from the blind wound penetrating the thoracic cavity and accompanied by injury to the thoracic organs and open haemopneumothorax.

According to forensic medical expert opinion No. 81 dated 21 September 2023, examination of the body of **Taghizada Jahangir Qurban oglu** revealed injuries to the organs of the

thoracic and abdominal cavities; open haemopneumothorax; one blind wound penetrating the thoracic and abdominal cavities and accompanied by an open comminuted fracture of the left ninth rib; numerous extensive tissue-defect lacerated wounds of the lumbar and right gluteal regions, the posterior surface of the middle one-third of the right upper arm, outer surface of the right hip joint, outer surface of the middle one-third of the left thigh, dorsum of the left foot and heel region; and multiple displaced comminuted fractures of the fifth lumbar vertebra, sacrum, pelvis, left second, third, fourth and fifth metatarsal bones and tarsal bones. The blind wound penetrating the thoracic and abdominal cavities was caused by a shot fired from a firearm, while the remaining injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was acute blood loss associated with the injuries sustained, namely injury to the organs of the thoracic and abdominal cavities; open haemopneumothorax; the blind wound penetrating the thoracic and abdominal cavities and accompanied by an open comminuted fracture of the left ninth rib; and the extensive tissue-defect wounds of the lumbar and right gluteal regions, posterior surface of the middle one-third of the right upper arm, outer surface of the right hip joint—

Page 582

—the outer surface of the middle one-third of the left thigh, the dorsum of the left foot and heel region; as well as the multiple displaced comminuted fractures of the fifth lumbar vertebra, sacrum, pelvis, the second, third, fourth and fifth metatarsal bones of the left foot and the tarsal bones.

According to forensic medical expert opinion No. 82 dated 21 September 2023, examination of the body of **Bayramov Ikhtiyar Bayram oglu** revealed a blind wound of the right temporal region penetrating the cranial cavity and accompanied by diffuse trauma to the brain tissue and fractures of the cranial bones; blind wounds of the soft tissues of the right cheek, right auricle, left frontotemporal region and right frontal region; and multiple abrasions of the posterior surface of the middle one-third of the right forearm, outer surface of the middle one-third of the right upper arm, outer surface of the right shoulder joint, anterior-outer surface of the right knee joint and both lower-leg regions. The abrasions were caused by a blunt mechanism through the impact of a hard blunt object, while the remaining injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and by primary fragments and secondary fragments generated through a blunt mechanism. The cause of death was diffuse trauma to the brain tissue resulting from the blind shrapnel wound of the right temporal region penetrating the cranial cavity.

According to forensic medical expert opinion No. 83 dated 21 September 2023, examination of the body of **Huseynzada Ramazan Hamdulla oglu** revealed: an irregular wound above the upper lip, with the wound channel passing from the anterior incisors and the projection of the left upper third, fourth and fifth teeth through the hard palate into the cranial cavity; fractures of the left upper third, fourth and fifth teeth; an irregular tissue-defect wound on the left anterior-lateral surface of the neck over the jugular artery; a wound analogous to the

foregoing injury below the upper border of the right shoulder joint accompanied by a surrounding abrasion ring; one wound along the upper edge of the left axillary fossa; one wound on the posterior surface of the right shoulder joint; one wound in the left axillary fossa connecting the middle and posterior axillary lines; and one wound on the left posterior chest located 2.0 centimetres to the left of the midline. The neck wound penetrated the thoracic cavity and was accompanied by injuries to the left axillary artery and vein and by an open comminuted fracture of the neck of the right scapula. The injuries were caused by numerous fragments generated by the explosion of a firearm projectile. The cause of death was acute haemorrhagic and traumatic shock resulting from injuries penetrating the thoracic and abdominal cavities and damage to the internal organs, left jugular artery and vein and left axillary artery and vein.

According to forensic medical expert opinion No. 84 dated 21 September 2023, examination of the body of **Qiyasli Davud Telman oglu** revealed injuries to the thoracic-cavity organs and through-and-through wounds of the thoracic cavity and the soft tissues of the right upper arm, accompanied by open haemopneumothorax. The injuries were caused by bullets as a result of two shots fired from a firearm. The cause of death was acute blood loss associated with injury to the thoracic-cavity organs, open haemopneumothorax and the through-and-through wounds of the thoracic cavity and soft tissues of the right upper arm.

According to forensic medical expert opinion No. 85 dated 21 September 2023, examination of the body of **Shikhaliyev Ceyhun Oktay oglu** revealed injury to the left lung; left-sided open haemopneumothorax; a through-and-through wound of the thoracic cavity in the left scapular region accompanied by open comminuted fractures of the left scapula and left fifth rib; crushed-lacerated wounds of the left scapular and right suprascapular regions, the outer surfaces of the upper and lower one-thirds of the left upper arm and the outer surface of the lower one-third of the right thigh; and open comminuted fractures of the left humerus. The through-and-through wound of the thoracic cavity was caused by a shot fired from a firearm, while the remaining injuries were caused by numerous fragments generated by the explosion of military ordnance possessing explosive properties—

Page 583

—and the cause of death was acute blood loss associated with the injuries sustained, namely injury to the left lung; left-sided open haemopneumothorax; the open comminuted fractures of the left scapula and left fifth rib; multiple shrapnel wounds of the body; and open comminuted fractures of the left humerus.

According to forensic medical expert opinion No. 86 dated 21 September 2023, examination of the body of **Babashov Ujal Narbala oglu** revealed: a blind wound of the parietal region penetrating the cranial cavity, accompanied by diffuse trauma to the brain tissue and fractures of the cranial bones; acute blood loss; blind wounds of the left half of the chest and anterior chest wall penetrating the thoracic cavity and accompanied by multiple displaced open fractures of the left eighth, ninth and tenth ribs and injuries to the left lung and heart; acute

blood loss; a through-and-through wound of the right thigh, with an entrance opening on the inner surface of the lower one-third and an exit opening on the outer surface of the upper one-third, accompanied by a multiple displaced open fracture of the femur and injury to the femoral artery; traumatic amputation of the left upper extremity at the level of the upper one-third of the upper arm, accompanied by multiple displaced open fractures of the left upper-arm and forearm bones; and multiple blind wounds of the right axillary region, anterior and inner surfaces of the right radiocarpal joint, the third, fourth and fifth fingers of the right hand and the palmar surface of the right hand. Taken together, the injuries bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. The through-and-through wound of the right thigh was caused by a shot fired from a firearm, while the remaining injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary and secondary fragments generated through a blunt mechanism. The cause of death was diffuse trauma to the brain tissue resulting from the blind shrapnel wound of the parietal region penetrating the cranial cavity.

According to forensic medical expert opinion No. 87 dated 21 September 2023, examination of the body of **Novruzzada Huseyn Faig oglu** revealed: a wound in the right parietal region containing visible fragments of the fractured cranial-vault bones; one wound in the upper-right occipital region and one wound in the lower-left occipital region penetrating the cranial cavity; a large wound with an extensive tissue defect in the right shoulder-girdle region extending to the middle one-third of the neck from above; one wound in the projection of the right shoulder joint; one wound on the outer surface of the middle one-third of the right upper arm; one wound in the right axillary region; wounds on the right lateral surface of the chest penetrating the thoracic cavity; one wound in the projection of the right greater trochanter; one wound on the posterior chest at the level of the fifth and sixth thoracic vertebrae; one wound on the right posterior chest in the intercostal area of the seventh and eighth ribs along the scapular line; and one wound slightly above the upper-outer quadrant of the right gluteal region. The left hand had been amputated at the lower one-third of the forearm, while the right hand had been amputated at the lower one-third of the forearm and remained attached by a flap of skin and muscle tissue; the wound edges were lacerated and haemorrhagic. The injuries were characteristic of having been caused by the general damaging factors of an exploding fragmentation firearm projectile, namely numerous primary and secondary fragments. The cause of death was crushing and destruction of the brain tissue resulting from multiple gunshot shrapnel wounds penetrating the cranial and thoracic cavities.

According to forensic medical expert opinion No. 88 dated 21 September 2023, examination of the body of **Dunyamaliyev Rustam Narman oglu** revealed injuries to the thoracic-cavity organs; a blind wound of the thoracic cavity accompanied by open haemopneumothorax; through-and-through wounds of the left upper arm accompanied by an open comminuted fracture of the humerus; and an abrasion extending over the lumbar and gluteal regions. The abrasion was caused by a hard blunt object, while the remaining injuries were caused by the impact of bullets fired from a firearm. The cause of death was acute blood loss associated with injury to the thoracic-cavity organs and the blind thoracic wound accompanied by open haemopneumothorax—

—of the thoracic cavity and the through-and-through wounds of the soft tissues of the right upper arm.

According to forensic medical expert opinion No. 90 dated 22 September 2023, examination of the body of **Aliyev Talib Elman oglu** revealed acute blood loss; fractures of the right eighth, ninth and tenth ribs; a blind wound of the right lateral chest penetrating the thoracic cavity and accompanied by injuries to the thoracic organs; acute blood loss; a blind wound of the left gluteal region penetrating the pelvic bone and accompanied by injuries to the abdominal-cavity organs and a fracture of the pelvic bone; a through-and-through wound of the posterior-outer surface of the upper one-third of the right lower leg; blind wounds of the right lumbar region, right thigh, right knee, right foot and soft tissues of the right foot; and abrasions on the left side of the face and the left auricle. The injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary and secondary fragments generated through a blunt mechanism. The cause of death was traumatic-haemorrhagic shock that developed in connection with the injuries sustained as a result of the explosion of the firearm projectile.

According to forensic medical expert opinion No. 89 dated 22 September 2023, examination of the body of **Huseynov Maharram Alashraf oglu** revealed open injuries to the organs of the thoracic and abdominal cavities; multiple open comminuted fractures of the ribs, scapula, right lower leg and right calcaneus; and numerous extensive crushed, incised and lacerated wounds with tissue defects involving both scapular and neck regions, the posterior surface of the right shoulder joint, the left subclavicular and left axillary regions, the anterior surface of the middle one-third of the left upper arm, the anterior abdominal wall, the left lumbar region, the middle and upper one-thirds of the right lower leg, the anterior surface of the left knee joint and the right lower leg extending from the lower one-third to the plantar region. The injuries were caused by numerous fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the open injuries to the thoracic and abdominal organs; the multiple open comminuted fractures of the ribs, scapula, right lower leg and right calcaneus; and the numerous extensive crushed, incised and lacerated wounds with tissue defects.

According to forensic medical expert opinion No. 91 dated 22 September 2023, examination of the body of **Aliyev Togrul Ilyas oglu** revealed injuries to the thoracic-cavity organs; open haemopneumothorax; complete traumatic avulsion of the left upper extremity at the level of the shoulder girdle; complete traumatic avulsion of the second finger of the left hand at the metacarpophalangeal joint and of the third finger at the proximal interphalangeal joint; complete traumatic avulsion of the right lower extremity at the level of the upper one-third of the lower leg; displaced fractures of the left second and third ribs and the right first and second ribs; and multiple extensive crushed-lacerated wounds with tissue defects extending from the left angle of the mandible to the right half of the upper lip, involving the left scapular region, anterior chest, anterior abdominal wall, anterior-outer surface of the upper

one-third of the right upper arm, posterior surface of the right forearm, posterior surface of the left forearm, inner surface of the left thigh, anterior-outer surface of the left knee and inner surface of the left lower leg. The injuries were caused by multiple fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the foregoing injuries, namely the injuries to the thoracic organs; open haemopneumothorax; traumatic avulsions of the left upper extremity and right lower extremity; traumatic amputations of the second and third fingers of the left hand; displaced fractures of the ribs; and multiple extensive crushed-lacerated wounds with tissue defects—

Page 585

—extending from the left angle of the mandible to the right half of the upper lip, and involving the left scapular region, anterior chest, anterior abdominal wall, anterior-outer surface of the upper one-third of the right upper arm, posterior surface of the right forearm, posterior surface of the left forearm, inner surface of the left thigh, anterior-outer surface of the left knee and inner surface of the left lower leg.

According to forensic medical expert opinion No. 92 dated 22 September 2023, examination of the body of **Mammadov Eltun Vugar oglu** revealed acute blood loss; a blind wound of the left lateral surface of the middle one-third of the neck penetrating the thoracic cavity and accompanied by injuries to the main vessels of the neck, the subclavian artery and the thoracic organs; acute blood loss; a blind wound of the outer surface of the lower one-third of the left lower leg accompanied by multiple displaced open fractures of the tibia and fibula; and a grazing wound of the greater curvature of the left auricle. The injuries were characteristic of having been caused by shots fired from a firearm. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained.

According to forensic medical expert opinion No. 93 dated 22 September 2023, the body of **Khalilov Yusif Mammadraza oglu** had been traumatically fragmented into small pieces incompatible with life by the impact of numerous fragments, the blast wave and flame generated by the explosion of a firearm projectile. The cause of death was traumatic fragmentation of the body into small pieces incompatible with life.

According to forensic medical expert opinion No. 95 dated 22 September 2023, the injuries sustained by **Mammadov Samir Agil oglu**—traumatic fragmentation of the body into small pieces incompatible with life—were caused by numerous fragments, the blast wave and flame generated by the explosion of a firearm projectile. The cause of death was traumatic fragmentation of the body into small pieces incompatible with life.

According to forensic medical expert opinion No. 94 dated 22 September 2023, the injuries sustained by **Suleymanov Elshad Mammad oglu**—traumatic fragmentation of the body into small pieces incompatible with life—were caused by numerous fragments, the blast wave and flame generated by the explosion of a firearm projectile. The cause of death was traumatic fragmentation of the body into small pieces incompatible with life.

According to forensic medical expert opinion No. 96 dated 22 September 2023, examination of the body of **Museyibli Isgandar Ganbar oglu** revealed: one wound in the right thigh region accompanied by injury to the femoral artery and soft tissues; superficial wounds in the right auricle region, including the greater curvature and posterior surface of the auricle and the right retroauricular region; and an abrasion on the inner surface of the upper one-third of the left lower leg. The wound in the right thigh region was caused by a bullet fired from a firearm and, since it resulted in death, constituted **serious harm to health**; the remaining injuries were caused by the impact of a hard blunt object. The cause of death was acute blood loss associated with injury to the femoral artery and soft tissues in the right thigh region.

According to forensic medical expert opinion No. 97 dated 22 September 2023, examination of the body of **Ahmadov Vilayat Dilafat oglu** revealed acute blood loss; right-sided haemopneumothorax, consisting of an accumulation of free blood and air in the thoracic cavity; and a through-and-through wound of the thoracic cavity with an entrance opening in the right scapular region and an exit opening on the right lateral chest over the second intercostal space along the anterior axillary line, accompanied by injuries to the thoracic-cavity organs. Numerous superficial wounds were also detected on the posterior and lateral surfaces of the left half of the chest, right lumbar region and right half of the anterior abdominal wall. Taken together, the injuries bore the characteristics of injuries constituting **serious harm to health in living persons** and resulted in death. The acute blood loss, right-sided haemopneumothorax and through-and-through thoracic wound accompanied by injury to the thoracic organs—

—were caused by a shot fired from a firearm, while the remaining injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary and secondary fragments generated through a blunt mechanism. The cause of death was traumatic-haemorrhagic shock associated with the injuries sustained.

According to forensic medical expert opinion No. 100 dated 22 September 2023, examination of the body of **Dunyamaliyev Islam Teymur oglu** revealed injuries to the pelvic-cavity organs and through-and-through wounds of the pelvic cavity accompanied by a fracture of the left pelvic bone. The injuries were caused by bullets as a result of two shots fired from a firearm. The cause of death was acute blood loss resulting from the through-and-through wound of the pelvic cavity accompanied by injury to the pelvic organs and fracture of the left pelvic bone.

According to forensic medical expert opinion No. 101 dated 22 September 2023, examination of the body of **Jafarov Khazar Qalib oglu** revealed acute blood loss; a blind wound of the outer surface of the upper one-third of the neck accompanied by injury to the left jugular artery and the neck organs; acute blood loss; a blind wound of the right subscapular region accompanied by injury to the thoracic-cavity organs; and numerous superficial wounds of the neck, the upper one-third of the left hand, the anterior surface of the right knee joint and both

lower-leg regions. The acute blood loss and the blind wounds accompanied by injuries to the left jugular artery, the neck organs and thoracic-cavity organs were caused by shots fired from a firearm, while the remaining injuries were characteristic of having been caused during the explosion of a firearm projectile by the blast wave and primary and secondary fragments generated through a blunt mechanism. The cause of death was diffuse trauma to the brain tissue resulting from a blind shrapnel wound of the right temporal region penetrating the cranial cavity.

According to forensic medical expert opinion No. 102 dated 22 September 2023, examination of the body of **Rahimov Ramil Sujaddin oglu** revealed injury to the cervical portion of the spinal cord; injury to the left lung; left-sided open haemopneumothorax; and through-and-through wounds of the neck and thoracic cavity accompanied by multiple open fractures of the cervical vertebrae and left scapula. The wounds were caused by bullets as a result of two shots fired from a firearm. The immediate cause of death was injury to the cervical portion of the spinal cord resulting from the through-and-through wound of the neck.

According to forensic medical expert opinion No. 107 dated 22 September 2023, examination of the body of **Kalbiyev Akram Faig oglu** revealed a through-and-through wound of the thoracic cavity entering through the anterior surface of the left shoulder joint and accompanied by injuries to the thoracic organs, open haemopneumothorax and a multiple open fracture of the fifth thoracic vertebra. The injury was caused by a bullet fired from a firearm. The cause of death was acute blood loss associated with injury to the thoracic-cavity organs, open haemopneumothorax and the through-and-through thoracic wound accompanied by the multiple open fracture of the fifth thoracic vertebra.

According to forensic medical expert opinion No. 105 dated 22 September 2023, examination of the body of **Alammammadov Khanbaba Ceyhun oglu** revealed injuries to the right popliteal artery and soft tissues; multiple open fractures of the femurs; through-and-through wounds of both thigh regions; and an abrasion on the anterior surface of the left knee joint. The through-and-through wounds of both thighs were caused by bullets as a result of two shots fired from a firearm—

Page 587

—while the abrasion on the anterior surface of the left knee joint was caused by the impact of a hard blunt object. The cause of death was acute blood loss resulting from the through-and-through wounds of both thighs accompanied by injury to the right popliteal artery and soft tissues and by multiple open fractures of both femurs.

According to forensic medical expert opinion No. 106 dated 22 September 2023, examination of the body of **Eyyubov Murad Bakhtiyar oglu** revealed injury to the cervical portion of the spinal cord and injuries to the thoracic-cavity organs, together with one blind wound of the neck penetrating the thoracic cavity and accompanied by comminuted fractures of the third and fourth cervical vertebrae. The wound was caused by a bullet fired from a firearm. The immediate cause of death was injury to the cervical portion of the spinal cord associated with

the blind wound of the neck penetrating the thoracic cavity and accompanied by comminuted fractures of the third and fourth cervical vertebrae.

According to forensic medical expert opinion No. 108 dated 22 September 2023, examination of the body of **Safiyev Allahverdi Safi oglu** revealed extensive tissue-defect wounds extending from the left lateral surface of the neck to the anterior surface of the chest, involving both inguinal regions, the outer surface of the upper one-third of the right upper arm, the right hand and the inner surface of the lower one-third of the left lower leg, accompanied by open injuries to the organs of the neck and thoracic cavity. The injuries were caused by fragments and the blast wave generated by the explosion of military ordnance possessing explosive properties. The cause of death was acute blood loss associated with the multiple extensive tissue-defect shrapnel wounds of the body and the open injuries to the neck and thoracic-cavity organs.

According to forensic medical expert opinion No. 98 dated 22 September 2023, examination of the body of **Bayramov Davud Samil oglu** revealed injuries to the thoracic-cavity organs; open haemopneumothorax; a through-and-through wound of the chest accompanied by displaced comminuted fractures of the left fifth rib and first thoracic vertebra; a through-and-through wound of the right foot; a wound penetrating the abdominal cavity and accompanied by injuries to the abdominal organs; a blind wound of the left thigh accompanied by a displaced comminuted fracture of the femur; and a grazing wound of the right heel. The injuries were caused by bullets as a result of five shots fired from a firearm. The cause of death was acute blood loss associated with the multiple penetrating, through-and-through and blind gunshot wounds of the body, injuries to the thoracic and abdominal organs, open haemopneumothorax and the displaced comminuted fractures of the left fifth rib, first thoracic vertebra and left femur.

According to forensic medical expert opinion No. 99 dated 22 September 2023, examination of the body of **Abushov Habil Qulam oglu** revealed injuries to the thoracic-cavity organs, a blind wound penetrating the thoracic cavity accompanied by open haemopneumothorax, and through-and-through wounds of the right foot. The injuries were caused by bullets as a result of two shots fired from a firearm. The immediate cause of death was acute blood loss associated with the injuries to the thoracic-cavity organs, the blind wound penetrating the thoracic cavity accompanied by open haemopneumothorax and the through-and-through wounds of the right foot.

According to forensic medical expert opinion No. 23 dated 1 October 2023, examination of the body of **Qasimov Jahan Khagani oglu** revealed: an extensive wound with bone and soft-tissue defects on the posterior surface of the right foot; multiple shrapnel wounds of the inner surface of the middle one-third of the left thigh, the right outer chest, the right scapular region and the right gluteal region; multiple open comminuted displaced fractures with bone defects of the first, third and fourth metatarsal and tarsal bones of the right foot; post-traumatic perforation of the posterior urethra; a haematoma spreading over the pelvis and trunk; and post-traumatic syndromes—

—manifested by multiorgan failure, hepatorenal syndrome, Grade II cerebral coma, secondary renal injury, acute renal failure, hypovolaemia, acute hepatic failure, acute pancreatitis, severe post-haemorrhagic anaemia and secondary thrombocytopenia. The injuries were caused by fragments and the blast wave generated by the explosion of a projectile possessing explosive properties. The cause of death was multiorgan failure involving the cardiovascular, hepatic, respiratory and renal systems that developed as a result of the blast trauma described above.

According to forensic medical expert opinion No. 21 dated 24 September 2023, the injuries sustained by **Koklarov Sarkhan Eyvaz oglu**—third-degree burn shock and multiorgan failure; thermal burns of the face, both auricles, scalp, neck, upper respiratory tract, anterior and posterior surfaces of the torso, both upper and lower extremities, including the surrounding and external genital organs, involving 75 per cent of the body surface, with first-, second-, third-A and third-B-degree burns—were caused by exposure to high temperature, including flame, and in a living person constituted **serious harm to health incompatible with life**. The cause of death was multiorgan failure involving the cardiovascular, respiratory and renal systems that developed as a result of the burn trauma described above.

According to forensic medical expert opinion No. 22 dated 25 September 2023, the injuries sustained by **Latifov Elmaddin Qabil oglu**—severe burn shock and burn disease; thermal burns of the head, face, auricles, neck, posterior and lateral surfaces of the torso and both upper and lower extremities, involving 70–75 per cent of the body surface—were caused by high temperature, including flame. The cause of death was multiorgan failure involving the cardiovascular, respiratory and renal systems that developed as a result of the burn trauma described above.

According to forensic medical expert opinion No. 08 dated 25 September 2023, examination of the body of **Ibrahimov Elnur Sakhavat oglu** revealed open fractures of the cranial-vault bones; diffuse trauma to the brain tissue; a blind wound penetrating the cranial cavity accompanied by subdural, epidural and intraparenchymal haematomas; closed blunt trauma to the chest accompanied by pulmonary contusions; superficial wounds of the soft tissues of the nose, upper lip and scapular region; abrasions of the right scapular and lumbar regions; and a laceration of the right upper-arm region. The injuries were characteristic of having been caused during the explosion of military ordnance possessing explosive properties by the blast wave and primary and secondary fragments generated through a blunt mechanism. The cause of death was diffuse trauma to the brain tissue associated with the blind shrapnel wound penetrating the cranial cavity.

According to forensic medical expert opinion No. 18 dated 19 September 2023, examination of the body of **Arzullayev Murad Tavakkul oglu** revealed: a blind shrapnel wound of the right temporal region penetrating the cranial cavity and accompanied by crushing and destruction of the brain, fractures of the cranial-vault and skull-base bones and traumatic amputation of the upper one-third of the right auricle; a blind shrapnel wound of the posterior

surface of the right half of the chest penetrating the thoracic cavity; a shrapnel wound of the right lower leg accompanied by open comminuted fractures of the tibia and fibula; and shrapnel wounds of the left lower leg and right upper arm involving only the soft tissues. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones and traumatic amputation of the upper one-third of the right auricle resulting from the multiple shrapnel wounds of the body.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1751 dated 1 December 2023, damage in the number and dimensions stated in the examination section of the opinion was detected on one pair of military trousers, one military body armour vest and one short-sleeved shirt belonging to **Arzullayev Murad Tavakkul oglu**. The damage—

Page 589

—was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion, travelling in different directions.

According to forensic medical expert opinion No. 19 dated 19 September 2023, examination of the body of **Hamidli Hamid Alisahib oglu** revealed a lacerated wound of the right thigh and gluteal region accompanied by multiple open comminuted fractures of the hip and femur and injury to the main blood vessels. The injury was caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the multiple open comminuted fractures of the right pelvic and femoral bones and injury to the main vessels.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1755 dated 1 December 2023, damage was detected on the military trousers belonging to **Hamidli Hamid Alisahib oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 20 dated 19 September 2023, examination of the body of **Adilzada Adil Rovshan oglu** revealed shrapnel wounds of the neck, right gluteal region, chest, right foot, right thigh and right upper arm, accompanied by injuries to the thoracic-cavity organs and fractures of the first cervical vertebra and the right pelvic bone. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties and were characteristic of injuries constituting **serious harm to health** in living persons; they resulted in death. The cause of death was a fracture of the first cervical vertebra resulting from multiple shrapnel wounds of the body.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1744 dated 30 November 2023, damage was detected on the military trousers, military body armour, short-sleeved shirt

and right boot belonging to **Adilzada Adil Rovshan oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 21 dated 19 September 2023, examination of the body of **Aliyev Javid Ceyhun oglu** revealed multiple extensive shrapnel wounds of the body accompanied by crushing and destruction of the brain tissue and multiple open comminuted fractures of the cranial-vault, facial-skeleton and skull-base bones. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was crushing and destruction of the brain resulting from the shrapnel wound of the cranial cavity accompanied by multiple open comminuted fractures of the cranial-vault, facial-skeleton and skull-base bones.

According to forensic medical expert opinion No. 22 dated 20 September 2023, examination of the body of **Ahmadov Yusif Alaskar oglu** revealed a blind gunshot bullet wound entering through the right hip-joint region, travelling upward and from right to left and terminating in the pelvic cavity. The wound was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was traumatic-haemorrhagic shock associated with injury to the pelvic organs resulting from the blind gunshot bullet wound of the right hip-joint region.

According to forensic medical expert opinion No. 23 dated 20 September 2023, examination of the body of **Aliyev Ramil Shakir oglu** revealed a through-and-through gunshot bullet wound of the cranial cavity entering through the left half of the forehead, travelling from left to right and relatively from above downward, and exiting through the right temporo-occipital region, accompanied by fractures of the cranial-vault and skull-base bones and crushing and destruction of the brain tissue. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones resulting from the through-and-through gunshot bullet wound of the cranial cavity—

Page 590

—accompanied by fractures of the cranial-vault and skull-base bones.

According to forensic medical expert opinion No. 24 dated 20 September 2023, examination of the body of **Babazada Ali Rustam oglu** revealed a through-and-through gunshot bullet wound of the cranial cavity entering through the left infraorbital region, travelling from left to right and relatively from above downward, and exiting through the right temporo-occipital region, accompanied by fractures of the facial skeleton, cranial-vault and skull-base bones and crushing and destruction of the brain. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones resulting from the through-and-through gunshot bullet wound of the cranial cavity.

According to forensic medical expert opinion No. 25 dated 20 September 2023, examination of the body of **Nasibov Huseyn Afqan oglu** revealed one through-and-through gunshot bullet wound of the head entering through the projection of the right temporomandibular joint, travelling from right to left and from above downward, and exiting through the left angle of the mandible, accompanied by multiple fractures of the facial skeleton and right temporal bone and crushing and destruction of the brain tissue. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was the through-and-through gunshot bullet wound of the cranial cavity accompanied by multiple fractures of the facial skeleton and right temporal bone and crushing and destruction of the brain tissue.

According to forensic medical expert opinion No. 26 dated 20 September 2023, examination of the body of **Yusibli Nofal Yusib oglu** revealed one blind gunshot bullet wound entering through the left anterior surface of the chest, travelling from above downward and relatively from left to right, and terminating in the thoracic cavity at the level of the seventh thoracic vertebra. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was traumatic-haemorrhagic shock associated with left-sided haemopneumothorax resulting from the blind gunshot bullet wound of the chest.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1799 dated 1 December 2023, damage was detected on the military trousers belonging to **Yusibli Nofal Yusib oglu**. The damage was characteristic of having been caused by bullets as a result of one shot fired from a firearm, from a distance exceeding 1 metre and travelling in different directions.

According to forensic medical expert opinion No. 27 dated 20 September 2023, examination of the body of **Maharramov Mayis Fizuli oglu** revealed multiple shrapnel wounds of various regions of the body accompanied by crushing and destruction of the lower one-third of the head, injuries to the abdominal-cavity organs and traumatic amputation of the right lower extremity at the level of the middle one-third of the lower leg. The cause of death was crushing and destruction of the brain tissue accompanied by fractures of the facial skeleton, cranial-vault and skull-base bones resulting from the multiple shrapnel wounds of the body.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1782 dated 1 December 2023, damage was detected on the military trousers, undershirt and body armour belonging to **Maharramov Mayis Fizuli oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 28 dated 20 September 2023, examination of the body of **Rzayev Iqbal Ilham oglu** revealed a through-and-through gunshot bullet wound of the left upper arm entering through the upper one-third of the left upper arm and exiting through the posterior surface of the upper one-third of the left outer upper arm, accompanied only by injury to the soft tissues; and a through-and-through gunshot bullet wound of the chest entering through the left lateral surface of the middle one-third of the neck, travelling from above downward and relatively from left to right, and exiting through

the posterior surface of the right half of the chest at the level of the fourth rib along the posterior axillary line, accompanied along its course by injury to the right lung—

Page 591

—and right-sided haemopneumothorax. The injuries were caused by one shot fired from a firearm loaded with a cartridge. The cause of death was traumatic-haemorrhagic shock associated with injury to the right lung and right-sided haemopneumothorax resulting from the through-and-through gunshot bullet wound of the chest.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1775 dated 1 December 2023, damage was detected on the sweater, body armour and shirt belonging to **Rzayev Iqbal Ilham oglu**. The damage was characteristic of having been caused by bullets as a result of at least two shots fired from a firearm from a distance exceeding 1 metre and travelling in different directions.

According to forensic medical expert opinion No. 29 dated 20 September 2023, examination of the body of **Mirzayev Javid Azer oglu** revealed one blind gunshot bullet wound of the cranial cavity entering slightly to the right of the frontal region, travelling from front to back and from right to left, and terminating in the occipital region, accompanied by fractures of the cranial-vault and skull-base bones and crushing and destruction of the brain. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones resulting from the gunshot bullet wound of the cranial cavity.

According to forensic medical expert opinion No. 30 dated 20 September 2023, examination of the body of **Aliyev Farid Tofig oglu** revealed one through-and-through gunshot bullet wound of the cranial cavity entering through the right temporal region, travelling from right to left and exiting through the left auricular region, accompanied along its course by fractures of the cranial-vault and skull-base bones and crushing and destruction of the brain. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones resulting from the gunshot bullet wound of the cranial cavity.

According to forensic medical expert opinion No. 31 dated 20 September 2023, examination of the body of **Sultanov Khalgali Boyukagha oglu** revealed complete traumatic amputations of both upper extremities at the level of the upper one-third of the upper arms; a comminuted fracture of the fourth and fifth metatarsal bones of the left foot; injury to the principal vessels of the lower extremities; and shrapnel wounds of the face, right anterior chest, left side of the face, anterior surfaces of both thighs, anterior surface of the right lower leg and outer surface of the left foot. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with complete traumatic amputations of both upper extremities at the level of the upper one-third of the upper arms resulting from multiple shrapnel wounds of the body.

According to forensic medical expert opinion No. 32 dated 20 September 2023, examination of the body of **Aghayev Kanan Vahid oglu** revealed a through-and-through gunshot bullet wound of the left lower extremity entering through the upper one-third of the left thigh, travelling from right to left and from below upward, and exiting through the projection of the left pelvic arch, accompanied by injury to the pelvic artery. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was traumatic-haemorrhagic shock resulting from injury to the pelvic artery caused by the through-and-through gunshot bullet wound of the left lower extremity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1764 dated 1 December 2023, damage was detected on parts of the military clothing belonging to **Aghayev Kanan Vahid oglu**. The damage was characteristic of having been caused by a bullet as a result of one shot fired from a firearm, from a distance exceeding 1 metre and travelling from left to right.

Page 592

According to forensic medical expert opinion No. 33 dated 20 September 2023, examination of the body of **Sadigov Neman Bahram oglu** revealed multiple shrapnel wounds of the body accompanied by injuries to the thoracic-cavity organs and an open fracture of the left humerus. The injuries were life-threatening and were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with injuries to the thoracic-cavity organs and the open fracture of the left humerus resulting from multiple shrapnel wounds.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1771 dated 1 December 2023, damage in the number and dimensions stated in the examination section of the opinion was detected on the military trousers, military body armour, military jacket, short-sleeved shirt and one pair of underpants belonging to **Sadigov Neman Bahram oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 34 dated 20 September 2023, examination of the body of **Ahmadov Rizvan Niyazi oglu** revealed traumatic amputation of the left lower extremity at the level of the ankle joint. The injury was caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with traumatic amputation of the left lower extremity at the level of the ankle joint resulting from multiple shrapnel wounds.

According to forensic medical expert opinion No. 35 dated 20 September 2023, examination of the body of **Shabiyev Seymur Sabir oglu** revealed multiple shrapnel wounds of the left shoulder-joint region, left forearm and chest, accompanied by injury to the thoracic-cavity organs. The injuries were life-threatening and were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The

cause of death was traumatic-haemorrhagic shock associated with injury to the thoracic-cavity organs resulting from multiple shrapnel wounds.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1773 dated 1 December 2023, damage was detected on the military body armour and military winter jacket belonging to **Shabiyev Seymur Sabir oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 36 dated 20 September 2023, examination of the body of **Azizaliyev Seymur Teymur oglu** revealed a shrapnel wound of the left thigh accompanied by an open comminuted fracture of the femur and injury to the principal vessels. The injury was caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the open comminuted fracture of the left femur and injury to the principal vessels resulting from the shrapnel wound of the left thigh.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1757 dated 1 December 2023, damage was detected on one pair of military trousers belonging to **Azizaliyev Seymur Teymur oglu**. The damage was characteristic of having been caused by a fragment generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 37 dated 20 September 2023, examination of the body of **Ismiyev Zeynal Mustafa oglu** revealed amputation of the first finger of the right hand; multiple shrapnel wounds of the body accompanied by injuries to the organs of the thoracic and abdominal cavities and fractures of the fourth and fifth thoracic vertebrae—

—were revealed. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock that developed in connection with injuries to the organs of the thoracic and abdominal cavities resulting from multiple shrapnel wounds of the body.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1762 dated 1 December 2023, damage was detected on the long-sleeved shirt, military body armour, short-sleeved shirt and sweater belonging to **Ismiyev Zeynal Mustafa oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 40 dated 21 September 2023, examination of the body of **Orujov Daghbayi Sabay oglu** revealed multiple shrapnel wounds of the body accompanied by fractures of the facial-skeleton bones; open fractures of the right femur and pelvic bones; traumatic amputation of the right thigh at the level of the upper one-third, with the limb remaining attached by a skin flap; crushing and destruction of the right eye; and

injuries to the abdominal and pelvic organs. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the multiple shrapnel wounds of the body, open fractures of the right femur and pelvic bones, traumatic amputation of the right thigh at the level of the upper one-third, and injuries to the abdominal and pelvic organs.

According to forensic medical expert opinion No. 41 dated 21 September 2023, examination of the body of **Beydiyev Royal Nasib oglu** revealed multiple shrapnel wounds of the body accompanied by injuries to the abdominal and pelvic organs. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the multiple shrapnel wounds of the body and injuries to the abdominal and pelvic organs.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1748 dated 30 November 2023, damage was detected on the military trousers, short-sleeved undershirt, long-sleeved shirt and underwear belonging to **Beydiyev Royal Nasib oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 42 dated 21 September 2023, examination of the body of **Rustamli Bahruz Malik oglu** revealed multiple shrapnel wounds of the body accompanied by injury to the left jugular artery and left brachial artery, an open comminuted fracture of the left humerus, and fractures of the left knee and femur. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with injury to the left jugular and brachial arteries, the open comminuted fracture of the left humerus and fractures of the left knee and femur resulting from the multiple shrapnel wounds.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1776 dated 1 December 2023, damage was detected on the military body armour, military trousers with a belt, short-sleeved shirt and left military boot belonging to **Rustamli Bahruz Malik oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 46 dated 21 September 2023, examination of the body of **Aliyev Elmaddin Dovlat oglu** revealed a through-and-through gunshot bullet wound of the chest entering through the anterior surface of the left half of the chest at the level of the fifth rib along the parasternal line, travelling from front to back and from below upward, and exiting through the left half of the posterior chest—

—at the level of the third rib along the posterior axillary line, accompanied along its course by injury to the left lung. The injury was caused by one shot fired from a firearm loaded with a cartridge and, according to its severity, bore the characteristics of **serious harm to health in living persons**. The cause of death was traumatic-haemorrhagic shock associated with injury to the left lung and left-sided haemopneumothorax resulting from the through-and-through gunshot bullet wound of the chest.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1742 dated 30 November 2023, damage was detected on the military body armour, sweater, long-sleeved undershirt and short-sleeved undershirt belonging to **Aliyev Elmaddin Dovlat oglu**. The damage was characteristic of having been caused by a bullet as a result of one shot fired from a firearm from a distance exceeding 1 metre and travelling from front to back.

According to forensic medical expert opinion No. 43 dated 21 September 2023, examination of the body of **Khankishiyev Elshan Elshad oglu** revealed shrapnel wounds of the left thigh and right upper arm accompanied by traumatic amputations of the left thigh and right upper arm. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the shrapnel wounds of the left thigh and right upper arm accompanied by traumatic amputations.

According to forensic medical expert opinion No. 45 dated 21 September 2023, examination of the body of **Nadirli Elvin Yurik oglu** revealed multiple comminuted fractures of the middle one-third of the right humerus; a through-and-through gunshot bullet wound entering through the outer surface of the right upper arm and exiting through the anterior surface of the right shoulder joint; and a through-and-through gunshot bullet wound entering through the right subclavicular region and exiting through the right half of the posterior chest, accompanied by right-sided haemopneumothorax. The injuries were caused by at least two shots fired from a firearm loaded with cartridges. The cause of death was traumatic-haemorrhagic shock resulting from the through-and-through gunshot bullet wound entering through the right subclavicular region and exiting through the right half of the posterior chest, accompanied by right-sided haemopneumothorax.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1790 dated 1 December 2023, damage was detected on the body armour, short-sleeved shirt, long-sleeved thermal undershirt and long-sleeved shirt belonging to **Nadirli Elvin Yurik oglu**. The damage was characteristic of having been caused by bullets as a result of at least two shots fired from a firearm from a distance exceeding 1 metre and travelling in different directions.

According to forensic medical expert opinion No. 74 dated 21 September 2023, examination of the body of **Yunusov Eltun Javanshir oglu** revealed a through-and-through gunshot bullet wound of the chest entering through the left lateral surface of the chest in the fifth intercostal space and exiting through the right lateral surface of the chest in the fifth intercostal space, accompanied along its course by injuries to both lungs. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was

traumatic-haemorrhagic shock associated with injuries to both lungs resulting from the through-and-through gunshot bullet wound of the chest.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1800 dated 1 December 2023, damage in the number and dimensions stated in the examination section of the opinion was detected on one shirt and one body armour vest belonging to **Yunusov Eltun Javanshir oglu**. The damage was characteristic of having been caused by a bullet as a result of one shot fired from a firearm from a distance exceeding 1 metre and travelling in different directions.

Page 595

According to forensic medical expert opinion No. 63 dated 21 September 2023, examination of the body of **Manafov Qiyas Ramil oglu** revealed multiple shrapnel wounds of the right upper arm accompanied by open fractures of the humerus, injury to the right brachial artery and multiple open fractures of the left upper arm. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the multiple shrapnel wounds of the body, open fractures of the right and left humeri and injury to the right brachial artery.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1783 dated 1 December 2023, damage was detected on the military clothing belonging to **Manafov Qiyas Ramil oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 64 dated 21 September 2023, examination of the body of **Mustafayev Nihat Asif oglu** revealed multiple shrapnel wounds of the body accompanied by open fractures of the left humerus and left femur. The injuries were life-threatening and were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the multiple shrapnel wounds of the body and open fractures of the left humerus and left femur.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1791 dated 1 December 2023, damage was detected on the military clothing belonging to **Mustafayev Nihat Asaf oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 65 dated 21 September 2023, examination of the body of **Mammadli Elkhan Alakbar oglu** revealed multiple shrapnel wounds of the left thigh accompanied by injury to the left femoral artery. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with injury to the left femoral artery resulting from the multiple shrapnel wounds.

According to forensic medical expert opinion No. 52 dated 21 September 2023, examination of the body of **Fatizada Fati Aghamoghlan oglu** revealed a through-and-through gunshot bullet wound of the neck entering through the left lateral surface of the middle one-third of the neck, travelling from left to right and exiting through the right lateral surface of the middle one-third of the neck, accompanied by injury to the principal vessels of the neck. The injury was caused by one shot fired from a firearm loaded with a cartridge. The cause of death was traumatic-haemorrhagic shock associated with injury to the principal vessels of the neck resulting from the through-and-through gunshot bullet wound.

According to forensic medical expert opinion No. 60 dated 21 September 2023, examination of the body of **Abbasov Zamin Khagani oglu** revealed injuries entering through the posterior surface of the left thigh and travelling from rear to front, including multiple shrapnel wounds of the body, traumatic amputation of the right hand, injuries to the thoracic and abdominal organs and damage to the large vessels of the left thigh. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with injury to the thoracic and abdominal organs and damage to the large vessels of the left thigh resulting from the multiple shrapnel wounds—

Page 596

According to forensic ballistic expert opinion No. 3-16-16/2-3/1765 dated 1 December 2023, damage was detected on the military clothing belonging to **Abbasov Zamin Khagani oglu**. The damage was characteristic of having been caused by a bullet as a result of one shot fired from a firearm from a distance exceeding 1 metre and travelling from rear to front.

According to forensic medical expert opinion No. 67 dated 21 September 2023, examination of the body of **Hasanli Arzulla Mubariz oglu** revealed multiple shrapnel wounds of the body accompanied by an open fracture of the left humerus, injury to the left brachial artery and injuries to the thoracic-cavity organs. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the multiple shrapnel wounds of the body, the open fracture of the left humerus, injury to the left brachial artery and injuries to the thoracic-cavity organs.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1754 dated 1 December 2023, damage was detected on the military trousers, military body armour and short-sleeved shirt belonging to **Hasanli Arzulla Mubariz oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 70 dated 21 September 2023, examination of the body of **Eyvazov Vugar Eyvaz oglu** revealed a shrapnel wound of the parieto-occipital region accompanied by fractures of the cranial-vault bones and crushing and destruction of the brain tissue. The injury was life-threatening and was caused by primary and

secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was crushing and destruction of the brain tissue accompanied by fractures of the cranial-vault bones.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1758 dated 5 October 2023, damage was detected on the military body armour, short-sleeved undershirt and short-sleeved shirt belonging to **Eyvazov Vugar Eyvaz oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 62 dated 21 September 2023, examination of the body of **Mirzayev Almirza Aghamirza oglu** revealed: a through-and-through wound of the head entering centrally through the parietal region, accompanied along its course by multiple comminuted fractures of the cranial-vault bones and injury to the brain, and exiting through the anterior surface of the upper one-third of the neck on the right side; a wound entering through the anterior surface of the lower one-third of the neck, accompanied by closed comminuted fractures of the bones of the left upper extremity and forearm; and a through-and-through wound entering through the left lateral surface of the chest and exiting through the left half of the anterior chest, accompanied by injuries to the thoracic-cavity organs. The injuries were caused by at least seven shots fired from a firearm loaded with cartridges, constituted **serious harm to health** in a living person and resulted in death. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones resulting from the through-and-through gunshot bullet wound of the cranial cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1741 dated 30 November 2023, damage was detected on the military body armour and undershirt belonging to **Aliyev Almirza Aghamirza oglu**. The damage was characteristic of having been caused by bullets as a result of at least two shots fired from a firearm from a distance exceeding 1 metre and travelling in different directions.

According to forensic medical expert opinion No. 47 dated 21 September 2023, examination of the body of **Jafarov Elshad Malik oglu** revealed crushing—

—and destruction of the brain; a wound of the right frontal region penetrating the cranial cavity and accompanied by a fracture of the frontal bone; a fracture of the right cheekbone and injury to the right orbit caused by a shrapnel wound penetrating the cranial cavity. Those injuries were life-threatening and were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties.

A closed fracture of the middle one-third of the right humerus accompanied by a through-and-through wound entering through the posterior surface of the right elbow joint and exiting through the inner surface of the middle one-third of the right upper arm; a through-and-

through gunshot bullet wound entering through the right lateral chest and exiting through the right half of the posterior chest, accompanied by right-sided haemopneumothorax; and through-and-through gunshot bullet wounds entering through the right half of the anterior chest and exiting from the right half of the posterior chest over the suprascapular region were caused by at least three shots fired from a firearm.

The immediate cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones resulting from multiple shrapnel wounds of the head.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1747 dated 30 November 2023, damage in the number and dimensions stated in the examination section of the opinion was detected on one military body armour vest and one short-sleeved undershirt belonging to **Jafarov Elshad Malik oglu**. The damage was characteristic of having been caused by bullets as a result of three shots fired from a firearm from a distance exceeding 1 metre and travelling in different directions.

According to forensic medical expert opinion No. 71 dated 21 September 2023, examination of the body of **Aghakhanov Osman Qadim oglu** revealed multiple shrapnel wounds of the body accompanied by traumatic amputation of the left upper extremity at the level of the upper arm and traumatic amputation of the torso at the level of the abdomen. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock associated with the multiple shrapnel wounds of the body, traumatic amputation of the left upper extremity at the level of the upper arm and traumatic amputation of the torso at the abdominal level.

According to forensic medical expert opinion No. 61 dated 21 September 2023, examination of the body of **Hasanov Karam Akif oglu** revealed a through-and-through gunshot bullet wound entering through the outer surface of the upper one-third of the left upper arm, travelling from front to back and exiting through the posterior surface of the chest at the level of the second thoracic vertebra along the left scapular line, accompanied by injury to the left lung. The injury was caused by at least one shot fired from a firearm loaded with a cartridge. The cause of death was traumatic-haemorrhagic shock associated with injury to the left lung and left-sided haemopneumothorax resulting from the through-and-through gunshot bullet wound of the thoracic cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1753 dated 1 December 2023, damage was detected on the military clothing belonging to **Hasanov Karam Akif oglu**. The damage was characteristic of having been caused by a bullet as a result of one shot fired from a firearm from a distance exceeding 1 metre and travelling from front to back.

According to forensic medical expert opinion No. 44 dated 21 September 2023, examination of the body of **Sadigov Jeyhun Niyamaddin oglu** revealed a through-and-through gunshot bullet wound of the left thigh entering through the inguinal region, travelling from front to

back and exiting through the posterior surface of the upper one-third of the left thigh, accompanied by injury to the left femoral artery; and a blind gunshot bullet wound of the left thigh involving only the soft tissues. The injuries were caused by at least two shots fired from a firearm loaded with cartridges. In a living person, the blind gunshot bullet wound of the left thigh did not cause harm to health and its degree of severity was not determined, while the through-and-through gunshot bullet wound of the left thigh constituted **serious harm to health**—

Page 598

—and resulted in death. The cause of death was traumatic-haemorrhagic shock associated with injury to the left femoral artery resulting from the through-and-through gunshot bullet wound of the left thigh.

According to forensic medical expert opinion No. 48 dated 21 September 2023, examination of the body of **Qasimov Qarib Shahbaz oglu** revealed: a through-and-through gunshot bullet wound of the left upper arm entering through the outer surface of the upper one-third and exiting through the posterior surface of the left shoulder joint, accompanied only by injury to the soft tissues; and a blind gunshot bullet wound of the right thigh entering through the inner-posterior surface of the upper one-third of the right thigh and penetrating the abdominal cavity. The injuries were caused by two shots fired from a firearm. The immediate cause of death was traumatic-haemorrhagic shock associated with injury to the abdominal-cavity organs resulting from the blind gunshot bullet wound of the right thigh.

According to forensic medical expert opinion No. 72 dated 21 September 2023, examination of the body of **Qeybaliyev Elvin Aghalar oglu** revealed multiple shrapnel wounds of the body accompanied by crushing and destruction of the brain and fractures of the cranial-vault, skull-base and facial-skeleton bones. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault, skull-base and facial-skeleton bones resulting from the multiple shrapnel wounds of the body.

According to forensic medical expert opinion No. 68 dated 21 September 2023, examination of the body of **Eynaliyev Samrad Ikram oglu** revealed: a through-and-through gunshot bullet wound of the neck entering through the left half of the middle one-third of the neck, travelling from left to right and exiting through the right half of the upper one-third of the neck, accompanied by injury to the jugular artery; and multiple blind shrapnel wounds of the body. The neck wound was caused by one shot fired from a firearm, while the multiple shrapnel wounds were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The immediate cause of death was traumatic-haemorrhagic shock associated with injury to the jugular artery resulting from the through-and-through gunshot bullet wound of the neck.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1759 dated 1 December 2023, damage in the number and dimensions stated in the examination section of the opinion was detected on the military body armour and short-sleeved undershirt belonging to **Eynaliyev Samrad Ikram oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 69 dated 21 September 2023, examination of the body of **Taniverdiyev Amil Elshan oglu** revealed a through-and-through gunshot bullet wound of the cranial cavity entering through the left submandibular region, travelling upward and exiting through the occipital region, accompanied along its course by fractures of the facial skeleton, cranial-vault and skull-base bones and crushing and destruction of the brain tissue; and a blind shrapnel wound of the inguinal region accompanied by injury to the abdominal-cavity organs. The cranial gunshot wound was caused by one shot fired from a firearm, while the inguinal shrapnel wound was caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The immediate cause of death was crushing and destruction of the brain resulting from the through-and-through gunshot bullet wound of the cranial cavity accompanied by fractures of the facial skeleton, cranial-vault and skull-base bones.

According to forensic medical expert opinion No. 54 dated 21 September 2023, examination of the body of **Suleymanov Elmat Rafig oglu** revealed—

—multiple shrapnel wounds of the body accompanied by open comminuted fractures of the right tibia and fibula—were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. Taken together, the injuries were life-threatening and, in living persons, constituted **serious harm to health**; they resulted in death. The cause of death of the late **Suleymanov Elmat Rafig oglu** was the multiple shrapnel wounds of the body.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1767 dated 1 December 2023, damage was detected on the items of military clothing belonging to **Suleymanov Elmat Rafig oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 53 dated 21 September 2023, examination of the body of **Jafarov Ravan Mahammadali oglu** revealed: a through-and-through gunshot bullet wound of the cranial cavity entering through the right periorbital region, travelling from front to back and from right to left, and exiting through the left side of the occipital region, accompanied along its course by fractures of the facial-skeleton, cranial-vault and skull-base bones and crushing and destruction of the brain tissue; open fractures of the left forearm bones; traumatic amputations of both lower legs at the level of the lower one-third;

and multiple shrapnel wounds of the body. The penetrating gunshot bullet wound of the cranial cavity was caused by one shot fired from a firearm; the fractures of the left forearm bones, traumatic amputations of both lower legs and multiple shrapnel wounds of the body were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was crushing and destruction of the brain tissue accompanied by fractures of the facial-skeleton, cranial-vault and skull-base bones resulting from the penetrating gunshot bullet wound of the cranial cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1745 dated 30 November 2023, damage was detected on one military body-armour vest and one long-sleeved undershirt belonging to **Jafarov Ravan Mahammadali oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 55 dated 21 September 2023, examination of the body of **Akhundov Murad Khidir oglu** revealed multiple shrapnel wounds of the body accompanied by injuries to the abdominal-cavity organs. The injuries were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties. The cause of death was traumatic-haemorrhagic shock that developed in connection with the multiple shrapnel wounds of the body accompanied by injuries to the abdominal-cavity organs.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1750 dated 1 December 2023, damage was detected on military trousers, military body armour, underpants and a short-sleeved shirt belonging to **Akhundov Murad Khidir oglu**. The damage was characteristic of having been caused by fragments generated by an explosion at a distance close to the centre of the explosion and travelling in different directions.

According to forensic medical expert opinion No. 56 dated 21 September 2023, examination of the body of **Safarov Javid Rovshan oglu** revealed: a through-and-through gunshot bullet wound of the cranial cavity entering through the left orbital region, accompanied by destruction of the left eyeball, open fractures of the cranial-vault bones and destruction of the brain tissue, and exiting through the left parietal region; a through-and-through gunshot bullet wound of the chest entering through the anterior surface of the left half of the chest and exiting through the right lateral surface of the abdomen, accompanied by injuries to the abdominal-cavity organs; and a through-and-through gunshot bullet wound entering through the posterior surface of the right radiocarpal joint and exiting through the palmar surface of the right hand. The injuries were caused by at least three shots fired from a firearm. The cause of death was—

Page 600

—crushing and destruction of the brain, accompanied by fractures of the cranial-vault and skull-base bones, resulting from the penetrating gunshot bullet wound of the cranial cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1770 dated 1 December 2023, damage was detected on the military trousers, sweater, long-sleeved shirt, body armour and undershirt belonging to **Safarov Javid Rovshan oglu**. The damage was characteristic of having been caused by bullets as a result of two shots fired from a firearm from a distance exceeding 1 metre and travelling in different directions.

According to forensic medical expert opinion No. 57 dated 21 September 2023, examination of the body of **Qahramanov Sanan Nasimi oglu** revealed a through-and-through gunshot bullet wound of the chest entering through the anterior surface of the left shoulder joint and exiting through the left half of the posterior torso, accompanied by injury to the left lung and left-sided haemopneumothorax. The injury was caused by at least one shot fired from a firearm, constituted **serious harm to health** in a living person and resulted in death. The cause of death was left-sided haemopneumothorax resulting from the through-and-through gunshot bullet wound of the chest.

According to forensic medical expert opinion No. 49 dated 21 September 2023, examination of the body of **Asadov Alibala Ali oglu** revealed a blind gunshot bullet wound of the chest entering through the anterior surface of the right half of the chest at the level of the third rib along the clavicular line, penetrating the thoracic cavity and accompanied by injury to the right lung. The injury was caused by at least one shot fired from a firearm, constituted **serious harm to health** in a living person and resulted in death. The cause of death was traumatic-haemorrhagic shock associated with injury to the right lung and right-sided haemopneumothorax resulting from the blind gunshot bullet wound of the chest.

According to forensic medical expert opinion No. 58 dated 21 September 2023, examination of the body of **Suleymanli Nail Safar oglu** revealed a through-and-through gunshot bullet wound of the cranial cavity entering through the right half of the forehead, travelling from left to right, from front to back and from above downward, and exiting through the lower-right portion of the occipital region, accompanied along its course by fractures of the cranial-vault and skull-base bones and crushing and destruction of the brain. The injury was caused by at least one shot fired from a firearm, constituted **serious harm to health** in a living person and resulted in death. The cause of death was crushing and destruction of the brain accompanied by fractures of the cranial-vault and skull-base bones resulting from the penetrating gunshot bullet wound of the cranial cavity.

According to forensic medical expert opinion No. 51 dated 21 September 2023, examination of the body of **Soltanbayli Tamerlan Imran oglu** revealed through-and-through gunshot bullet wounds entering through the outer surface of the lower one-third of the right thigh and exiting through the inner surface of the right knee, and then entering through the inner surface of the left knee and exiting through the outer surface of the upper one-third of the left lower leg, accompanied by injuries to the major vessels of both lower extremities. The injuries were caused by at least one shot fired from a firearm, constituted **serious harm to health** in a living person and resulted in death. The cause of death was traumatic-haemorrhagic shock that developed as a result of injury to the major vessels of both lower extremities caused by the through-and-through gunshot bullet wound.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1769 dated 1 December 2023, damage was detected on the military clothing belonging to **Soltanbayli Tamerlan Imran oglu**. The damage was characteristic of having been caused by bullets fired from a firearm and travelling in different directions.

According to forensic medical expert opinion No. 59 dated 21 September 2023, examination of the body of **Mammadhasanov Qasim Bilal oglu** revealed a wound entering through the submandibular region and exiting centrally through the occipital region, accompanied along its course by fractures of the cranial-vault and skull-base bones and crushing and destruction of the brain—

a penetrating gunshot wound of the cranial cavity and multiple shrapnel wounds of the body accompanied by injuries to the organs of the abdominal and pelvic cavities were fatal injuries. Of those injuries, the penetrating gunshot wound of the cranial cavity was caused by one shot fired from a firearm, while the multiple shrapnel wounds of the body accompanied by injuries to the organs of the abdominal and pelvic cavities were caused by the effects of primary and secondary fragments generated by the explosion of a substance possessing explosive properties. According to their severity in living persons, both collectively and separately, these injuries are classified as grievous harm to health and resulted in death. The immediate cause of death was the crushing and destruction of the brain, accompanied by fractures of the vault and base of the skull, resulting from the penetrating gunshot wound of the cranial cavity.

According to forensic medical expert opinion No. 73 dated 21 September 2023, the injuries found on the body of **Heybatov Sergey Ramin oglu**, namely the crushing and destruction of the brain, fractures of the bones of the skull vault, base and facial skeleton, and a shrapnel wound to the head and neck region, were caused by the effects of primary and secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, these injuries are classified in living persons as grievous harm to health, dangerous to life and resulting in death. The cause of death was the crushing and destruction of the brain, accompanied by fractures of the bones of the skull vault, base and facial skeleton, resulting from injury to the head and neck region.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1752 dated 1 December 2023, damage was found in various areas of the military clothing belonging to **Heybatov Sergey Ramin oglu**. That damage was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 80 dated 22 September 2023, the injuries found on the body of **Qasimzada Inqilab Fuzuli oglu**, namely a penetrating gunshot wound of the cranial cavity entering through the left frontal region, travelling from left to right and from front to back, and exiting through the right temporo-occipital region, accompanied along its course by fractures of the bones of the skull vault, base and facial skeleton and by

crushing and destruction of the brain, were caused by at least one shot fired from a firearm and resulted in death. The immediate cause of death was the crushing and destruction of the brain accompanied by fractures of the bones of the skull vault, base and facial skeleton, resulting from the penetrating gunshot wound of the cranial cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1786 dated 1 December 2023, damage was found on one neck gaiter forming part of the military clothing belonging to **Qasimzada Inqilab Fuzuli oglu**. That damage was characteristic of having been caused by the impact of a bullet as a result of one shot fired from a firearm, from a distance exceeding one metre and in various directions.

According to forensic medical expert opinion No. 78 dated 22 September 2023, the injuries found on the body of **Rzayev Ramil Elchin oglu**, namely an extensive shrapnel wound of the head accompanied by fractures of the bones of the skull vault, base and facial skeleton, crushing and destruction of brain tissue, were caused by the effects of primary and secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, these injuries are classified in living persons as grievous harm to health, dangerous to life and resulting in death. The cause of death was the crushing and destruction of the brain accompanied by fractures of the bones of the skull vault, base and facial skeleton, resulting from the shrapnel wound of the head.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1774 dated 1 December 2023, damage was found on the military trousers and undershirt forming part of the military clothing belonging to **Rzayev Ramil Elchin oglu**. That damage

was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 79 dated 3 October 2023, the injuries found on the body of **Imamaliyev Etibar Hijran oglu**, namely a penetrating gunshot wound of the cranial cavity entering through the tail region of the left eyebrow, travelling from left to right, and exiting through the right temporal region, accompanied along its course by fractures of the bones of the skull vault and base and by crushing and destruction of the brain; and a penetrating gunshot wound of the right lower leg entering through the posterior surface of the middle third of the right lower leg, damaging the soft tissues and exiting through the medial surface of the middle third of the right lower leg, were caused by at least two shots fired from a firearm and resulted in death. The immediate cause of death was the crushing and destruction of the brain accompanied by fractures of the bones of the skull vault and base, resulting from the penetrating gunshot wound of the cranial cavity.

According to forensic medical expert opinion No. 76 dated 3 October 2023, the injuries found on the body of **Jafarov Mahir Asif oglu**, namely a penetrating gunshot wound of the chest entering through the right lateral surface of the chest at the level of the fifth intercostal space

along the mid-axillary line, travelling from back to front and exiting through the right subclavicular region on the anterior surface of the chest, accompanied along its course by damage to the organs of the thoracic cavity; and a blind gunshot wound of the abdominal cavity entering through the anterior abdominal wall and terminating in the upper outer quadrant of the right buttock, accompanied along its course by damage to the organs of the abdominal cavity, were caused by two shots fired from a firearm. According to their degree, these injuries are classified in living persons as grievous harm to health and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of damage to the organs of the thoracic and abdominal cavities caused by the gunshot wounds of the chest and abdominal cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1746 dated 30 November 2023, damage was found on a military tunic, sweater and long-sleeved shirt forming part of the military clothing belonging to **Jafarov Mahir Asif oglu**. That damage was characteristic of having been caused by bullets as a result of two shots fired from a firearm, from a distance exceeding one metre and in various directions.

According to the protocol dated 22 September 2023 concerning the examination of the body of serviceman **Qasimov Kamal Huseyn oglu**, a fixed-term active-duty soldier of a military unit of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to forensic medical expert opinion No. 75 dated 3 October 2023, the injuries found on the body of **Qasimov Kamal Huseyn oglu**, namely a blind gunshot wound of the thoracic cavity entering through the left half of the posterior surface of the chest at the level of the third rib along the posterior axillary line, travelling from left to right, with a metallic foreign object—a bullet—lodged on the right half of the posterior surface of the chest at the level of the second rib along the posterior axillary line, and accompanied along its course by damage to both lungs, were caused by one shot fired from a firearm. According to their degree, these injuries are classified in living persons as grievous harm to health and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of damage to both lungs caused by the blind gunshot wound of the thoracic cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1788 dated 1 December 2023, damage was found on one military tunic and one long-sleeved shirt forming part of the military clothing belonging to **Qasimov Kamal Huseyn oglu**. That damage was characteristic of having been caused by a bullet as a result of one shot fired from a firearm, from a distance exceeding one metre and in various directions.

Page 603

According to forensic medical expert opinion No. 77 dated 3 October 2023, the injuries found on the body of **Huseynov Sabuhi Mahbub oglu**, namely shrapnel wounds of both lower extremities accompanied by complete traumatic amputation of the left lower extremity at the lower third of the lower leg and complete traumatic amputation of the right lower extremity at the upper third of the lower leg, were caused by the effects of primary and secondary

fragments generated by the explosion of a substance possessing explosive properties. These injuries were classified as grievous harm to health and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with the complete traumatic amputation of the left lower extremity at the lower third of the lower leg and of the right lower extremity at the upper third of the lower leg, as a result of shrapnel wounds to both lower extremities.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1797 dated 1 December 2023, damage was found on the military trousers and undershirt forming part of the military clothing belonging to **Huseynov Sabuhi Mahbub oglu**. That damage was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 81 dated 3 October 2023, the injuries found on the body of **Rasulov Nuraddin Akif oglu**, namely a shrapnel wound of the abdominal region accompanied by damage to the organs of the abdominal cavity, were caused by the effects of primary fragments generated by the explosion of a substance possessing explosive properties and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with damage to the organs of the abdominal cavity caused by the shrapnel wound of the abdominal region.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1777 dated 1 December 2023, damage was found on a short-sleeved undershirt forming part of the military clothing belonging to **Rasulov Nuraddin Akif oglu**. That damage was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 85 dated 3 October 2023, the injuries found on the body of **Ismayilov Vugar Mammadgasim oglu**, namely a penetrating gunshot wound of the cranial cavity entering through the right frontal region, travelling from right to left and from top to bottom, and exiting through the left occipital region, accompanied along its course by fractures of the bones of the skull vault and base and by crushing and destruction of brain tissue; and a combined penetrating gunshot wound of the thoracic and abdominal cavities entering through the right lumbar region on the posterior surface of the torso, travelling from back to front and from top to bottom, and exiting through the right subclavicular region, accompanied along its course by damage to the organs of the thoracic and abdominal cavities, were caused by two shots fired from a firearm. Both collectively and separately, these injuries are classified as grievous harm to health and resulted in death. The immediate cause of death was the crushing and destruction of the brain accompanied by fractures of the bones of the skull vault and base, resulting from the penetrating gunshot wound of the cranial cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1761 dated 1 December 2023, damage was found on military trousers, a thermal shirt and a short-sleeved shirt forming part of the military clothing belonging to **Ismayilov Vugar Mammadgasim oglu**. That damage

was characteristic of having been caused by bullets as a result of one shot fired from a firearm, from a distance exceeding one metre, in a direction from back to front.

According to forensic medical expert opinion No. 83 dated 3 October 2023, the injuries found on the body of **Sumbatzada Vusal Barat oglu**, namely traumatic amputation of the left upper extremity at the level of the elbow, damage to the organs of the abdominal cavity, open fractures of the pelvic bones, and shrapnel wounds of the left upper extremity and posterior surface of the torso, were fatal injuries caused by the effects of primary and secondary

fragments generated by the explosion of a substance possessing explosive properties and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with traumatic amputation of the left upper extremity at the level of the elbow, damage to the organs of the abdominal cavity, and open fractures of the pelvic bones caused by shrapnel wounds to the left upper extremity and posterior surface of the torso.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1766 dated 1 December 2023, damage was found on the military clothing belonging to **Sumbatzada Vusal Barat oglu**. That damage was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 82 dated 3 October 2023, the injuries found on the body of **Gahramanov Alimardan Samad oglu**, namely a penetrating gunshot wound of the abdominal cavity entering through the outer surface of the upper third of the left thigh, travelling from bottom to top, from left to right and from front to back, and exiting through the midline of the lumbar region, accompanied along its course by damage to the organs of the abdominal cavity, were caused by one shot fired from a firearm. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with damage to the organs of the abdominal cavity caused by the penetrating gunshot wound of the abdominal cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1785 dated 1 December 2023, damage was found on the military clothing belonging to **Gahramanov Alimardan Samad oglu**. That damage was characteristic of having been caused by a bullet as a result of one shot fired from a firearm, from a distance exceeding one metre and in various directions.

According to forensic medical expert opinion No. 86 dated 3 October 2023, the injuries found on the body of **Mirzayev Farid Namiq oglu**, namely a penetrating gunshot wound of the thoracic cavity entering through the outer surface of the left ankle, travelling from left to right, from front to back and from top to bottom, and exiting through the right half of the posterior surface of the chest at the level of the fourth rib along the scapular line, accompanied along its course by damage to both lungs, were caused by one shot fired from a firearm. The immediate cause of death was traumatic haemorrhagic shock that developed in

connection with damage to both lungs and bilateral haemopneumothorax resulting from the penetrating gunshot wound of the thoracic cavity.

According to forensic medical expert opinion No. 84 dated 3 October 2023, the injuries found on the body of **Zulfugarov Javid Javanshir oglu**, namely multiple penetrating gunshot wounds of the cranial cavity accompanied by multiple fractures of the bones of the skull vault, base and facial skeleton and by crushing and destruction of brain tissue, were caused by firearm shots. The immediate cause of death was the crushing and destruction of the brain accompanied by fractures of the bones of the skull vault, base and facial skeleton resulting from the penetrating gunshot wounds of the cranial cavity.

According to forensic medical expert opinion No. 87 dated 3 October 2023, the injuries found on the body of **Mammadov Samir Mammad oglu**, namely a penetrating gunshot wound of the cranial cavity entering through the occipital region from left to right, from back to front and from bottom to top, and exiting through the left parietal region, accompanied along its course by fractures of the bones of the skull vault and base and by crushing and destruction of the brain, were caused by one shot fired from a firearm. The immediate cause of death was the crushing and destruction of the brain accompanied by fractures of the bones of the skull vault and base resulting from the penetrating gunshot wound of the cranial cavity.

According to forensic medical expert opinion No. 09 dated 20 October 2023, the injuries found on the body of **Shamsiyev Ilham Shakir oglu**, namely multiple

comminuted, defective, open fractures of the skull bones and a blind wound penetrating the cranial cavity in the right parietal region, accompanied by diffuse crushing and destruction of brain tissue; an extensive blind wound of the left forearm region with a tissue defect; and a blind wound of the first finger of the right hand, were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. The immediate cause of death was diffuse crushing and destruction of brain tissue resulting from the blind shrapnel wound penetrating the cranial cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1556 dated 7 January 2023, damage was found on the lower front portion of the left sleeve of a military tunic and military sweater bearing the inscription “Martyr Junior Lieutenant Ilham Shamsiyev.” Although no copper traces were detected on the surface of the damage, the shape, size and morphological structure of the damage, as well as the detection on its surface of explosive material—TNT—and incompletely burnt smokeless powder particles as an additional factor of the shot, indicated that the damage was characteristic of having been caused by fragments travelling from front to back from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 07 dated 6 October 2023, the injuries found on the body of **Hasanov Hasan Zabit oglu**, namely sharp blood loss, comminuted open fractures of the pelvic bones, and one penetrating and two blind wounds of the abdominal

cavity accompanied by multiple injuries to the organs of the abdominal cavity, as well as a tangential wound of the soft tissues of the left subaxillary region, were caused by firearm shots and resulted in grievous harm to health and death. In addition, during the forensic medical examination of the body of **Hasanov Hasan Zabit oglu**, superficial abrasions were found on the neck, in the region of the left elbow joint, and on the first finger of the right hand. Those injuries were caused by the impact of a blunt object with limited surface area. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of sharp blood loss, comminuted open fractures of the pelvic bones and multiple injuries to the organs of the abdominal cavity caused by one penetrating and two blind gunshot wounds of the abdominal cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1553 dated 7 January 2023, a penetrating defect was found on the front upper left part of the undershirt belonging to **Hasan Hasanov**. Although no copper traces or explosive material—TNT—were detected around that damage, incompletely burnt smokeless powder particles, being an additional factor of the shot, were found around it. Based on the shape, size and morphological structure of the damage, it was established that the damage was an entrance defect caused by a bullet with an approximate diameter of 5 millimetres, fired from a rifled firearm from a distance exceeding one metre.

According to forensic medical expert opinion No. 11 dated 20 September 2023, the injuries found on the body of **Qasimov Sanan Farman oglu**, namely multiple comminuted defective open fractures of the bones of the skull vault, base and nose, diffuse crushing and destruction of brain tissue, a penetrating head wound, three penetrating wounds to the left half of the chest and three blind wounds penetrating the thoracic cavity on the right half of the chest, accompanied by multiple injuries to the thoracic organs; traumatic detachment of a flap-like deep tissue segment at the level of the upper third of the right upper extremity, left attached in a hanging condition; a penetrating wound of the left hand accompanied by multiple comminuted open fractures of the hand bones; multiple blind wounds of the left lower leg accompanied by multiple comminuted open fractures of the lower-leg bones; three blind wounds of the soft tissues of the left upper arm and one blind wound of the soft tissues of the right lower leg; and an abrasion of the left forearm region, were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. The immediate

cause of death was a penetrating shrapnel wound of the head accompanied by multiple comminuted open fractures of the bones of the skull vault and base and diffuse crushing and destruction of brain tissue, resulting from the explosion.

According to forensic ballistic expert opinion Nos. 3-16-16/2-3/1541 and 3/1585 dated 7 January 2023, four metallic objects submitted for examination, based on their shape, manufacturing characteristics, traces and other properties, constituted parts of factory-

manufactured ammunition—bullet projectiles. One metallic object submitted for examination was a bullet separated during the firing process from a factory-manufactured 7.62×39 mm cartridge intended for use as ammunition in Kalashnikov-pattern automatic weapons, RPK light machine guns, SKS carbines and other rifled firearms of the appropriate calibre. In the condition submitted, it was not considered fit for use as ammunition for its intended purpose.

Damage of the dimensions and quantity indicated in the examination section of the opinion was found on one military jacket, one military tunic, one military sweater, one long-sleeved military shirt, one short-sleeved military shirt, one pair of military trousers with a belt, and one undershirt bearing the notation that they belonged to "Martyr Major Sanan Qasimov." Although no copper traces were detected on the surface of the damage, the shape, size and morphological structure of the damage, as well as the detection on its surface of explosive material—TNT—and incompletely burnt smokeless powder particles as an additional factor of the shot, indicated that the damage was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 10 dated 29 October 2023, the injuries found on the body of **Yusifli Shamsistan Shukran oglu**, namely multiple comminuted defective open fractures of the bones of the skull vault, base and facial skeleton, diffuse crushing and destruction of brain tissue, massive vascular injuries to the neck, and one combined penetrating wound of the head and neck; damage to the left lung, left-sided haemopneumothorax—an accumulation of free blood and air in the thoracic cavity—and a penetrating wound of the left half of the chest accompanied by displaced open fractures of the sixth and seventh ribs; a blind wound of the left lower leg accompanied by multiple comminuted displaced open fractures of the lower-leg bones; a blind wound of the right foot accompanied by a comminuted displaced open fracture of the fifth metatarsal bone; a penetrating shrapnel wound of the right auricle; and blind shrapnel wounds of the right shoulder region, the right lateral surface of the chest and the soft tissues of the right upper arm, were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. The immediate cause of death was diffuse crushing and destruction of brain tissue resulting from the combined penetrating shrapnel wound of the head and neck.

According to forensic ballistic expert opinion Nos. 3-16-16/2-3/1564 and 3/1578 dated 7 January 2023, damage was found on a military jacket, military tunic, short-sleeved military shirt, military trousers with a belt, a right sock and a right stocking belonging to **Shamsistan Yusifli**. Although no copper traces were detected on the surfaces of the damage, the shape, size and morphological structure of the damage, as well as the detection on those surfaces of explosive material—TNT—and incompletely burnt smokeless powder particles as an additional factor of the shot, indicated that the damage was characteristic of having been caused by fragments travelling from bottom to top from a distance close to the centre of the explosion. Incompletely burnt smokeless powder particles—nitro compounds—being an additional factor of the shot, and explosive material—TNT—were detected on the clothing items. One metallic object submitted for examination, based on its shape, manufacturing

characteristics, traces and other properties, constituted a component of factory-manufactured ammunition—a bullet projectile.

Page 607

According to forensic medical expert opinion No. 06 dated 6 October 2023, the injuries found on the body of **Jahangirov Tural Galamhuseyn oglu**, namely acute blood loss; a comminuted open fracture of the left scapula; a blind wound of the left scapular region penetrating the thoracic cavity, accompanied by injuries to the organs of the thoracic cavity and left-sided open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity; multiple abrasions and contusions of the lumbar and lower-back regions; and abrasions of both knee-joint regions, were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. The cause of death was traumatic haemorrhagic shock that developed as a result of acute blood loss, a comminuted open fracture of the left scapula and damage to the organs of the thoracic cavity caused by the blind shrapnel wound penetrating the thoracic cavity.

According to forensic ballistic expert opinion Nos. 3-16-16/2-3/1543 and 3/1583 dated 7 January 2023, one metallic object submitted for examination, based on its shape, manufacturing characteristics, traces and other properties, constituted part of factory-manufactured ammunition—a bullet projectile. Damage of the dimensions and quantity indicated in the examination section of the opinion was found on one military tunic, one undershirt and one short-sleeved shirt bearing the notation that they belonged to “Martyr Junior Lieutenant Tural Jahangirov.” Although no copper traces or explosive material—TNT—were detected on the surface of the damage, the presence of incompletely burnt smokeless powder particles, being an additional factor of the shot, indicated that the damage was characteristic of having been caused by a fragment travelling from back to front from a distance remote from the centre of the explosion.

According to forensic medical expert opinion No. 08 dated 20 October 2023, the injuries found on the body of **Huseynov Shikar Huseyn oglu**, namely multiple comminuted defective open fractures of the left temporal, parietal and occipital bones and diffuse crushing and destruction of brain tissue, with a blind wound of the head; superficial wounds of the right temporal region, right supraorbital region, submental region, posterior surface of the left hand and right lower-leg region, were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, these injuries are classified in living persons as grievous harm to health and resulted in death. In addition, injuries to the thoracic organs, a comminuted open fracture of the left scapula, left-sided open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity—and one penetrating and one blind wound of the thoracic cavity accompanied by acute blood loss were caused by bullets fired from a firearm. The cause of death was diffuse crushing and destruction of brain tissue resulting from the blind shrapnel wound penetrating the cranial cavity.

According to forensic ballistic expert opinion Nos. 3-16-16/2-3/1562 and 3/1576 dated 7 January 2023, one metallic object submitted for examination was a bullet separated during the firing process from a factory-manufactured 7.62×39 mm cartridge intended for use as ammunition in Kalashnikov-pattern AK automatic weapons, RPK light machine guns, SKS carbines and other rifled firearms of the appropriate calibre. In the condition submitted, it was not considered fit for use as ammunition for its intended purpose.

Damage indicated in the examination section of the opinion was found on a military tunic, military sweater, long-sleeved shirt, short-sleeved shirt, sleeveless undershirt and right stocking. That damage was characteristic of having been caused by bullets fired from a firearm from a distance exceeding one metre and in various directions.

According to forensic medical expert opinion No. 15 dated 21 September 2023, the injuries found on the body of **Rajabov Vagif Yagub oglu**, namely multiple comminuted defective open fractures of the skull bones and diffuse crushing and destruction of brain tissue…

Page 608

…accompanied by a blind wound of the head; acute blood loss; injuries to the organs of the thoracic cavity; a penetrating wound of the chest accompanied by bilateral haemopneumothorax—an accumulation of free blood and air in the thoracic cavity; a penetrating wound of the chest accompanied by comminuted displaced open fractures of the lower-leg bones; and a blind wound of the soft tissues of the right thigh, were caused by the effects of bullets fired from a firearm and by primary or blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. The immediate cause of death was diffuse crushing and destruction of brain tissue resulting from the blind firearm wound of the head.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1551 dated 7 January 2023, damage was found on a military jacket, military tunic, insulated undershirt, sleeveless undershirt, military trousers and an insulated pair of under-trousers belonging to **Vagif Rajabov**. Although no copper traces were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, and explosive material—TNT—indicated, based on the shape, dimensions and morphological structure of the damage, that the damage on the clothing consisted of entrance and exit defects caused by at least two bullets of approximately 6 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre and in various directions, as well as damage caused by fragments travelling in various directions from a distance close to the centre of the explosion. Incompletely burnt smokeless powder particles and explosive material—TNT—were detected on the surface of the military clothing.

According to forensic medical expert opinion No. 14 dated 21 September 2023, the injuries found on the body of **Samadov Jamal Vugar oglu**, namely acute blood loss; damage to the organs of the thoracic cavity; bilateral open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity; one combined penetrating wound of the thoracic cavity

and right upper arm accompanied by a comminuted open fracture of the right humerus; two blind wounds of the right lumbar region penetrating the abdominal cavity and accompanied by damage to the organs of the abdominal cavity and acute blood loss; one blind wound of the soft tissues of the right lumbar region; and one penetrating wound of the soft tissues of the left lumbar region, were caused by bullets fired from a firearm. According to their degree, these injuries are classified in living persons as grievous harm to health and resulted in death. The immediate cause of death was acute blood loss caused by multiple gunshot wounds and damage to the organs of the thoracic and abdominal cavities.

According to forensic ballistic expert opinion Nos. 3-16-16/2-3/1565 and 3/1579 dated 7 January 2023, damage was found on a military jacket, military tunic, military sweater, short-sleeved shirt, sleeveless undershirt, military trousers, lower undergarment, right stocking and right sock belonging to **Jamal Samadov**. Although no copper traces or explosive material—TNT—were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, indicated, based on the shape, dimensions and morphological structure of the damage, that the damage consisted of entrance and exit defects caused by numerous bullets of approximately 8 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre, as well as damage caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 16 dated 21 September 2023, the injuries found on the body of **Nabiyev Farid Kamran oglu**, namely acute blood loss; bilateral open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity; damage to the organs of the thoracic cavity; one penetrating wound of the chest accompanied by displaced fractures of the ribs on the right side; penetrating wounds of the right scapular region and the soft tissues of the left knee-joint region; and

a penetrating wound of the right thigh accompanied by a comminuted displaced open fracture of the femur, were caused by the effects of bullets fired from a firearm. Multiple blind wounds of the left upper arm, right hip-joint region and soft tissues of both thighs, as well as an abrasion of the right supra-gluteal region, were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of acute blood loss, bilateral open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity—and damage to the organs of the thoracic cavity caused by the penetrating gunshot wound of the chest.

According to forensic medical expert opinion No. 22 dated 21 September 2023, the injuries found on the body of **Ahmadov Elvin Galandar oglu**, namely damage to the organs of the thoracic cavity; fractures of the left ribs; bilateral open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity; two combined penetrating wounds

of the left upper arm and thoracic cavity accompanied by acute blood loss; a penetrating wound of the neck accompanied by injury to the major vessels; two blind wounds of the right lumbar region penetrating the abdominal cavity and accompanied by damage to the abdominal organs; one blind wound of the soft tissues of the left lumbar region; and one penetrating wound of the left lower leg and one penetrating wound of the left knee-joint region accompanied by multiple comminuted displaced open fractures of the left femur and lower-leg bones, were caused by bullets fired from a firearm. The cause of death was acute blood loss resulting from damage to the major vessels of the neck and to the organs of the thoracic and abdominal cavities caused by multiple gunshot wounds.

According to forensic medical expert opinion No. 23 dated 21 September 2023, the injuries found on the body of **Babayev Sahil Saribala oglu**, namely a penetrating wound of the thoracic cavity with an entrance opening on the right half of the anterior surface of the chest and an exit opening on the left lateral wall of the chest, accompanied by acute blood loss, bilateral haemopneumothorax—an accumulation of free blood and air in the thoracic cavity—damage to the organs of the thoracic cavity, and displaced open fractures of the first and second ribs on the right and the fourth, fifth, sixth and seventh ribs on the left; and a penetrating wound of the soft tissues of the right forearm, were caused by bullets fired from a firearm. According to their degree, those injuries are classified in living persons as grievous harm to health and resulted in death. In addition, during the forensic medical examination of the body of **S.S. Babayev**, irregular reddish-brown abrasions measuring 9.5 × 7 centimetres were found in the frontal region, and abrasions measuring 2 × 1.5 centimetres were found at the outer corner of the right eye. Those injuries were caused by the impact of a blunt object. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with damage to the organs of the thoracic cavity, bilateral haemopneumothorax and acute blood loss caused by the penetrating gunshot wound of the thoracic cavity.

According to forensic medical expert opinion No. 21 dated 21 September 2023, the injuries found on the body of **Aliyev Zahir Sadi oglu**, namely multiple injuries to the organs of the abdominal and pelvic cavities accompanied by acute blood loss; one penetrating wound of the abdominal cavity, with the entrance opening located in the projection of the left iliac crest and the exit opening in the left lumbar region; three blind wounds penetrating the pelvic cavity with entrance openings on the left forearm; one penetrating wound of the left elbow-joint region accompanied by multiple comminuted displaced open fractures of the left humerus and forearm bones; one penetrating wound of the soft tissues of the right buttock region; two penetrating wounds of the right thigh accompanied by multiple comminuted displaced open fractures of the femur; one penetrating wound of the soft tissues of the left thigh; and a wound of the soft tissues of the left lower leg

of the soft tissues of the left lower leg—were caused by the effects of bullets fired from a firearm as a result of ten shots. Multiple blind shrapnel wounds of the left auricle, left knee-joint region, left thigh and lower-leg regions were caused by the effects of primary fragments

generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified in living persons as causing prolonged impairment of health and therefore as less grievous bodily harm. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of multiple gunshot wounds, damage to the organs of the abdominal and pelvic cavities, multiple comminuted displaced open fractures of the left upper-arm and forearm bones and of the right femur, and acute blood loss.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1558 dated 7 January 2023, damage was found on a military tunic, military sweater, undershirt and military trousers belonging to **Zahir Aliyev**. Although no copper traces were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, and explosive material—TNT—indicated, based on the shape, dimensions and morphological structure of the damage, that the damage on the military clothing consisted of entrance and exit defects caused by numerous bullets approximately 6 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre and in various directions, as well as damage caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 13 dated 21 September 2023, the injuries found on the body of **Valizada Rashad Rasim oglu**, namely a penetrating head wound with an entrance opening located in the left parietal region and an exit opening in the right temporal region, accompanied by multiple defective open fractures of the bones of the skull vault and diffuse crushing and destruction of brain tissue; comminuted defective open fractures of the humerus and a blind wound of the right shoulder region; a penetrating wound of the soft tissues of the posterior chest wall; multiple blind and penetrating wounds of both upper-arm regions; one abrasion on the left half of the chest; and abrasions of the frontal region, were caused by the effects of a bullet fired from a firearm in a direction from left to right. According to their degree, these injuries are classified in living persons as grievous harm to health and resulted in death. The remaining injuries were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. The immediate cause of death was diffuse traumatic crushing of brain tissue resulting from the penetrating gunshot wound of the head.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1559 dated 7 January 2023, damage was found on a military tunic, military jacket, insulated undershirt, face mask and undershirt belonging to **Valizada Rashad Rasim oglu**. Although no copper traces were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, and explosive material—TNT—indicated, based on the shape, dimensions and morphological structure of the damage, that the damage consisted of entrance and exit defects caused by bullets approximately 6 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre and in various

directions. Other damage to the clothing was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 12 dated 21 September 2023, the injuries found on the body of **Sadigov Samir Jabrayil oglu**, namely a penetrating gunshot wound of the cranial cavity with an entrance opening in the right occipital region and an exit opening in the left parietal region, accompanied by multiple

defective open fractures of the skull bones and diffuse crushing and destruction of brain tissue; one penetrating gunshot wound of the head; and one combined penetrating wound of the neck and cranial cavity with an entrance opening in the neck region and an exit opening in the occipital region, accompanied by multiple defective open fractures of the bones of the skull vault and base and diffuse crushing and destruction of brain tissue, together with one tangential wound of the soft tissues of the neck and right upper-arm region, were caused by bullets fired from a firearm. The immediate cause of death was diffuse crushing and destruction of brain tissue resulting from two penetrating gunshot wounds of the cranial cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1552 dated 7 January 2023, damage was found on a military tunic, military sweater, insulated undershirt and neck gaiter belonging to **Samir Sadigov**. Although no copper traces were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, indicated, based on the shape, dimensions and morphological structure of the damage, that the defects were entrance wounds caused by at least two bullets approximately 7 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre and in various directions.

According to forensic medical expert opinion No. 17 dated 21 September 2023, the injuries found on the body of **Mammadov Azer Sulduz oglu**, namely acute blood loss; damage to the organs of the thoracic cavity; one penetrating wound of the thoracic cavity accompanied by open displaced fractures of the eighth and ninth ribs; and one penetrating wound of the pelvic cavity accompanied by damage to the pelvic organs, were caused by bullets fired from a firearm. In addition, during examination of the body, multiple abrasions and contusions were found on the forehead, left supra-gluteal region, both knees and anterior surfaces of the lower legs. Those injuries were caused by a blunt object. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of acute blood loss and damage to the organs of the thoracic and pelvic cavities caused by one penetrating gunshot wound of the chest and one penetrating gunshot wound of the pelvic cavity.

According to forensic medical expert opinion No. 20 dated 21 September 2023, the injuries found on the body of **Huseynov Ramin Rovshan oglu**, namely fourth-degree thermal burns of the head, neck, chest and abdominal regions, both upper extremities and the upper third of both thighs, covering approximately 90% of the total body surface; incomplete traumatic

amputation of the right lower extremity at the lower third of the thigh, with a flap of skin hanging from the stump; and a blind wound of the left lower-leg region, were caused by the effects of the blast wave, flame and fragments generated during the explosion of a firearm projectile. The cause of death was trauma incompatible with life, namely fourth-degree thermal burns covering approximately 90% of the total body surface, together with incomplete traumatic amputation of the right lower extremity at the lower third of the thigh.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1555 dated 7 January 2023, damage was found on two military parts belonging to **Ramin Huseynov**. Based on the form, dimensions and morphological structure of the damage, as well as the detection on the surface of the two military parts of soot, thermal traces, explosive material—TNT—and incompletely burnt smokeless powder particles, being an additional factor of the shot, the damage was characteristic of having been caused by fragments travelling from the centre of the explosion. In addition, incompletely burnt smokeless powder particles—nitro compounds—and explosive material—TNT—were detected on one belt, one pair of military boots and one pair of socks.

Page 612

According to forensic medical expert opinion No. 19 dated 21 September 2023, the injuries found on the body of **Mehdiyev Suleyman Mansur oglu**, namely acute blood loss; a comminuted open fracture of the right scapula; comminuted open fractures of the left seventh and eighth ribs; damage to the organs of the thoracic cavity; one penetrating wound and one blind wound of the thoracic cavity accompanied by bilateral open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity; one blind wound of the right lumbar region penetrating the abdominal cavity and accompanied by damage to the organs of the abdominal cavity; one combined penetrating wound of the right and left buttock regions; one penetrating wound of the soft tissues of the right thigh and lower-leg regions; and one penetrating wound of the left lower leg accompanied by multiple comminuted open fractures of the lower-leg bones, were caused by the effects of bullets fired from a firearm loaded with bullet cartridges. According to their degree, the injuries are classified in living persons as grievous harm to health and resulted in death. In addition, abrasions were found on the eyebrow, nasal region and left lower-leg region during the forensic medical examination of the body of **S.M. Mehdiyev**. Those injuries were caused by the effects of a hard blunt object. The cause of death was traumatic haemorrhagic shock that developed as a result of acute blood loss, damage to the organs of the thoracic and abdominal cavities, a comminuted fracture of the right scapula, fractures of the left seventh and eighth ribs and of the left lower-leg bones, caused by multiple gunshot wounds.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1557 dated 7 January 2023, damage was found on a military tunic, one military sweater, a short-sleeved military shirt, a long-sleeved undershirt, military trousers with a belt, an insulated pair of under-trousers and an undershirt belonging to **Suleyman Mehdiyev**. Although no copper traces or explosive material—TNT—were detected around the damage, the presence around it of incompletely

burnt smokeless powder particles, being an additional factor of the shot, indicated, based on the shape, dimensions and morphological structure of the damage, that the defects were entrance wounds caused by numerous bullets approximately 6 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre and in various directions. Incompletely burnt smokeless powder particles, being an additional factor of the shot, were detected on the surface of the military clothing.

According to forensic medical expert opinion No. 24 dated 21 September 2023, during the forensic medical examination of the body of **Gadirov Amid Gurban oglu**, the injuries found included: a penetrating head wound with an entrance opening in the left occipital region and an exit opening in the left parietal region, accompanied by multiple comminuted open fractures of the skull-vault bones and diffuse crushing and destruction of brain tissue; a blind wound of the posterior chest wall penetrating the thoracic cavity and accompanied by damage to the organs of the thoracic cavity and acute blood loss; blind wounds of the anterior chest wall, left lumbar region, left shoulder-joint region and left forearm region; and abrasions. The penetrating head wound was caused by a bullet fired from a firearm and, according to its degree, was classified as grievous harm to health and resulted in death. The other injuries were caused by the effects of the blast wave and primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. The immediate cause of death was diffuse crushing and destruction of brain tissue resulting from the penetrating gunshot wound of the head.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1560 dated 7 January 2023, damage was found on a military tunic, a long-sleeved shirt with the front and left sleeve cut away, and military trousers with a belt belonging to **Amid Gadirov**. Although no copper traces were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, and explosive material—TNT—indicated, based on the form, dimensions and morphological

structure of the damage, that the defects found on the military clothing were characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion. In addition, incompletely burnt smokeless powder particles, being an additional factor of the shot, and explosive material—TNT—were detected on one undershirt, one pair of socks, one pair of boots and one pair of socks.

According to forensic medical expert opinion No. 25 dated 21 September 2023, the injuries found on the body of **Samadov Khayyam Mirazim oglu**, namely multiple open fractures of the skull bones and a blind wound of the right parietal region penetrating the cranial cavity, accompanied by diffuse trauma to the brain tissue; one blind wound of the right lumbar region penetrating the abdominal cavity, accompanied by multiple injuries to the organs of the abdominal cavity and acute blood loss; one penetrating wound of the left thigh accompanied by a comminuted displaced open fracture of the femur; an extensive wound

with a soft-tissue defect on the left lateral wall of the chest and abdomen; one penetrating wound of the right hip region; one penetrating wound of the right thigh region; blind wounds of the soft tissues of both buttock regions; and a superficial wound of the left upper-arm region, were caused by primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, these injuries are classified in living persons as grievous harm to health and resulted in death.

In addition, one penetrating and one blind wound of the abdominal cavity accompanied by multiple injuries to the organs of the abdominal cavity and acute blood loss; one penetrating wound of the right upper-arm region; one penetrating wound of the left knee-joint region; one penetrating wound of the soft tissues of the left foot; and one blind wound of the right knee-joint region were caused by bullets fired from a firearm. The immediate cause of death was diffuse trauma to the brain tissue resulting from a blind shrapnel wound penetrating the cranial cavity during the explosion.

According to forensic ballistic expert opinion Nos. 3-16-16/2-3/1563 and 3/1577 dated 7 January 2023, the metallic object marked with the number “1” was a bullet core separated during the firing process from a factory-manufactured 7.62×54 mm cartridge intended for use as ammunition in Mosin-system rifles, Dragunov-pattern sniper rifles, Simonov rifles, Kalashnikov-pattern machine guns and other rifled firearms of the appropriate calibre. In the condition submitted, it was not considered fit for use as ammunition for its intended purpose.

The metallic object marked with the number “2” was a bullet jacket separated during the firing process from a factory-manufactured 7.62×39 mm cartridge intended for use as ammunition in Kalashnikov-pattern AK-74, AKS-74, AK-74M and AKS-74U automatic weapons, RPK-74 and RPKS-74 light machine guns and other rifled firearms of the appropriate calibre. In the condition submitted, it was not considered fit for use as ammunition for its intended purpose.

The objects marked with the numbers “3” and “4” were parts of a cartridge separated during firing, namely fragments of a bullet jacket. Those objects were factory-manufactured and were not excluded from having been intended for use as ammunition in Kalashnikov-pattern AK automatic weapons, RPK light machine guns, SKS carbines and other rifled firearms of the appropriate calibre, in 7.62×39 mm cartridges.

Damage of the dimensions and quantity indicated in the examination section of the opinion was found on one long-sleeved military shirt, one undershirt, one pair of military trousers with a belt, one undershirt and one stocking bearing the notation that they belonged to “Martyr Major Khayyam Samadov.” Although no copper traces were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, and explosive material—TNT—indicated, based on the form, dimensions and morphological structure of the damage, that the defects on the military clothing consisted of entrance and exit wounds caused by numerous shots fired from a rifled firearm

with bullets approximately 7 millimetres in diameter from a distance exceeding one metre and in various directions, as well as defects caused by fragments travelling in various directions from a distance close to the centre of the explosion. In addition, incompletely burnt smokeless powder particles—nitro compounds—being an additional factor of the shot, and explosive material—TNT—were detected on the surface of one automobile safety belt and one stocking.

According to forensic medical expert opinion No. 32 dated 21 September 2023, the injuries found on the body of **Abdullayev Asim Javanshir oglu**, namely one combined penetrating wound of the right side of the face and neck, with the entrance opening located in the right side of the face in the projection of the jaw angle and the exit opening in the supra-scapular region, accompanied by acute blood loss, comminuted open fractures of the mandible and damage to the major vessels of the neck, were caused by a bullet fired from a firearm. According to their degree, the injuries are classified in living persons as grievous harm to health and resulted in death.

In addition, during the forensic medical examination of the body of **A.J. Abdullayev**, an abrasion was found on the left upper eyelid and a superficial wound on the right thigh region. Those injuries were caused by a blunt object. The immediate cause of death was acute blood loss resulting from damage to the major vessels of the neck caused by the combined penetrating gunshot wound of the right side of the face and neck.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1547 dated 7 January 2023, damage was found on one military jacket, one military tunic, one short-sleeved military shirt and one pair of military trousers with a belt bearing the notation that they belonged to “Martyr Asim Abdullayev.” Based on the form, dimensions and morphological structure of the damage, as well as the detection around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, the damage on the military jacket, military tunic and short-sleeved military shirt was characteristic of an exit defect caused by a bullet approximately 7 millimetres in diameter fired from a rifled firearm. The damage on the front portion of the military trousers with a belt was an entrance defect.

According to forensic medical expert opinion No. 27 dated 21 September 2023, the injuries found on the body of **Mustafayev Huseyn Ali oglu**, namely a penetrating wound of the head with entrance and exit openings located in the left fronto-temporal region, accompanied by multiple comminuted defective open fractures of the skull-vault bones and diffuse crushing and destruction of brain tissue, were caused by a bullet fired from a firearm. According to their degree, the injuries are classified in living persons as grievous harm to health and resulted in death.

In addition, during the forensic medical examination of the body of **H.A. Mustafayev**, an irregular reddish abrasion measuring 2.0 × 0.3 centimetres with a dry surface was found on the anterior surface of the left knee-joint region. That injury was caused by a blunt object, its

degree of harm to health was not determined, and it had no direct causal connection with death. The immediate cause of death was diffuse crushing and destruction of brain tissue resulting from the penetrating gunshot wound of the head.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1566 dated 7 January 2023, damage was found on one snow mask bearing the notation that it belonged to “Martyr Huseyn Mustafayev.” Although no copper traces or explosive material—TNT—were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, indicated, based on the form, dimensions and morphological structure of the damage, that the defects were entrance and exit wounds caused by one bullet approximately

Page 615

7 millimetres in diameter fired from a distance exceeding one metre, in a direction from front to back and from left to right.

According to forensic medical expert opinion No. 26 dated 21 September 2023, the injuries found on the body of **Orujov Niftali Gafar oglu**, namely a comminuted displaced open fracture of the right scapula, fractures of the right fourth and fifth ribs, damage to the organs of the thoracic cavity, right-sided open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity—and multiple blind wounds of the right scapular region penetrating the thoracic cavity; one blind wound of the right thigh accompanied by a comminuted displaced open fracture of the femur; and blind wounds of the right eyebrow, posterior surface of the right hand and right lower-leg region, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of the foregoing injuries caused by the explosion.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1550 dated 7 January 2023, damage of the dimensions and quantity indicated in the examination section of the opinion was found on one military jacket, one short-sleeved military shirt and one pair of military trousers with two belts bearing the notation that they belonged to “Martyr Senior Lieutenant Niftali Orucov.” Based on the form, dimensions and morphological structure of the damage, as well as the detection on its surface of explosive material—TNT—and incompletely burnt smokeless powder particles, being an additional factor of the shot, the damage was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion. In addition, incompletely burnt smokeless powder particles—nitro compounds—being an additional factor of the shot, and explosive material—TNT—were detected on one belt, one pair of undergarments, one pair of military boots and one pair of socks.

According to forensic medical expert opinion No. 28 dated 21 September 2023, the injuries found on the body of **Mirzazada Mirzali Kamran oglu**, namely a blind wound of the right buttock region penetrating the abdominal cavity and accompanied by damage to the organs of

the abdominal cavity and acute blood loss, were caused by a bullet fired from a firearm. According to their degree, the injuries are classified in living persons as grievous harm to health and resulted in death.

In addition, during the forensic medical examination of the body of **M.K. Mirzazada**, irregular reddish-grey abrasions measuring 4 × 1.5 centimetres in the central part of the left scapular region and 3 × 0.3 centimetres on the right side of the lumbar region were found. Those injuries were caused by a blunt object, were sustained while alive shortly before death, did not cause harm to health and had no direct causal connection with death. The immediate cause of death was traumatic haemorrhagic shock that developed as a result of damage to the organs of the abdominal cavity and acute blood loss caused by the blind gunshot wound penetrating the abdominal cavity.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1549 dated 7 January 2023, damage of the quantity and dimensions indicated in the examination section of the opinion was found on one pair of military trousers submitted for examination and bearing the notation that they belonged to “Martyr Mirzali Mirzazada.” Although no copper traces or explosive material—TNT—were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, indicated, based on the form, dimensions and morphological structure of the damage, that the defect on the military clothing was an entrance wound caused by one bullet approximately 6 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre, in a direction from back to front. Incompletely burnt smokeless powder particles, being an additional factor of the shot, were detected on the surface of the military clothing.

Page 616

According to forensic medical expert opinion No. 29 dated 21 September 2023, the injuries found on the body of **Lalayev Ruslan Akif oglu**, namely acute blood loss; comminuted open fractures of the left seventh and eighth ribs; damage to the organs of the thoracic cavity; and one penetrating wound of the thoracic cavity accompanied by left-sided open haemopneumothorax—an accumulation of free blood and air in the thoracic cavity—were caused by a bullet fired from a firearm. According to their degree, these injuries are classified in living persons as grievous harm to health and resulted in death. The blind wound of the left thigh region was caused by fragments generated during the explosion of military ammunition possessing explosive properties. The immediate cause of death was acute blood loss resulting from damage to the organs of the thoracic cavity caused by the penetrating gunshot wound of the thoracic cavity.

According to forensic ballistic expert opinion Nos. 3-16-16/2-3/1561 and 3/1575 dated 7 January 2023, one metallic object, based on its form, manufacturing characteristics, traces and other properties, constituted part of factory-manufactured ammunition—a bullet projectile.

Damage was found on one long-sleeved military shirt, one short-sleeved military shirt, one pair of military trousers and one pair of insulated under-trousers bearing the notation that they belonged to “Martyr Ruslan Lalayev.” Although no copper traces or explosive material—TNT—were detected around the damage, the presence around it of incompletely burnt smokeless powder particles, being an additional factor of the shot, indicated, based on the form, dimensions and morphological structure of the damage, that the damage on the front and rear portions of one long-sleeved military shirt and one short-sleeved military shirt consisted of entrance and exit defects caused by one bullet approximately 7 millimetres in diameter fired from a rifled firearm from a distance exceeding one metre, in a direction from front to back.

The damage on the rear portion of one pair of military trousers and one pair of insulated under-trousers was characteristic of having been caused by a fragment travelling from back to front from a distance remote from the centre of the explosion. In addition, incompletely burnt smokeless powder particles—nitro compounds—being an additional factor of the shot, were detected on one military jacket, one pair of military trousers with a belt, one pair of insulated under-trousers, one undershirt, one pair of boots and one pair of socks.

According to forensic medical expert opinion No. 18 dated 22 September 2023, the injuries found on the body of **Huseynov Rashad Rahim oglu**, namely acute blood loss; a penetrating wound of the abdominal cavity accompanied by damage to the transverse colon, the capsule of the left kidney and the greater omentum, contusion and parenchymal haemorrhage of the left kidney, and a paranephric haematoma; one penetrating wound of the left thigh, one blind wound of the left knee-joint region and one blind wound of the left lower-leg region; and one penetrating wound of the left foot accompanied by a comminuted open fracture of the proximal phalanx, were caused by bullets fired from a firearm.

Blind wounds of the scapular and right upper-arm regions, the left buttock and thigh, both knee-joint regions, the left lower-leg region and the soft tissues of the left foot, as well as abrasions of the right lower-leg region, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties.

The cause of death was multiple-organ failure—acute cardiovascular and respiratory failure and renal failure—resulting from a penetrating gunshot wound of the abdominal cavity accompanied by acute blood loss, damage to the transverse colon, the capsule of the left kidney and the greater omentum, contusion and parenchymal haemorrhage of the left kidney, a paranephric haematoma and third-degree traumatic haemorrhagic shock.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1542 dated 27 November 2023, one metallic object removed from the body of the deceased **Huseynov Rashad Rahim oglu** was a bullet core, factory-manufactured and intended for use in 7.62×54 mm cartridges as ammunition in Mosin-system rifles, Dragunov-pattern sniper rifles, Simonov

rifles, Kalashnikov-pattern machine guns and other rifled firearms of the appropriate calibre; it was a component of a bullet separated during the firing process.

According to forensic medical expert opinion No. 31 dated 20 September 2023, the injuries found on the body of **Ahadov Eltaj Ajdar oglu**, namely partial traumatic amputation of the head; complete traumatic amputation of the right upper extremity at the level of the shoulder girdle; incomplete traumatic amputations of both lower extremities at the level of the middle third of the lower legs, with skin flaps remaining attached; and third- to fourth-degree thermal burns of both thighs and the upper third of the lower legs, were caused by the blast wave, flame and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile.

The immediate cause of death was trauma incompatible with life, namely partial traumatic amputation of the head, complete traumatic amputation of the right upper extremity at the level of the shoulder girdle, and incomplete traumatic amputations of both lower extremities at the level of the middle third of the lower legs, with skin flaps remaining attached.

According to forensic medical expert opinion No. 30 dated 21 September 2023, the injuries found on the body of **Huseynov Mahammad Shafahat oglu**, namely, as a result of the explosion, traumatic separation of the torso at the level of the seventh thoracic vertebra; complete traumatic amputation of both upper extremities at the level of the middle third of the upper arms; traumatic separation of the left lower extremity at the level of the middle third of the lower leg; displaced fractures of the nasal and mandibular bones; and multiple abrasions of the right supraorbital, right infraorbital and submandibular regions and both supraclavicular regions, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile.

The cause of death was trauma incompatible with life, namely separation of the torso at the level of the seventh thoracic vertebra and complete traumatic amputation of both upper extremities at the level of the middle third of the upper arms, caused by the explosion.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1548 dated 24 November 2023, damage indicated in the examination section of the opinion was found on one camouflage-pattern military-style jacket, one camouflage-pattern head covering, one camouflage-pattern military tunic, one camouflage-pattern carrying bag and one yellow military short-sleeved shirt forming part of the military clothing belonging to **Huseynov Mahammad Shafahat oglu**. That damage was characteristic of having been caused by fragments travelling in various directions from the centre of the explosion.

According to forensic medical expert opinion No. 38 dated 20 September 2023, the injuries found on the body of **Akbarov Agil Fayaddin oglu**, namely a penetrating gunshot wound of the left thigh entering through the medial surface of the upper third of the left thigh and exiting through the anterior surface of the left hip joint, accompanied along its course by damage to the left femoral artery; and a blind gunshot wound of the right thigh entering through the medial surface of the upper third of the right thigh and accompanied by a metallic

foreign object lodged at the boundary between the upper and middle thirds of the right thigh and by damage to the right femoral artery, were caused by two shots fired from a firearm.

According to their degree, both collectively and separately, these injuries are classified in living persons as grievous harm to health and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with damage to both femoral arteries caused by gunshot wounds to both thigh regions.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1794 dated 1 December 2023, damage indicated in the examination section of the opinion was found on one pair of trousers forming part of the military clothing belonging to **Akbarov Agil Fayaddin oglu**. That damage was characteristic of having been caused by bullets as a result of at least two shots fired from a firearm, from a distance exceeding one metre and in various directions.

Page 618

According to forensic medical expert opinion No. 64 dated 21 September 2023, the injuries found on the body of **Tahmazov Mirali Mirfattah oglu**, namely multiple shrapnel wounds of the body accompanied by damage to the organs of the thoracic and pelvic cavities, were sustained while alive and were caused by the effects of primary and secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries are classified in living persons as grievous harm to health and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with damage to the organs of the abdominal and pelvic cavities caused by the multiple shrapnel wounds of the body.

According to forensic ballistic expert opinion No. 3-16-16/2-3/1793 dated 1 December 2023, damage was found on the military clothing of **Tahmazov Mirali Mirfattah oglu**. That damage was characteristic of having been caused by fragments travelling in various directions from a distance close to the centre of the explosion.

According to forensic medical expert opinion No. 50 dated 21 September 2023, the injuries found on the body of **Najafi Elkhan Shukur oglu**, namely a blind gunshot wound of the thoracic cavity entering through the posterior surface of the left half of the chest at the level of the fifth to sixth intercostal spaces along the posterior axillary line, penetrating the thoracic cavity and accompanied by damage to the left lung, were caused by one shot fired from a firearm. According to their degree, the injuries are classified in living persons as grievous harm to health and resulted in death. The immediate cause of death was traumatic haemorrhagic shock that developed in connection with damage to the left lung and left-sided haemopneumothorax caused by the blind gunshot wound of the chest.

According to forensic medical expert opinion No. 39 dated 20 September 2023, the injuries found on the body of **Dashdamirov Sahib Natig oglu**, namely a penetrating gunshot wound of the cranial cavity entering through the left frontoparietal region, travelling from front to back, from top to bottom and from left to right, and exiting centrally through the occipital

region, accompanied along its course by fractures of the bones of the skull vault and base and by crushing and destruction of the brain, were caused by one shot fired from a firearm. According to their degree, the injuries are classified in living persons as grievous harm to health and resulted in death. The immediate cause of death was crushing and destruction of the brain accompanied by fractures of the bones of the skull vault and base, resulting from the penetrating gunshot wound of the cranial cavity.

According to forensic medical expert opinion No. 01 dated 12 February 2024, **Qasimov Hajiali Tahir oglu** died on 27 January 2024 at approximately 23:05. The cause of **Hajiali Qasimov's** death was multiple-organ failure—heart, lungs, kidneys and liver—which developed following a penetrating gunshot wound of the head accompanied by a fracture of the skull-cap bones and severe crushing and destruction of the brain. The injury resulted from a shot fired from a firearm and, in living persons, is classified as grievous harm to health.

According to forensic medical expert opinion No. 05 dated 24 April 2024, it was established that the injuries found on the body of **Bagirov Ulvi Hanifa oglu**, namely a blind wound penetrating the cranial cavity accompanied by severe crushing of the brain, haemorrhages into the brain tissue, ventricles and subarachnoid spaces, and a fracture of the left temporal bone, as well as closed crushing of the lungs, were caused by fragments and the blast wave generated during the explosion of military ammunition—a projectile—possessing explosive properties. Those injuries resulted in death and, at the time they were inflicted, constituted grievous harm to health.

The cause of death was multiple-organ failure that subsequently developed as a result of the blind wound penetrating the cranial cavity, accompanied by severe crushing of the brain, haemorrhages into the brain tissue, ventricles and subarachnoid spaces, and a fracture of the left temporal bone. According to the entries in medical history No. 6203 issued in his name, the deceased died on 7 April 2024 at approximately 15:00.

Page 619

According to forensic medical expert opinion No. 1619 dated 20 October 2023, the injury sustained by **Atayev Nihad Rovshan oglu**, namely a non-displaced shrapnel fracture of the fifth metatarsal bone of the right foot caused by the impact of a hard blunt object, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1371 dated 29 September 2023, the injuries found on **Agayev Elmaddin Farzi oglu**, namely multiple shrapnel wounds accompanied by metallic fragments in the soft tissues of the upper thirds of both thighs and in the projection of the third metacarpal bone of the left hand, as well as shrapnel wounds of the posterior surfaces of the right upper arm and right forearm, the left cheek region, the posterior surfaces of both lower extremities and both buttock regions, were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 224 dated 22 January 2024, the injuries found on **Mammadzada Elshad Namaz oglu**, namely wounds of the posterior surface of the lower third of the left thigh accompanied by a foreign object in the middle third of the left femur; wounds of the posterior surface of the lower third of the left forearm; wounds of the posterior surfaces of the second, third, fourth and fifth fingers of the left hand; wounds of the right cheek region; foreign objects in both eyes; bilateral hearing impairment; tinnitus in both ears; and other diagnosed injuries, were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 425 dated 1 March 2024, the injury sustained by **Abdiyev Yunis Elkhan oglu**, namely a wound of the first toe of the right foot that had granulated after a penetrating gunshot wound, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1643 dated 20 October 2023, the injuries sustained by **Gambarov Ismayil Azer oglu**, namely shrapnel wounds of the right thigh, left lower leg and both feet, were caused by fragments generated during the explosion of a bullet possessing explosive properties and were classified as minor harm to health.

According to forensic medical expert opinion No. 1590 dated 20 October 2023, the injuries sustained by **Najafov Orkhan Bashir oglu**, namely multiple wounds of the right upper and lower extremities and the diagnosis made during examination at the Goychay District Central Hospital on 20 September 2023—"concussion of the brain, post-concussion syndrome"—were classified, according to their overall degree, as minor harm to health.

According to forensic medical expert opinion No. 1599 dated 20 October 2023, the injuries sustained by **Mammadzada Tural Shikara oglu**, namely blind shrapnel wounds of the right forearm and the first finger of the right hand, accompanied by a fracture of the proximal end of the proximal phalanx of the first finger of the right hand, were classified, according to their degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1642 dated 20 October 2023, the diagnosis made in respect of **Guliyev Tural Fada oglu** at the Goychay District Central Hospital on 21 September 2023—"post-concussion syndrome; barotrauma; tinnitus in the ears; severe left-sided sensorineural hearing loss"—was caused by the blast wave generated during the explosion of a bullet possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1630 dated 20 October 2023, the injuries sustained by **Karimov Samir Famil oglu**, namely a wound of the left temporal region accompanied by an abrasion of the left infraorbital region, and a wound on the left side of the neck, were caused by fragments generated during the explosion of a bullet possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1391 dated 29 September 2023, the injuries sustained by **Safarov Dilgam Chingiz oglu**, namely gunshot wounds of the right ankle region and the anterior surface of the right lower leg above the ankle joint, were classified, according to their degree, as minor harm to health.

Page 620

According to forensic medical expert opinion No. 1395 dated 29 September 2023, the injury sustained by **Musayev Vugar Taryel oglu**, namely wounds of the left elbow region accompanied by a shrapnel fracture of the upper third of the left ulna and foreign objects—metallic fragments—was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1407 dated 29 September 2023, the injury sustained by **Karimov Afig Faig oglu**, namely a shrapnel wound of the left foot accompanied by a foreign object in the soft tissues of the medial surface of the first metatarsal bone, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1406 dated 29 September 2023, the injury sustained by **Aliyev Tamerlan Rahim oglu**, namely a surgically sutured shrapnel wound over the parietal region of the head, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1596 dated 20 October 2023, the injuries found on **Mahizada Nicat Mehman oglu**, namely a blind shrapnel wound of the upper third of the right forearm and wounds of the left half of the chest, were classified, according to their degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1650 dated 20 October 2023, the injury sustained by **Hasanov Ulvi Farhad oglu**, namely a tangential penetrating wound of the left lateral wall of the abdomen that did not penetrate the cavity and was caused by bullets fired from a firearm, was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1566 dated 20 October 2023, the injury sustained by **Asadov Nurlan Farrukh oglu**, namely a penetrating gunshot wound of the upper third of the right thigh, was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1388 dated 29 September 2023, the injuries found on **Hajiyev Khayal Nizami oglu**, namely penetrating gunshot wounds of the lower third of the left lower leg accompanied by a fracture of the left tibia, and penetrating gunshot wounds of the left upper arm and left buttock region, were classified, both collectively and separately, as less grievous harm to health.

According to forensic medical expert opinion No. 1399 dated 29 September 2023, the injuries sustained by **Kalantarov Elnur Abuzar oglu**, namely multiple shrapnel wounds of the upper

third of the right knee region, the soft tissues of the left thigh and left upper arm accompanied by foreign objects, and multiple shrapnel wounds of the forehead, face, base of the left eyebrow, left lateral surface of the chest, left shoulder girdle, left upper extremity, left buttock region and left foot, together with bilateral hearing impairment and tinnitus in both ears, were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1363 dated 29 September 2023, the wounds found on the outer surface of the upper third of the left thigh of **Ibrahimov Rahim Ibrahim oglu** were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1405 dated 29 September 2023, the abrasion on the left lower leg of **Huseynov Sanan Telman oglu**, accompanied by excoriation of the skin, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1372 dated 29 September 2023, the injuries found on **Hashimov Mirtaleb Elchin oglu**, namely a fracture of the left scapula and a combined penetrating wound of the left upper arm and the left half of the thoracic cavity resulting in haemopneumothorax, as well as one tangential gunshot wound of the upper third of the left thigh, were classified in general as grievous harm to health.

According to forensic medical expert opinion No. 1414 dated 29 September 2023, the injuries found on the body surface of **Bagirov Sahib Sadig oglu**, namely a fracture of the tibia of the left lower leg

accompanied by multiple shrapnel wounds of the lower leg, were classified, according to their overall degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1385 dated 29 September 2023, the injuries found on **Mirzahmadov Elkin Mutallim oglu**, namely injuries of the right upper extremity, right thigh, right knee, chest and anterior abdominal wall accompanied by a fracture of the upper third of the right ulna, multiple shrapnel wounds, numerous foreign objects in the soft tissues, hearing weakness in both ears, traumatic perforation and bilateral barotrauma, were classified, both collectively and separately, as less grievous harm to health.

According to forensic medical expert opinion No. 1375 dated 29 September 2023, the injuries found on **Rzayev Sanan Yagub oglu**, namely shrapnel wounds of both upper arms, the right elbow joint, both sides of the face, the right half of the forehead, the posterior surface of the right hand, the right side of the abdomen, both upper arms and the anterior abdominal wall, accompanied by metallic foreign objects in the soft tissues, were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1404 dated 29 September 2023, the injury sustained by **Shavgatli Javid Ogtay oglu**, namely a shrapnel wound of the soft tissues of the

left lower leg accompanied by a foreign object, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1403 dated 29 September 2023, the injuries sustained by **Ahmadli Parvin Gulmammad oglu**, namely shrapnel wounds of the left cubital fossa and the posterior surface of the left upper arm, were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1384 dated 29 September 2023, the shrapnel wound of the upper third of the right forearm found on **Hasanov Atash Bakhtiyar oglu** was classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1364 dated 29 September 2023, the wounds found on the left buttock region of **Guliyev Hajibaba Alaskar oglu** were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1419 dated 29 September 2023, the injuries sustained by **Babayev Huseyn Habil oglu**, namely perforation of the right cheek, right ear and right tympanic membrane, hearing impairment in the right ear, tinnitus in both ears, and shrapnel wounds of the anterior surface of the middle third of the right upper arm and the outer surface of the upper third of the left upper arm, were classified, according to their overall degree, as minor harm to health.

According to forensic medical expert opinion No. 1369 dated 29 September 2023, the injuries found on **Mammadov Huseyn Elkhan oglu**, namely shrapnel wounds of the right lower leg accompanied by a fracture of the right tibia and blind shrapnel wounds of the right upper arm accompanied by damage to the soft tissues, were classified, both collectively and separately, as less grievous harm to health.

According to forensic medical expert opinion No. 1366 dated 29 September 2023, the injuries found on **Abbasov Ravan Rizvan oglu**, namely wounds of the outer surface of the right heel region, the posterior surface of the fourth finger of the left hand, and the right buttock region, together with a diagnosis made at the Aghjabadi District Hospital on 22 September 2023 of closed craniocerebral trauma, concussion of the brain, bilateral hearing impairment and tinnitus in both ears, were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1410 dated 29 September 2023, the injuries found on the body of **Guliyev Nihad Adalat oglu**, namely shrapnel wounds of the left lateral surface of the neck, the left shoulder girdle and both lower extremities, accompanied by a metallic foreign object in the soft tissues of the lower third of the left upper arm, were classified as minor harm to health.

According to forensic medical expert opinion No. 1368 dated 29 September 2023, the injuries found on **Badalov Elnur Rafiq oglu**, namely shrapnel wounds of the anterior surface of the upper third of the left thigh, the posterior surface of the upper third of the left forearm, and the anteromedial and lateral surfaces of the right lower leg, were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1362 dated 29 September 2023, the injuries found on **Soltanov Elnur Khudaverdi oglu**, namely wounds of the medial surface of the lower third of the right lower leg, the anterior surfaces of the upper thirds of both upper arms and the anterior surface of the upper third of the left lower leg accompanied by a fracture of the left fibula, as well as an abrasion of the anterior surface of the upper-arm joint, were classified, according to their degree, as grievous harm to health.

According to forensic medical expert opinion No. 1398 dated 29 September 2023, the penetrating gunshot wound of the middle third of the left lower leg and the right heel sustained by **Abusxov Yusif Mahir oglu** was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1381 dated 29 September 2023, the injuries found on **Chobanov Elshan Mammad oglu**, namely a penetrating wound of the abdominal cavity accompanied by internal bleeding, injury to the small intestine and anterior abdominal vessels; amputation of the second finger of the left hand at the level of the middle phalanx; a shrapnel wound of the left hand accompanied by metallic foreign objects in the second finger of the left hand; and crushing of the left shoulder-girdle region, were classified, according to their overall degree, as grievous harm to health.

According to forensic medical expert opinion No. 1622 dated 20 October 2023, the diagnosis made in respect of **Niftaliyev Siraj Abil oglu** at the Goychay District Central Hospital on 22 September 2023—“closed craniocerebral trauma; concussion of the brain”—was caused by the blast wave generated during the explosion of a projectile possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1639 dated 20 October 2023, the injuries sustained by **Mammadov Shahlar Sahmar oglu**, namely multiple blind shrapnel wounds of the plantar surface of the right foot and the anterior surface of the upper and middle thirds of the left lower leg, as well as the diagnosis made at the Goychay District Central Hospital on 27 September 2023 of “closed craniocerebral trauma; concussion of the brain,” were caused by the blast wave and fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their overall degree, as minor harm to health.

According to forensic medical expert opinion No. 1649 dated 20 October 2023, the injury sustained by **Islamov Samir Elshan oglu**, namely a penetrating gunshot wound of the soft tissues of the right thigh caused by bullets fired from a firearm, was classified, according to its degree, as less grievous harm to health. A blind shrapnel wound of the soft tissues of the

fifth finger of the right hand was caused by fragments generated during the explosion of a firearm projectile and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 406 dated 1 March 2024, the injuries sustained by **Bayramov Elvin Eyvaz oglu**, namely a fracture of the styloid process at the distal metaphysis of the left radius and a displaced closed fracture of the olecranon process of the ulna following immobilisation in a long plaster cast, were classified, according to their overall degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1571 dated 20 October 2023, the injuries sustained by **Hajizada Elmaddin Bahram oglu**, namely first-degree thermal burns of the right cheek and nasal region; limited first- to second-degree thermal burn wounds of the right forearm, the second, third, fourth and fifth fingers of the right hand, the posterior surface of the left hand, the right buttock and the right lower-leg region; and barotrauma resulting in hearing impairment, were caused by flame and…

Page 623

…the blast wave and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1618 dated 20 October 2023, the injuries sustained by **Aghazada Kenan Aslan oglu**, namely a wound of the occipital region caused by a firearm shot, wounds of the posterior surface of the right hand, and “concussion of the brain” diagnosed at the Goychay District Central Hospital on 22 September 2023, were caused by both the blast wave and fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their overall degree, as minor harm to health.

According to forensic medical expert opinion No. 1582 dated 20 October 2023, the injuries sustained by **Mammadzada Mahammadali Ashrat oglu**, namely blind wounds of the soft tissues of the left elbow joint, left lumbar region, both thighs and left lower-leg region, accompanied by transection of the left Achilles tendon, were caused by fragments generated during the explosion of a firearm projectile and were classified, according to their overall degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1592 dated 20 October 2023, the injuries sustained by **Huseynov Isgandar Garakhan oglu**, namely multiple blind wounds of the soft tissues of both upper and lower extremities and barotrauma accompanied by sensorineural hearing loss, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their overall degree, as minor harm to health.

According to forensic medical expert opinion No. 1635 dated 20 October 2023, the injuries sustained by **Jabiyev Hikmat Huseyn oglu**, namely traumatic neuropathy of the right sural nerve; multiple wounds of the middle and lower thirds of the right lower leg accompanied by

swelling; and a wound of the medial heel region of the left foot, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their overall degree, as less grievous harm to health.

According to forensic medical expert opinion No. 399 dated 1 March 2024, the injuries sustained by **Huseynov Isgandar Garakhan oglu**, namely a shrapnel wound of the posterior surface of the fifth finger of the left hand; a comminuted slightly displaced open fracture of the middle phalanx of the fifth finger; and the condition following primary surgical treatment and immobilisation of the fifth finger in a plaster cast, were classified, according to their overall degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1589 dated 20 October 2023, the wound of the left outer heel region sustained by **Atakishiyev Namiq Zaur oglu** was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1570 dated 20 October 2023, the gunshot wound of the left elbow region sustained by **Safaraliyev Mirzahasan Mazahir oglu**, accompanied by a fracture of the upper end of the left ulna, was classified, according to its degree and because it caused prolonged impairment of health, as less grievous harm to health.

According to forensic medical expert opinion No. 1609 dated 20 October 2023, it was established that the injuries sustained by **Gardashkhanov Subhan Sahib oglu**, namely shrapnel wounds of the anterior and lateral surfaces of the left half of the chest, the anterior and posterior surfaces of the left shoulder, the lateral surface of the upper third of the left upper arm, the right lower leg, the first finger of the left hand, the left thigh and knee regions, the right lower-leg region, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1604 dated 20 October 2023, the injuries sustained by **Suleymanov Ulvi Ildirim oglu**, namely wounds of the anterior surface of the upper third of the left forearm, the middle third of the right thigh, the medial surface of the left foot, the medial surface of the left heel region and the right half of the eyebrow region, were caused by the explosion of a projectile possessing explosive properties

and the fragments generated thereby and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1640 dated 20 October 2023, the injuries sustained by **Ahmadov Shahvalad Satar oglu**, namely wounds of the neck, face, left lower leg and upper arm regions, were caused by the blast wave and fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1648 dated 20 October 2023, the injuries sustained by **Karimli Mehran Sakit oglu**, namely multiple shrapnel wounds of the lower third of the left lower leg and foot, accompanied by a fracture of the calcaneus, were caused by a firearm shot and were classified, according to their degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1982 dated 6 December 2023, the injuries found on **Ahmadzada Nijat Nazim oglu**, namely a penetrating wound of the left eye accompanied by perforation of the cornea; a fragment in the vitreous body; traumatic cataract; iridectomy; and retinal detachment, as well as a penetrating wound of the anterior abdominal wall, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injury to the left eye was classified as grievous harm to health, while the penetrating wound of the anterior abdominal wall was classified as minor harm to health.

According to forensic medical expert opinion No. 1755 dated 11 October 2023, the injuries found on **Mammadov Sadig Shamir oglu**, namely a gunshot wound of the left supraorbital region; contusion of the left eye; traumatic iridocyclitis; cataract; haemophthalmos; and retinal detachment, were caused by a projectile fired from a firearm and were classified, according to their overall degree, as grievous harm to health.

According to forensic medical expert opinion No. 1738 dated 11 October 2023, the injuries found on **Mammadzada Vugar Nasimi oglu**, namely multiple wounds of the right shoulder, forearm, hand, the third, fourth and fifth fingers and the right scapular region, caused by fragments generated during the explosion of a projectile possessing explosive properties, together with haemopneumothorax and a wound of the right half of the chest, were classified, according to their degree, as grievous harm to health. In addition, the barotrauma was classified as minor harm to health.

According to forensic medical expert opinion No. 1850 dated 13 October 2023, the injuries sustained by **Aliyev Rashad Shamil oglu**, namely shrapnel wounds of the left upper extremity accompanied by a fracture, a defect of the left forearm and injury to a major vessel, together with shrapnel wounds of the left eye, were classified, according to their degree, as grievous harm to health.

According to forensic medical expert opinion No. 1739 dated 11 October 2023, the injuries found on **Najafzada Farzani Yashar oglu**, namely haemopneumothorax on the left side, a gunshot wound of the left side of the chest, multiple injuries to the organs of the thoracic cavity, and a shrapnel wound of the upper third of the left thigh, were classified as grievous harm to health.

According to the opinion of the forensic medical expert No. 1760 dated 11.10.2023, the injuries found on Gasimov Elnur Eyvaz oglu - removal of pseudopterygium of both eyes, foreign bodies of the soft tissues of the left forehead and shrapnel fractures of the frontal bones, open craniocerebral trauma resulting in, contusion of the brain,

open shrapnel displaced fracture of the lower 1/3 of the diaphysis of the right metacarpal bone accompanied by complete rupture of the tendon of the 3rd, 4th fingers of the right hand, multiple shrapnel injuries of the left lower and upper extremities, blind shrapnel injuries of the soft tissues of the face, forehead, and both eye sockets of the external nose due to foreign bodies of soft tissues, post-traumatic fractures of the crowns of the 11th, 12th, 21st, 22nd molars, small-sized foreign bodies of soft tissues Dry perforation of both eardrums has generally been attributed to severe health damage.

According to forensic medical expert opinion No. 1740 dated 11 October 2023, the injuries found on **Mazanov Samir Ayaz oglu**, namely shrapnel wounds of the left half of the chest that did not penetrate the cavity; shrapnel wounds of the left forearm, left lumbar region and upper third of the left thigh accompanied by soft-tissue defects; displacement of the left tympanic membrane; and barotrauma of the left ear accompanied by left-sided acute cochlear neuritis, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1843 dated 8 December 2023, the injuries sustained by **Aslanov Amin Shahruz oglu**, namely a penetrating gunshot wound of the left buttock region entering the abdominal cavity and accompanied by injury to the small intestine, sigmoid colon and a comminuted open fracture of the left pelvic bone, were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1737 dated 11 October 2023, the injuries found on **Lachinov Subhan Mehdi oglu**, namely a fracture of the left seventh to ninth ribs resulting in left-sided haemopneumothorax, and a penetrating gunshot wound of the left half of the chest accompanied by a fracture of the left humeral head, were classified as grievous harm to health.

According to forensic medical expert opinions Nos. 874 and 1849 dated 25 September 2023, the injury sustained by **Aliyev Ziya Vugar oglu**, namely a blind gunshot wound of the left knee joint accompanied by a displaced fracture of the left femur and a metallic foreign body, was classified as grievous harm to health.

According to forensic medical expert opinion No. 65 dated 25 January 2024, the injuries found on **Salmanov Vagif Ruslan oglu**, namely an open non-displaced fracture of the olecranon process of the right ulna; partial injury to the right ulnar nerve; shrapnel wounds of both upper extremities; blast trauma; and crushing of the left shoulder-girdle region, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 699 dated 24 April 2024, the injuries sustained by **Valibayov Namiq Raik oglu**, namely a blind gunshot wound of the anterolateral surface of the upper third of the right thigh; an open comminuted displaced fracture of the right pelvic bone; and the condition following primary surgical treatment of wounds to the soft tissues of the right pelvic-wing region caused by a foreign object—a

bullet—and surgical removal of the foreign object, were caused by a shot fired from a firearm loaded with a bullet cartridge and were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1842 dated 6 December 2023, the injury sustained by **Bayramov Sadig Elim oglu**, namely a blind gunshot wound entering through the left buttock region and penetrating the abdominal cavity, accompanied by injury to the small intestine, an intra-abdominal haematoma and faecal peritonitis, was classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1766 dated 11 October 2023, the injuries found on **Jabiyev Tural Aliniyaz oglu**, namely a lacerated and sutured wound of the third and fourth toes of the right foot and open, multiple comminuted displaced fractures with bone defects of the distal phalanges of the third and fourth toes of the right foot, accompanied by

the penetrating gunshot wound of the right foot, were classified, according to their degree and because they caused prolonged impairment of health, as less grievous harm to health.

According to forensic medical expert opinion No. 1761 dated 11 October 2023, the injuries found on **Ismayilov Elsavar Khudaverdi oglu**, namely a blind shrapnel wound of the chin region accompanied by a fracture of the anterior and posterior walls of the left maxillary sinus, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1874 dated 16 October 2023, the injuries found on **Qasimov Adil Matlab oglu**, namely a penetrating gunshot wound of the left buttock region accompanied by open, slightly displaced fractures of both pelvic wings and the sacrum, were classified as grievous harm to health.

According to forensic medical expert opinion No. 1764 dated 11 October 2023, the injuries found on **Gardashkhanov Mahammadali Niyamaddin oglu**, namely extensive soft-tissue and bone-defect wounds of the left foot; traumatic amputation of the first and second toes of the left foot; open comminuted fractures of the third, fourth and fifth metatarsal and tarsal bones; closed displaced fractures of the lower third of the left tibial shaft; incised and sutured wounds of the anterior surface of the left lower leg and the medial surface of the upper third of the right thigh; first- and second-degree thermal burns; a sutured lacerated wound of the posterior surface of the left hand; exarticulation of the first and second metacarpal bones of the left hand at the carpometacarpal joint level; and closed craniocerebral trauma accompanied by concussion of the brain, were classified as less grievous harm to health resulting in permanent loss of less than one-third of general working capacity.

According to forensic medical expert opinion No. 1763 dated 11 October 2023, the injuries found on **Huseynov Huseyn Afig oglu**, namely a gunshot wound of the left lower extremity accompanied by an open fracture of the calcaneus and a dislocation of the foot at the

Chopart-joint level, together with closed craniocerebral trauma accompanied by concussion of the brain, were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1768 dated 11 October 2023, the injuries found on **Mahmudov Hasan Natig oglu**, namely traumatic amputation of the left foot at the level of the ankle joint; a soft-tissue defect wound of the medial heel region of the right foot; and a fracture of the calcaneus resulting from a mine-blast injury, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, they were classified as grievous harm to health resulting in permanent loss of more than one-third of general working capacity—40%.

Separately, the traumatic amputation of the left foot at the level of the ankle joint was also classified as grievous harm to health resulting in permanent loss of more than one-third of general working capacity—40%, while the remaining injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1871 dated 16 October 2023, the injuries found on **Guliyev Mahammad Ziyad oglu**, namely a shrapnel wound accompanied by an open displaced fracture of the lower third of the left tibia; a lacerated wound of the inner surface of the left hand; and barotrauma of the left ear accompanied by left-sided acute cochlear neuritis, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the fracture was classified as grievous harm to health, while the other injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1838 dated 6 December 2023, the injury sustained by **Jabbarli Osman Amil oglu**, namely a penetrating gunshot wound entering through the gluteal region and passing through the soft tissues of the posterior surface of the upper third of the right thigh, was caused by a shot fired from a firearm and was classified as less grievous harm to health.

Page 627

According to forensic medical expert opinion No. 892 dated 28 September 2023, the blind shrapnel wound of the middle third of the left upper arm sustained by soldier **Niftaliyev Arastun Akif oglu**, a serviceman of military unit No. 181, was caused by the effects of primary or secondary fragments generated by the explosion of a substance possessing explosive properties and was classified as minor harm to health.

According to forensic medical expert opinion No. 1840 dated 13 October 2023, the injuries found on **Eminov Elbrus Saleh oglu**, namely shrapnel wounds with soft-tissue defects on the anterior surfaces of the middle and lower thirds of the right thigh, the posterior surfaces of the upper third of the left upper arm and middle third of the left forearm, the left buttock region and various other areas of the body, accompanied by foreign objects—metallic fragments—

and mild post-haemorrhagic anaemia, were caused by fragments generated during the explosion of a projectile and were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1370 dated 29 September 2023, the injuries found on **Tanriverdiyev Aydin Eldaniz oglu**, namely blind shrapnel wounds of the soft tissues of the right upper arm caused by fragments generated during the explosion of a projectile possessing explosive properties, were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1373 dated 29 September 2023, the injuries found on **Aliyev Azad Parviz oglu**, namely shrapnel wounds of the left shoulder girdle, right upper arm, upper third of the left forearm, right thigh, right buttock and lumbar regions, accompanied by metallic fragments in the soft tissues, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties and were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1602 dated 20 October 2023, the injuries sustained by **Mammadov Sanan Niyazi oglu**, namely a tangential penetrating gunshot wound passing through the left auricle and soft tissues of the posterior neck, and a haematoma of the left knee region caused by a blunt object, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1400 dated 29 September 2023, the injuries sustained by **Feyzullayev Baloglan Ramiz oglu**, namely wounds of the jaw, both thighs, both feet, both upper and lower extremities and the right buttock region accompanied by foreign objects in the soft tissues, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified as minor harm to health.

According to forensic medical expert opinion No. 1374 dated 29 September 2023, the injuries found on **Abbasov Alakbar Fuad oglu**, namely an abrasion of the right buttock region and a penetrating gunshot wound entering the right half of the chest and passing through the right lung without entering a body cavity, were caused by a firearm shot and were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1394 dated 29 September 2023, the injuries sustained by **Bahramov Shahin Vagif oglu**, namely a fracture of the right femur and wounds of the right buttock, right thigh, right lower leg, left thigh and left lower-leg regions accompanied by foreign objects, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified as grievous harm to health.

According to forensic medical expert opinion No. 85 dated 15 February 2024, the injuries sustained by **Naghiyev Eljan Sarvan oglu**, namely wounds of the left parieto-occipital region

were caused by fragments generated during the explosion of a projectile possessing explosive properties. The wounds of the anterior right side of the chest and the posterior right side of the chest were caused by firearm shots and, according to their degree, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1401 dated 29 September 2023, the injuries sustained by **Mirzazada Rajabali Ikhtiyar oglu**, namely second- to third-degree thermal burns covering 18% of both lower extremities; hyperaemia, swelling and the presence of bullae; and wounds of the posterior surface of the chest in the projection of both scapulae, were caused by the effects of fragments generated during the explosion of a projectile possessing explosive properties and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1397 dated 29 September 2023, the injuries found during the forensic medical examination of **Najafov Tural Mehdi oglu**, namely wounds of the right half of the frontal region, the left zygomatic region, the right shoulder joint and the posterior surfaces of both hands; abrasions of the right zygomatic region and the anteromedial surface of the middle third of the left thigh; and one foreign object in the upper jaw, together with the diagnosis made at the Aghjabadi District Central Hospital of "barotrauma; tinnitus and hearing impairment in both ears; perforation of the right tympanic membrane," were caused by the blast wave and fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1402 dated 29 September 2023, the injuries sustained by **Puchakhov Elchin Ilham oglu**, namely barotrauma, acute otitis media, hearing impairment, tinnitus in both ears and a shrapnel wound of the right lower leg, were caused by the blast wave and fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1409 dated 29 September 2023, the injury sustained by **Mehdiyev Gulverdi Jalil oglu**, namely a penetrating gunshot wound of the first finger of the right foot, was caused by a firearm shot and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1420 dated 29 September 2023, the injuries sustained by **Jafarov Samir Jeyhun oglu**, namely shrapnel wounds of the left temporal region and left cheek region accompanied by a metallic foreign object in the temporal region, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1378 dated 29 September 2023, the gunshot wound of the right knee joint found on **Mammadov Imran Nasir oglu** was caused by a firearm shot and was classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1418 dated 29 September 2023, the injuries found in the soft tissues on the right side of the neck of **Amoyev Gunduz Intigam oglu**, accompanied by a foreign object, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1421 dated 29 September 2023, the injury sustained by **Khammadli Samir Farhad oglu**, namely a shrapnel wound of the left radiocarpal joint, was caused by fragments generated during the explosion of a projectile possessing explosive properties and was classified overall as minor harm to health.

According to forensic medical expert opinion No. 64 dated 25 January 2024, the injuries sustained by **Suleymanov Bahram Khamis oglu**, namely a sprain of the left ankle joint and multiple abrasions caused by the impact of a hard blunt object, as well as “barotrauma; astheno-

neurotic disorder,” were caused by the blast wave generated during the explosion of a projectile possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1365 dated 29 September 2023, the injuries found on **Nurullayev Huseyn Dashgin oglu**, namely wounds of the upper third of the left upper arm, the posterior surface of the right forearm and the posterior surfaces of the fingers of both hands, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties and were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1376 dated 29 September 2023, the injuries found on **Abdullayev Aykhan Fakhraddin oglu**, namely a shrapnel wound of the right lower leg accompanied by a fracture of the cortical tissue of the right tibia, and barotrauma, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties and were classified, both collectively and separately, as less grievous harm to health.

According to forensic medical expert opinion No. 1383 dated 29 September 2023, the injuries found on **Hasanov Ravan Gulabala oglu**, namely a penetrating wound of the middle third of the left lower leg and a gunshot wound of the right knee joint, were caused by firearm shots and were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1377 dated 29 September 2023, the injury found on **Maharramov Agil Gurban oglu**, namely a gunshot wound of the anteromedial surface of the upper third of the left thigh, was caused by a firearm shot and was classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1380 dated 29 September 2023, the injuries sustained by **Gurdayev Ramazan Samir oglu**, namely a fracture of the sternum and blind gunshot wounds of the chest region, were caused by firearm shots and were classified, according to their degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1411 dated 29 September 2023, the injuries found on **Ahmadov Ravan Javanshir oglu**, namely wounds of the upper third of the left thigh, right knee, right half of the anterior chest wall, left half of the posterior chest wall, and anterior surface of the upper third of the right lower leg, accompanied by foreign objects in the right knee and left thigh; a penetrating gunshot wound of the right abdominal wall not entering the cavity; a shrapnel wound of the upper third of the right lower leg and left buttock region; and barotrauma, were caused partly by firearm shots and partly by the blast wave and fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1379 dated 29 September 2023, the injuries found on **Abusov Tabriz Sarhad oglu**, namely a penetrating gunshot wound of the abdominal cavity and a sutured wound of the left groin region, were caused by firearm shots and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1645 dated 20 October 2023, the injuries sustained by **Usubov Araz Afis oglu**, namely shrapnel wounds of the parietal region of the head, left auricle, left side of the neck, lateral surface of the left elbow joint, right buttock region, upper thirds of both thighs, and other areas, together with the diagnosis made at the Goychay District Central Hospital on 28 September 2023 of “tension-type headache; post-traumatic encephalopathy,” were caused by both the blast wave and fragments generated during the explosion of a projectile possessing explosive properties. The injury to the right knee

joint, namely an abrasion of its anterior surface, was caused by a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1610 dated 20 October 2023, the injury sustained by **Aliyev Arzu Jafar oglu**, namely a tangential wound of the left forearm caused by a bullet fired from a firearm, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1587 dated 20 October 2023, the injuries sustained by **Manafov Fariz Hafiz oglu**, namely penetrating wounds of the upper third of the left upper arm caused by fragments generated during the explosion of a projectile possessing explosive properties, were classified, according to their degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1569 dated 20 October 2023, the injury sustained by **Khalilov Haji Elkhan oglu**, namely a penetrating gunshot wound of the right upper arm and right forearm accompanied by a haematoma, was caused by a firearm shot and was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1629 dated 20 October 2023, the injuries sustained by **Sadig Murad Rashid oglu**, namely two blind wounds of the soft tissues of the right hand and a limited first- to second-degree thermal burn of the left forearm, were caused by the flame and blast wave generated during the explosion of a firearm projectile and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1579 dated 20 October 2023, the injury sustained by **Nabiyev Amir Abdul oglu**, namely a penetrating gunshot wound of the soft tissues of the left lower leg, was caused by a bullet fired from a firearm and was classified, according to its degree and because it caused prolonged impairment of health, as less grievous harm to health.

According to forensic medical expert opinion No. 1578 dated 20 October 2023, the injury sustained by **Azizov Fagan Tayyub oglu**, namely a penetrating gunshot wound of the soft tissues of the upper and middle thirds of the right upper arm accompanied by bruising of the upper arm, elbow and forearm regions, was caused by a firearm shot and was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1606 dated 20 October 2023, it was established that the injury sustained by **Huseynov Ibrahim Asadullah oglu**, namely a wound of the middle third of the left forearm caused by fragments generated during the explosion of a projectile possessing explosive properties, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1595 dated 20 October 2023, the injury sustained by **Mahmudov Mahammad Bahruz oglu**, namely a penetrating wound of the left scapular region caused by a firearm shot, was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1623 dated 20 October 2023, the injury sustained by **Heydarov Ruslan Eldar oglu**, namely a penetrating gunshot wound of the upper third of the right upper arm, was caused by a firearm shot and was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1614 dated 20 October 2023, the injuries sustained by **Isparzada Agil Ramiz oglu**, namely multiple wounds of the left knee and lower-leg regions and the diagnosis made at the Goychay District Central Hospital on 21 September 2023 of “closed craniocerebral trauma; concussion of the brain; barotrauma,” were caused by fragments and the blast wave generated during the explosion of a projectile

possessing explosive properties, as well as by a firearm shot, and were classified, according to their degree, as minor harm to health.

Page 631

According to forensic medical expert opinion No. 1620 dated 20 October 2023, the injury sustained by **Dostiyev Mirhuseyn Gafar oglu**, namely a penetrating gunshot wound of the right upper arm, was caused by a shot fired from a firearm and was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1651 dated 20 October 2023, the injury sustained by **Ismayilov Ibad Gubad oglu**, namely a penetrating wound of the soft tissues of the right thigh caused by a bullet fired from a firearm, was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1628 dated 20 October 2023, the injury sustained by **Rahimov Heydar Nasraddin oglu**, namely a blind gunshot wound of the right shoulder region accompanied by a large haematoma covering the posteromedial surface of the right upper arm, the right half of the chest and the right half of the abdomen, was caused by a shot fired from a firearm and was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 61 dated 25 January 2024, the barotrauma sustained by **Nabiyev Shamsi Mahammad oglu** was caused by the blast wave generated by the explosion of a substance possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1572 dated 20 October 2023, the injuries sustained by **Abbasov Jeyhun Anvar oglu**, namely a blind shrapnel wound of the left half of the chest and the diagnosis made at the Aghjabadi District Central Hospital on 22 September 2023 of “closed craniocerebral trauma,” were caused by the blast wave and fragments generated during the explosion of a projectile possessing explosive properties and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1613 dated 20 October 2023, the injuries sustained by **Suleymanov Samir Alaskar oglu**, namely blind shrapnel wounds of the upper lateral quadrant of the left buttock region and the lower lateral quadrant of the right buttock region, accompanied by a haematoma covering the posterolateral surface of the upper third of the left thigh, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1603 dated 20 October 2023, the injury sustained by **Hudulov Jeyhun Shabanovich**, namely a penetrating gunshot wound of the left auricle, was caused by a firearm shot and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1612 dated 20 October 2023, it was established that the injuries sustained by **Aslanov Farid Rafiq oglu**, namely traumatic neuropathy of the right radial nerve and a penetrating shrapnel wound of the middle third of the right forearm caused by fragments generated during the explosion of a projectile possessing explosive properties, together with an abrasion of the middle third of the left lower leg caused by a hard blunt object, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1607 dated 20 October 2023, it was established that the injury sustained by **Abbasov Elvin Elchin oglu**, namely a tangential penetrating gunshot wound of the soft tissues of the upper third of the left lower leg, was caused by a firearm shot and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1598 dated 20 October 2023, the injury sustained by **Musazada Ilkin Fizuli oglu**, namely a penetrating wound of the left hand accompanied by an open fracture of the first metacarpal bone of the right hand, was caused by a firearm shot and was classified, according to its degree, as less grievous harm to health.

Page 632

According to forensic medical expert opinion No. 1593 dated 20 October 2023, the injuries sustained by **Zulfugarov Beyrak Fizuli oglu**, namely a blind gunshot wound of the lower third of the right upper arm caused by a firearm shot, and the diagnosis made at the Goychay District Central Hospital on 26 September 2023 of "post-traumatic post-concussion syndrome," which arose from the blast wave generated during the explosion of a projectile possessing explosive properties, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1576 dated 20 October 2023, the injuries sustained by **Imranzada Salman Aydin oglu**, namely a penetrating gunshot wound of the left buttock region caused by a firearm shot, and "barotrauma" diagnosed at the Goychay District Central Hospital on 21 September 2023, which arose from the blast wave generated during the explosion of a projectile possessing explosive properties, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1588 dated 20 October 2023, the injury sustained by **Isayev Alim Natig oglu**, namely a wound of the lower third of the left lower leg caused by fragments generated during the explosion of a projectile possessing explosive properties, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1617 dated 20 October 2023, the injuries sustained by **Almadadov Kanan Azer oglu**, namely a blind shrapnel wound of the middle third of the left lower leg and the diagnosis made at the Goychay District Central Hospital on 21 September 2023 of "closed craniocerebral trauma; concussion of the brain," were caused by both the blast wave and fragments generated during the explosion of a projectile possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1594 dated 20 October 2023, the injuries sustained by **Hummatzada Ahmad Sehram oglu**, namely penetrating gunshot wounds of the lower third of the right thigh accompanied by a partial separation fracture of the outer surface of the upper third of the right upper arm and the distal third of the right femur, were caused by firearm shots and were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 711 dated 24 April 2024, it was established that the injuries sustained by **Jabbarov Seyfaddin Giyasaddin oglu**, namely the condition following primary surgical treatment of a shrapnel wound of the middle third of the anterior surface of the right lower leg; blast trauma; and the condition following left-sided acute cochlear neuritis, were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1626 dated 20 October 2023, the injuries sustained by **Verdiyev Orkhan Niyamaddin oglu**, namely wounds of the right temporal region, right half of the neck, nasal tip, anterior surface of the right upper arm, upper thirds of both forearms and lower third of the left lower leg, were caused by fragments generated during the explosion of a projectile possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 67 dated 25 January 2024, the injuries sustained by **Veysov Yusif Ziyaraddin oglu**, namely the condition following primary surgical treatment of a shrapnel wound of the anterior surface of the left knee and the presence of a foreign object—a metallic fragment—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 1624 dated 20 October 2023, in respect of **Shukurov Gismat Shukur oglu**, the diagnosis made at the Goychay District Central Hospital on 21 September 2023

Page 633

of “shrapnel wound of the lower third of the right lower leg; closed craniocerebral trauma; concussion of the brain” was caused by both the blast wave and fragments generated during the explosion of a projectile possessing explosive properties, while multiple abrasions of both lower-leg regions were caused by a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 890 dated 28 September 2023, the injuries sustained by **Rustamov Mammadtaga Mubariz oglu**, namely blind shrapnel wounds of the lower third of the left upper arm, the posterior surface of the forehead and the bridge of the nose, were caused by primary or secondary fragments generated by the explosion of a

substance possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 891 dated 28 September 2023, the injury sustained by **Settarov Mirgaribagha Mirazim oglu**, namely a penetrating gunshot wound entering through the right buttock region and exiting through the lumbar region, was caused by at least one shot fired from a firearm and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 893 dated 28 September 2023, the injuries sustained by **Allahverdiyev Asaf Arzuman oglu**, namely blind shrapnel wounds of the right upper arm, elbow, buttock region and lower leg, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 889 dated 28 September 2023, the injury sustained by **Alakbarov Nasimi Mehdi oglu**, namely a penetrating gunshot wound of the left lower leg, was caused by at least one shot fired from a firearm and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 899 dated 28 September 2023, the injury sustained by **Javadov Mehman Alamdar oglu**, namely a penetrating gunshot wound of the outer surface of the lower third of the right thigh, was caused by at least one shot fired from a firearm and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 896 dated 28 September 2023, the injury sustained by **Bayramov Javid Agil oglu**, namely a penetrating gunshot wound of the left hand caused by a shot fired from a firearm loaded with a bullet cartridge, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 897 dated 28 September 2023, the injury sustained by **Ibrahimov Ali Ilgar oglu**, namely a penetrating gunshot wound of the right elbow region, was caused by at least one shot fired from a firearm and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 894 dated 28 September 2023, the injuries sustained by **Amiraslanov Guloglan Murad oglu**, namely multiple blind shrapnel wounds of both lower extremities, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 895 dated 28 September 2023, the injury sustained by **Veyisov Parviz Rasul oglu**, namely a penetrating gunshot wound of the left foot caused by a shot fired from a firearm loaded with a bullet cartridge, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 888 dated 28 September 2023, the injury sustained by **Malikov Nihat Etibar oglu**, namely a tangential gunshot wound of the soft tissues of the middle third of the left upper arm, was caused by at least one shot fired from a firearm. Since the injury did not cause harm to health, its degree of severity was not determined.

Page 634

According to forensic medical expert opinion No. 885 dated 28 September 2023, the injuries sustained by **Aliyev Sadi Saleh oglu**, namely a shrapnel wound of the left elbow joint and blind shrapnel wounds of the left forearm accompanied by a foreign object in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 879 dated 28 September 2023, the injuries sustained by **Farziyev Alifandi Mehman oglu**, namely multiple shrapnel wounds of the left foot accompanied by barotrauma, were caused by the combined effects of the blast wave and primary or secondary fragments generated by the explosion of a substance possessing explosive properties and were classified, according to their degree, as minor harm to health.

According to forensic medical expert opinion No. 315 dated 22 February 2024, the injury sustained by **Ibrahimov Valeh Iramil oglu**, namely a granulating wound following primary surgical treatment of a shrapnel wound of the right foot, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 877 dated 28 September 2023, the injury sustained by **Mirzayev Allahverdi Asgar oglu**, namely a blind shrapnel wound of the inner surface of the left hand and finger, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 884 dated 28 September 2023, the injury sustained by **Hajiyev Huseyn Ilgar oglu**, namely a penetrating shrapnel wound of the soft tissues of the right half of the chest, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 887 dated 28 September 2023, the injuries sustained by **Mammadzada Sardar Zakir oglu**, namely an abrasion of the left breast region, a gunshot wound of the abdomen, and an infected wound of the inner surface of the third finger of the left hand, were caused by firearm shots and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 878 dated 28 September 2023, the injury sustained by **Sadigov Mahammad Rasim oglu**, namely a penetrating gunshot wound accompanied only by injury to the soft tissues of the left upper arm, was caused by at least one shot fired from a firearm and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 880 dated 28 September 2023, the injuries sustained by **Aliyev Javid Famil oglu**, namely multiple blind shrapnel wounds of various regions of the body accompanied by barotrauma, were caused by the combined effects of the blast wave and primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, they were classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 886 dated 28 September 2023, the injuries sustained by **Dadashov Maarif Alim oglu**, namely barotrauma, blunt trauma to the right hand, left foot and left knee, were caused by the combined effects of the blast wave and primary or secondary fragments generated by the explosion of a substance possessing explosive properties and were classified, according to their degree, as minor harm to health.

Page 635

According to forensic medical expert opinion No. 883 dated 28 September 2023, the injury sustained by **Gulmammadov Ilham Giyas oglu**, namely crushing of the soft tissues of the anterior surface of the right knee caused by a hard blunt object, did not cause harm to health and therefore its degree of severity was not determined.

According to forensic medical expert opinion No. 882 dated 28 September 2023, the injury sustained by **Garazada Farid Vahid oglu**, namely a blind shrapnel wound of the anterior surface of the middle third of the right forearm, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1847 dated 6 December 2023, the injuries sustained by **Sadigov Farid Anar oglu**, namely wounds with soft-tissue defects of the left hand and both lower extremities accompanied by mild post-haemorrhagic anaemia; barotrauma; traumatic perforation of both tympanic membranes; and bilateral mixed-type hearing impairment, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties and by fragments generated thereby, and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 866-A dated 1 May 2024, it was established that the injuries sustained by **Hasanov Suliddin Rafi oglu**, namely a penetrating gunshot wound of the soft tissues of the upper third of the left cheek and left thigh accompanied by absence of the left cheek, were caused by a shot fired from a firearm and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 703 dated 24 April 2024, it was established that the injuries sustained by **Rzayev Riyad Javad oglu**, namely the condition following primary and secondary surgical treatment of wounds caused by blind shrapnel injuries to the posterior surface of the left hand, left heel region, medial surface of the lower third of the right thigh, posterior and lateral surfaces of the upper third of the left thigh, and middle third of the left lower leg, accompanied by removal of a foreign object and surgical closure of a skin-defect wound using a keystone flap, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1746 dated 8 December 2023, the injuries sustained by **Rzayev Ravan Gadirdagha oglu**, namely penetrating gunshot wounds of the left thigh and left lower leg, were caused by firearm shots and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1745 dated 11 October 2023, the injury sustained by **Nuraliyev Nazir Gazanfar oglu**, namely a blind shrapnel wound of the outer surface of the middle third of the right lower leg, was caused by fragments generated during the explosion of a projectile and was classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1747 dated 8 December 2023, the injuries sustained by **Allahverdiyev Parvin Rafiq oglu**, namely a blind shrapnel wound of the left upper arm caused by fragments generated during the explosion of a projectile, and a blind gunshot wound of the left buttock region accompanied by an open comminuted displaced fracture of the left pelvic wing, were caused respectively by fragments and by a firearm shot and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 57 dated 25 January 2024, the injuries found on **Abilov Kanan Sanan oglu**, namely a penetrating

gunshot wound of the middle third of the left forearm, caused by a shot fired from a firearm loaded with a bullet cartridge, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1756 dated 11 October 2023, the injuries found on **Nasirov Jamaladdin Fakhraddin oglu**, namely a penetrating gunshot wound of the anterior abdominal wall entering the abdominal cavity and accompanied by fractures of the right tenth rib, were caused by a shot fired from a firearm loaded with a bullet cartridge and were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1809 dated 6 December 2023, **Azizov Aziz Nasimi oglu** was diagnosed at the Main Clinical Hospital with “post-traumatic stress disorder; stuttering; mild asthenia accompanied by an acutely expressed stress-related

reaction." This was assessed as an injury whose degree had not yet been determined by the investigation.

According to forensic medical expert opinion No. 1799 dated 11 December 2023, during the forensic medical examination of **Zeynalov Tahir Elshad oglu**, an abrasion was found on the first finger of the right hand. It was caused by a hard blunt object and, since it did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1800 dated 8 December 2023, **Garibov Ismat Ashraf oglu** was diagnosed with "closed craniocerebral trauma sustained as a result of blast trauma; astheno-neurotic manifestations following concussion of the brain; multiple abrasions and lacerated wounds of various regions of the body; and condition following left-sided acute cochlear neuritis." The multiple abrasions and lacerated wounds were caused by a hard blunt object, including impact of the injured regions against such an object, while the other injuries were caused by the powerful blast wave generated during the explosion of a projectile. According to their degree, they were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1757 dated 11 October 2023, the injuries found on **Hajiyev Ramazan Allahveran oglu**, namely a penetrating gunshot wound entering through the anterior surface of the upper third of the left thigh and exiting through the left buttock region, were caused by a firearm shot and were classified, both collectively and separately, as less grievous harm to health.

According to forensic medical expert opinion No. 1807 dated 5 December 2023, **Rahimov Agil Khanbala oglu** was diagnosed at the Main Clinical Hospital with "moderately expressed prolonged dissociative conversion disorder; gastroesophageal reflux disease; protrusion of the L5–S1 intervertebral disc; vertebrogenic lumbalgia; old skin scar following an incised wound of the lower third of the right forearm; blunt trauma to the right knee joint; and crushing of soft tissues." The diagnosed injuries were caused by a hard blunt object and by impact of the injured regions against such an object. Since they did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 1810 dated 6 December 2023, **Garayev Javid Maarif oglu** was diagnosed at the Main Clinical Hospital with "mild asthenia accompanied by a moderately expressed stress-related acute reaction; and tension-type headache." This was assessed as an injury whose degree had not yet been determined by the investigation.

According to forensic medical expert opinion No. 1808 dated 5 December 2023, **Najafli Ismayil Nasib oglu** was diagnosed at the Main Clinical Hospital with "closed craniocerebral trauma sustained as a result of blast trauma; astheno-neurotic manifestations following concussion of the brain." The injury stated in the diagnosis was caused by the powerful blast wave generated during the explosion of a projectile and was classified, according to its degree, as less grievous harm to health.

According to forensic medical expert opinion No. 1812 dated 12 December 2023, the injuries sustained by **Mammadzada Fakhri Teymur oglu**, namely closed craniocerebral trauma and concussion of the brain caused by blast trauma; traumatic perforation of both tympanic membranes accompanied by bilateral acute cochlear neuritis; and blind wounds of the frontal region, right eyebrow region, both hands, both lower legs, left thigh and right knee-joint region, were caused by the powerful blast wave and fragments generated during the explosion of a projectile. According to their degree, they were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 704 dated 24 April 2024, it was established that the injuries sustained by **Mirzayev Fuad Sakavat oglu**, namely the condition following closed craniocerebral trauma caused by blast trauma and concussion of the brain; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain; the condition following bilateral acute cochlear neuritis resulting from blast trauma, with both ears having lost their fitness for military service; a gunshot wound; post-traumatic lumbar plexopathy; skin scars following a blind gunshot wound of the left thigh; and the presence of a foreign object—a bullet—in the soft tissues, were caused by the blast wave generated during the explosion of a substance possessing explosive properties and by a firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 705 dated 24 April 2024, it was established that the injuries sustained by **Mamsinli Shahin Yadigar oglu**, namely the condition following compression-ischaemic neuropathy of the right radial nerve resulting from a gunshot wound; and the condition following a penetrating gunshot wound of the middle third of the right forearm caused by a shot fired from a firearm loaded with a bullet cartridge, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1892 dated 17 October 2023, the injuries found on **Abdullayev Mahammad Farhad oglu**, namely a penetrating gunshot wound of the middle third of the right upper arm accompanied by thrombosis of the right brachial artery and complete transection of the radial nerve, were caused by a shot fired from a firearm loaded with a bullet cartridge. They were classified as grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 62 dated 25 January 2024, the injuries sustained by **Orujov Musa Elmar oglu**, namely the condition following primary surgical treatment of a blind shrapnel wound of the medial surface of the middle third of the right thigh, removal of a foreign object, a healed skin scar after surgery, and the presence of a metallic fragment in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1733 dated 11 October 2023, the injuries found on **Taniverdili Anar Rovshan oglu**, namely blind shrapnel wounds of the right thigh and lower-leg regions; barotrauma of the left ear accompanied by left-sided acute cochlear neuritis; and closed craniocerebral trauma accompanied by concussion of the brain, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. Abrasions of the right thigh and left knee, as well as an abrasion and contusion of the right half of the forehead, were caused by a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1735 dated 11 October 2023, the injuries found on **Agayev Elshan Aghabala oglu**, namely a blind shrapnel wound of the first finger of the right hand

Page 638

caused by fragments generated during the explosion of a projectile possessing explosive properties; barotrauma of both ears accompanied by bilateral acute cochlear neuritis and closed craniocerebral trauma accompanied by concussion of the brain caused by the blast wave generated during the explosion of a projectile possessing explosive properties; a penetrating gunshot wound of the soft tissues of the left foot caused by a shot fired from a firearm loaded with a bullet cartridge; and abrasions of the nasal tip and the anterior surfaces of both lower legs caused by a hard blunt object, were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1734 dated 11 October 2023, the injuries found on **Allahverdiyev Niyamaddin Ahl-iman oglu**, namely a blind shrapnel wound of the right thigh caused by fragments generated during the explosion of a projectile possessing explosive properties; barotrauma of the right ear accompanied by right-sided acute cochlear neuritis and closed craniocerebral trauma accompanied by concussion of the brain caused by the blast wave generated during the explosion of a projectile possessing explosive properties, were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1813 dated 6 December 2023, the injuries sustained by **Mammadov Musa Rafiq oglu**, namely blind shrapnel wounds of both buttocks, the right thigh and the right forearm, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, they were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1891 dated 17 October 2023, the injuries found on **Osmanov Vasif Ramiz oglu**, namely open comminuted fractures of the left forearm bones, a penetrating shrapnel wound of the forearm accompanied by a soft-tissue defect, and closed craniocerebral trauma accompanied by concussion of the brain and an incised wound of the parietal region, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 1751 dated 11 October 2023, the injuries found on **Suleymanov Fuad Huseyn oglu**, namely a penetrating gunshot wound of the soft tissues of the left thigh caused by a firearm shot, were classified, both collectively and separately, as less grievous harm to health causing prolonged impairment of health. In addition, blind shrapnel wounds of both lower extremities and barotrauma of the left ear accompanied by left-sided acute cochlear neuritis were caused by the blast wave generated during the explosion of a projectile possessing explosive properties and were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1758 dated 11 October 2023, the injuries found on **Maharramov Vugar Fikrat oglu**, namely a penetrating gunshot wound of the left buttock region and the upper third of the left thigh caused by a shot fired from a firearm loaded with a bullet cartridge, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 706 dated 24 April 2024, it was established that the injuries sustained by **Garazada Ravan Suleyman oglu**, namely the condition following primary surgical treatment of penetrating gunshot wounds of the middle third of the right lower leg and the postoperative condition, were caused by shots fired from a firearm loaded with a bullet cartridge. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1759 dated 11 October 2023, the injuries found on **Nasirli Eynulla Aman oglu**, namely partial injury to the right sciatic nerve

accompanied by a penetrating gunshot wound of the upper third of the right thigh, were caused by a shot fired from a firearm loaded with a bullet cartridge and were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1853 dated 12 December 2023, the injuries sustained by **Rahmatzada Amin Ismayil oglu**, namely an incised wound of the upper eyelid of the right eye accompanied by subconjunctival haemorrhage, optic nerve atrophy, a foreign object lodged in the orbit, reduction of visual acuity to perception of hand movement, subconjunctival haemorrhage of the left eye accompanied by an incised wound of the infraorbital region of the left eyebrow, destruction of the vitreous body, retrobulbar foreign objects, a displaced comminuted fracture of the lower orbital wall, haematomas of both periorbital regions, multiple small blind shrapnel wounds of various regions of the face, closed craniocerebral trauma, concussion of the brain, a blind shrapnel wound of the soft tissues of the anterior neck and a foreign object in the body of the fifth cervical vertebra, were caused by fragments and the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health resulting in permanent loss of more than one-third of general working capacity.

According to forensic medical expert opinion No. 1854 dated 6 December 2023, the injuries sustained by **Safarli Ali Sabuhi oglu**, namely perforation of both tympanic membranes accompanied by bilateral acute cochlear neuritis, closed craniocerebral trauma and concussion of the brain, as well as multiple shrapnel wounds of both lower extremities, were caused by the effects of fragments and the powerful blast wave generated during the explosion of a projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1872 dated 16 October 2023, the injuries found on **Mehdiyev Orkhan Vidadi oglu**, namely traumatic amputation of the lower third of the left lower leg; closed comminuted displaced fracture of the middle third of the shaft of the left femur; open multiple comminuted displaced fracture of the middle and lower thirds of the right ulna, including the olecranon process; a lacerated and sutured wound of the upper third of the right forearm; multiple abrasions of the body; closed craniocerebral trauma accompanied by concussion of the brain; and a right-sided haemotympanum—haemorrhage behind the tympanic membrane—were caused by the combined effects of fragments and the blast wave generated during the explosion of a projectile possessing explosive properties.

Overall, the injuries were classified as grievous harm to health resulting in permanent loss of more than one-third of general working capacity. Separately, the traumatic amputation of the right lower leg was classified as grievous harm to health resulting in permanent loss of more than one-third of general working capacity; the fractures were classified as less grievous harm to health causing prolonged impairment of health; and the wounds and haemotympanum were classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 707 dated 24 April 2024, it was established that the injuries sustained by **Hasanov Aghahuseyn Nasimi oglu**, namely the condition following primary surgical treatment of a penetrating gunshot wound of the lower third of the right upper arm accompanied by a soft-tissue defect; an open comminuted displaced fracture of the lower third of the right humeral shaft; damage to the radial nerve; open reduction of the fracture fragments; osteosynthesis using a metal plate and screws; revision of the right radial nerve; opening of an abscessed wound of the right upper-arm region; sanitation; application of a VAC device; and the postoperative condition accompanied by post-traumatic neuropathy of the right radial nerve, were caused by a shot fired from a firearm loaded with a bullet cartridge. According to their degree, the injuries were classified overall as grievous harm to health.

Page 640

According to forensic medical expert opinion No. 1844 dated 12 December 2023, the injuries sustained by **Babayev Said Ramilovich**, namely damage to the fourth segment of the liver; a penetrating wound of the right lateral abdominal wall entering the abdominal cavity and accompanied by intra-abdominal bleeding; post-traumatic neuropathy of the right radial, left

median and ulnar nerves; traumatic transection of the right radial nerve at the level of the elbow crease; traumatic transection of the left median and ulnar nerves at the level of the lower third of the upper arm; and blind shrapnel wounds of both upper extremities, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1752 dated 11 October 2023, the injuries found on **Aghazada Hamid Mahir oglu**, namely blind shrapnel wounds of both buttock regions accompanied by soft-tissue defects and foreign objects in the soft tissues, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, they were classified as grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 1806 dated 12 December 2023, the injuries sustained by **Zeynalli Elvin Eldar oglu**, namely post-traumatic neuropathy of the right radial nerve and a penetrating shrapnel wound of the right forearm and right thigh accompanied by an open comminuted displaced fracture of the right ulna, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1805 dated 12 December 2023, the injuries sustained by **Azayev Osman Babaverdi oglu**, namely a wound of the anterior surface of the right shoulder girdle not penetrating the thoracic cavity and a penetrating gunshot wound of the right forearm, were caused by firearm shots and were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 653 dated 26 December 2023, the injuries sustained by **Rashidli Tamerlan Elchin oglu**, namely a penetrating gunshot wound of the left forearm accompanied by a comminuted displaced open fracture of the radius and damage to the flexor tendons, were caused by a bullet fired from a firearm. According to their degree, the injuries were classified as less grievous harm to health. Closed craniocerebral trauma accompanied by concussion of the brain was caused by the blast wave generated during the explosion of military ammunition possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 634 dated 26 December 2023, the injury sustained by **Ganbarov Rafat Hilal oglu**, namely a blind shrapnel wound of the right thigh, was caused by fragments generated during the explosion of a firearm projectile and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 620 dated 23 September 2023, the injuries found on the body of **Isayev Tural Khaladdin oglu**, namely a blind wound of the right thigh accompanied by metallic foreign objects in the soft tissues and a superficial wound of the left

thigh, were caused by fragments generated during the explosion of a firearm projectile and were classified as minor harm to health.

According to forensic medical expert opinion No. 660 dated 26 December 2023, the injury sustained by **Asgarov Rahman Mubariz oglu**, namely a blind wound of the soft tissues of the right shoulder region, was caused by fragments generated during the explosion of military ammunition possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 657 dated 26 December 2023, the injuries sustained by **Huseynov Bayram Habil oglu**, namely post-traumatic neuropathies of the radial and ulnar nerves; a penetrating wound of the left forearm accompanied by an open comminuted fracture of the lower third of the ulnar shaft

Page 641

and penetrating wounds of the soft tissues of the right buttock region and right foot, were caused by bullets fired from a firearm. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 661 dated 26 December 2023, the injury sustained by **Abbasov Subhan Hummat oglu**, namely a blind wound of the right thigh, was caused by fragments generated during the explosion of a firearm projectile and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 624 dated 26 December 2023, the injury sustained by **Qasimzada Natig Gabil oglu**, namely a blind wound of the right thigh accompanied by a metallic foreign object in the soft tissues, was caused by fragments generated during the explosion of military ammunition possessing explosive properties and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 652 dated 26 December 2023, the injury sustained by **Safarov Khandan Fariz oglu**, namely a wound of the lower lip region, was caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 618 dated 23 September 2023, the injuries sustained by **Rzazada Ravan Baba oglu**, namely blind wounds of the right buttock region and right foot accompanied by metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of a firearm projectile and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 617 dated 23 September 2023, the injuries sustained by **Rustamov Rustam Raudin oglu**, namely blind wounds of the right upper arm

and right lower-leg regions accompanied by metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of a firearm projectile and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 621 dated 26 December 2023, the injuries sustained by **Zamanov Sahil Seyran oglu**, namely blind wounds of the left shoulder-girdle region, the fifth finger of the right hand, the right thigh and the left knee-joint region, were caused by primary and blunt-force secondary fragments generated during the explosion of a firearm projectile and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 625 dated 26 December 2023, the injuries sustained by **Mammadov Ravan Rovshan oglu**, namely:

- Tangential wounds of the right thigh and forearm caused by bullets fired from a firearm loaded with bullet cartridges, which were classified overall as minor harm to health causing short-term impairment of health;
- A limited thermal burn of the fourth finger of the left hand caused by local exposure to high temperature, which did not cause harm to health and therefore was not assigned a degree of severity.

According to forensic medical expert opinion No. 623 dated 26 December 2023, the injuries sustained by **Guliyev Elchin Bakhtiyar oglu**, namely:

- Blunt trauma to the right ankle joint accompanied by swelling and crushing of the soft tissues, caused by the impact of a hard blunt object and classified as minor harm to health;
- A secondarily infected superficial wound of the right outer heel region caused by a hard blunt object, which did not cause harm to health and therefore was not assigned a degree of severity.

According to forensic medical expert opinion No. 615 dated 23 September 2023, the injuries found on the body of **Khalilov Murad Aydin oglu**, namely blind wounds of both thighs, the right knee-joint region and the left heel region accompanied by metallic foreign objects in the soft tissues, were caused by primary or secondary fragments generated during the explosion of military ammunition possessing explosive properties

Page 642

and were classified overall as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 629 dated 23 September 2023, the injury found on the body of **Alakbarov Nasib Telman oglu**, namely a penetrating gunshot wound of the soft tissues of the left half of the chest that did not enter the cavity, was caused by a bullet fired from a firearm. According to its degree, it was classified overall as less grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 664 dated 21 November 2023, the injuries sustained by **Aliyev Parviz Aghali oglu**, namely a penetrating gunshot wound of the left lower leg accompanied by comminuted displaced open fractures of the tibia and fibula, were caused by a bullet fired from a firearm. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 632 dated 23 September 2023, the injuries found on the body of **Zeynalov Shukur Dilgam oglu**, namely a penetrating wound of the left forearm accompanied by temporary impairment of the function of the left upper extremity and a displaced comminuted open fracture of the radius, as well as a penetrating gunshot wound of the soft tissues of the left half of the chest that did not enter the cavity, were caused by bullets fired from a firearm. According to their degree, the injuries were classified overall as less grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 630 dated 23 September 2023, the injuries found on the body of **Atalli Soltanali Ismayil oglu**, namely a blind wound of the anterior surface of the lower third of the right lower leg accompanied by temporary impairment of the function of the lower extremity and a slightly displaced open fracture of the distal metaphysis of the right tibia, as well as a blind wound of the soft tissues of the right thigh, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 627 dated 26 December 2023, the injuries sustained by **Aliyev Nijat Arzuman oglu**, namely a blind wound of the right thigh accompanied by a metallic foreign object in the soft tissues, and a wound of the soft tissues of the right lower-leg region, were caused respectively by fragments generated during the explosion of a firearm projectile and by a firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 616 dated 23 September 2023, the injuries found on the body of **Mammadov Famil Elkhan oglu**, namely two tangential wounds of the right lower-leg region caused by fragments generated during the explosion of a firearm projectile, were classified overall as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 614 dated 23 September 2023, the injury found on the body of **Budagov Bakhtiyar Mushvig oglu**, namely a blind wound of the posterior surface of the right half of the chest that did not penetrate the cavity and was accompanied by a metallic foreign object in the soft tissues, was caused by fragments generated during the explosion of a firearm projectile and was classified overall as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 642 dated 26 December 2023, the injuries sustained by **Shirinov Murad Isa oglu**, namely a penetrating gunshot wound of the soft tissues of the right foot caused by a bullet fired from a firearm, were classified overall as

minor harm to health causing short-term impairment of health. A limited thermal burn of the posterior surface of the right hand was caused by local exposure to high temperature and, since it did not cause harm to health, its degree of severity was not determined.

Page 643

According to forensic medical expert opinion No. 1997 dated 13 November 2023, the injuries sustained by **Muradov Kamran Heydar oglu**, namely a blind shrapnel wound of the soft tissues of the right thigh and barotrauma of the right ear accompanied by right-sided acute tubulotritis, were caused by the combined effects of fragments and the blast wave generated during the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 1999 dated 18 November 2023, the injuries sustained by **Jafarov Emin Inam oglu**, namely a blind gunshot wound of the soft tissues of the left scapular region caused by a firearm shot; a blind shrapnel wound of the upper third of the upper arm; and barotrauma of the left ear accompanied by left-sided acute cochlear neuritis, were caused by the combined effects of fragments and the blast wave generated during the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 1998 dated 14 November 2023, the injury sustained by **Asgarov Nemat Akbar oglu**, namely a penetrating gunshot wound of the middle third of the left forearm accompanied by injury to the left median nerve, was caused by a firearm shot and was classified as less grievous harm to health.

According to forensic medical expert opinion No. 651 dated 23 September 2023, the injuries found on the body of **Shafizada Ravan Agharahim oglu**, namely swelling and an abrasion of the right ankle-joint region accompanied by an abrasion, were caused by a hard blunt object and were classified overall as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 673 dated 26 December 2023, the injuries sustained by **Imamguliyev Tural Kamaladdin oglu**, namely a blind wound of the left periocular region and blind wounds of the left lower-leg region accompanied by contusions, were caused by metallic foreign objects—fragments—generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 660 dated 26 December 2023, the injuries sustained by **Bayramov Imran Rahman oglu**, namely blind wounds of the right zygomatic region and left corner of the mouth, as well as numerous metallic foreign objects in the soft tissues of the right frontal region, were caused by fragments generated during the explosion

of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 649 dated 26 December 2023, the injuries sustained by **Khalilov Rahil Vagif oglu**, namely haematomas of both upper eyelids accompanied by haemorrhage beneath the conjunctiva of the lower eyelids; multiple superficial wounds of the forehead, right infraorbital region and both zygomatic regions, were caused by the blast wave and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 628 dated 23 September 2023, the injury found on the body of **Yediyarov Shaig Khanbaba oglu**, namely a penetrating wound of the right fronto-temporal region that did not enter the cranial cavity and was caused by a bullet fired from a firearm loaded with a bullet cartridge, was classified as minor harm to health.

According to forensic medical expert opinion No. 622 dated 26 December 2023, the injuries sustained by **Binyatov Orkhan Elkhan oglu**, namely blind wounds of the right lower-leg region accompanied by metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of a firearm projectile

Page 644

and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 709 dated 24 April 2024, it was established that the injury sustained by **Mustafayev Shirkan Sadiyar oglu**, namely the condition following primary surgical treatment of a penetrating gunshot wound of the second and third toes of the right foot and the condition after surgery performed on 20 September 2023, was caused by a shot fired from a firearm loaded with a bullet cartridge. According to its degree, the injury was classified overall as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 655 dated 23 September 2023, the injuries found on the body of **Mammadov Elvin Ogtay oglu**, namely reduction of visual acuity to 0.8 in the right eye and 0.3 in the left eye; a haematoma of the left periocular region; haemorrhage under the conjunctiva of the lower eyelid of the left eye; metallic foreign objects in both eye sockets; and multiple blind wounds of the left eye, both periocular regions, the frontal region and the posterior surfaces of both hands, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 656 dated 26 December 2023, the injuries sustained by **Huseynov Vugar Ilham oglu**, namely penetrating wounds of the right upper-

arm region and right hand, were caused by primary or blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 636 dated 26 December 2023, it was established that the injuries sustained by **Samadov Tural Farhad oglu**, namely post-traumatic cataract; reduction of visual acuity in the right eye to 0.5; hyphaema—haemorrhage into the anterior chamber of the eye; clouding of the lens; damage to the cornea of the right eye accompanied by subconjunctival haemorrhage; oedema and haematoma of the periocular region; a laceration of the lateral canthus of the right upper eyelid; and a blind wound of the nasal region, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified as less grievous harm to health resulting in permanent loss of one-tenth—10%—of general working capacity.

According to forensic medical expert opinion No. 639 dated 23 September 2023, the injuries found on the body of **Mahammadov Farid Faig oglu**, namely traumatic amputation of the left lower extremity at the level of the lower third of the lower leg accompanied by post-haemorrhagic anaemia, and third- to fourth-degree traumatic haemorrhagic shock; closed craniocerebral trauma accompanied by concussion of the brain; and blind wounds of the soft tissues of the right hand, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as grievous harm to health.

Of the injuries noted, the loss of the left lower extremity at the level of the middle third of the lower leg was classified as grievous harm to health resulting in permanent loss of more than one-third—50%—of general working capacity.

According to forensic medical expert opinion No. 640 dated 23 September 2023, the injuries found on the body of **Huseynov Shahriyar Shakir oglu**, namely traumatic loss of the left lower extremity at the level of the upper third of the lower leg accompanied by post-haemorrhagic anaemia and third- to fourth-degree traumatic haemorrhagic shock, were caused by fragments generated during the explosion of a projectile possessing explosive properties

and were classified overall as grievous harm to health. The injury was also classified as grievous harm to health resulting in permanent loss of more than one-third—50%—of general working capacity.

According to forensic medical expert opinion No. 1996 dated 13 November 2023, the injury sustained by **Musayev Kamal Bahruz oglu**, namely a penetrating gunshot wound of the soft tissues of the outer surface of the middle third of the right upper arm caused by a firearm shot, was classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 689 dated 26 December 2023, the injuries sustained by **Shahguliyev Vusal Mazahir oglu**, namely a penetrating wound of the second finger of the right hand accompanied by a comminuted displaced open fracture of the distal phalanx; right-sided acute cochlear neuritis resulting from barotrauma; compression-ischaemic neuropathy of the median and ulnar nerves; numerous blind wounds of the left upper extremity accompanied by metallic foreign objects in the soft tissues; multiple blind wounds of the left periocular region, right temporal region, right upper arm, both lower extremities and both buttock regions accompanied by metallic foreign objects in the soft tissues; and crushing of the soft tissues of the medial surface of the left thigh accompanied by a subcutaneous haematoma, were caused by fragments and the blast wave generated during the explosion of military ammunition possessing explosive properties.

Of the injuries noted, the penetrating wound of the third finger of the right hand accompanied by a comminuted displaced open fracture of the distal phalanx was caused by a bullet fired from a firearm, while the remaining injuries were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified, both collectively and separately, as less grievous harm to health.

According to forensic medical expert opinion No. 684 dated 30 November 2023, the injuries found on the body of **Abbasov Galandar Shaadat oglu**, namely blind wounds of both buttock regions accompanied by metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of a firearm projectile and were classified as minor harm to health.

According to forensic medical expert opinion No. 670 dated 21 November 2023, the injuries sustained by **Musayev Elgun Zakir oglu**, namely a penetrating wound of the left lower leg accompanied by a comminuted displaced open fracture of the tibia; a penetrating gunshot wound of the right knee-joint region; and multiple blind wounds of both lower extremities, were caused by firearm shots and fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 637 dated 23 September 2023, the injuries found on the body of **Abdullayev Iftikhar Nasib oglu**, namely a blind wound of the soft tissues of the frontal region; injury to the patellar ligament; a penetrating wound of the right knee-joint region accompanied by a comminuted displaced open fracture of the patella; and multiple blind wounds of the posterior surface of the left hand, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health requiring prolonged treatment.

According to forensic medical expert opinion No. 650 dated 26 December 2023, the injuries sustained by **Khalfayev Simurq Nurali oglu**, namely a penetrating gunshot wound of the right hand accompanied by a comminuted open fracture of the third metacarpal bone, and a

blind wound of the left wrist region accompanied by a slightly displaced open fracture of the distal epiphysis of the ulna and a metallic foreign object in the soft tissues, were caused respectively by a firearm shot and by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified, both collectively and separately, as less grievous harm to health.

Page 646

According to forensic medical expert opinion No. 672 dated 26 December 2023, the injuries sustained by **Mammadov Asif Bakhtiyar oglu**, namely a blind shrapnel wound of the left scapular region accompanied by an open comminuted fracture of the left clavicle, and multiple blind wounds of the left hand and both buttock regions accompanied by metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 57 dated 20 February 2024, the injuries sustained by **Rasulov Samit Namiq oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain, blunt trauma to the left knee-joint region and crushing of the soft tissues, were caused by a hard blunt object. According to their overall degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 674 dated 20 November 2023, the injury sustained by **Hashimov Ariz Anar oglu**, namely a blind wound of the right thigh accompanied by a metallic foreign object in the soft tissues, was caused by fragments generated during the explosion of a firearm projectile and was classified overall as minor harm to health.

According to forensic medical expert opinion No. 675 dated 26 December 2023, the injuries sustained by **Gulaliyev Nazir Halay oglu**, namely right-sided pneumothorax—an accumulation of free air in the thoracic cavity; contusion and injury of the right lung; a blind wound of the posterior surface of the chest penetrating the thoracic cavity; and multiple blind wounds of the right supra-gluteal region, right lumbar region, posterior surface of the chest, left upper extremity, right thigh and left knee-joint region accompanied by metallic foreign objects in the soft tissues, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 646 dated 26 December 2023, the injuries sustained by **Israfilov Shamil Kamil oglu**, namely penetrating wounds of the right subscapular, right axillary and upper-arm regions accompanied by metallic foreign objects in the soft tissues, and a blind wound penetrating the precordial region with a small metallic foreign object located in the anteroinferior part of the heart, were caused by fragments generated during the explosion of military ammunition possessing explosive properties. The injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 327 dated 22 February 2024, the superficial abrasions and scratches found on both lower-leg regions of **Bagirov Nurlan Vasif oglu** were caused by a hard blunt object. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 329 dated 19 March 2024, the injury sustained by **Khaniyev Vidadi Salman oglu**, namely blunt trauma to the left knee joint accompanied by crushing of the soft tissues and haematrosis, was caused by a hard blunt object. The injury was classified as less grievous harm to health because it caused prolonged impairment of health.

According to forensic medical expert opinion No. 330 dated 19 March 2024, the injuries found on the body of **Mamedov Nijat Azay oglu**, namely wounds of the left upper eyelid and left upper-arm region, were caused by fragments generated during the explosion of a projectile and were classified as minor harm to health.

According to forensic medical expert opinion No. 2000 dated 18 November 2023, the injuries sustained by **Shukurlu Parviz Mahir oglu**, namely blind shrapnel wounds of the right thigh and right lower-leg regions caused by fragments generated during the explosion of a projectile possessing explosive properties, and an abrasion of the right periocular region caused by a hard blunt object, were classified overall as minor harm to health causing short-term impairment of health. Separately, because the abrasion did not cause harm to health, its degree of severity was not determined, while the shrapnel wounds were classified as minor harm to health.

Page 647

According to forensic medical expert opinion No. 681 dated 23 September 2023, the injuries found on the body of **Ismayilov Abdulmatin Arshad oglu**, namely perichondritis resulting from a wound of the left auricle and an abrasion of the palmar surface of the left hand, were caused by a hard blunt object and were classified as minor harm to health.

According to forensic medical expert opinion No. 536 dated 23 September 2023, the injuries found on the body of **Bahramov Kamal Shukur oglu**, namely multiple blind wounds of the right upper scapular region and both lower extremities accompanied by metallic foreign objects in the soft tissues; first- and second-degree thermal burns involving the head, the right half of the face, the right auricle, the right side of the neck, the posterior surfaces of both hands and four percent of the total body surface, were caused by the blast wave, flame and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health requiring prolonged treatment.

According to forensic medical expert opinion No. 683 dated 23 September 2023, the injuries found on the body of **Gurbanov Javid Zakir oglu**, namely dry perforation of the right tympanic membrane accompanied by reduction of the perception of whispered speech in the

right ear to a distance of one metre; superficial wounds of the right zygomatic and upper-arm regions and both lower-leg regions, were caused by the blast wave and secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as minor harm to health resulting in a slight permanent loss of general working capacity of five percent.

According to forensic medical expert opinion No. 682 dated 23 September 2023, the injuries found on the body of **Asadullayev Ahmad Ajdar oglu**, namely dry perforation of the right tympanic membrane accompanied by reduction of the perception of whispered speech in the right ear to a distance of one metre, and crushing of the soft tissues of the left lower-leg region accompanied by an abrasion and superficial wound, were caused by the blast wave generated during the explosion of a firearm projectile and by the effects of a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health resulting in a slight permanent loss of general working capacity of five percent.

According to forensic medical expert opinion No. 1954 dated 1 December 2023, the injuries sustained by **Hasanov Dilgam Heybat oglu**, namely a shrapnel wound accompanied by a soft-tissue defect on the posterior surfaces of the right thigh and lower leg and partial injury to the right Achilles tendon; thermal burns of the posterior surfaces of both thighs and lower legs, both buttock regions, the posterior surfaces of both hands, the forehead, both auricles, the hairy part of the head and the right half of the neck, covering thirty percent of the body surface and classified as first-, second- and third-degree burns; and post-traumatic perforation of the left tympanic membrane accompanied by left-sided acute cochlear neuritis, were caused by the combined effects of fragments, flame and the blast wave generated during the explosion of a projectile possessing explosive properties.

According to their degree, the injuries were classified overall as less grievous harm to health. Separately, the soft-tissue defect of the posterior surfaces of the right thigh and lower leg and the partial injury to the right Achilles tendon were classified as less grievous harm to health; the thermal burns were classified as less grievous harm to health because they caused prolonged impairment of health; and the post-traumatic perforation of the left tympanic membrane accompanied by left-sided acute cochlear neuritis was classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 676 dated 26 December 2023, the injuries sustained by **Aliyev Hamzali Rza oglu**, namely blind wounds of the left upper arm, thigh and first toe of the left foot accompanied by metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, they were classified overall as minor harm to health.

Page 648

According to forensic medical expert opinion No. 875/A dated 1 May 2024, it was established that the injuries sustained by **Zeynalov Shakhavat Fizuli oglu**, namely a penetrating gunshot wound of the soft tissues of the right upper-arm region caused by a

firearm shot; closed craniocerebral trauma accompanied by concussion of the brain; sensorineural hearing impairment associated with barotrauma, with reduction of perception of whispered speech to 1.5 metres in the right ear and 3 metres in the left ear; post-traumatic neuropathy of the right radial nerve; flexion contracture of the radiocarpal joint; a blind wound of the right wrist-joint region accompanied by metallic foreign objects in the soft tissues; and multiple blind wounds of the right upper extremity, right lumbar region, both buttock regions, right thigh and lower-leg regions, were caused by a firearm shot and by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 671 dated 23 September 2023, the injuries found on the body of **Mirzayev Samir Gurban oglu**, namely post-haemorrhagic anaemia; post-traumatic neuropathy of the right brachial and radial nerves; sensory and motor impairment of the right upper extremity; an intra-articular comminuted displaced open fracture of the distal metaepiphysis of the humerus; and a penetrating gunshot wound of the right upper-arm region caused by a firearm shot, were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 86 dated 1 March 2024, the injuries sustained by **Karimov Babahasan Ibrahim oglu**, namely post-traumatic neuropathy of the tibial and peroneal nerves; a penetrating wound of the left ankle-joint region accompanied by a slightly displaced open fracture of the distal end of the left tibia; pain in the left thigh; blind wounds of the left thigh and left ankle-joint regions; and metallic foreign objects in the soft tissues, were caused by the blast wave, flame and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 677 dated 26 December 2023, the injuries sustained by **Aliyev Ramin Rasim oglu**, namely a blind wound of the left shoulder-girdle region; post-traumatic neuropathy of the sciatic nerve; a blind wound of the left thigh; closed craniocerebral trauma accompanied by concussion of the brain; and sensorineural hearing impairment caused by acute acoustic trauma, were caused partly by a firearm shot and partly by the blast wave generated during the explosion of a firearm projectile. According to their degree, the injuries were classified, both collectively and separately, as less grievous harm to health.

According to forensic medical expert opinion No. 668 dated 21 November 2023, the injuries sustained by **Gardashov Rahim Adil oglu**, namely a blind wound of the right lower leg accompanied by comminuted displaced open fractures of the tibia and fibula; post-traumatic neuropathy of the upper-arm and forearm nerves; a penetrating wound of the left upper extremity accompanied by complete transection of the flexor tendons of the first, second and third fingers of the left hand; multiple blind wounds of the soft tissues of the left upper extremity, right elbow-joint region, perineal region and both lower extremities, were caused by the blast wave and primary and blunt-force secondary fragments generated during the

explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 85 dated 1 March 2024, the injuries sustained by **Ismayilov Saleh Valeh oglu**, namely a blind wound of the left shoulder-girdle region, wounds of the second finger of the right hand, both thighs and lower-leg regions accompanied by metallic foreign objects in the soft tissues

Page 649

were caused by primary and secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 647 dated 26 December 2023, the injuries sustained by **Eyvazov Abulfaz Gulagha oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain and superficial abrasions of the palmar surface of the right hand and the anterior surfaces of both lower legs, were caused by a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 32 dated 16 January 2024, the injuries sustained by **Chobanov Gulu Nasir oglu**, namely barotrauma; closed craniocerebral trauma; concussion of the brain resulting in vegetative vascular dystonia; and injuries caused by the blast wave generated during the explosion and by a hard blunt object, were classified overall as minor harm to health.

According to forensic medical expert opinion No. 168 dated 13 February 2024, the injury sustained by **Abishov Nurlan Masud oglu**, namely a blind wound of the right thigh caused by one of the numerous fragments generated during an explosion, did not cause harm to health and therefore its degree of severity was not determined.

According to forensic medical expert opinion No. 33 dated 16 January 2024, the injury sustained by **Hasanov Vugar Shahlar oglu**, namely a blind shrapnel wound of the right buttock region caused by one of the numerous fragments generated during an explosion, was classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 34 dated 16 January 2024, the injuries sustained by **Isgandarov Sarkhan Elshan oglu**, namely a penetrating gunshot wound of the right foot and a comminuted open fracture of the body of the fourth metatarsal bone, were caused by one shot fired from a firearm. The injuries were inflicted at the date and under the circumstances specified in the decision. According to their degree, they were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 36 dated 22 January 2024, the injuries sustained by **Bagirov Nofal Salim oglu**, namely barotrauma and blunt closed trauma of the

forehead and right supraorbital region, were caused by the blast wave and the impact of a hard object and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1640 dated 20 October 2023, the injuries sustained by **Ahmadov Tural Aflatun oglu**, namely wounds of the posterior surface of the upper third of the left forearm, the anteromedial surface of the lower third of the left forearm and the left buttock region, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 35 dated 16 January 2024, the injuries sustained by **Ismayilov Elgun Bahbut oglu**, namely barotrauma and blunt closed trauma of the forehead and right supraorbital region, were caused by the blast wave and the impact of a hard object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 321 dated 22 February 2024, the injuries sustained by **Garibli Elnur Nasimi oglu**, namely blast trauma; blunt trauma to the right ankle-joint region; and crushing of the soft tissues, were caused by the blast wave generated during the explosion of a substance possessing explosive properties and by the impact of a hard blunt object. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 329 dated 22 February 2024, the injuries sustained by **Malikov Abdul Malik oglu**, namely a granulating wound following primary surgical treatment of a blind shrapnel wound of the upper third of the right thigh; the presence of a metallic foreign object in the soft tissues; blast trauma; closed craniocerebral trauma; and the condition following concussion of the brain

as well as the condition following bilateral acute cochlear neuritis, were caused by primary or secondary fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 2001 dated 25 November 2023, the injuries sustained by **Rasulov Sahil Shamsi oglu**, namely fractures of the distal phalanges of the thirty-sixth, thirty-fifth and thirty-fourth teeth of the anterior and posterior walls of the left maxillary sinus, together with a blind shrapnel wound of the left cheek, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 665 dated 26 December 2023, the injuries sustained by **Allahverdiyev Mardan Yashar oglu**, namely a slightly displaced fracture of the anterior margin of the proximal metaphysis of the tibia; a comminuted intra-articular open

fracture of the intercondylar eminence; a blind wound of the right lower-leg region accompanied by penetration of a metallic foreign object into the tibia; closed craniocerebral trauma accompanied by concussion of the brain; and superficial wounds of the soft tissues of the chest and left thigh, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 31 dated 16 January 2024, the injuries sustained by **Jalilov Shahmar Ilgar oglu**, namely right-sided acute cochlear neuritis resulting from barotrauma; right-sided sensorineural hearing loss; reduction in the perception of whispered speech to three metres in the right ear and six metres in the left ear; and injuries caused by the blast wave generated during the explosion and by the impact of a hard object, were classified overall as minor harm to health.

According to forensic medical expert opinion No. 113 dated 2 February 2024, the injuries sustained by **Babayev Elshan Elshad oglu**, namely barotrauma resulting in bilateral chronic cochlear neuritis and bilateral permanent sensorineural hearing loss, with perception of whispered speech from a distance of four metres in both ears; closed craniocerebral trauma; and concussion of the brain resulting in astheno-neurotic manifestations, were caused by the blast wave generated during the explosion and by the impact of a hard object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 111 dated 2 February 2024, the injury sustained by **Khanlayev Faraj Akif oglu**, namely closed craniocerebral trauma, was caused by the blast wave generated during the explosion and by the impact of a hard object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 112 dated 2 February 2024, the injuries sustained by **Hashimov Khayal Sahib oglu**, namely closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated during the explosion. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 255 dated 6 March 2024, the injury sustained by **Mammadov Tural Zeynal oglu**, namely an abrasion of the right palmar region caused by a hard object, did not cause harm to health and therefore its degree of severity was not determined.

According to forensic medical expert opinion No. 1647 dated 20 October 2023, the injury sustained by **Khalilov Javanshir Tofig oglu**, namely a blind shrapnel wound of the upper third of the right upper arm caused by fragments generated during the explosion of a projectile possessing explosive properties, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 166 dated 13 February 2024, the injuries sustained by **Abdullayev Nurlan Rafiq oglu**, namely injuries of the anterior surface of the upper third of the right lower leg

Page 651

injuries of the anterior surface of the upper third of the right lower leg were caused by fragments generated during the explosion. According to their degree, they were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1543 dated 13 November 2023, the injuries sustained by **Mammadov Hasankhan Murad oglu**, namely post-traumatic neuropathy of the left tibial and left sciatic nerves; a marginal fracture of the C4 vertebra; a penetrating gunshot wound of the middle third of the left thigh, the wound track of which was filled with a bullet; and shrapnel wounds of the right thigh, right scapular region and right heel, were caused partly by a shot fired from a firearm and partly by fragments generated by the explosion of an explosive bullet. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 63 dated 1 February 2024, the injuries sustained by **Humbatzada Taleh Khanoglan oglu**, namely shrapnel wounds of the right upper arm and scapular region, were caused by multiple fragments generated during an explosion. According to their degree, they were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1447 dated 13 March 2024, the injury sustained by **Ahmadli Royal Nizami oglu**, namely a blind wound of the soft tissues, was caused by fragments generated during the explosion of a firearm projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 891 dated 1 December 2023, the injury sustained by **Hashimov Shirin Shiraslan oglu**, namely a closed displaced fracture of the left medial malleolus caused by the impact of a hard blunt object, resulted in prolonged impairment of health and was therefore classified as less grievous harm to health.

According to forensic medical expert opinion No. 1435 dated 25 March 2024, the injuries sustained by **Khalilov Samir Nadir oglu**, namely wounds of the parietal region and the palmar surface of the right hand, were caused by a hard blunt object. Since the injuries did not cause impairment of health, their degree of severity was not determined.

According to forensic medical expert opinion No. 65 dated 1 February 2024, the injury sustained by **Alizada Eltun Vugar oglu**, namely a shrapnel wound of the left frontal region, was caused by one of the multiple fragments generated during an explosion and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 1513 dated 13 November 2023, the injuries sustained by **Guliyev Bahadur Tayyar oglu**, namely blind shrapnel wounds of the upper

third of the lateral surface of the right thigh, were caused by multiple fragments generated by the explosion of an explosive bullet. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 27 dated 16 January 2024, the injury sustained by **Nuriyev Yusif Abdulla oglu**, namely a granulating wound following primary surgical treatment of a penetrating gunshot wound of the right lumbar region, was caused by a shot fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 26 dated 16 January 2024, the injuries sustained by **Samadli Bakhtiyar Elkhan oglu**, namely the condition following primary surgical treatment and removal of a foreign object in connection with a blind shrapnel wound of the upper third of the left humerus, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 25 dated 16 January 2024, the injury sustained by **Mammadzada Adil Tabriz oglu**, namely a wound of the lower third of the lateral surface of the left thigh that was granulating following primary surgical treatment of a blind gunshot wound

Page 652

was caused by a shot fired from a firearm loaded with a bullet cartridge. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1785 dated 11 October 2023, the injuries found on **Karimli Aykhan Khaliq oglu**, namely a blind shrapnel wound of the middle third of the right upper arm; abrasions of both lower legs; and barotrauma of both ears accompanied by left-sided acute cochlear neuritis, were caused by the combined effects of fragments generated by the explosion of an explosive bullet, hard blunt objects and the blast wave. The shrapnel wound and barotrauma were classified as minor harm to health, while the abrasions did not cause harm to health and therefore their degree of severity was not determined.

According to forensic medical expert opinion No. 1977 dated 25 October 2023, the injuries found on **Huseynov Mahammad Mubariz oglu**, namely a penetrating gunshot wound of the middle third of the right upper arm accompanied by a soft-tissue defect and compression-ischaemic neuropathy of the right radial nerve, were caused by a shot fired from a firearm. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 20 dated 16 January 2024, the injury sustained by **Isgandarov Nicat Habil oglu**, namely the condition following primary surgical treatment of a penetrating gunshot wound of the posterior surface of the right hand, was

caused by a shot fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1754 dated 11 October 2023, the injuries found on **Nas irov Rahim Karim oglu**, namely a gunshot wound of the right anterior neck accompanied by traumatic paralysis of the right vocal cord; displaced open fractures of the third and fourth metacarpal bones of the left hand and of the base of the proximal phalanx of the fifth finger; and a penetrating gunshot wound of the left hand and left forearm accompanied by damage to the flexor tendons of the third and fourth fingers, were caused by shots fired from a firearm loaded with bullets. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1887 dated 17 October 2023, the injuries found on **Abdullayev Nemat Rafiq oglu**, namely blind shrapnel wounds of the right knee and right heel regions; closed craniocerebral trauma accompanied by concussion of the brain; and barotrauma of the right ear accompanied by right-sided acute cochlear neuritis, were caused by fragments generated by the explosion of an explosive bullet and by the blast wave. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1728 dated 10 October 2023, the injuries found on **Amirov Fuad Feyaz oglu**, namely a tangential gunshot wound of the soft tissues of the anterior surface of the upper third of the right thigh, and barotrauma of both ears accompanied by bilateral acute cochlear neuritis, were caused respectively by a shot fired from a firearm and by the blast wave generated during the explosion of an explosive bullet. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 17 dated 16 January 2024, the injuries sustained by **Gurbanov Gunduz Huseyn oglu**, namely blast trauma; closed craniocerebral trauma; astheno-neurotic manifestations following concussion of the brain; vegetative vascular instability following concussion of the brain; a healed skin scar following removal of a foreign object in connection with a blind gunshot wound of the posterior surface of the upper third of the right thigh; pain syndrome; bilateral chronic cochlear neuritis; bilateral sensorineural hearing impairment; and perception of whispered speech from a distance of five metres in both ears, were caused partly by the blast wave generated by the explosion of a substance possessing explosive properties and partly by a firearm shot.

Page 653

The injuries comprising blast trauma; closed craniocerebral trauma; astheno-neurotic manifestations following concussion of the brain; vegetative vascular instability following concussion of the brain; bilateral chronic cochlear neuritis; bilateral sensorineural hearing impairment; and perception of whispered speech from a distance of five metres in both ears were caused by the blast wave generated by the explosion of a substance possessing explosive properties.

The healed skin scar and pain syndrome following removal of a foreign object in connection with a blind gunshot wound of the posterior surface of the upper third of the right thigh were caused by a shot fired from a firearm. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 18 dated 16 January 2024, the injuries sustained by **Mammadov Ariz Gurban oglu**, namely healed skin scars following blind shrapnel wounds of the left scapular region, the right forearm and the left lumbar region, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 19 dated 16 January 2024, the injuries sustained by **Jabbarov Tarlan Ismat oglu**, namely the condition following primary surgical treatment of wounds caused by blind shrapnel injuries to the left lower leg and left ankle; blast trauma; and the condition following left-sided acute cochlear neuritis, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 21 dated 16 January 2024, the injuries sustained by **Mammadov Azad Khanbaba oglu**, namely the condition following primary surgical treatment of wounds caused by shrapnel injuries to the right thigh and knee following blast trauma, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 22 dated 16 January 2024, the injuries sustained by **Safarov Yagubali Vagif oglu**, namely the condition following primary surgical treatment of wounds caused by blind shrapnel injuries to the left lower leg and right lateral malleolus, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 24 dated 16 January 2024, the injury sustained by **Ismayilov Elchin Hasan oglu**, namely the condition following primary surgical treatment of a blind gunshot wound of the posterior surface of the right shoulder girdle, was caused by a shot fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 23 dated 16 January 2024, the injuries sustained by **Qasimli Sadiq Vusal oglu**, namely bilateral acute cochlear neuritis resulting from blast trauma; traumatic perforation of the right tympanic membrane; and the condition following primary surgical treatment of shrapnel wounds of the right hand and both thigh regions, were caused by the blast wave and primary or secondary fragments generated by the

explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1584 dated 20 October 2023, the injuries sustained by **Abbasov Khagani Suleyman oglu**, namely wounds of the middle third of the right forearm and the left lateral abdominal wall, were caused by fragments generated by the explosion of an explosive bullet. The abrasions of the middle third of the right lower leg were caused

Page 654

by the impact of a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 83 dated 1 February 2024, the injuries sustained by **Ahmadov Vusal Baloglan oglu**, namely penetrating shrapnel wounds of the soft tissues of the right upper arm and right forearm, and of the first and second fingers of the right hand, were caused by multiple fragments generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 85 dated 1 February 2024, the injuries sustained by **Guliyev Jeyhun Rafiq oglu**, namely closed craniocerebral trauma; concussion of the brain; perforation of the left tympanic membrane; blind shrapnel wounds of the left elbow joint, left forearm and hand, right hand, both thighs and lower-leg regions; a closed wound of the left infraorbital region; traumatic iridodialysis; retinopathy; and reduction of visual acuity to 0.7, were caused by multiple fragments and the blast wave generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1413 dated 29 September 2023, metallic fragments were found in the middle third of the left lower leg and the middle third of the left upper arm of **Isazada Vusal Ilham oglu**. The injuries were caused by the combined effects of the blast wave and fragments generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 32 dated 16 January 2024, the injury sustained by **Badalov Mahammad Miraddin oglu**, namely blunt trauma to the right heel, was caused by a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 28 dated 16 January 2024, the injuries sustained by **Fatullayev Mirseyid Seyid oglu**, namely blast trauma and a typical compression fracture of the right lumbar vertebra, were caused by the blast wave generated

by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 30 dated 16 January 2024, the injuries sustained by **Hajiyev Aghahuseyn Haji oglu**, namely blast trauma and the condition following primary surgical treatment of shrapnel wounds of the right shoulder and fourth finger of the right hand, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 31 dated 16 January 2024, the injuries sustained by **Alizada Mursal Sabuhi oglu**, namely a firearm wound; a blind shrapnel wound of the left side of the neck; a foreign object at the level of the C6 cervical vertebra; post-traumatic encephalopathy; obsessive-compulsive disorder; insomnia; and memory impairment, were caused by a shot fired from a firearm. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 29 dated 16 January 2024, the injuries sustained by **Garibov Aydin Aghamirza oglu**, namely blast trauma and the condition following primary surgical treatment of shrapnel wounds of the right scapular region, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 68 dated 25 January 2024, the injury sustained by **Babazada Murad Malik oglu**, namely a tangential shrapnel wound of the lower third of the right lower leg, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

Page 655

According to forensic medical expert opinion No. 74 dated 1 February 2024, the injuries sustained by **Aliyev Rafiq Ali oglu**, namely closed craniocerebral trauma; concussion of the brain resulting in vegetative vascular instability and astheno-neurotic manifestations; and barotrauma resulting in acute cochlear neuritis, were caused by the blast wave and blunt impact generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 86 dated 1 February 2024, the injury sustained by **Atayev Barzani Masud oglu**, namely closed craniocerebral trauma and concussion of the brain, was caused by the blast wave and blunt impact generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1390 dated 29 September 2023, the injuries found on **Aliyev Samir Mushfig oglu**, namely closed craniocerebral trauma; concussion of the brain; and crushing of the left shoulder-girdle region, were caused partly by the blast wave generated by the explosion of a projectile possessing explosive properties and partly by the impact of a hard blunt object. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 81 dated 1 February 2024, the injury sustained by **Aliyev Jeyhun Fazil oglu**, namely closed craniocerebral trauma and concussion of the brain, was caused by the blast wave and blunt impact generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 76 dated 1 February 2024, the injury sustained by **Jafarov Rahid Rashid oglu**, namely a penetrating gunshot wound of the soft tissues of the right forearm, was caused by a shot fired from a firearm and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 157 dated 9 February 2024, the injuries sustained by **Guliyev Rashad Abulfat oglu**, namely barotrauma and crushing of the soft tissues of the left shoulder and left knee-joint region, were caused by the blast wave and the impact of a hard blunt object generated during an explosion. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 82 dated 1 February 2024, the injury sustained by **Guliyev Huseyn Mahir oglu**, namely closed craniocerebral trauma and concussion of the brain, was caused by the blast wave and blunt impact generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 152 dated 9 February 2024, the injury sustained by **Mammadli Safiyar Sardar oglu**, namely crushing of the soft tissues of the right ankle-joint region, was caused by a hard blunt object and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 97 dated 1 February 2024, the injuries sustained by **Sadigli Orkhan Gunduz oglu**, namely crushing of the soft tissues of the lumbar region and both knee-joint regions, were caused by the blast wave and impact of a hard blunt object generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1526 dated 17 October 2023, the injuries sustained by **Mammadov Mahammad Vagif oglu**, namely closed blunt trauma of the right heel region, including swelling and restricted movement, were caused by the impact of a hard blunt object, while closed craniocerebral trauma and concussion of the brain were caused by the blast wave generated by the explosion of an explosive bullet. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 84 dated 1 February 2024, the injury sustained by **Hamzayev Azer Aydin oglu**, namely closed craniocerebral trauma and concussion of the brain, was caused by the blast wave and blunt impact generated during an explosion and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 158 dated 20 February 2024, the injury sustained by **Gadirli Kanan Sanan oglu**, namely a sprain of the anterior cruciate ligament of the right knee joint, was caused by the impact of a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 120 dated 2 February 2024, the injuries sustained by **Akhundov Elsevar Elshan oglu**, namely incised and lacerated wounds of the left hand caused by shrapnel, were caused by multiple fragments generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 119 dated 2 February 2024, the injury sustained by **Muradov Elvin Elchin oglu**, namely a shrapnel wound of the posterior surface of the neck, was caused by multiple fragments generated during an explosion. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 91 dated 1 February 2024, the injuries sustained by **Hajiyev Elnur Gurban oglu**, namely a lacerated wound of the left upper eyelid; multiple shrapnel wounds of the face and right hand; closed craniocerebral trauma; concussion of the brain; bilateral acute cochlear neuritis; and traumatic central perforation of both tympanic membranes, were caused by multiple fragments and the blast wave generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 110 dated 2 February 2024, the injuries sustained by **Karimov Shamil Kheyraddin oglu**, namely a penetrating shrapnel wound of the left cheek accompanied by a displaced fracture of the left angle and mental region of the mandible; post-traumatic fractures of the crowns of teeth Nos. 36 and 37; and post-traumatic neuropathy of the third branch of the left trigeminal nerve, were caused by multiple fragments generated during an explosion. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 153 dated 9 February 2024, the injuries sustained by **Mahammadov Ahmad Bahram oglu**, namely incised and lacerated shrapnel wounds of the left hand, were caused by multiple fragments generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 107 dated 2 February 2024, the injuries sustained by **Hajihasanov Aslan Arif oglu**, namely penetrating firearm wounds of the

second and third fingers of the right hand, a foreign object in the soft tissues, and penetrating injuries caused by bullet fragments from a firearm shot, were caused by secondary fragments. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1629 dated 20 October 2023, the injuries sustained by **Karamli Karam Agha oglu**, namely wounds of the right half of the parietal region, left side of the neck, right scapular region and right shoulder region; a first-degree thermal burn of the right scapular region; and first-degree sensorineural hearing impairment, were caused by the combined effects of the blast wave and fragments generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1310 dated 20 October 2023, the injury sustained by **Safarli Minur Ramin oglu**, namely a second-degree thermal burn of the posterior surface of the lower third of the right lower leg, was caused by flame generated during the explosion of a military projectile

Page 657

was caused by flame generated during the explosion of military ammunition possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1605 dated 20 October 2023, the injuries sustained by **Mammadov Fikrat Hidayat oglu**, namely wounds of the lower third of the right upper arm, upper third of the right forearm, posterior surface of the right hand and lower third of the left lower leg, as well as “post-traumatic headaches” diagnosed at the Goychay District Central Hospital on 21 September 2023, were caused by the combined effects of the blast wave and fragments generated during the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 37 dated 14 February 2024, the injury sustained by **Karimov Alsab Matlab oglu**, namely a blind gunshot wound of the left lateral surface of the neck, was caused on 20 September 2023 by a shot fired from a firearm from a long distance, in a direction from left to right. Because the injury resulted in prolonged impairment of health for more than three weeks, it was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1600 dated 20 October 2023, the injuries sustained by **Gurbanli Samran Aslan oglu**, namely crushing of the left thigh and left upper-arm regions accompanied by oedema of the left thigh, were caused by the impact of a hard blunt object. Because the injuries caused short-term impairment of health, they were classified as minor harm to health.

According to forensic medical expert opinion No. 1323 dated 20 October 2023, the injuries sustained by **Dayanov Amin Vusal oglu**, namely superficial wounds of the posterior surface of the upper third of the right forearm and the anterolateral surface of the middle third of the right thigh, were caused by fragments generated by the explosion of a military projectile possessing explosive properties. Since the injuries did not cause impairment of health, their degree of severity was not determined.

According to forensic medical expert opinion No. 1509 dated 29 February 2024, the injury sustained by **Hajiyev Abdulla Sahil oglu**, namely a shrapnel wound of the lumbar region, was caused by one of the multiple fragments generated by the explosion of a bullet possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 64 dated 1 February 2024, the injuries sustained by **Mahyaddinli Hasan Sadaddin oglu**, namely multiple shrapnel wounds of the left knee, both lower legs and right foot regions; metallic foreign objects in the soft tissues; perforation of the right tympanic membrane; closed craniocerebral trauma; and concussion of the brain, were caused by multiple fragments and the blast wave generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 88 dated 1 February 2024, the injury sustained by **Bayramli Bahruz Bakhtiyar oglu**, namely closed craniocerebral trauma and concussion of the brain, was caused by the blast wave and blunt impact generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1471 dated 8 April 2024, the injuries sustained by **Baghiyev Mahammad Fakhraddin oglu**, namely multiple blind wounds of the right frontal region, the posterior surfaces of both thighs, the posterior surfaces of both lower legs and the posterior surface of the upper third of the right forearm; and a first- to third-degree thermal burn of the lower third of the right lower leg, were caused by the effects of flame and primary and blunt-force secondary fragments generated during the explosion of a military projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1491 dated 11 April 2024, the injuries sustained by **Ismayilov Hazrat Vahid oglu**, namely multiple blind wounds of the soft tissues of the left thigh and left lower leg, were caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

Page 658

According to forensic medical expert opinion No. 77 dated 1 February 2024, the injury sustained by **Najafov Zahid Ilgar oglu**, namely closed craniocerebral trauma and concussion

of the brain, was caused by the blast wave and blunt impact generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1472 dated 8 April 2024, the injuries sustained by **Javadov Amin Javad oglu**, namely multiple blind wounds of the right eyebrow, left lumbar region and the soft tissues of both lower legs, were caused by primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 117 dated 2 February 2024, the injuries sustained by **Aghali Parviz Adilbay oglu**, namely a lacerated wound of the left upper-arm region caused by a bullet passing tangentially as a result of a firearm shot, and a blind shrapnel wound of the right upper arm caused by one of the multiple fragments generated during an explosion, did not cause harm to health. Therefore, their degree of severity was not determined.

According to forensic medical expert opinion No. 118 dated 2 February 2024, the injuries sustained by **Jafarli Ayaz Gorkhmaz oglu**, namely closed craniocerebral trauma; concussion of the brain resulting in astheno-neurotic manifestations; and barotrauma resulting in left-sided acute cochlear neuritis, were caused by the blast wave and blunt impact generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 251 dated 12 March 2024, the injury sustained by **Rzayev Hakimali Vali oglu**, namely a blind shrapnel wound of the left scapular region, was caused by one of the multiple fragments generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 116 dated 2 February 2024, the injury sustained by **Adigozalov Parviz Alimdar oglu**, namely barotrauma resulting in left-sided acute cochlear neuritis, was caused by the blast wave generated during an explosion and was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 253 dated 12 March 2024, the injuries sustained by **Aliyev Sahib Seyfulla oglu**, namely lacerated wounds of the upper thirds of both lower legs caused by the impact of a hard blunt object, did not cause harm to health. Therefore, their degree of severity was not determined.

According to forensic medical expert opinion No. 100 dated 2 February 2024, the injury sustained by **Turabov Yusif Mikayil oglu**, namely a penetrating gunshot wound of the posterior surface of the middle third of the right lower leg caused by a bullet passing through as a result of a firearm shot, did not cause harm to health. Therefore, its degree of severity was not determined.

According to forensic medical expert opinion No. 104 dated 2 February 2024, the injuries sustained by **Huseynguliyev Safar Arzu oglu**, namely closed craniocerebral trauma; concussion of the brain; a blind gunshot wound of the left cheek; displaced fracture of the lower, anterior and posterior walls of the left maxillary sinus; a metallic foreign object in the soft tissues; and moderate impairment of chewing function, were caused by one firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 115 dated 2 February 2024, the injury sustained by **Jafarov Asiman Abasat oglu**, namely a gunshot wound of the upper third of the left thigh caused by one firearm shot, was classified as minor harm to health.

Page 659

According to forensic medical expert opinion No. 106 dated 2 February 2024, the injuries sustained by **Karimli Azer Bakhtiyar oglu**, namely blunt trauma to the right knee-joint region, oedema and crushing of the soft tissues, and abrasions of the palmar surfaces of both hands, were caused by the impact of a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1581 dated 20 October 2023, the injury sustained by **Babazada Esgin Vagif oglu**, namely “post-concussion syndrome” diagnosed at the Goychay District Central Hospital on 20 September 2023, was caused by the blast wave generated by the explosion of a bullet possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1320 dated 20 October 2023, the injury sustained by **Aliyev Elmin Ilham oglu**, namely closed craniocerebral trauma and concussion of the brain, was caused by the impact of a hard blunt object, including the blast wave generated by the explosion of military ammunition possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 666 dated 26 December 2023, the injuries sustained by **Abdullazada Avazagha Fazil oglu**, namely a blind wound of the right elbow-joint region accompanied by restricted movement; foreign objects in the soft tissues; wounds of the lumbar region; and metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 405 dated 12 March 2024, the injuries sustained by **Ahmadzada Mirkanan Rza oglu**, namely multiple shrapnel wounds of both lower extremities, were caused by fragments generated by the explosion of an unidentified explosive projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1554 dated 5 April 2024, the injuries sustained by **Asadullayev Suleyman Ehtibar oglu**, namely blind wounds of the soft tissues of the posterior surface of the right hand and the occipital region, were caused by fragments generated by the explosion of a bullet possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 293 dated 5 March 2024, the injuries sustained by **Jahangirzada Zamin Javanshir oglu**, namely barotrauma and closed craniocerebral trauma, were caused by the combined effects of the blast wave generated by the explosion of an unidentified explosive projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 92 dated 1 February 2024, the injury sustained by **Goyushov Nicat Shohrat oglu**, namely a blind shrapnel wound of the right thigh caused by one of the multiple fragments generated during an explosion, was classified, according to its degree, as minor harm to health.

According to forensic medical expert opinion No. 387 dated 11 March 2024, the injuries sustained by **Balabayli Vali Elkhan oglu**, namely closed craniocerebral trauma; concussion of the brain; and a soft-tissue wound of the second finger of the right hand, were caused by the combined effects of the blast wave and fragments generated by the explosion of an unidentified explosive projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1502 dated 13 November 2023, the injuries sustained by **Novruzlu Sabuhi Rovshan oglu**, namely a second-degree thermal burn of the middle third of the left lower leg, a mucosal wound on the right side of the lower lip, a haematoma of the right supraclavicular region and gangrene of the medial surface of the upper third of the left lower leg, were caused by local exposure to high temperature and by the impact of a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

Page 660

According to forensic medical expert opinion No. 101 dated 2 February 2024, the injuries sustained by **Mahmudov Kanan Allahverdi oglu**, namely shrapnel wounds of the urinary bladder, left thigh, right lower leg, jaw region and right lower eyelid; vegetative vascular dystonia; right-sided acute cochlear neuritis; and metallic foreign objects—fragments—in the soft tissues, were caused by multiple fragments and the blast wave generated during an explosion. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1511 dated 13 November 2023, the injuries sustained by **Mammadov Nurlan Fazil oglu**, namely blind shrapnel wounds of various shapes and sizes on the anterior surface of the left thigh, were caused by multiple fragments

generated by the explosion of a bullet possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1521 dated 15 April 2024, it was established that the injuries sustained by **Aghayev Nicat Abuzar oglu**, namely barotrauma and post-traumatic stress disorder, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 103 dated 2 February 2024, the injuries sustained by **Huseynov Arif**, namely blind shrapnel wounds of the left and right hands and barotrauma, were caused by the blast wave and multiple fragments generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 102 dated 2 February 2024, the injury sustained by **Islamzada Islam Yasar oglu**, namely a gunshot wound of the lower third of the left upper arm, was caused by one shot fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1327 dated 20 October 2023, the injury sustained by **Orucov Ulvi Ayaz oglu**, namely a superficial wound on the anterior surface of the left knee joint, was caused by the impact of a hard blunt object. Since the injury did not cause impairment of health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1534 dated 10 October 2023, the injuries sustained by **Jabrayilov Kamran Mehman oglu**, namely closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 73 dated 1 February 2024, the injuries sustained by **Abdullayev Rashad Sahib oglu**, namely crushing of the soft tissues of various areas of the body, were caused by the impact of a hard object. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 386 dated 7 March 2024, the injuries sustained by **Mahmudov Nasimi Feyruz oglu**, namely a penetrating blind gunshot wound extending from the lumbar region into the abdominal cavity and accompanied by multiple injuries to the small intestine and caecum; an open shrapnel displaced fracture of the right femur with a bone defect; multiple foreign objects in the soft tissues of the right half of the chest and right thigh, were caused partly by shots fired from a firearm and partly by fragments generated by the explosion of an unidentified explosive projectile. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 897-A dated 1 May 2024, it was established that the injuries sustained by **Amirli Ravan Ramin oglu**, namely post-traumatic neuropathy of the left tibial nerve and blind shrapnel wounds of both lower legs, were caused by fragments generated by the explosion of an unidentified explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

Page 661

According to forensic medical expert opinion No. 882-A dated 1 May 2024, it was established that the injuries sustained by **Muradov Omar Lutfiyar oglu**, namely lacerated wounds of both knee regions, were caused by the impact of a hard blunt object. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 1393 dated 29 September 2023, the injuries sustained by **Gahramanli Huseynbaba Allahveran oglu**, namely wounds of the anterior surfaces of both lower legs and the posterior surface of the right hand, were caused by fragments generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1477 dated 8 April 2024, the injury sustained by **Mammad Said Kamal oglu**, namely a blind wound of the anterior surface of the upper third of the right upper arm accompanied by a fracture of the humerus, was caused by a firearm shot. Since the injury resulted in prolonged impairment of health, it was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1492 dated 11 April 2024, the injuries sustained by **Khalilov Samir Khalil oglu**, namely multiple blind wounds of the soft tissues of the facial region, were caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 90 dated 1 February 2024, the injuries sustained by **Taghiyev Maharram Mahir oglu**, namely closed craniocerebral trauma; concussion of the brain; and lacerated wounds of both knee regions, were caused by the blast wave and impact of a hard blunt object generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 72 dated 1 February 2024, the injuries sustained by **Mammadov Royal Huseyn oglu**, namely closed craniocerebral trauma; concussion of the brain; and bilateral acute cochlear neuritis, were caused by the blast wave generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 41 dated 22 January 2024, the injuries sustained by **Teymurov Seymur Balayar oglu**, namely closed craniocerebral trauma;

concussion of the brain; thermal burns of the face, scalp, both auricles, neck, both hands and posterior surface of the left thigh, covering 13% of the body surface and comprising first-, second- and third-degree burns; multiple blind shrapnel wounds of various body regions; and metallic foreign objects in the soft tissues, were caused by multiple fragments, flame and the blast wave generated during an explosion. The injuries were sustained on the date and under the circumstances specified. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 40 dated 22 January 2024, the injury sustained by **Zarbaliyev Elshan Ehtiram oglu**, namely barotrauma, was caused by the blast wave generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 39 dated 22 January 2024, the injuries sustained by **Jafali Ali Zahid oglu**, namely multiple blind shrapnel wounds of both lower legs and both thigh regions; open displaced shrapnel fractures of both tibias; millimetric metallic foreign objects—fragments—in the soft tissues; contracture of the left ankle joint; shortening of the Achilles tendon; bilateral acute cochlear neuritis; traumatic perforation of the right tympanic membrane; right-sided mixed hearing loss; hearing of whispered speech at a distance of four metres in the right ear and six metres in the left ear; and an acute stress reaction resulting in mild asthenia, were caused by multiple fragments and the blast wave generated during an explosion. According to their degree, the injuries were classified overall as less grievous harm to health.

Page 662

According to forensic medical expert opinion No. 99 dated 2 February 2024, the injuries sustained by **Ahmadov Rafiq Vidadi oglu**, namely closed craniocerebral trauma; concussion of the brain; and a lacerated wound of the frontal region, were caused by the blast wave and the impact of a hard object generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1956 dated 24 October 2023, the injuries sustained by **Fatullayev Fariz Galib oglu**, namely an incised wound of the lower eyelid; traumatic cataract; haemophthalmos; traumatic maculopathy; reduction of vision in the right eye to perception of hand movement; a penetrating injury to the sclera of the right eye; barotrauma of the right ear accompanied by right-sided acute tubootitis; and closed craniocerebral trauma accompanied by astheno-neurotic manifestations following concussion of the brain, were caused by the combined effects of fragments and the blast wave generated by the explosion of a projectile possessing explosive properties.

Overall, the injuries were classified as grievous harm to health resulting in permanent loss of more than one-third of general working capacity. Separately, the shrapnel injury to the right eye was classified as grievous harm to health resulting in permanent loss of more than one-

third of general working capacity, while the barotrauma and craniocerebral trauma were classified as minor harm to health.

According to forensic medical expert opinion No. 1519 dated 13 November 2023, the injuries sustained by **Irzayev Royal Imran oglu**, namely barotrauma resulting in right-sided acute cochlear neuritis, and crushing of the soft tissues of the left foot accompanied by sprain of the ankle-joint ligaments resulting in synovitis, were caused respectively by the blast wave generated by the explosion of a bullet possessing explosive properties and by the impact of a hard blunt object. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1470 dated 8 April 2024, the injuries sustained by **Nazarov Elsevar Bakhtiyar oglu**, namely thermal burns of both hands and both lower legs; multiple blind wounds of the soft tissues of the left forearm, left wrist, dorsal surfaces of both hands, anterior and medial surfaces of both lower legs; and metallic foreign objects—fragments—in the left wrist, first finger of the left hand and right lower leg, were caused by flame and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1586 dated 20 October 2023, the injuries sustained by **Hagverdiyev Fagan Sahib oglu**, namely a blind shrapnel wound of the right lumbar region diagnosed at the Goychay District Central Hospital on 20 September 2023; a small metallic foreign object remaining in the soft tissues; and barotrauma, were caused by the combined effects of the blast wave and fragments generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 252 dated 12 March 2024, the injuries sustained by **Bagirov Haji Araz oglu**, namely lacerated wounds of both knee regions and of the left shoulder and root of the nose, were caused by the impact of a hard blunt object. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 87 dated 1 February 2024, the injury sustained by **Abbasov Joshgun Zabil oglu**, namely a thermal burn of the right lower leg, was caused by flame generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 114 dated 2 February 2024, the injury sustained by **Ibrahimov Vusal Polad oglu**, namely a lacerated wound of the middle third of the right lower leg

was caused by the impact of a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 105 dated 2 February 2024, the injuries sustained by **Ismayilzada Elgiz Farhad oglu**, namely closed craniocerebral trauma; concussion of the brain; a lacerated wound of the parietal region; and left-sided acute cochlear neuritis, were caused by a firearm shot. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1786 dated 11 October 2023, the injuries found on **Poladzada Amil Mazahir oglu**, namely a sprain of the ligaments of the left ankle joint accompanied by movement of the joint beyond its physiological range and subsequent backward, forward and lateral movements, were caused by the impact of a hard blunt object. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1790 dated 11 October 2023, the injuries found on **Dovlatov Asgar Rasim oglu**, namely a blind shrapnel wound of the left lower-leg region and barotrauma of both ears accompanied by bilateral acute cochlear neuritis, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 338 dated 6 March 2024, the injuries sustained by **Karimli Ilkin Ilyas oglu**, namely bilateral chronic cochlear neuritis; bilateral sensorineural hearing loss; post-traumatic perforation of both tympanic membranes; closed craniocerebral trauma; concussion of the brain; complete loss of vision in the right eye resulting from an eye wound; a scar of the medial wall of the right orbit accompanied by a foreign object; post-traumatic fractures of the crowns of teeth Nos. 11, 12, 21 and 22; multiple penetrating and blind shrapnel wounds of the upper lip, forehead, left cheek, both upper extremities and the right knee joint accompanied by instability of the knee, atrophy of the quadriceps muscle and rupture of the anterior cruciate ligament, were caused by fragments and the combined blast wave generated by the explosion of a bullet possessing explosive properties.

According to their degree, the injuries were classified overall as grievous harm to health resulting in permanent loss of more than one-third of general working capacity.

According to forensic medical expert opinion No. 1458 dated 27 March 2024, the injuries sustained by **Abdullayev Bahram Tazakhan oglu**, namely an open wound of the left lower leg accompanied by a comminuted displaced open fracture of the tibia, and blind wounds of the soft tissues of the left thigh and the upper third of the right thigh, were caused by primary fragments and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 75 dated 1 February 2024, the injuries sustained by **Jafarov Seyran Nadir oglu**, namely multiple shrapnel wounds of both thighs, both lower legs and both feet; foreign objects—metallic fragments—in the soft tissues; and perforation of the right tympanic membrane, were caused by multiple fragments and the blast wave generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 56 dated 25 January 2024, the injuries sustained by **Qilincov Anar Mirzali oglu**, namely blast trauma; closed craniocerebral trauma; vegetative vascular instability following concussion of the brain; barotrauma; bilateral chronic cochlear neuritis; bilateral sensorineural hearing loss; perception of whispered speech at a distance of two metres in the left ear and four metres in the right ear; and a healed skin scar following a shrapnel wound of the anterior surface of the middle third of the left lower leg, were caused by primary or secondary

fragments, including the blast wave, generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1729 dated 10 October 2023, the injuries sustained by **Shahnamazli Jeyhun Valeh oglu**, namely multiple blind shrapnel wounds of the soft tissues of both lower extremities, were caused by fragments generated during the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 58 dated 25 January 2024, the injuries sustained by **Fataliyev Shakir Zakir oglu**, namely blunt trauma to the right knee joint and the condition following conservative treatment performed for partial ruptures of the anterior and posterior cruciate ligaments and complete rupture of the medial collateral ligament, were caused by the blast wave generated during the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 59 dated 25 January 2024, the injuries sustained by **Badirov Alizamin Yahya oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; a blind shrapnel wound of the middle third of the left lower leg; and the condition following laparotomy and splenectomy performed due to injury to the abdominal cavity and internal bleeding, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 60 dated 25 January 2024, the injury sustained by **Babayev Poladkhan Tural oglu**, namely a healed skin scar following a blind shrapnel wound of the middle third of the right lower leg, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 96 dated 23 April 2024, the injuries sustained by **Ganbarov Parviz Etibar oglu**, namely blunt trauma to the left half of the chest identified during the forensic medical examination, were caused by the blast wave generated by the explosion of a firearm projectile and the impact of a hard object. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 63 dated 25 January 2024, the injuries found on **Suleymanov Elman Eldar oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain resulting in astheno-neurotic manifestations, and a shrapnel wound of the soft tissues of the upper third of the right thigh, were caused by the blast wave generated during the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 253 dated 9 February 2024, the injuries sustained by **Abbasov Ruslan Elshan oglu**, namely a shrapnel wound of the left wrist region and an abrasion of the fifth finger of the right hand, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 457 dated 29 February 2024, the injuries sustained by **Humbatov Parviz Chingiz oglu**, namely a blind shrapnel wound of the right shoulder and the anterior surface of the left half of the chest that did not penetrate the thoracic cavity; the condition following primary surgical treatment of the wound; foreign objects—metallic fragments—in the soft tissues; blast trauma; closed craniocerebral trauma; and the condition following concussion of the brain, were caused by primary or secondary fragments

including the blast wave, generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 687-A dated 5 April 2024, the injury sustained by **Gurbanov Elmir Jeyhun oglu**, namely a blind shrapnel wound of the soft tissues of the left elbow region, was caused by fragments generated by the explosion of a bullet possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 712 dated 24 April 2024, the injury sustained by **Ismayilov Bakhtiyar Aslan oglu**, namely a healed skin scar following a

shrapnel wound of the anterior surface of the lower third of the left lower leg, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 683-A dated 4 April 2024, the injuries sustained by **Shakarov Sadiq Bayram oglu**, namely multiple blind shrapnel wounds of the soft tissues of both upper extremities, the left lower extremity and the left shoulder-girdle region, were caused by fragments generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1487 dated 11 April 2024, the injury sustained by **Mammadov Eltun Ramin oglu**, namely a blind wound of the soft tissues of the posterior surface of the middle third of the right thigh, was caused by primary and blunt-force secondary fragments generated during the explosion of combat ammunition possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 233 dated 9 February 2024, the injuries sustained by **Guliyev Agil Mardan oglu**, namely the condition following a gunshot wound of the left forearm and tinnitus, were caused respectively by a firearm shot and by the blast wave generated during the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 79 dated 1 February 2024, the injury sustained by **Ismayilov Khazar Maharram oglu**, namely closed craniocerebral trauma and concussion of the brain, was caused by the blast wave and the impact of a hard object generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1546 dated 13 November 2023, the injuries sustained by **Guluzada Shahriyar Habil oglu**, namely closed craniocerebral trauma and concussion of the brain accompanied by tinnitus, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1475 dated 8 April 2024, it was established that the injuries sustained by **Hasanov Hilal Farman oglu**, namely a penetrating gunshot wound of the soft tissues of the right hand with an entrance opening on the anteromedial surface in the projection of the first metacarpal bone and an exit opening on the anterior-lateral surface in the projection of the first metacarpal bone; traumatic amputation of the proximal phalanx of the third finger of the right hand; and multiple blind wounds of the soft tissues of the second, fourth and fifth fingers of the right hand, were caused partly by a bullet

fired from a firearm and partly by fragments generated during the explosion of combat ammunition possessing explosive properties

Page 666

were caused by primary fragments and blunt-force secondary fragments generated during the explosion. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 55 dated 2 February 2024, the injury sustained by **Bakhshiyev Sadiq Alihasan oglu**, namely a penetrating wound of the right lower leg accompanied by an open comminuted displaced fracture of the middle third of the shaft of the right tibia, was caused by a bullet fired from a firearm. According to its degree, the injury was classified as grievous harm to health.

According to forensic medical expert opinion No. 167 dated 13 February 2024, the injury sustained by **Gafarov Asim Anar oglu**, namely barotrauma resulting in headaches, was caused by the blast wave generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1551 dated 10 October 2023, the injuries sustained by **Rustamov Ruzi Shahin oglu**, namely closed craniocerebral trauma and concussion of the brain resulting in vegetative vascular instability and astheno-neurotic manifestations; the condition following bilateral acute cochlear neuritis; and post-traumatic perforation of the left tympanic membrane, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 108 dated 2 February 2024, the injury sustained by **Ibrahimli Elshan Ilgar oglu**, namely a gunshot wound of the right forearm, was caused by one shot fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 227 dated 16 April 2024, the injury sustained by **Rzayev Elvin Anvar oglu**, namely an abrasion of the posterior surface of the right hand, did not cause harm to health and therefore its degree of severity was not determined.

According to forensic medical expert opinion No. 56 dated 2 February 2024, the injuries sustained by **Shahbazov Emin Elshad oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain resulting in astheno-neurotic manifestations, and barotrauma resulting in right-sided acute cochlear neuritis, were caused by the blast wave generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 682-A dated 4 April 2024, the injury sustained by **Aliyev Elvin Oktay oglu**, namely a tangential penetrating wound of the soft tissues of the right thigh, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 691-A dated 5 April 2024, the injuries sustained by **Karimli Movsum Nasib oglu**, namely multiple blind shrapnel wounds of the soft tissues of the right lower leg, were caused by fragments generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 692-A dated 5 April 2024, the injuries sustained by **Aliyev Amil Gamat oglu**, namely blind shrapnel wounds of the soft tissues of both thighs, the right knee joint and the third finger of the right hand, were caused by fragments generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 689-A dated 5 April 2024, the injury sustained by **Babayev Guleli Azer oglu**, namely a blind shrapnel wound of the soft tissues of the right radiocarpal joint, was caused by fragments generated by the explosion of a bullet possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

Page 667

According to forensic medical expert opinion No. 714 dated 24 April 2024, the injuries sustained by **Osmanov Ramin Shikayat oglu**, namely a blind shrapnel wound of the left supraorbital region caused by blast trauma; periorbital haemorrhage; and a weak skin scar following removal of a metallic foreign object—fragment—and revision surgery, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1516 dated 13 November 2023, the injuries sustained by **Aghalarov Mirali Vagif oglu**, namely wounds of the lower third of the right thigh, the upper third of the right lower leg and the lower third of the left lower leg, were caused by fragments generated by the explosion of a bullet possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 678-A dated 3 April 2024, the injury sustained by **Rustamov Farman Arif oglu**, namely an abrasion of the left side of the lumbar region, was caused by the impact of a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1498 dated 15 April 2024, the injuries sustained by **Nuraddinli Elgiz Mirami oglu**, namely an open wound of the left lower leg accompanied by a fracture of the tibia; multiple blind wounds of the left cheek region, lateral surface of the neck, left scapular region, upper third of the left forearm, posterior surface of the left hand, both thighs and both lower legs; and a thermal burn wound of the left hand, were caused by flame, fragments and the blast wave generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 66 dated 1 February 2024, the injuries sustained by **Abbaszada Kamran Nariman oglu**, namely a penetrating gunshot wound of the thoracic cavity; fractures of the second, third, fourth and fifth left clavicular ribs; contusion of the left lung; haemopneumothorax; metallic foreign objects—fragments—in the soft tissues of the chest; and post-traumatic plexopathy of the left brachial plexus, were caused by a firearm shot and by primary or secondary fragments generated during an explosion. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 679-A dated 3 April 2024, the injuries sustained by **Jafarov Rovshan Ayaz oglu**, namely barotrauma of the right ear accompanied by right-sided acute cochlear neuritis and a haematoma of the right supraorbital region, were caused respectively by the blast wave generated by the explosion of a bullet possessing explosive properties and by the impact of a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 261 dated 9 February 2024, the injuries sustained by **Zamanov Samir Nazim oglu**, namely blast trauma; closed craniocerebral trauma; concussion of the brain; and the condition following left-sided acute cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 254 dated 9 February 2024, the injury sustained by **Babayev Ali Jamil oglu**, namely a superficial shrapnel wound of the right ankle-joint region, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to the opinion of the forensic medical expert No. 681/a dated 03.04.2024, the injury sustained by Khalilov Eltaj Kheybar oglu - a shrapnel wound that penetrated the soft tissues of his right arm, was caused by the impact of shrapnel

resulting from the explosion of an explosive projectile (munition). It refers to minor harm to health.

According to forensic medical expert opinion No. 684-A dated 4 April 2024, the injury sustained by **Bakhshov Etibar Fuzuli oglu**, namely a superficial tangential shrapnel wound of the right elbow region, was caused by fragments generated by the explosion of a bullet possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 716 dated 24 April 2024, the injuries sustained by **Isgandarov Shahriyar Rustam oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; and astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 67 dated 1 February 2024, the injuries sustained by **Zeynalov Taleh Vahid oglu**, namely closed craniocerebral trauma; concussion of the brain; traumatic perforation of the right tympanic membrane; and acute cochlear neuritis, were caused by the blast wave generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 44 dated 2 February 2024, the injuries sustained by **Hashimov Namiq Abdulrahman oglu**, namely abrasions of the frontal and parietal regions, were caused when the injured area struck a hard blunt object under the influence of the blast wave generated during the explosion of a firearm projectile. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 885-A dated 2 May 2024, the injury sustained by **Hasanov Jeyhun Vugar oglu**, namely blunt trauma to the right knee and lumbar regions accompanied by an abrasion of the right knee-joint region, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 96 dated 1 February 2024, the injury sustained by **Mirzayev Salah Asad oglu**, namely a full-thickness longitudinal tear of the posterior horn of the right medial meniscus, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1392 dated 29 September 2023, the injury sustained by **Gulmaliyev Alim Rahim oglu**, namely a penetrating gunshot wound of the right upper arm accompanied by a comminuted fracture of the lower third of the humeral shaft, was caused by a firearm shot. According to its degree, the injury was classified as grievous harm to health.

According to forensic medical expert opinion No. 71 dated 1 February 2024, the injuries sustained by **Latifov Vusal Namiq oglu**, namely closed craniocerebral trauma; concussion of the brain; and shrapnel wounds of the anterior surface of the left side of the chest, the left hand and the left thigh region, were caused by the blast wave and multiple fragments generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1518 dated 13 November 2023, the injuries sustained by **Qasimov Shamkhal Sabir oglu**, namely a displaced fracture of the distal metaphysis of the right tibia; post-traumatic perforation of the right tympanic membrane; and multiple blind shrapnel wounds of the body accompanied by metallic foreign objects in the soft tissues, were caused by multiple fragments and the blast wave generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

Page 669

According to forensic medical expert opinion No. 78 dated 1 February 2024, the injury sustained by **Eyvazov Vaseh Asim oglu**, namely a gunshot wound penetrating from the right lumbar region into the abdominal cavity and accompanied by damage to the gallbladder and pancreas and by internal bleeding, was caused by a firearm shot. According to its degree, the injury was classified overall as grievous harm to health.

According to forensic medical expert opinion No. 68 dated 1 February 2024, the injuries sustained by **Abbasov Niyamaddin Niyazi oglu**, namely closed craniocerebral trauma; concussion of the brain; traumatic perforation of both tympanic membranes; and acute cochlear neuritis, were caused by the blast wave generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 671 dated 23 September 2023, the injuries found on the body of **Mirzayev Samir Gurban oglu**, namely post-haemorrhagic anaemia; post-traumatic neuropathy of the brachial and radial nerves; sensory and motor impairment of the right upper extremity; and a penetrating gunshot wound of the right upper-arm region accompanied by an intra-articular comminuted displaced open fracture of the distal metaepiphysis of the humerus, were caused by a bullet fired from a firearm loaded with a bullet cartridge. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1482 dated 11 April 2024, the injuries sustained by **Ismayilov Alizamin Vilayaddin oglu**, namely a blind wound of the right scapular region not penetrating the cavity and accompanied by a metallic foreign object—fragment—and an open comminuted displaced fracture of the lower angle of the scapula; and multiple blind wounds of the soft tissues of the right scapular region, right hand, left thigh and right lower leg, were caused by primary and blunt-force secondary fragments generated

during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 95 dated 1 February 2024, the injuries sustained by **Aghabagirov Sabutay Ismayil oglu**, namely a blind shrapnel wound of the left lower-eyelid region; superficial clouding of the vitreous body; and visual acuity of 1.0 in both eyes, were caused by multiple fragments generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 35 dated 23 February 2024, the injuries sustained by **Hajili Latif Kazim oglu**, namely fractures of the right orbital floor and the anterior wall of the right maxillary sinus; injury to the femoral artery; a blind shrapnel wound of the right thigh accompanied by a soft-tissue defect; the condition following concussion of the brain; post-traumatic perforation of the right tympanic membrane; post-traumatic macular atrophy of the right eye with visual acuity reduced to 0.04; and visual acuity of 1.0 in the left eye, were caused by fragments and the blast wave generated during an explosion. Because the injuries were inflicted while the person was alive and resulted in permanent loss of more than one-third of general working capacity, they were classified as grievous harm to health.

According to forensic medical expert opinion No. 1730 dated 10 October 2023, the injuries found on **Aghayev Farid Said oglu**, namely a blind shrapnel wound of the soft tissues of the upper third of the left forearm; barotrauma of the left ear accompanied by left-sided acute cochlear neuritis; and closed craniocerebral trauma accompanied by concussion of the brain, were caused by the blast wave generated during the explosion of a bullet possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1791 dated 11 October 2023, the injuries found on **Imanzada Kanan Nusrat oglu**, namely a blind gunshot wound of the anterior surface of the upper third of the left thigh accompanied by fractures of the lower part of the left pubic bone and the femur

were caused by a firearm shot. Both collectively and separately, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 870 dated 28 September 2023, the injuries found on **Abbasaliyev Sanan Fazil oglu**, namely blind wounds of the left upper-arm and thigh-lower-leg regions; metallic foreign objects in the soft tissues; and a penetrating wound of the left foot, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 233 dated 6 March 2024, the injuries sustained by **Hamidov Sadiq Said oglu**, namely a blind gunshot wound of the left shoulder-

girdle region; an open comminuted displaced fracture of the acromial end of the left clavicle; and the condition following left-sided post-traumatic brachial plexopathy, were caused by a firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 93 dated 9 February 2024, the injuries sustained by **Salmanov Ilkin Habil oglu**, namely a blind gunshot wound of the right scapular region accompanied by a displaced comminuted fracture of the right scapula; a penetrating gunshot wound of the middle third of the right thigh accompanied by damage to the sciatic nerve; and multiple fractures of the posterior process of the T8 vertebra, the left transverse process of the T9 vertebra and the posterior part of the left ninth rib, were caused by firearm shots. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 853 dated 6 November 2023, the injury sustained by **Valiyev Elariz Tahir oglu**, namely crushing of the soft tissues of the left ankle-joint region, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1531 dated 17 October 2023, the injuries sustained by **Seyfiyev Musa Sholat oglu**, namely closed craniocerebral trauma; concussion of the brain; and bilateral acute cochlear neuritis, were caused by the blast wave generated during the explosion of a bullet possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 669 dated 30 November 2023, the injuries sustained by **Pashayev Bakir Vugar oglu**, namely a blind wound of the right thigh accompanied by a comminuted displaced open fracture of the femur; multiple blind wounds of the soft tissues of the left shoulder, upper arm and knee-joint regions; and a penetrating wound of the soft tissues of the left heel, were caused partly by the blast wave and primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties, and partly by a bullet fired from a firearm. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 70 dated 1 February 2024, the injury sustained by **Hajiyev Ildirim Rauf oglu**, namely crushing of the soft tissues of the neck region, was caused by the blast wave and the impact of a hard blunt object generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1485 dated 11 April 2024, the injuries sustained by **Hasanzada Nofal Safar oglu**, namely a penetrating wound of the right thigh with the entrance opening on the anterolateral surface of the middle third and the exit opening on the medial surface of the middle third; a blind wound of the posterolateral surface of the right upper arm accompanied by open comminuted displaced fractures of the right scapula and the posterior process of the seventh cervical vertebra; and a metallic foreign object—a

bullet—in the right paravertebral region of the neck, were caused by firearm shots. According to their degree, the injuries were classified overall as less grievous harm to health.

Page 671

According to forensic medical expert opinion No. 619 dated 26 December 2023, the injury sustained by **Amirov Huseyn Elshad oglu**, namely a blind wound of the left hand accompanied by a metallic foreign object in the soft tissues, was caused by fragments generated during the explosion of a firearm projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 80 dated 5 February 2024, the injury sustained by **Azizzada Anar Ehtiram oglu**, namely a sprain of the ligaments of the left ankle joint caused by movement of the joint and its components beyond their physiological range, was caused by blunt trauma. Since the injury did not cause impairment of health, its degree of severity was not determined.

According to forensic medical expert opinion No. 82 dated 20 February 2024, **Mursalov Imran Latif oglu** was diagnosed with crushing of the soft tissues of the right heel region. The injury was caused by a hard blunt object and, since it did not cause impairment of health, its degree of severity was not determined.

According to forensic medical expert opinion No. 658 dated 26 December 2023, the injuries sustained by **Humbatzada Togrul Khanoglan oglu**, namely multiple blind wounds of the left forearm and both lower extremities, were caused by primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 157 dated 8 February 2024, the injuries sustained by **Aliyev Ali Elmidar oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; secondary repair of post-traumatic perforation of the right tympanic membrane; and a healed skin scar following a gunshot wound of the lower third of the right upper arm, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave, and also by a firearm shot. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 156 dated 8 February 2024, the injuries sustained by **Seyidzada Nihad Javid oglu**, namely a gunshot wound of the right hand; multiple intra-articular fractures of the third, fourth and fifth metacarpal bones; and bone defects of the heads of the second, third, fourth and fifth metacarpal bones, were caused by a firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 155 dated 8 February 2024, the injuries sustained by **Allahverdiyev Azad Hajidada oglu**, namely blunt trauma to the left foot and left lower leg resulting from a mine explosion; open displaced fractures of the left ankle, cuboid, third, fourth and fifth metatarsal bones and the proximal phalanges of the third and fourth toes; dislocation of the ankle joint; compartment syndromes of the left foot and left lower leg; a penetrating gunshot wound of the soft tissues of the right elbow region; and the condition following primary surgical treatment of a lacerated wound of the middle third of the lower leg, fasciotomy, open reduction of the ankle fracture fragments, fixation with metal screws, and blast trauma accompanied by bilateral acute cochlear neuritis, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave, and by a firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 154 dated 8 February 2024, the injuries sustained by **Zarbaliyev Shahriyar Zahir oglu**, namely barotrauma; the condition following primary surgical treatment of a penetrating shrapnel wound of the upper third of the right upper arm; right-sided cochlear neuritis; and tension-type headache

Page 672

were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 153 dated 8 February 2024, the injuries sustained by **Hummatov Samir Vasif oglu**, namely blast trauma; closed craniocerebral trauma; concussion of the brain; and the condition following acute cochlear neuritis of the left ear, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 161 dated 8 February 2024, the injuries sustained by serviceman **Jabrayilov Araz Mammadagha oglu**, namely blast trauma; a shrapnel wound of the right side of the chest; and closed craniocerebral trauma, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 160 dated 8 February 2024, the injury sustained by **Malikov Abulfaz Sayahat oglu**, namely blast trauma and the condition following closed craniocerebral trauma and concussion of the brain, was caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 159 dated 8 February 2024, the injuries sustained by **Gurbanov Davud Jeyhun oglu**, namely barotrauma and a shrapnel wound of the lower third of the right thigh, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 158 dated 8 February 2024, the injuries sustained by **Azimli Rovshan Mehrac oglu**, namely blast trauma; closed craniocerebral trauma; concussion of the brain; a shrapnel wound of the right side of the chest; and blunt trauma to the anterior surface of the lower third of the left thigh and the knee joint, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 152 dated 8 February 2024, the injuries sustained by **Asdanov Jahid Niyaz oglu**, namely blast trauma; closed craniocerebral trauma; the condition following concussion of the brain; and perforation of the left tympanic membrane, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 685-A dated 4 April 2024, the injury sustained by **Museyibov Huseyn Akif oglu**, namely a sprain of the ligaments of the right ankle joint accompanied by haemarthrosis and reactive oedema, was caused by the joint moving sharply inward, outward, forward and backward beyond its physiological range as a result of blunt trauma. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 718 dated 24 April 2024, the injuries sustained by **Muradov Jumshud Bahlul oglu**, namely a penetrating gunshot wound of the right foot accompanied by a marginal fracture of a navicular-like bone; multiple blind shrapnel wounds of the left lower leg; the condition following primary and secondary surgical treatment of the wounds; and the postoperative condition, were caused by firearm shots. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 868 dated 28 September 2023, the injuries found on **Ahmadzada Aykhan Gulkhan oglu**, namely a blind wound of the left lower-leg region

accompanied by a metallic foreign object in the soft tissues, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1449 dated 13 March 2024, the injury sustained by **Hajizada Farid Bayram oglu**, namely a blind wound of the soft tissues of the left foot accompanied by a metallic foreign object—fragment—in the left foot region, was caused by fragments generated during the explosion of a firearm projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 79 dated 5 February 2024, the injury sustained by **Nuriyev Ramin Shahrza oglu**, namely a blind wound of the medial surface of the right thigh accompanied by a metallic foreign object in the soft tissues, was caused by primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 78 dated 23 February 2024, the injuries sustained by **Maharramov Ali Mazahir oglu**, namely a penetrating wound of the chest accompanied by moderate mixed ventilatory dysfunction resulting from impaired external respiratory function, an open fracture of the left sixth rib and left-sided haemopneumothorax—accumulation of free blood and air in the thoracic cavity—and a penetrating wound of the anterior surface of the left forearm accompanied by damage to the flexor surface and deep muscle tendons of the fourth and fifth fingers of the left hand, were caused by two firearm shots. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 81 dated 5 February 2024, the injury sustained by **Ahmadov Elvin Saleh oglu**, namely an abraded and secondarily infected wound of the anterior surface of the right knee-joint region accompanied by crushing of the soft tissues, was caused by the impact of a hard blunt object. Since the injury did not cause impairment of health, its degree of severity was not determined.

According to forensic medical expert opinion No. 83 dated 5 February 2024, **Aliyev Seymur Ziraddin oglu** was diagnosed with crushing of the soft tissues of the right upper-arm region. The injury was caused by the impact of a hard blunt object. Since it did not cause impairment of health, its degree of severity was not determined.

According to forensic medical expert opinion No. 164 dated 8 February 2024, the injuries sustained by **Aslanov Sakit Yusif oglu**, namely blast trauma; vegetative vascular instability following closed craniocerebral trauma and concussion of the brain; bilateral chronic cochlear neuritis; bilateral sensorineural hearing loss with perception of whispered speech at a distance of five metres in both ears; a healed skin scar following primary surgical treatment of a penetrating gunshot wound of the right shoulder region that did not enter the thoracic cavity and was accompanied by fractures of the right sixth and seventh ribs and contusion of the upper lobe of the right lung; slightly healed fractures; and healed skin scars on the anterior surface of the right forearm, were caused partly by a firearm shot and partly by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1479 dated 11 April 2024, the injuries sustained by **Ahmadov Ilkin Rovshan oglu**, namely multiple blind wounds of the soft tissues of the left temporal region, left buttock, posteromedial surface of the lower third of the right thigh, anterolateral surface of the left lower leg and posteromedial surface of the right lower leg; and a metallic foreign object in the left temporal region, were caused by primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

Page 674

According to forensic medical expert opinion No. 1793 dated 11 October 2023, the injuries found on **Najafov Kamran Jeyhun oglu**, namely a blind shrapnel wound of the soft tissues of the right side of the neck, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1845 dated 6 December 2023, the injury sustained by **Amirli Fazil Zafar oglu**, namely a blind shrapnel wound of the left lower leg, was caused by fragments generated during the explosion of a projectile. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1783 dated 11 October 2023, the injuries found on **Shukurlu Khalid Alishan oglu**, namely a blind shrapnel wound of the soft tissues of the anterior surface of the left half of the chest that did not penetrate the cavity, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 866 dated 28 September 2023, the injuries found on **Aliyev Muslim Mehdi oglu**, namely a blind wound of the right upper-arm region accompanied by a metallic foreign object in the soft tissues, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1789 dated 11 October 2023, the injury found on **Zabitov Tale Nuraddin oglu**, namely a penetrating gunshot wound of the soft tissues of the left upper arm, was caused by a firearm shot. Both collectively and separately, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 165 dated 8 February 2024, the injuries sustained by **Khalilov Khazar Asgar oglu**, namely blast trauma; vegetative vascular instability following closed craniocerebral trauma and concussion of the brain; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain; secondary repair of post-traumatic perforation of the left tympanic membrane; bilateral

chronic tubootitis; bilateral conductive hearing loss; and perception of whispered speech at a distance of five metres in both ears, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 163 dated 8 February 2024, the injuries sustained by **Allahverdiyev Tahir Ayaz oglu**, namely blast trauma; a healed skin scar following a shrapnel wound of the soft tissues of the left side of the chest; and a metallic foreign object—fragment—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 162 dated 8 February 2024, the injury sustained by **Abdulkarimov Khagani Atraf oglu**, namely a healed skin scar following a tangential gunshot wound of the upper third of the left thigh, was caused by a firearm shot. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 150 dated 11 March 2024, abrasions of the parietal and occipital regions were found on **Zeynalov Elshan Adil oglu**. The injuries, both separately and collectively, caused short-term impairment of health and were therefore classified as minor harm to health.

Page 675

According to forensic medical expert opinion No. 151 dated 11 March 2024, the injuries found on **Guliyev Elmaddin Imran oglu** as a result of blast trauma, namely closed craniocerebral trauma; concussion of the brain; a lacerated wound of the left half of the right parietal region; contused abrasions of both knee regions; crushing of the soft tissues of the right shoulder girdle; traumatic perforation of the right tympanic membrane; and bilateral acute cochlear neuritis, were caused by fragments generated during the explosion. Since the injuries caused short-term impairment of health, they were classified as minor harm to health.

According to forensic medical expert opinion No. 24 dated 31 January 2024, the injuries sustained by **Gulmammadov Vurgun Fagan oglu**, namely open comminuted displaced fractures of the upper third of the left femur, were caused by a firearm shot fired from a long distance in an anterior-to-posterior direction. The injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 69 dated 1 February 2024, the injuries sustained by **Babayev Ulvi Fizuli oglu**, namely thermal burns of the face, forehead, both hands, both forearms and the right lower extremity, covering 14% of the body surface, including 5% first-, second-, third-A- and third-B-degree burns; multiple blind shrapnel wounds of the right lower extremity; closed craniocerebral trauma; concussion of the brain; and bilateral acute cochlear neuritis, were caused by the blast wave, multiple fragments and

flame generated during an explosion. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 80 dated 1 February 2024, the injury sustained by **Gozalli Isgandar Yadigar oglu**, namely barotrauma resulting in pain in the head region, was caused by the blast wave generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1450 dated 27 March 2024, the injuries sustained by **Huseynov Murad Zulfali oglu**, namely multiple blind wounds of the soft tissues of the right knee region, were caused by primary and blunt-force secondary fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 719 dated 24 April 2024, the injuries sustained by **Khalilov Maharram Natig oglu**, namely traumatic amputation of the middle third of the right lower leg resulting from blast trauma; multiple penetrating and blind shrapnel wounds of both upper extremities and the right lower extremity; the condition following primary surgical treatment of the wounds; a stump and healed skin scars following amputation of the right lower leg at the level of its upper third; open craniocerebral trauma sustained as a result of blast trauma; haemorrhagic contusion of the right temporal lobe of the brain; subarachnoid haemorrhage; the condition following primary surgical treatment of blind shrapnel wounds of the right temporal-frontal region; the condition following right-sided acute cochlear neuritis; and metallic foreign objects—fragments—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 51 dated 1 March 2024, the injuries sustained by **Valiyev Vugar Mirza oglu**, namely blunt trauma to the left shoulder region complicated by bursitis of the subdeltoid and subcoracoid bursae and accompanied by temporary impairment of the function of the left upper extremity; abrasions of the left shoulder and right thigh regions; and closed craniocerebral trauma accompanied by concussion of the brain, were caused partly by blunt impact and partly by the blast wave.

The blunt trauma to the left shoulder region complicated by bursitis of the subdeltoid and subcoracoid bursae and accompanied by temporary impairment of the function of the left upper extremity, as well as the abrasions of the left shoulder and right thigh regions, were caused by a hard blunt object. According to their degree, these injuries were classified overall as less grievous harm to health causing prolonged impairment of health. The closed craniocerebral trauma accompanied by concussion of the brain

was caused by the blast wave generated during the explosion of a firearm projectile. According to its degree, it was classified as minor harm to health.

According to forensic medical expert opinion No. 720 dated 24 April 2024, the injuries sustained by **Ahmadli Babak Tofig oglu**, namely the condition following primary surgical treatment and immobilisation of wounds caused by a blind shrapnel injury to the left cheek accompanied by a bone defect and fracture of the lower border of the mandibular body in the mental region; blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain; and the condition following right-sided acute cochlear neuritis caused by blast trauma, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 2175 dated 29 November 2023, the injuries sustained by **Nahmatzada Elvar Murad oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain and a lacerated wound of the right lower leg, were caused by the impact of a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 2174 dated 30 November 2023, the injuries sustained by **Abasov Anar Aydin oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain and barotrauma of the left ear accompanied by left-sided acute cochlear neuritis, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 723 dated 24 April 2024, the injuries sustained by **Turabov Zamiq Zabit oglu**, namely blast trauma and the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 686-A dated 5 April 2024, the injuries sustained by **Abbasov Ibrahim Ayaz oglu**, namely penetrating gunshot wounds of the middle third of the left lower leg accompanied by a large bone and soft-tissue defect, and penetrating gunshot wounds of the upper third of the right thigh, were caused by firearm shots. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 135 dated 8 February 2024, the injuries sustained by **Hasanli Sarvan Alizamin oglu**, namely the condition following primary surgical treatment of a penetrating gunshot wound of the right foot accompanied by an open comminuted displaced fracture of the distal third of the first metatarsal bone, and the condition following immobilisation of the right foot with a plaster splint, were caused by a

firearm shot. Since the injuries resulted in prolonged impairment of health, they were classified as less grievous harm to health.

According to forensic medical expert opinion No. 137 dated 8 February 2024, the injuries sustained by **Teymurov Nicat Elchin oglu**, namely closed craniocerebral trauma; the condition following chronic neuritis; and perforation of the left tympanic membrane, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 136 dated 8 February 2024, the injury sustained by **Rzayev Ayaz Ali-pasha oglu**, namely a blind shrapnel wound of the right side of the face, was caused by primary

or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 134 dated 8 February 2024, the injury sustained by **Jabbarov Nizami Adil oglu**, namely a sprain of the left radiocarpal ligament, was caused by the impact of a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 138 dated 8 February 2024, the injuries sustained by **Khalilzada Tamerlan Elman oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; barotrauma; and traumatic perforation of the right tympanic membrane, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 139 dated 8 February 2024, the injuries sustained by **Verdiyev Bakhtiyar Vidadi oglu**, namely healed skin scars following shrapnel wounds of the upper third of the right thigh and the middle third of the right lower leg, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 140 dated 8 February 2024, the injuries sustained by **Ibrahimli Parviz Shamshir oglu**, namely a healed skin scar following a blind shrapnel wound of the left hand and a metallic foreign object—fragment—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 147 dated 8 February 2024, the injuries sustained by **Safarov Ruzi Sadi oglu**, namely blast trauma; the condition following bilateral acute cochlear neuritis; and the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 141 dated 8 February 2024, the injuries sustained by **Musayev Orkhan Ramiz oglu**, namely a firearm wound; the condition following closed craniocerebral trauma and concussion of the brain; barotrauma; the condition following a gunshot wound of the nose; the condition following primary surgical treatment of wounds; the condition following a comminuted displaced fracture of one-third of the bony tissues of the nose; healed skin scars of the soft tissues of the nose and left infraorbital region; and a scar on the lower eyelid of the left eye, were caused partly by a firearm shot and partly by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 142 dated 8 February 2024, the injury sustained by **Nabiyev Sarvar Adalat oglu**, namely a shrapnel wound of the right elbow region, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 143 dated 8 February 2024, the injuries sustained by **Shahmarov Mahammad Vugar oglu**, namely blast trauma; a wound of both hands, the right thigh, the second and third fingers of the left hand and the posterior surface of the second finger of the right hand accompanied by a soft-tissue defect and a blind shrapnel wound accompanied by a slightly displaced open fracture of the middle phalanx; the condition following primary surgical treatment of the wounds; secondary

surgical treatment of the wounds; secondary surgical closure of the gunshot wound; the condition following immobilisation of the right hand with a plaster splint; a partially united fracture following surgery; metallic foreign objects—fragments—in the soft tissues; contracture of the second finger; blast trauma; post-traumatic perforation of both tympanic membranes; the condition following bilateral acute cochlear neuritis; the condition following closed craniocerebral trauma and concussion of the brain sustained as a result of blast trauma; and astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain, were caused partly by firearm shots and partly by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 148 dated 8 February 2024, the injury sustained by **Bukavadza Chakir Ruslan oglu**, namely a penetrating shrapnel wound of the fifth toe region of the right foot, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 149 dated 8 February 2024, the injury sustained by **Guliyev Javad Rovshan oglu**, namely a tangential firearm wound of the medial surface of the lower third of the left thigh sustained as a result of blast trauma, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 150 dated 8 February 2024, the injury sustained by **Nuriyev Aliqismat Vahid oglu**, namely a firearm wound of the lower third of the left thigh accompanied by a foreign object—a bullet—was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 151 dated 8 February 2024, the injuries sustained by **Nabiyev Emil Shaban oglu**, namely blast trauma; an infected wound and pain syndrome following primary surgical treatment of a blind shrapnel wound of the soft tissues at the level of the C6 vertebra; and the condition following closed craniocerebral trauma and concussion of the brain, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 145 dated 8 February 2024, the injuries sustained by **Sadigov Elmir Ali oglu**, namely closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 144 dated 8 February 2024, the injuries sustained by **Mehdizada Javid Mahammadali oglu**, namely blast trauma; closed craniocerebral trauma; the condition following concussion of the brain; and the condition following bilateral acute cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 146 dated 8 February 2024, the injuries sustained by **Aghazada Ravan Huseyn oglu**, namely a penetrating shrapnel wound of the right shoulder-girdle region and a blind shrapnel wound of the right frontal region, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1889 dated 17 October 2023, the injuries found on **Sirajli Ramil Fazmil oglu**, namely a wound of the left shoulder; fractures of the left fourth, fifth, sixth, seventh and eighth ribs accompanied by a wound of the left side of the chest penetrating the thoracic cavity; penetrating gunshot wounds of the soft tissues of the middle third of the left thigh; an abraded wound of the right auricle; and closed craniocerebral trauma accompanied by concussion of the brain, were caused partly by firearm shots, partly by the impact of a hard blunt object, and partly by the blast wave generated by the explosion of a projectile possessing explosive properties.

Both collectively and separately, the injuries were classified as grievous harm to health causing impairment of health. Separately, the gunshot wound of the thigh was classified as minor harm to health; the gunshot wound penetrating the cavity of the left side of the chest was classified as grievous harm to health; and, since the abraded wound of the right auricle did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 184 dated 9 February 2024, the injuries found on **Safarov Rusif Namaz oglu**, namely displaced fractures of the left third, fifth, sixth and seventh ribs; a penetrating gunshot wound of the left side of the chest accompanied by haemopneumothorax; and a tangential shrapnel wound of the soft tissues of the submandibular region, were caused respectively by a firearm shot and by the blast wave generated by the explosion of a bullet possessing explosive properties. The injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 1798 dated 11 December 2023, the injuries sustained by **Ganbarov Ibrahim Ilham oglu**, namely closed craniocerebral trauma accompanied by a blind shrapnel wound of the soft tissues of the right temporal region and concussion of the brain; and multiple blind shrapnel wounds of the soft tissues of the second finger of the left hand, the left thigh and the left lower leg, were caused by fragments generated during the explosion of a projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 186 dated 9 February 2024, the injuries sustained by **Karimov Turan Abasat oglu**, namely blast trauma; the condition following primary surgical treatment of wounds caused by a blind shrapnel injury to the right lumbar region, the posterior surface of the lower third of the left thigh and the external surface of the right testicle; the condition following right-sided orchiectomy; the condition following removal of the left testicle; closed craniocerebral trauma; concussion of the brain; mild post-haemorrhagic anaemia; the condition following left-sided acute cochlear neuritis; and an acute stress reaction accompanied by mild asthenia, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 187 dated 9 February 2024, the injuries sustained by **Hasanov Khalid Musa oglu**, namely closed craniocerebral trauma; crushing of the soft tissues of the frontal region; and penetrating and blind shrapnel wounds of the right thigh, both lower legs and the left foot, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 190 dated 9 February 2024, the injuries sustained by **Jumayev Intigam Saadaddin oglu** as a result of blast trauma, namely injury to the left upper extremity, brachial artery and ulnar artery; contusion of the ulnar and median nerves; an open displaced fracture of the first metacarpal bone of the left hand; rupture of the flexor tendons of the third finger; complete traumatic amputation of the fourth finger; traumatic amputation of the fifth finger at the level of the proximal phalanx; and blind shrapnel wounds of the left frontal and left cheek regions

Page 680

for which primary surgical treatment of the wounds, nerve revision and decompression, restoration of the integrity of the brachial artery, autovenous reconstruction of the ulnar artery, formation of stumps of the fourth and fifth fingers, immobilisation of the left hand with a posterior plaster splint, revision of the ulnar and median nerves of the left forearm, restoration of the flexor tendon of the third finger, formation of stumps of the fourth and fifth fingers, secondary surgical treatment of the wounds and surgery were performed; as well as the condition following conservative treatment for closed craniocerebral trauma, concussion of the brain, bilateral acute cochlear neuritis and bilateral haemotympanum, and metallic foreign objects—fragments—in the soft tissues of the left frontal region, left cheek region and left upper extremity, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 189 dated 9 February 2024, the injuries sustained by **Jalilov Vagif Javanshir oglu**, namely blast trauma and pain syndrome following a sprain of the ligaments of the right ankle joint, were caused by blunt trauma, specifically by the impact of a hard blunt object on the injured region or by the injured region striking such an object. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1774 dated 11 October 2023, the injuries found on **Abbasov Nurlan Ruslan oglu**, namely blind shrapnel wounds of the middle third of the left lower leg, the right thigh and lower-leg regions, and the soft tissues of the right half of the chest, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 654 dated 26 December 2023, the injury sustained by **Miriyev Surat Vali oglu**, namely a penetrating wound of the soft tissues of the submandibular region, was caused by a bullet fired from a firearm. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1452 dated 27 March 2024, the injuries sustained by **Hasanov Yusif Elshan oglu**, namely laparotomy; haemoperitoneum—accumulation of free blood in the abdominal cavity; a haematoma in the right retroperitoneal region; injury to the right iliopsoas muscle; injury to the small intestine and its mesentery; injury to the serous membrane and mesentery of the sigmoid colon; and an entry wound in the right lumbar region accompanied by damage to the serous membrane of the rectum, with an exit wound in the right hip region positioned somewhat lateral to the iliac crest, resulting in a penetrating wound of the abdominal cavity and retroperitoneal region; as well as multiple blind wounds of the soft tissues of the right axillary region, right upper arm, right elbow, right supraclavicular region, right scapular region, right lumbar region and left thigh, were caused partly by a bullet fired from a firearm and partly by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as grievous harm to health causing prolonged impairment of health.

According to forensic medical expert opinion No. 1784 dated 11 October 2023, the injuries found on **Gojayev Emin Anar oglu**, namely blind shrapnel wounds of the scapular region, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1822 dated 12 October 2023, the injuries found on **Guliyev Ramin Yurik oglu**, namely penetrating and blind shrapnel wounds of the soft tissues of the right thigh, both lower legs and left foot; closed craniocerebral trauma accompanied by concussion of the brain and crushing of the soft tissues of the frontal region, were caused by the explosion of a bullet possessing explosive properties

were caused by the blast wave generated during the explosion. According to their degree, the injuries were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 1829 dated 12 October 2023, the injuries found on **Jafarov Rasim Rza oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain and barotrauma of the left ear accompanied by left-sided acute cochlear neuritis, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified, both collectively and separately, as minor harm to health.

According to forensic medical expert opinion No. 648 dated 23 September 2023, the injuries found on the body of **Aliyev Heydar Tofig oglu**, namely a blind wound of the left

parietotemporal region accompanied by haemorrhagic contusion of the left temporal and parietal lobes of the brain, subarachnoid haemorrhage and oedema of the left cerebral hemisphere; metallic foreign objects in the soft tissues of the left temporal region; loss of the spleen; and a penetrating abdominal wound accompanied by intra-abdominal bleeding, damage to the spleen, stomach, small intestine and colon, were caused by the blast wave and primary and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1489 dated 11 April 2024, the injuries sustained by **Mammadli Ruslan Mehman oglu**, namely second-degree thermal burns of both wrists and the face; multiple blind wounds of the soft tissues of both hands and wrist regions, both lower legs and both thigh regions; and an open displaced fracture of the right tibia accompanied by injury to the tibial nerve, were caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1319 dated 20 October 2023, the injury found on **Huseynov Natig Rafail oglu**, namely a superficial wound on the anterior surface of the upper third of the left thigh caused by fragments generated during the explosion of military ammunition, did not cause impairment of health. Therefore, its degree of severity was not determined.

According to forensic medical expert opinion No. 631 dated 26 December 2023, the injury sustained by **Talibov Elgun Magsud oglu**, namely a penetrating wound of the soft tissues of the palmar surface of the right hand accompanied by temporary functional impairment, was caused by a bullet fired from a firearm. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 98 dated 2 February 2024, the injuries sustained by **Siripov Parviz Nadir oglu**, namely blind shrapnel wounds of the right lower leg and left upper arm, were caused by multiple fragments generated during an explosion. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 194 dated 2 February 2024, the injuries identified on the body of **Guliyev Agshin Ajdar oglu**, namely closed craniocerebral trauma and wounds of the left knee and left scapular regions, were caused by the impact of a hard blunt object. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 203 dated 3 February 2024, the injury identified on the body of **Alakbarov Sarkhan Ramiz oglu**, namely a dissociative-conversion disorder, was caused by the blast waves generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 724 dated 24 April 2024, the injury sustained by **Jabiyev Shahin Shakir oglu**, namely blast trauma and the condition following right-sided acute cochlear neuritis, was caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 725 dated 24 April 2024, the injury sustained by **Khosiyev Javid Hilal oglu**, namely blast trauma and the condition following left-sided acute cochlear neuritis, was caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 201 dated 9 February 2024, the injuries sustained by **Guliyev Amil Oktay oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 200 dated 9 February 2024, the injuries sustained by **Karimov Baylar Elsan oglu**, namely blast trauma and multiple shrapnel wounds of both lower extremities and the face, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 199 dated 9 February 2024, the injuries sustained by **Ahmadov Ruslan Etibar oglu**, namely blast trauma and healed skin scars following superficial shrapnel wounds of the left forearm and the posterior surface of the left hand, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 196 dated 9 February 2024, the injuries sustained by **Muradzada Ilkin Vasif oglu**, namely blast trauma and a shrapnel wound of the right lower extremity, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 195 dated 9 February 2024, the injuries sustained by **Safarov Parvin Ilyas oglu**, namely the condition following primary surgical treatment of a penetrating gunshot wound of the right foot accompanied by a marginal fracture of the base of the fifth metatarsal bone; blast trauma; and the condition following closed craniocerebral trauma and concussion of the brain, were caused partly by a firearm shot and partly by the blast wave generated by the explosion of a substance possessing

explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 194 dated 9 February 2024, the injuries sustained by **Mammadzada Elkhan Ilgar oglu**, namely barotrauma; closed craniocerebral trauma; concussion of the brain; blunt trauma to the left lumbar region; an abraded shrapnel wound of the right lumbar region; and a rupture of the intervertebral discs at the L4–L5 and L5–S1 levels, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

Page 683

According to forensic medical expert opinion No. 192 dated 9 February 2024, the injuries sustained by **Mehdizada Alisafa Aladdin oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; and the condition following right-sided acute cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 205 dated 9 February 2024, the injuries sustained by **Aliyev Rashad Gahraman oglu**, namely blast trauma; closed craniocerebral trauma; concussion of the brain; left-sided acute cochlear neuritis; and blind shrapnel wounds of the right eyelid and parietal region, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 191 dated 9 February 2024, the injury sustained by **Jabrayilov Zakir Karmulla oglu**, namely a penetrating gunshot wound of the soft tissues of the medial surface of the left foot, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1359 dated 20 October 2023, the injuries found on **Mammadov Seydimirzada Mirzamin oglu**, namely barotrauma; concussion of the brain; and an acute astheno-neurotic condition, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 320 dated 22 February 2024, the injuries sustained by **Galali Sirus Arzuman oglu**, namely abrasions of both lower legs, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 1357 dated 20 October 2023, the injuries found on **Isazada Kamal Kamil oglu**, namely barotrauma and an astheno-neurotic condition, were caused by the blast wave generated by the explosion of a bullet possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 328 dated 22 February 2024, the injuries sustained by **Alakbarov Ramil Elman oglu**, namely blast trauma and crushing of the soft tissues, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 898 dated 28 September 2023, the injury sustained by **Huseynov Vusal Vagif oglu**, namely a penetrating gunshot wound of the left thigh, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1771 dated 14 November 2023, the injury found on **Bakhshov Samir Telman oglu**, namely a penetrating gunshot wound of the posterior surface of the right foot accompanied by a soft-tissue defect and an open comminuted fracture of the proximal phalanx of the third toe, was caused by a firearm shot. According to its degree, the injury was classified as less grievous harm to health

Page 684

According to forensic medical expert opinion No. 317 dated 22 February 2024, the injury sustained by **Sadigov Ilyas Sadiq oglu**, namely crushing of the left parietal region and a blind shrapnel wound, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 318 dated 22 February 2024, the injury sustained by **Ahmadov Ahmad Ikhtiyar oglu**, namely a tangential gunshot wound of the left shoulder, was caused by a firearm shot. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 319 dated 22 February 2024, the injury sustained by **Gafarov Oruc Mahir oglu**, namely an abrasion of the posterior surface of the hand, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1741 dated 30 November 2023, the injuries found on **Mirzayev Farid Firayil oglu**, namely a penetrating gunshot wound of the soft tissues of the right thigh and shrapnel wounds of the soft tissues of the left upper arm and left

side of the lumbar region, were caused respectively by a firearm shot and by fragments generated by the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 316 dated 22 February 2024, the injury sustained by **Rahimov Oruc Mammadovich**, namely a tangential gunshot wound of the posterior surface of the middle third of the left lower leg, was caused by a firearm shot. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 867 dated 14 November 2023, the injury found on **Abbasov Eldar Aladdin oglu**, namely a blind wound of the right thigh accompanied by a metallic foreign object in the soft tissues, was caused by fragments generated during the explosion of a firearm projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1560 dated 20 October 2023, the injuries sustained by **Aliyev Ilgar Asif oglu**, namely a penetrating wound of the lower third of the right lower leg and blind shrapnel wounds of the upper third of the left thigh and the lateral surface of the left heel, were caused by fragments generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1361 dated 20 October 2023, the injuries found on **Mahmudov Marat Ramik oglu**, namely shrapnel wounds of both lower legs and the right lateral malleolus, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1846 dated 6 December 2023, the injuries sustained by **Jafarzada Amrah Shamil oglu**, namely blind shrapnel wounds of the soft tissues of both thighs and lower legs accompanied by metallic foreign objects—fragments—in the soft tissues, were caused by fragments generated during the explosion of a projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1632 dated 20 October 2023, the injury sustained by **Ibrahimov Eltaj Ramil oglu**, namely a blind shrapnel wound of the right side of the neck, was caused by fragments generated by the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

Page 685

According to forensic medical expert opinion No. 1564 dated 20 October 2023, the injuries sustained by **Ahmadov Samil Eldaniz oglu**, namely multiple wounds of the occipital region and the upper third of the left upper arm, and post-contusion syndrome, were caused by the

blast wave and fragments generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 726 dated 24 April 2024, the injuries sustained by **Tarverdiyev Nurlan Ruslan oglu**, namely an unhealed skin scar following primary surgical treatment of a shrapnel wound of the lower-middle third of the left forearm; a metallic foreign object—fragment—in the soft tissues; and pain syndrome, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1819 dated 27 October 2023, the injuries found on **Azizov Dunyamin Abdulla oglu**, namely a penetrating gunshot wound of the soft tissues of the left thigh and a blind gunshot wound of the right thigh, were caused by firearm shots. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1591 dated 20 October 2023, the injury sustained by **Balayev Nadir Ilgar oglu**, namely a penetrating wound of the soft tissues of the middle third of the right upper arm, was caused by a shot fired from a firearm loaded with a bullet cartridge. According to its degree, the injury was classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 727 dated 24 April 2024, the injuries sustained by **Suleymanli Rashad Rafil oglu**, namely blast trauma; a blind shrapnel wound of the soft tissues of the left lumbar region; the condition following primary surgical treatment of a tangential firearm wound of the plantar surface of the right heel; a healed skin scar; and metallic foreign objects—fragments—in the soft tissues, were caused partly by a firearm shot and partly by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1816 dated 27 October 2023, the injuries found on **Mustafayev Murad Rahim oglu**, namely blind shrapnel wounds of the right thigh and lower-leg regions accompanied by a displaced fracture of the shaft of the right tibia, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1776 dated 18 October 2023, the injuries found on **Allahyarov Ehtiram Ulfat oglu**, namely blind shrapnel wounds of the frontal and nasal regions of the face and the anterior surface of the upper third of the right forearm, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 166 dated 22 February 2024, the injury sustained by **Huseynov Famil Mubariz oglu**, namely the condition following contusion-related tinnitus, was caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1893 dated 13 November 2023, the injury found on **Najizada Togrul Farhad oglu**, namely a combined penetrating gunshot wound of the medial surface of the upper third of the right thigh and the soft tissues of the right buttock region

Page 686

was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1828 dated 31 October 2023, the injuries found on **Qasimov Ilgar Vugar oglu**, namely multiple blind shrapnel wounds of the facial region; bilateral corneal epitheliopathy accompanied by reduction of visual acuity to 0.4 in the right eye and 0.2 in the left eye; stromal oedema of the left cornea; hyphaema; conjunctival laceration; closed craniocerebral trauma accompanied by concussion of the brain; and an abrasion of the right shoulder region, were caused partly by fragments generated during the explosion of a projectile possessing explosive properties, partly by the blast wave and partly by the impact of a hard blunt object.

Separately, the shrapnel wounds were classified as minor harm to health; the bilateral corneal epitheliopathy accompanied by reduction of visual acuity to 0.4 in the right eye and 0.2 in the left eye, stromal oedema of the left cornea, hyphaema and conjunctival laceration were classified as less grievous harm to health; and, since the abrasion did not cause harm to health, its degree of severity was not determined. Overall, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 1775 dated 18 October 2023, the injuries found on **Mamizada Fakhri Rafiq oglu**, namely a penetrating gunshot wound of the left hand accompanied by a fracture of the body of the fourth metacarpal bone, and a tangential shrapnel wound of the posterior surface of the middle third of the right thigh, were caused respectively by a firearm shot and by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the shrapnel wound was classified as minor harm to health, while the gunshot wound was classified as grievous harm to health.

According to forensic medical expert opinion No. 1444 dated 13 March 2024, the injury sustained by **Karimov Elsevar Gulbala oglu**, namely a tangential wound of the soft tissues of the left lower-leg region, was caused by a bullet fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 169 dated 22 February 2024, the injury sustained by **Nuriyev Rovshan Galib oglu**, namely damage to the lateral ligaments of the left knee region, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 172 dated 22 February 2024, the injuries sustained by **Huseynov Aykhan Elkhanovich**, namely multiple abrasions of the face, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 208 dated 9 February 2024, the injuries sustained by **Osmanli Togrul Ramiz oglu**, namely blast trauma; healed skin scars following multiple shrapnel wounds of the upper thirds of both thighs; and metallic foreign objects—fragments—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 209 dated 9 February 2024, the injuries sustained by **Nabiyev Royal Hilal oglu**, namely blast trauma; the condition following left-sided acute cochlear neuritis; post-traumatic perforation of the left tympanic membrane; and the condition following closed craniocerebral trauma, were caused by the blast wave generated by the explosion of a substance possessing explosive properties

Page 687

including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 210 dated 9 February 2024, the injury sustained by **Qasimov Konsul Alovsat oglu**, namely tinnitus resulting from blast trauma, was caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 211 dated 9 February 2024, the injuries sustained by **Karimov Nusrat Huseynkhan oglu**, namely blast trauma, closed craniocerebral trauma and the condition following concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 207 dated 9 February 2024, the injuries sustained by **Azizov Aslan Mehdi oglu**, namely blast trauma; closed craniocerebral trauma; the condition following concussion of the brain; and a skin scar following a lacerated wound of the middle third of the right lower leg, were caused by primary or secondary fragments

generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 398 dated 1 March 2024, the injuries sustained by **Khanaliyev Alim Rahman oglu**, namely the condition following right-sided acute cochlear neuritis caused by barotrauma; a fully healed skin scar following a shrapnel wound of the right auricle; blast trauma; and a healed skin scar following primary surgical treatment of a shrapnel wound of the left anterior abdominal wall, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 416 dated 1 March 2024, the injuries sustained by **Mammadov Jamal Shafaddin oglu**, namely blast trauma; a blind shrapnel wound of the right thigh; the condition following primary surgical treatment of wounds caused by an open comminuted displaced fracture of the upper third of the femoral shaft; a healing fracture following intramedullary pin osteosynthesis of the femur; an unretrieved metal fixation device; barotrauma; bilateral chronic cochlear neuritis; post-traumatic subtotal perforation of the right tympanic membrane; secondary repair of the left tympanic membrane; bilateral sensorineural hearing loss; and perception of whispered speech at a distance of four metres in the left ear and five metres in the right ear, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 95 dated 21 February 2024, the injuries sustained by **Ismayilov Gahraman Bahram oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; elastic skin following first- and second-degree thermal burns of the face, left half of the chest, lateral surface of the right upper arm and medial surface of the right forearm; and traumatic perforation of both tympanic membranes, were sustained on 19 September 2023 as a result of an explosion and fire. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 78 dated 16 February 2024, the injuries sustained by **Garaxanov Radim Sahismayil oglu**, namely closed craniocerebral trauma; vegetative vascular instability following concussion of the brain; and healed skin scars following shrapnel wounds of the upper thirds of both thighs, with metallic foreign objects—fragments—in the soft tissues, together with the condition following right-sided acute cochlear neuritis, were caused on 19 September 2023 by the combined effects of an explosion, fire and the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 415 dated 1 March 2024, the injuries sustained by **Hasanov Aslan Aziz oglu**, namely blast trauma; a healed skin scar following primary surgical treatment of a blind shrapnel wound of the left knee-joint region; and a metallic foreign object—fragment—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 435 dated 1 March 2024, the injuries sustained by **Ahmadov Omar Rashid oglu**, namely blast trauma and post-traumatic perforation of both tympanic membranes, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 426 dated 1 March 2024, the injuries sustained by **Azimov Tural Nurulla oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; traumatic perforation of both tympanic membranes; subconjunctival haemorrhage in the right eye; and visual acuity of 0.8, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 313 dated 22 February 2024, the injury sustained by **Guliyev Vugar Murad oglu**, namely an epithelialising wound following a tangential firearm wound of the soft tissues of the left lumbar region, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 327 dated 22 February 2024, the injury sustained by **Yusifov Rauf Namiq oglu**, namely blunt trauma to the left shoulder-girdle region accompanied by a subcutaneous haematoma, was caused by a hard blunt object striking either the injured region or the injured region striking such an object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 312 dated 22 February 2024, the injuries sustained by **Asgarzada Abdulla Akif oglu**, namely blast trauma; right-sided chronic cochlear neuritis; right-sided sensorineural hearing loss; and perception of whispered speech at a distance of five metres in the right ear and one metre in the left ear, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 311 dated 22 February 2024, the injuries sustained by **Rustamov Nemat Adalat oglu**, namely a healed skin scar following a penetrating gunshot wound of the soft tissues of the middle third of the left thigh and contracture of the left knee joint, were caused by a firearm shot. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1888 dated 31 October 2023, the injuries found on **Qasimov Kanan Kazim oglu**, namely blind shrapnel wounds of the soft tissues of the left cheek, left wrist, left thigh and lumbar region, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

Page 689

According to forensic medical expert opinion No. 869 dated 14 November 2023, the injury found on **Jafarli Ali Shohrat oglu**, namely a penetrating wound of the soft tissues of the right thigh, was caused by fragments generated during the explosion of a firearm projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1782 dated 18 October 2023, the injuries found on **Ismayilov Rustam Nazim oglu**, namely a penetrating gunshot wound of the soft tissues of the left foot caused by a firearm shot; barotrauma of the left ear accompanied by left-sided acute cochlear neuritis; and closed craniocerebral trauma accompanied by concussion of the brain, were caused partly by a firearm shot and partly by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 287 dated 28 March 2024, the injuries sustained by **Aliyev Samiq Hummat oglu**, namely blast trauma; vegetative vascular dystonia following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 171 dated 22 February 2024, the injury sustained by **Sabirzada Madat Sabir oglu**, namely a tangential firearm wound of the left hip region, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 382 dated 23 February 2024, the injuries sustained by **Aghayev Giray Asadulla oglu**, namely a firearm wound; vegetative vascular instability following closed craniocerebral trauma and concussion of the brain; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain caused by a firearm wound; a penetrating shrapnel wound of the left half of the chest that did not enter the thoracic cavity and was accompanied by a fracture of the sixth rib; the condition following primary surgical treatment of the wound; a healed skin scar; a metallic foreign object—fragment—in the soft tissues; and a partially healed fracture of the left sixth rib, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 285 dated 22 February 2024, the injuries sustained by **Jafarov Emil Yusif oglu**, namely blast trauma; the condition following primary surgical treatment of a lacerated wound of the upper third of the right thigh; a healed skin scar following a shrapnel wound of the right parietal region; and tinnitus, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health causing short-term impairment of health.

According to forensic medical expert opinion No. 368 dated 26 February 2024, the injury sustained by **Zeynalov Nurlan Ilham oglu**, namely a sprain of the ligaments of the right ankle joint accompanied by reactive oedema, was caused by a hard blunt object striking either the injured region or the injured region striking such an object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 168 dated 22 February 2024, the injury sustained by **Habibli Mahammad Ramil oglu**, namely a tangential firearm wound of the posterior surface of the middle third of the right upper arm, was caused by a firearm shot

was caused by a firearm shot. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1583 dated 20 October 2023, the injury sustained by **Atayev Mammagdaghi Jamil oglu**, namely right-sided acute cochlear neuritis resulting from barotrauma, was caused by the blast wave generated during the explosion of a firearm projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 71 dated 10 February 2024, the injuries sustained by **Karimov Ulvi Telman oglu**, namely wounds of the anterior surface of the upper third of the right thigh and the lateral surface of the upper third of the left thigh, were caused by firearm shots. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 78 dated 3 March 2024, the injuries sustained by **Israyilov Ilham Ramzi oglu**, namely wounds of the lateral surface of the right knee joint, the right thigh and the lateral surface of the left heel joint, were caused by fragments of an explosive substance. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 800 dated 1 November 2023, the injury sustained by **Khalilov Rovshan Elkhan oglu**, namely a wound of the left foot accompanied by an open comminuted displaced fracture of the proximal phalanx of the first toe, was caused by a bullet fired from a firearm. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 182 dated 9 February 2024, the injuries sustained by **Valiyev Mahammad Teyyub oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; the condition following left-sided acute cochlear neuritis; and a skin scar following a lacerated wound of the middle third of the right lower leg, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1633 dated 20 October 2023, the injuries sustained by **Farzaliyev Orkhan Gadimali oglu**, namely penetrating gunshot wounds of the left hand and the upper third of the left thigh, were caused by firearm shots. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1803 dated 8 December 2023, the injuries sustained by **Gubadov Arif Ilkin oglu**, namely a penetrating gunshot wound of the right ankle joint accompanied by an open comminuted slightly displaced fracture of the right talus; and tangential shrapnel wounds of the right axillary region and right scapular region, were caused respectively by a firearm shot and by fragments generated during the explosion of a projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 872 dated 14 November 2023, the injuries found on **Mehdiyev Mahir Gabil oglu**, namely blind wounds of the soft tissues of the left shoulder girdle, upper arm, thigh and lower leg, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 212 dated 9 February 2024, the injuries sustained by **Mehdiyev Emil Emin oglu**, namely a firearm wound; displaced fracture of the middle third of the right femur; slightly displaced fracture of the fifth metacarpal bone of the right hand; the condition following osteosynthesis of the right femur using the Ilizarov method and immobilisation of the right hand with a plaster splint; a partially united fracture of the fifth metacarpal bone; a healing fracture of the femur; and metallic foreign objects—fragments—in the soft tissues

Page 691

were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 213 dated 9 February 2024, the injuries sustained by **Azimov Sadiq Vugar oglu**, namely the condition following post-traumatic neuropathy of the left tibial nerve; blast trauma; a non-healing skin scar following a shrapnel wound of the posterior surface of the upper third of the left thigh; and pain syndrome, were

caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 214 dated 9 February 2024, the injuries sustained by **Rasulov Togrul Teymur oglu**, namely blunt trauma to the scapular region accompanied by a subcutaneous haematoma, were caused by a hard blunt object striking either the injured region or the injured region striking such an object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 215 dated 9 February 2024, the injury sustained by **Hasanli Imran Elman oglu**, namely a blind shrapnel wound of the upper third of the right upper arm, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 428 dated 1 March 2024, the injuries sustained by **Taghiyev Farhad Fikrat oglu**, namely the condition following closed craniocerebral trauma and concussion of the brain sustained as a result of a blast injury; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain; barotrauma resulting in dry perforation of the right tympanic membrane; secondary repair of perforation of the left tympanic membrane; right-sided chronic cochlear neuritis; right-sided mixed hearing loss; perception of whispered speech at a distance of four metres in the right ear and six metres in the left ear; blast trauma; first-, second- and third-A-degree thermal burns of the lumbar region covering four percent of the body surface; and healed fractures and moderate contracture following primary surgical treatment of blind shrapnel wounds to various parts of the body, including an open comminuted displaced fracture of the distal end of the fifth metacarpal bone of the right hand and an open comminuted displaced fracture of the proximal phalanx of the fifth finger, together with immobilisation of the right hand in a plaster cast, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave, and by local exposure to high temperature. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 419 dated 1 March 2024, the injuries sustained by **Zeynalov Nahid Sahib oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; post-traumatic perforation of both tympanic membranes; and an infected wound of the middle third of the anterior surface of the right lower leg following a shrapnel wound, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 393 dated 1 March 2024, the injuries sustained by **Zeynalov Farid Zahid oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; a healing wound following thermal

burns of the first, second and third fingers of the left hand; and the condition following left-sided acute cochlear neuritis…

Page 692

…were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave and local exposure to high temperature. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 92 dated 21 February 2024, the injuries sustained by **Kamilov Afgan Hafiz oglu**, namely healed scars following burns to the left forehead region and shrapnel wounds of the lower eyelid of the left eye; closed craniocerebral trauma; vegetative vascular instability following concussion of the brain; left-sided chronic cochlear neuritis; left-sided sensorineural hearing loss; and perception of whispered speech at a distance of two metres in the left ear and six metres in the right ear, were sustained on 19 September 2023 as a result of an explosion, fire and the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 423 dated 1 March 2024, the injuries sustained by **Korogluyev Mayis Aydinbay oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; barotrauma; bilateral chronic cochlear neuritis; secondary repair of the left tympanic membrane; bilateral sensorineural hearing loss; perception of whispered speech at a distance of 5.5 metres in the right ear and five metres in the left ear; and a healed skin scar following shrapnel wounds of the lateral surface of the left thigh and the middle third of the right lower leg, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 410 dated 1 March 2024, the injuries sustained by **Safarov Nurlan Mahammad oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; vegetative vascular instability; barotrauma; post-traumatic subtotal perforation of the left tympanic membrane; post-traumatic retraction of the right tympanic membrane; left-sided chronic cochlear neuritis; left-sided mixed and right-sided conductive hearing loss; and perception of whispered speech at a distance of three metres in the left ear and five metres in the right ear, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 403 dated 1 March 2024, the injuries sustained by **Safarguliyev Famil Faid oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; traumatic perforation of the right tympanic membrane; and traumatic retraction of the left tympanic membrane, were caused by

the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 427 dated 1 March 2024, the injuries sustained by **Alakbarov Abil Vugar oglu**, namely slight residual signs of compression-ischaemic neuropathy of the right femoral nerve; blast trauma; penetrating and blind shrapnel wounds of the right axillary region, left scapular region and right thigh; the condition following primary surgical treatment of an open non-displaced fracture of both branches of the right pubic bone; healing fractures; metallic foreign objects—fragments—in the soft tissues; simple myopic astigmatism of both eyes resulting in visual acuity reduced to 0.8 and corrected to 1.0; and somatoform astheno-neurotic manifestations, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 402 dated 1 March 2024, the injuries sustained by **Nadirshahov Elshan Sarkar oglu**, namely blast trauma and post-traumatic dry perforation of the right tympanic membrane

Page 693

post-traumatic dry perforation of the right tympanic membrane; secondary repair of the left tympanic membrane; bilateral chronic cochlear neuritis; right-sided mixed hearing loss and left-sided sensorineural hearing loss; perception of whispered speech at a distance of four metres in the right ear and five metres in the left ear; a skin scar on the right side of the neck; and a metallic foreign object—fragment—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 394 dated 1 March 2024, the injury sustained by **Samadov Firuz Mushfig oglu**, namely a healed skin scar following a shrapnel wound of the lower third of the left thigh, was caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 407 dated 1 March 2024, the injuries sustained by **Kamilov Murad Famil oglu**, namely blast trauma; vegetative vascular instability following closed craniocerebral trauma and concussion of the brain; right-sided chronic cochlear neuritis; secondary post-traumatic repair of the right tympanic membrane; right-sided sensorineural hearing loss; and perception of whispered speech at a distance of four metres in the right ear and six metres in the left ear, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1567 dated 20 October 2023, the injuries sustained by **Ahmadov Anar Fazil oglu**, namely abrasions of the posterolateral surface of the chest, the left upper arm and the middle third of the right lower leg, were caused by the impact of a hard blunt object. Traumatic crushing of the right half of the chest and post-contusion syndrome—concussion syndrome—were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1802 dated 11 December 2023, the injuries sustained by **Mirzayev Ruslan Eyvaz oglu**, namely shrapnel wounds of the right forearm, right hand, right eyebrow region and right buttock region, were caused by fragments generated during the explosion of a projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 81 dated 18 February 2024, the injuries sustained by **Piriyev Elmaddin Elshan oglu**, namely open comminuted displaced fractures with bone defects of the proximal phalanx of the fourth finger and the middle phalanx of the fifth finger of the left hand; a broad wound with a soft-tissue defect on the posterior surface of the fifth finger; and a shrapnel wound of the soft tissues of the anterior surface of the left half of the chest, were caused by a firearm shot and by fragments generated during the explosion of an artillery projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1568 dated 20 October 2023, the injuries sustained by **Imanov Parvin Tabriz oglu**, namely crushing of the soft tissues of the right hip-joint region, sprain of the joint ligaments, and abrasions of the left lower leg and the second toe of the right foot, were caused by blunt trauma and the impact of a hard blunt object. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1736 dated 25 October 2023, the injuries found on **Alasgarli Asiman Ilgar oglu**, namely a penetrating wound of the right auricle; injury to the right lung; left-sided haemothorax; fractures of the left third rib, the sixth and seventh cervical vertebrae and the first thoracic vertebra; and a combined blind gunshot wound of the chest and abdominal cavities penetrating the thoracic cavity and accompanied by a metallic foreign object—a bullet—in the left pleural cavity, were caused by

at least two firearm shots. According to their degree, the gunshot wound of the chest was classified as grievous harm to health, while the gunshot wound of the right auricle was classified as minor harm to health.

According to forensic medical expert opinion No. 69 dated 18 February 2024, the injury sustained by **Eyvazli Ramazan Ramil oglu**, namely a blind shrapnel wound in the region of the middle phalangeal joint of the second finger of the right hand, was caused by fragments

generated during the explosion of an explosive firearm or artillery projectile. The injury was sustained on 19 September 2023 and, according to its degree, was classified as minor harm to health.

According to forensic medical expert opinion No. 104 dated 23 February 2024, the injuries sustained by **Karimov Narman Mahir oglu**, namely multiple firearm—shrapnel—wounds of the right buttock region and the right lower extremity, were caused by fragments generated during the explosion of an artillery projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1316 dated 20 October 2023, the injury sustained by **Karimov Sayaddin Seyfaddin oglu**, namely a superficial wound on the palmar surface of the distal phalanx of the third finger of the left hand, was caused by a sharp-pointed and/or sharp-edged object. The injury was sustained on 20 September 2023 and, since it did not cause impairment of health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1309 dated 20 October 2023, the injury sustained by **Mammadli Allahverdi Mammad oglu**, namely a superficial wound on the posterior surface of the right hand, was caused by a fragment generated during the explosion of military ammunition. Since the injury did not cause impairment of health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1811 dated 6 December 2023, the injuries sustained by **Hajiyev Ilgar Mahammad oglu**, namely blast trauma; closed craniocerebral trauma; concussion of the brain; and the condition following right-sided acute cochlear neuritis caused by blast trauma, were caused by the powerful blast wave generated during the explosion of a projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 310 dated 22 February 2024, the injury sustained by **Guliyev Vusal Alifagha oglu**, namely the condition following a penetrating firearm wound of the soft tissues of the right half of the abdomen that did not enter the cavity and a healed skin scar, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1597 dated 20 October 2023, the injuries sustained by **Rahimov Vusal Bahadur oglu**, namely a subcutaneous haematoma of the right lateral chest wall and left-sided sensorineural hearing loss, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1821 dated 27 October 2023, the injuries found on **Nas irov Mirsoltan Ali oglu**, namely blind shrapnel wounds of the left side of the face, left hand and right buttock region; a fracture of the left zygomatic bone; and barotrauma of the left ear accompanied by left-sided acute cochlear neuritis and perforation of the left

tympanic membrane, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 309 dated 22 February 2024, the injuries sustained by **Aliyev Ibrahim Bayram oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; barotrauma; and the condition following bilateral acute cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties

Page 695

and were classified overall as minor harm to health.

According to forensic medical expert opinion No. 308 dated 22 February 2024, the injuries sustained by **Suleymanov Mirmansum Mahmud oglu**, namely healed skin scars following primary surgical treatment of a blind shrapnel wound of the middle third of the left upper arm, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 307 dated 17 February 2024, the injuries sustained by **Hajiyev Taleh Telman oglu**, namely blast trauma; post-traumatic perforation of the left tympanic membrane; the condition following closed craniocerebral trauma and concussion of the brain; and a skin scar on the lower third of the left lower leg, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave, and by a firearm shot. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 306 dated 22 February 2024, the injuries sustained by **Suleymanov Rashad Zulfuqar oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; barotrauma; right-sided chronic cochlear neuritis; right-sided sensorineural hearing loss; and perception of whispered speech at a distance of one metre in the right ear and six metres in the left ear, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 81 dated 16 February 2024, the injuries sustained by **Karimov Fuad Fikrat oglu**, namely sprains of the right knee and right ankle regions, were caused by the blast wave on 19 September 2023. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 80 dated 16 February 2024, the injuries sustained by **Aydamirov Alifag Faig oglu**, namely a scar following a shrapnel wound of the occipital region; a moderately expressed acute stress reaction accompanied by mild asthenia;

nodular goitre in euthyroid form; tension-type headache; the condition following right-sided acute cochlear neuritis; unhealed skin scars following blind shrapnel wounds of the posterior surface of the right elbow joint, the lower third of the right forearm and the posterior surface of the second finger of the right hand; and healed skin scars following incised wounds of the anterior surface of the right elbow-joint region and the palmar surface of the right hand, were sustained on 19 September 2023 as a result of an explosion, fire and the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 401 dated 1 March 2024, the injuries sustained by **Namazov Elvin Shahriyar oglu**, namely an acute stress reaction resulting in recovery; blast trauma; secondary post-traumatic repair of the right tympanic membrane; normal perception of whispered speech at a distance of six metres in both ears; blast trauma; a healed skin scar following primary surgical treatment of blind shrapnel wounds of the lower third of the right forearm, the right lower leg and the left hand; and a metallic foreign object—fragment—in the soft tissues, were caused by primary or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 867-A dated 1 May 2024, the injury sustained by **Alakbarov Ramal Jamal oglu**, namely a penetrating gunshot wound accompanied by a fracture of the right ankle joint

Page 696

a penetrating firearm (bullet) wound resulting in a fracture of the right ankle joint, was caused by a shot fired from a firearm. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 94 dated 21 February 2024, the injuries sustained by **Ismayilov Samir Bakhtiyar oglu**, namely skin scars following wounds to the lateral surface of the upper third of the right upper arm and the middle third of the left lower leg; and blind shrapnel wounds of the anterior surface of the upper third of the right upper arm and the left lower-leg region, were sustained on 19 September 2023 as a result of an explosion, fire and blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 412 dated 1 March 2024, the injuries sustained by **Guliyev Azer Ibadat oglu**, namely blast trauma; vegetative vascular instability following closed craniocerebral trauma and concussion of the brain; bilateral chronic cochlear neuritis caused by blast trauma; bilateral sensorineural hearing loss; and perception of whispered speech at a distance of four metres in both ears, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 96 dated 21 February 2024, the injuries sustained by **Gurbanov Emil Dilgam oglu**, namely skin scars on the lower third of the left radiocarpal region and the lower third of the right lower leg, and the condition following left-sided acute cochlear neuritis caused by barotrauma, were sustained on 19 September 2023 as a result of an explosion and fire. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1501 dated 13 November 2023, the injuries sustained by **Huseynov Elgun Maris oglu**, namely one wound on the anterior surface of the upper third of the right lower leg and one wound on the medial surface of the upper third of the right lower leg, were caused by fragments generated during the explosion of a bullet possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1434 dated 27 March 2024, the injury sustained by **Hasanov Nurkhan Farman oglu**, namely a blind wound of the soft tissues of the left buttock region, was caused by primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1837 dated 5 December 2023, the injuries sustained by **Kazimov Aykhan Sadiq oglu**, namely blind shrapnel wounds of the soft tissues of the left half of the abdomen and of the upper third of the left forearm, were caused by fragments generated during the explosion of an explosive device. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1480 dated 11 April 2024, the injuries sustained by **Niyazov Raul Niyazi oglu**, namely a blind wound of the lower right side of the chest complicated by purulent reactive hydrocele; a metallic foreign object—fragment; and multiple blind wounds of the soft tissues of the left forearm, left upper arm, right upper arm, left thigh and groin regions, were caused by primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1332 dated 28 October 2023, the injury found on the body of **Alirzayev Ruslan Etibarovich**, namely a wound on the anterior surface of the upper third of the left upper arm, was caused by a fragment generated during the explosion of military ammunition. Since the injury did not cause impairment of health, its degree of severity was not determined.

Page 697

According to forensic medical expert opinion No. 1497 dated 11 April 2024, the injuries sustained by **Ahmadov Huseyn Adil oglu**, namely a penetrating wound of the right foot accompanied by a fracture of the distal phalanx of the first toe; a penetrating wound of the

right lower leg; blind bullet wounds of the soft tissues of both thigh regions; and blind wounds of the soft tissues of both thighs, were caused partly by fragments generated during the explosion of military ammunition possessing explosive properties and partly by bullets fired from a firearm. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1474 dated 8 April 2024, the injuries sustained by **Bayramov Gurban Nursadiq oglu**, namely a penetrating wound of the soft tissues of the left lower leg with the entry opening on the lateral surface of the upper third and the exit opening on the medial surface of the upper third; and stretching of the ligaments of the left ankle joint, were caused respectively by a bullet fired from a firearm and by the ligaments and muscles of the joint being stretched beyond their physiological limits—a sprain. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 129 dated 17 February 2024, the injuries sustained by **Zahidzada Farid Rovshan oglu**, namely blast trauma; a shrapnel wound of the left shoulder region; and a lacerated wound of the anterior abdominal wall, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 1508 dated 13 November 2023, the injuries sustained by **Shukurlu Eltun Tayyar oglu**, namely post-traumatic neuropathy of the right tibial nerve resulting in slight impairment of limb function; and penetrating wounds of the right knee and lower-leg region and the left lower-leg and ankle region, were caused by firearm shots. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 130 dated 17 February 2024, the injuries sustained by **Talibov Ali Ilham oglu**, namely blast trauma; a shrapnel wound of the first finger of the right hand; and a fracture of the distal phalanx of the third finger of the right hand, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1515 dated 13 November 2023, the injuries sustained by **Valiyev Elnur Aghakishi oglu**, namely multiple superficial shrapnel wounds of both lower and upper extremities, were caused by multiple fragments generated during the explosion of a bullet possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1577 dated 20 October 2023, the injury sustained by **Rahimov Orkhan Khagani oglu**, namely a penetrating shrapnel wound of the soft tissues of the middle third of the right forearm, was caused by fragments generated

during the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 170 dated 15 February 2024, the injuries sustained by **Abdullayev Orkhan Adil oglu**, namely a penetrating gunshot wound entering the thoracic cavity; fractures of the left fifth, sixth, seventh and eighth ribs; left-sided haemopneumothorax; a post-traumatic defect of the left side of the chest; and rupture of the left hemidiaphragm, were caused by firearm shots. The time of infliction corresponded to 19 September 2023 and, according to their degree, the injuries were classified overall as grievous harm to health.

Page 698

According to forensic medical expert opinion No. 44 dated 5 March 2024, the injuries identified on the body of **Pashazada Qasim Adil oglu** during the forensic medical examination, namely a blast wound and open multiple comminuted fractures of the bones of the lower leg at the level of the middle third of the left lower leg, were caused by one or more fragments during blast trauma. The injuries were inflicted on 19 September 2023 and, according to their degree, were classified as grievous harm to health.

According to forensic medical expert opinion No. 242 dated 9 February 2024, the injury sustained by **Javadzada Sirus Kamil oglu**, namely the condition following primary surgical treatment of a shrapnel wound of the upper third of the right lower leg, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 238 dated 9 February 2024, the injuries sustained by **Aghayev Nazim Habil oglu**, namely the condition following primary surgical treatment of a shrapnel wound of the lateral surface of the upper third of the left thigh, and reactive oedema of the left thigh, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 245 dated 9 February 2024, the injury sustained by **Mammadli Elyas Mammad oglu**, namely a tangential shrapnel wound of the lateral surface of the lower third of the right thigh, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 234 dated 9 February 2024, the injuries sustained by **Aliyev Togrul Hasanbala oglu**, namely a skin scar following a blind shrapnel wound of the soft tissues of both cheek regions and a metallic foreign object—fragment—still present, were caused by primary and/or secondary fragments generated by the explosion

of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 231 dated 9 February 2024, the injuries sustained by **Shahbazov Farid Valeh oglu**, namely the condition following primary surgical treatment of multiple shrapnel wounds of both hands and the right foot, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 259 dated 9 February 2024, the injuries sustained by **Hasanli Fariz Elshan oglu**, namely shrapnel wounds of the right half of the chest, the right upper arm and the right radiocarpal region, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 235 dated 9 February 2024, the injuries sustained by **Muradov Ahliyar Afqan oglu**, namely blast trauma; the condition following a penetrating shrapnel wound of the lower third of the right lower leg; the condition following closed craniocerebral trauma and concussion of the brain caused by blast trauma, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 232 dated 9 February 2024, the injury sustained by **Nas irov Joshgun Taghi oglu**, namely a firearm wound and an injury to the right foot

Page 699

the condition following primary surgical treatment of a penetrating gunshot wound was caused by a shot fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 414 dated 1 March 2024, the injuries sustained by **Rustamov Rustam Yavar oglu**, namely blast trauma; the condition following closed craniocerebral trauma; vegetative vascular instability resulting from concussion of the brain; barotrauma; and secondary repair of both tympanic membranes, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 400 dated 1 March 2024, the injuries sustained by **Guliyev Araz Nemat oglu**, namely blast trauma; post-traumatic dry perforation of the right tympanic membrane; right-sided chronic cochlear neuritis; right-sided mixed hearing loss, with whispered speech perceived at a distance of four metres in the right ear and

six metres in the left ear; and vegetative vascular dystonia following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 72 dated 16 February 2024, the injuries sustained by **Valiyev Fagan Adil oglu**, namely scars on the medial surface of the left forearm, the medial surface of the middle third of the left thigh, the dorsum of the right foot and the lateral surface of the upper third of the left upper arm, resulted from an explosion, fire and blast wave on 19 September 2023. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 82 dated 21 February 2024, the injury sustained by **Mutallibov Adalat Rahim oglu**, namely barotrauma of the left tympanic membrane, was caused by the blast wave on 19 September 2023. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 93 dated 21 February 2024, the injuries sustained by **Salimov Rafail Khanlarbay oglu**, namely closed craniocerebral trauma; the condition following concussion of the brain; and tinnitus, were caused by the blast wave on 19 September 2023. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1777 dated 11 October 2023, the injury found on **Rustamov Jeyhun Polad oglu**, namely a puncture wound of the anterior surface of the left knee-joint region, was caused by a piercing object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1499 dated 13 November 2023, the injury sustained by **Aliyev Mukhtar Namig oglu**, namely a blind gunshot wound of the thigh and lower-leg region of the right lower extremity, was caused by a firearm shot. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1601 dated 20 October 2023, the injury sustained by **Hasanov Izzat Ilgar oglu**, namely a penetrating gunshot wound of the anterior surface of the neck, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1461 dated 27 March 2024, the injuries sustained by **Alizada Ilkin Gorkhmaz oglu**, namely a penetrating wound of the soft tissues of the third finger of the right hand and multiple blind wounds of the soft tissues of the right buttock and right lower-leg regions, were caused by primary fragments and blunt-force secondary fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1580 dated 20 October 2023, the injuries sustained by **Isbandarov Elvin Anvar oglu**, namely one blind wound of the upper-lip region and a penetrating wound of the right half of the upper lip resulting in traumatic loss of the second tooth on the right side of the upper jaw, were caused by fragments generated during the explosion of a firearm projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1459 dated 11 April 2024, the injuries sustained by **Gubadov Aziz Ilgar oglu**, namely two penetrating wounds of the soft tissues of the right thigh, with the entrance openings located on the anterolateral surface of the middle third of the right thigh and the exit openings on the anteromedial surface of the middle third of the right thigh, were caused by bullets fired from a firearm. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1333 dated 20 October 2023, the injury sustained by **Mehdiyev Adam Rasim oglu**, namely a wound on the lateral surface of the middle third of the left thigh, was caused by a projectile—a bullet—fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1468 dated 8 April 2024, the injuries sustained by **Aliyev Altun Sabit oglu**, namely multiple blind wounds of the soft tissues of the forehead-parietal region, tongue, left elbow region, the middle and upper thirds of the left forearm and the medial surfaces of both thighs, as well as fractures of two incisors on the left side of the lower jaw, were caused by primary and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1565 dated 20 October 2023, the injuries sustained by **Hasanov Elyar Elbrus oglu**, namely a blind shrapnel wound of the left knee joint; an open displaced fracture of the medial condyle of the femur; and a retained metallic foreign object, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 182 dated 9 February 2024, the injuries sustained by **Ismayilli Elgun Eldar oglu**, namely a firearm injury; the condition following primary surgical treatment of a gunshot wound of the right temporal region; closed craniocerebral trauma; and the condition following concussion of the brain, were caused by a firearm shot, including the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 240 dated 9 February 2024, the injuries sustained by **Rustamov Adil Ali oglu**, namely blast trauma; blind shrapnel wounds of both upper and lower extremities; an open comminuted non-displaced fracture of the middle phalanx of the left little finger; the condition following primary surgical treatment of the wounds and immobilisation of the left lower extremity with a plaster splint; metallic foreign objects—fragments—in the soft tissues; and tinnitus, were caused by primary and secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 243 dated 9 February 2024, the injuries sustained by **Niyazli Rashid Murad oglu**, namely blast trauma; closed craniocerebral trauma; concussion of the brain; and the condition following bilateral cochlear neuritis, were caused by the explosion of a substance possessing explosive properties

Page 701

was caused by the blast wave. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 241 dated 9 February 2024, the injuries sustained by **Ahmadov Gardashkhan Osman oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; blunt trauma to the head resulting from blast trauma; the condition following a shrapnel wound of the right buttock region; and a foreign object—a metal fragment—in the soft tissues, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 251 dated 9 February 2024, the injuries sustained by **Ismayilov Jafar Firuddin oglu**, namely multiple shrapnel wounds of the upper third of the left upper arm and the left occipital region; open craniocerebral trauma; mild contusion of the left occipital lobe of the brain; the condition following a non-displaced fracture of the occipital bone; and a small foreign object—a metal fragment—in the occipital bone, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 236 dated 9 February 2024, the injuries sustained by **Shalanli Nijat Ilgar oglu**, namely a firearm injury; healed skin scars following shrapnel wounds of the middle third of the right lower leg and the upper third of the left lower leg; and foreign objects—metal fragments—in the soft tissues of both lower legs, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 246 dated 9 February 2024, the injuries sustained by **Omarov Yusif Valehovich**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; a fracture of the occipital bone; traumatic perforation of the left tympanic membrane; the condition following left-sided acute cochlear neuritis; a blind shrapnel wound of the left half of the neck; and a foreign object—a metal fragment—in the soft tissues, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 279 dated 22 February 2024, the injury sustained by **Musali Orkhan Gurban oglu**, namely abrasions of the left half of the face, did not cause harm to health; therefore, its degree of severity was not determined.

According to forensic medical expert opinion No. 278 dated 22 February 2024, the injuries sustained by **Yusifli Elgun Namig oglu**, namely left-sided chronic cochlear neuritis accompanied by residual signs following perforation of the tympanic membrane; bilateral chronic adhesive otitis media; left-sided sensorineural hearing loss; and perception of whispered speech at a distance of five metres in the left ear and six metres in the right ear, were caused by the blast wave generated by the explosion of a substance possessing explosive properties

Page 702

The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 265 dated 22 February 2024, the injuries sustained by **Adigozalov Telman Mehman oglu**, namely bilateral chronic cochlear neuritis accompanied by bilateral sensorineural hearing loss and perception of whispered speech at a distance of five metres in both ears, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 237 dated 6 March 2024, the injuries sustained by **Seyidli Vasif Karim oglu**, namely a large lacerated wound with a soft-tissue defect in the plantar region of the left foot; closed displaced fractures of the left medial malleolus and the lower third of the left tibia; a marginal fracture of the base of the fifth metatarsal bone of the left foot; dislocation of the foot at the Lisfranc joint; a second- to third-A-degree thermal burn covering one percent of the medial surface of the lower third of the right forearm; mild post-haemorrhagic anaemia; barotrauma; closed craniocerebral trauma; and contusion of the right testicle, were caused by multiple fragments, the blast wave and flame generated during an explosion. The injuries were sustained on 19 September 2023 and, according to their degree, were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 247 dated 8 February 2024, the injuries found on the body of **Aliyev Ariz Anar oglu**, namely a blind shrapnel wound of the lumbar region penetrating the abdominal cavity and accompanied by damage to the large intestine and a comminuted fracture of the right iliac and sacral bones; and a gunshot wound of the right lower leg accompanied by an open comminuted displaced fracture of the right tibia, were caused by a fragment generated during the explosion of an explosive projectile and by a firearm shot. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as grievous harm to health.

According to forensic medical expert opinion No. 91 dated 8 February 2024, the injury sustained by **Huseynov Vusal Sardar oglu**, namely a scar following a tangential shrapnel wound involving all three phalanges of the fourth finger of the right hand, was caused by fragments generated during the explosion of a projectile. The injury was sustained on 19 September 2023 and, according to its degree, was classified as minor harm to health.

According to forensic medical expert opinion No. 1773 dated 14 October 2023, the injuries found on **Sayilov Vurgun Aghazar oglu**, namely blind and penetrating shrapnel wounds of the left thigh, foot and lower leg, accompanied by an open comminuted displaced fracture of the lower third of the shaft of the left tibia, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 255 dated 9 February 2024, the injury sustained by **Karimov Nusrat Garay oglu**, namely one foreign object—a fragment—in the soft tissues of the proximal interphalangeal joint of the fifth finger of the left hand, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 258 dated 9 February 2024, the injuries sustained by **Balakhanli Ramin Vugar oglu**, namely lacerated wounds of the nose and right auricle, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 237 dated 9 February 2024, the injuries sustained by **Sadigov Taleh Ilham oglu**, namely blast trauma; the condition following left-sided acute cochlear neuritis; the condition following closed craniocerebral trauma

and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 159 dated 9 February 2024, the injuries sustained by **Zeynalov Avaz Alakbar oglu**, namely closed craniocerebral trauma and concussion of the brain, were caused by the blast wave and blunt impact generated during an explosion. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 169 dated 13 February 2024, the injury sustained by **Allahverdiyev Amal Parviz oglu**, namely right-sided acute cochlear neuritis, was caused by the blast wave generated during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1772 dated 14 November 2023, the injuries found on **Jafarov Turkan Gulagha oglu**, namely concussion of the brain resulting in astheno-neurotic manifestations and closed craniocerebral trauma, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 305 dated 22 February 2024, the injury sustained by **Guliyev Asgar Nughay oglu**, namely a healed skin scar following primary surgical treatment of a tangential gunshot wound of the lower third of the right thigh, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1358 dated 20 October 2023, the injury found on **Mursalov Mehti Movsum oglu**, namely contusion of the left knee joint, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 252 dated 9 February 2024, the injury sustained by **Verdiyev Mugaddas Atamali oglu**, namely the condition following a sprain of the ligaments of the left ankle joint, was caused by the impact of a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 244 dated 9 February 2024, the injuries sustained by **Shukurov Rajib Chovdar oglu**, namely barotrauma; contusion of the right extremity; the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 248 dated 9 February 2024, the injuries sustained by **Hummatov Rasmi Nadir oglu**, namely shrapnel wounds of the right thigh, left knee and right heel regions, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 247 dated 9 February 2024, the injuries sustained by **Huseynov Eldar Adil oglu**, namely blast trauma; the condition following closed craniocerebral trauma; and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 239 dated 9 February 2024, the injuries sustained by **Abdullayev Hasan Rafail oglu**, namely a gunshot wound of the parietal region; a tangential gunshot wound; open craniocerebral trauma; and contusion of the left parietal lobe of the brain, for which primary surgical treatment of the wounds was performed

and the condition following primary surgical treatment of the wounds, were caused by a firearm shot. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 250 dated 9 February 2024, the injuries sustained by **Gahramanov Ariz Mirzakishi oglu**, namely blast trauma and the condition following left-sided acute cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 405 dated 1 March 2024, the injuries sustained by **Gurbanov Hasan Rufat oglu**, namely blast trauma; the condition following right-sided acute cochlear neuritis; healed skin scars following shrapnel wounds of the lower third of the right upper arm and the lumbar region; and a foreign object—a metal fragment—in the soft tissues, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 409 dated 1 March 2024, the injuries sustained by **Girkhlarov Dayanat Tofig oglu**, namely blast trauma; the condition following closed craniocerebral trauma; astheno-neurotic manifestations following concussion of the brain; vegetative vascular instability following closed craniocerebral trauma and concussion of the brain; barotrauma; post-traumatic dry perforation of both tympanic membranes; bilateral chronic cochlear neuritis; bilateral mixed-type hearing loss, with whispered speech perceived at a distance of 3.5 metres in both ears; and a healed skin scar following a lacerated wound of the right knee, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 455 dated 1 March 2024, the injuries sustained by **Sultanov Hijran Panah oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; astheno-neurotic manifestations

following closed craniocerebral trauma and concussion of the brain; secondary repair of traumatic perforation of the left tympanic membrane; healed skin scars following primary surgical treatment of shrapnel wounds of the left forearm, lumbar region and posterolateral surface of the right thigh; and a foreign object in the soft tissues, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 395 dated 1 March 2024, the injuries sustained by **Rzayev Amil Mohabbat oglu**, namely blast trauma; vegetative vascular instability following closed craniocerebral trauma and concussion of the brain; and astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 424 dated 1 March 2024, the injuries sustained by **Ahmadov Tabriz Ismayil oglu**, namely blast trauma and the condition following right-sided acute cochlear neuritis resulting from blast trauma, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 431 dated 1 March 2024, the injuries sustained by **Alirzayev Subhan Rovshan oglu**, namely blast trauma; closed craniocerebral

trauma; the condition following concussion of the brain; post-traumatic perforation of both tympanic membranes resulting from blast trauma; and the condition following acute cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 432 dated 1 March 2024, the injuries sustained by **Aliyev Umid Agshin oglu**, namely blast trauma; a skin scar following a shrapnel wound of the right buttock region; and the condition following left-sided acute cochlear neuritis resulting from blast trauma, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 397 dated 1 March 2024, the injuries sustained by **Salimov Elnur Ehdiram oglu**, namely the condition following right-sided acute cochlear neuritis resulting from blast trauma and a healed skin scar following a shrapnel wound of the right side of the neck, were caused by primary and/or secondary fragments

generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 418 dated 1 March 2024, the injuries sustained by **Mammadov Ali Natig oglu**, namely a dissociative reaction; catarrh of the upper respiratory tract; tension-type headache; retention cysts of the right maxillary and frontal sinuses in a state of incomplete remission; blast trauma; healed skin scars following primary surgical treatment of a shrapnel wound of the soft tissues of the posterior surface of the left half of the chest and a blind shrapnel wound of the fourth finger of the left hand, including surgical removal of the fragment, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 396 dated 1 March 2024, the injuries sustained by **Rzayev Taleh Hikmat oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain; and healed skin scars following shrapnel wounds of the left axillary and left scapular regions and a thermal burn, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave and the local effects of high temperature. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 68 dated 18 February 2024, the injuries sustained by **Huseynov Asim Zakir oglu**, namely blast trauma; craniocerebral trauma; and blind shrapnel wounds of the middle third of the right lower leg, were caused by the blast wave and fragments generated by the explosion of an explosive firearm—an artillery projectile. The injuries were sustained on 19–20 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 66 dated 18 February 2024, the injuries sustained by **Salahov Sahil Gadimovich**, namely barotrauma and craniocerebral trauma, were caused by the blast wave generated by the explosion of an explosive firearm—an artillery projectile. The injuries were sustained on 19 September 2023 and were classified as minor harm to health.

According to forensic medical expert opinion No. 1423 dated 29 September 2023, the injury sustained by **Shikhaliyev Elmir Ilgar oglu**, namely a blind gunshot wound of the left buttock

was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 67 dated 13 February 2024, the injuries sustained by **Abbasov Royal Ismat oglu**, namely craniocerebral trauma and shrapnel wounds of the upper third of the left lower leg, were caused by the blast wave and fragments generated by the explosion of an explosive firearm—an artillery projectile. The injuries were sustained on 19 September 2023 and were classified as minor harm to health.

According to forensic medical expert opinion No. 1311 dated 20 October 2023, the injury sustained by **Alakbarov Zamin Sakhavat oglu**, namely one blind wound of the lower third of the right lower leg, was caused by a projectile—a bullet—fired from a firearm. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1514 dated 13 November 2023, the injuries sustained by **Mashadiyev Eltaj Halay oglu**, namely blind wounds of the left temporal region, right knee, lower third of the right thigh and left knee, were caused by multiple fragments generated during the explosion of a projectile possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1317 dated 20 October 2023, the injuries sustained by **Ibadullayev Mahammad Aflatun oglu**, namely wounds of the second and third toes of the right foot, were caused by fragments generated during the explosion of military ammunition—a projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 71 dated 13 February 2024, the injuries sustained by **Muradov Kanan Bahruz oglu**, namely a third-degree degenerative tear of the medial meniscus of the right knee joint; blast trauma; the condition following closed craniocerebral trauma; vegetative vascular instability following concussion of the brain; bilateral chronic cochlear neuritis; and bilateral sensorineural hearing loss, with whispered speech perceived at a distance of three metres in the left ear and five metres in the right ear, were caused by the blast wave generated by the explosion of an explosive firearm—an artillery projectile. The injuries were sustained on 20 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 70 dated 18 February 2024, the injuries sustained by **Mustafayev Kanan Tapdig oglu**, namely barotrauma and craniocerebral trauma, were caused by the blast wave generated by the explosion of an explosive firearm—an artillery projectile. The injuries were sustained on 20 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 72 dated 13 February 2024, the injuries sustained by **Mammadov Valeh Habil oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; bilateral acute cochlear neuritis; and a tangential gunshot wound of the posterior surface of the lower third of the left upper arm, were caused by the blast wave and a bullet generated during the explosion of an

explosive firearm—an artillery projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1512 dated 13 November 2023, the injury sustained by **Hasanzada Jeyhun Elshan oglu**, namely a sprain of the heel region of the left lower extremity, was caused by blunt trauma resulting from movement of the joint beyond its physiological range. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 301 dated 22 February 2024, the injuries sustained by **Imanov Murad Tarverdi oglu**, namely blast trauma; healed skin scars following primary surgical treatment of multiple shrapnel wounds of the left upper extremity; and foreign objects—metal fragments—in the soft tissues of the left hand and left forearm, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties.

Page 707

The injuries were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 302 dated 22 February 2024, the injuries sustained by **Rustamli Rustam Ayaz oglu**, namely closed craniocerebral trauma; blast trauma; and the condition following immobilisation with a plaster splint for a closed, non-displaced fracture of the base of the proximal phalanx of the first toe of the left foot, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 303 dated 22 February 2024, the injuries sustained by **Hasanov Ramig Faig oglu**, namely the condition following primary surgical treatment of a shrapnel wound of the upper third of the left upper arm and a foreign object—a metal fragment—in the soft tissues, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 304 dated 22 February 2024, the injuries sustained by **Abbasov Maarif Azay oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain; a sufficiently united fracture of the right ninth rib; barotrauma; and the condition following left-sided acute cochlear neuritis, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1841 dated 1 December 2023, the injury found on **Basirov Isakh Sabir oglu**, namely a blind gunshot wound of the anterior abdominal wall penetrating the abdominal cavity and accompanied by intraperitoneal damage to the S-shaped intestine and urinary bladder, complicated by post-haemorrhagic anaemia, was caused by a firearm shot. According to its degree, the injury was classified as grievous harm to health.

According to forensic medical expert opinion No. 1801 dated 8 December 2023, the injury sustained by **Abbasov Vusal Asad oglu**, namely a blind gunshot wound of the lower third of the right lower leg accompanied by an open comminuted displaced fracture of the distal metaphysis of the right tibia, was caused by a firearm shot. According to its degree, the injury was classified as grievous harm to health.

According to forensic medical expert opinion No. 1818 dated 27 October 2023, the injury found on **Ahmadov Ravan Habil oglu**, namely barotrauma of the left ear accompanied by left-sided acute cochlear neuritis, was caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified overall as minor harm to health.

According to forensic medical expert opinion No. 249 dated 9 February 2024, the injuries sustained by **Bagirov Arif Mammadsadig oglu**, namely blast trauma and the condition following left-sided cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 229 dated 9 February 2024, the injuries sustained by **Aliyev Murad Tazakhan oglu**, namely blast trauma; superficial abrasions of the upper right forehead and right parietal region; blunt trauma to the right forearm; and contusion of the soft tissues, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave.

Page 708

Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 225 dated 9 February 2024, the injuries sustained by **Kazimov Punhan Asif oglu**, namely blast trauma and the condition following primary surgical treatment of blind shrapnel wounds of the posterior surface of the upper third of the right forearm and the posterior surface of the middle third of the right thigh, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 222 dated 9 February 2024, the injuries sustained by **Huseynli Osman Sohbat oglu**, namely the condition following primary surgical

treatment of shrapnel wounds of the upper third of the left forearm and the anterior surface of the right thigh; blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; and tinnitus, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 260 dated 9 February 2024, the injury sustained by **Mirzayev Khudashukur Sahibali oglu**, namely a lacerated wound of the right heel complicated by infection, was caused by contact of the injured area with a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 226 dated 9 February 2024, the injuries sustained by **Hasanli Turan Mahammad oglu**, namely a gunshot wound of the left half of the chest and closed craniocerebral trauma, were caused by a firearm shot and by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 227 dated 9 February 2024, the injuries sustained by **Bayramli Vahid Yusif oglu**, namely a shrapnel wound of the left half of the chest; blast trauma; the condition following closed craniocerebral trauma and concussion of the brain, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 230 dated 9 February 2024, the injuries sustained by **Valiyev Nizami Fizuli oglu**, namely a tangential shrapnel wound of the medial surface of the upper third of the right lower leg; blast trauma; the condition following closed craniocerebral trauma and concussion of the brain, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 228 dated 9 February 2024, the injuries sustained by **Ismayilov Elnur Ismayil oglu**, namely blast trauma; closed craniocerebral trauma; concussion of the brain; right-sided acute cochlear neuritis; and perforation of the right tympanic membrane, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 223 dated 9 February 2024, the injuries sustained by **Seyidaliyev Tabriz Eyvaz oglu**, namely blast trauma and a healed skin scar following primary surgical treatment of a shrapnel wound of the left lower leg

were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 95 dated 9 February 2024, the injuries sustained by **Guliyev Niyazi Allahverdi oglu**, namely a blind shrapnel wound of the right renal region penetrating the retroperitoneal space and resulting in right-sided nephrectomy; bilateral chronic cochlear neuritis; bilateral sensorineural hearing loss; and residual signs of closed craniocerebral trauma and concussion of the brain, were caused by the blast wave and fragments generated during the explosion of a projectile. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 97 dated 9 February 2024, the injury sustained by **Huseynov Ehtigam Elman oglu**, namely blunt trauma to the soft tissues of the right thigh in the form of contusion, was caused by the blast wave and/or fragments. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1894 dated 13 November 2023, the injuries found on **Gurbanov Vurgun Allahverdi oglu**, namely a blind shrapnel wound of the abdominal cavity penetrating through the anterior abdominal wall and accompanied by injury to the loops of the small intestine; and blind shrapnel wounds of the soft tissues of the groin and left thigh regions, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. Overall, the injuries were classified as grievous harm to health, while the other shrapnel wounds were classified as minor harm to health.

According to forensic medical expert opinion No. 364 dated 6 March 2024, the injuries sustained by **Hajiyev Kamran Natig oglu**, namely open craniocerebral trauma accompanied by cerebral and left parietal-lobe haemorrhagic contusion, subarachnoid haemorrhage and a comminuted fracture of the left parietal bone; and blind shrapnel wounds of the left parietal region, left side of the neck and left upper extremity, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1360 dated 20 October 2023, the injuries found on **Mammadov Zamig Rasim oglu**, namely barotrauma; decreased hearing on the right side; and traumatic perforation of the left tympanic membrane, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 79 dated 16 February 2024, the injuries sustained by **Mammadov Mustafa Mehrab oglu**, namely post-traumatic perforation of both tympanic membranes; right-sided chronic cochlear neuritis; perception of whispered speech at a distance of five metres in the right ear and six metres in the left ear; a healed skin scar following a shrapnel wound of the lower third of the right upper arm; and a foreign object in

the soft tissues, were caused by the explosion and/or blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1424 dated 29 September 2023, the injuries sustained by **Guliyev Sarkhan Tahir oglu**, namely gunshot wounds of the anteromedial surface and lateral surface of the middle third of the right thigh, were caused by a firearm shot. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 299 dated 17 February 2024, the injury sustained by **Mirzayev Zakir Zamil oglu**, namely a healed skin scar following an abrasion of the left side of the nose, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties

Page 710

were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 325 dated 22 February 2024, the injuries sustained by **Rasulov Asif Sadi oglu**, namely blunt trauma to the right lower leg, an abraded wound and reactive oedema at the healing stage, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 326 dated 22 February 2024, the injuries sustained by **Jujuyev Vahid Anvar oglu**, namely first-degree thermal burns of both feet at the healing stage, were caused by the local effects of high temperature. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 300 dated 22 February 2024, the injury sustained by **Aliyev Veysal Shadman oglu**, namely a healed skin scar following a gunshot wound of the fifth toe of the right foot, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 95 dated 1 March 2024, the injuries sustained by **Mehdiyev Ilyas Elshan oglu**, namely an open fracture of the right tenth rib; a blind wound of the right half of the chest penetrating the thoracic cavity and accompanied by right-sided haemopneumothorax—accumulation of free blood and air in the thoracic cavity; a foreign object in the thoracic cavity; and a blind wound of the upper third of the left thigh, were caused by two firearm shots. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 221 dated 28 March 2024, the injuries sustained by **Alakbarov Zaur Gasim oglu**, namely blast trauma; the condition following

closed craniocerebral trauma; and vegetative vascular instability following concussion of the brain, were caused by the blast wave generated during the explosion of firearm ammunition. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 93 dated 1 March 2024, the injuries sustained by **Orujov Ali Rafael oglu**, namely a blind wound of the posterior surface of the right hand accompanied by complete injury to the extensor tendon of the fourth finger; multiple blind wounds of the right upper arm, right axillary region, right buttock, both thighs and left lower leg; and metallic foreign objects in the soft tissues, were caused by fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 865 dated 14 November 2023, the injuries found on **Shukurov Royal Namig oglu**, namely a blind wound of the right lower leg and a metallic foreign object in the soft tissues, were caused by fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 448 dated 29 February 2024, the injuries sustained by **Safarov Parvin Ramiz oglu**, namely a firearm injury; a comminuted fracture of the left lower extremity; compartment syndrome; acute renal failure; left-sided encephalopathy; and craniocerebral trauma, were caused by a firearm shot and also by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 452 dated 29 February 2024, the injuries sustained by **Guliyev Khagani Vugar oglu**, namely a blind gunshot wound of the upper third of the left lower leg accompanied by an open marginal fracture of the middle third of the tibial shaft; the condition following primary surgical treatment of the wounds and removal of the foreign object

were caused by a firearm shot. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 453 dated 29 February 2024, the injuries sustained by **Mardanli Dayanat Ilham oglu**, namely a gunshot wound of the upper third of the right thigh accompanied by a marginal fracture of the upper third of the right femur; the condition following primary surgical treatment of the wounds; blast trauma; and the condition following bilateral acute cochlear neuritis, were caused by a firearm shot and by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 450 dated 29 February 2024, the injuries sustained by **Abayev Pasha Khagani oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 444 dated 29 February 2024, the injuries sustained by **Ahmadov Telman Abulfaz oglu**, namely blast trauma; the condition following left-sided acute cochlear neuritis; and the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 456 dated 29 February 2024, the injury sustained by **Gurbanov Taleh Ilgar oglu**, namely a healed skin scar following a tangential shrapnel wound of the right hand, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 441 dated 29 February 2024, the injuries sustained by **Mammadov Ramil Telman oglu**, namely a penetrating gunshot wound of the right shoulder girdle accompanied by an open comminuted intra-articular fracture of the head of the right humerus; the condition following primary surgical treatment of the wounds; and immobilisation with a plaster splint, were caused by a firearm shot. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 868-A dated 1 May 2024, the injuries sustained by **Valizada Murad Logman oglu**, namely:
a) barotrauma; left-sided chronic cochlear neuritis; left-sided sensorineural hearing loss; astheno-neurotic manifestations; closed craniocerebral trauma accompanied by concussion of the brain; and
b) a firearm wound with a soft-tissue defect on the posterior surface of the middle third of the right lower leg,
were caused respectively by the combined powerful blast wave generated during the explosion of a projectile and by a firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 2170 dated 6 December 2023, the injuries sustained by **Abbaszada Gismatpasha Ismayil oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain and barotrauma of both ears accompanied by bilateral acute cochlear neuritis, were caused by the blast wave generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1851 dated 6 December 2023, the injuries sustained by **Ganbarov Rashad Vahid oglu**, namely a displaced marginal comminuted fracture of the proximal third of the right tibia and blind shrapnel wounds of the right scapular region, right upper arm, right thigh and right lower leg

Page 712

were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 736 dated 24 April 2024, the injuries sustained by **Yunusov Hummat Shamsaddin oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 739 dated 24 April 2024, the injury sustained by **Yaraliyev Samir Jeyhun oglu**, namely the condition following immobilisation with a plaster splint for a closed displaced fracture of the scaphoid bone of the right hand, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 430 dated 1 March 2024, the injuries sustained by **Korogluyev Akif Sarhad oglu**, namely closed craniocerebral trauma resulting from blast trauma; bilateral contusion of the frontal lobes of the brain; subarachnoid and intraventricular haemorrhage; pneumocephalus; blind shrapnel wounds of the forehead, left half of the face and left eyebrow region; displaced fractures of the ethmoid bone of the skull base; non-displaced fractures of the medial and anterior walls of the left maxillary sinus; astheno-neurotic manifestations following closed craniocerebral trauma and concussion of the brain; secondary post-traumatic repair of the left tympanic membrane; perception of whispered speech at a distance of six metres in both ears; a penetrating injury to the left eye accompanied by prolapse of intraocular contents; a haematoma of the left periorbital region; the condition following evisceration, implantation of a silicone sphere and primary surgical treatment for a lacerated wound of the left eyebrow region; reduction of visual acuity in the left eye to zero without correction, with visual acuity of 1.0 in the right eye; and a healed fracture of the anterior wall of the left maxillary sinus, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 59 dated 12 February 2024, the injuries sustained by **Karimov Ilgar Alish oglu**, namely abrasions of the forehead and left scapular region, were caused by fragments generated during the explosion of a projectile. The injuries

were sustained on 19 September 2023 and, since they did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 58 dated 12 February 2024, the injuries sustained by **Verdiyev Khasi Kamil oglu**, namely amputation of the middle third of the left lower leg and multiple shrapnel wounds of the body surface, were caused by fragments generated during the explosion of a projectile. The injuries were sustained on 19 September 2023 and, because they resulted in permanent loss of 50% of general working capacity, were classified as grievous harm to health.

According to forensic medical expert opinion No. 139 dated 13 February 2024, the injury sustained by **Maharramov Rasim Elizbar oglu**, namely a penetrating firearm wound of the soft tissues of the middle third of the left thigh, was caused by a firearm shot. The injury was sustained on 20 September 2023 and, according to its degree, was classified as less grievous harm to health.

According to forensic medical expert opinion No. 492 dated 4 March 2024, the injury found on the body of **Asgarov Jeyhun Ramiz oglu**, namely a healing skin scar following a firearm wound of the lower third of the right upper arm

Page 713

was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 85 dated 18 February 2024, the injuries sustained by **Mammadov Intigam Maharram oglu**, namely left-sided acute cochlear neuritis and simple myopic astigmatism of the right eye of 1.0 dioptre, resulting in reduction of visual acuity to 0.5 and corrected visual acuity of 1.0, were caused by the blast wave generated during the explosion of an artillery projectile. The injuries were sustained on 20 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1559 dated 29 February 2024, the injury sustained by **Piriyev Mahammad Vilayat oglu**, namely a penetrating gunshot wound of the middle third of the right lower leg, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 82 dated 18 February 2024, the injuries sustained by **Piriyev Elnur Habil oglu**, namely barotrauma and craniocerebral trauma, were caused by the blast wave generated by the explosion of an explosive firearm—an artillery projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 101 dated 21 February 2024, the injuries sustained by **Hasanov Amrah Kamil oglu**, namely contusion of the soft tissues of the right wrist region and thoracic cage, were caused by the blast wave generated during the explosion of an artillery projectile. The injuries were sustained on 20 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 274 dated 13 March 2024, the injuries found on the body of **Gurbanov Elnur Elchin oglu**, namely a shrapnel wound of the right half of the chest accompanied by injury to the right lung and haemopneumothorax, were caused by fragments generated during the explosion of an explosive projectile. The injuries were sustained on 20 September 2023 and, according to their degree, were classified as grievous harm to health.

According to forensic medical expert opinion No. 342 dated 22 February 2024, the injuries sustained by **Mirzayev Mirgabil Habil oglu**, namely the condition following primary surgical treatment of a blind shrapnel wound of the left elbow region; barotrauma; and left-sided tinnitus, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 344 dated 22 February 2024, the injuries sustained by **Hasanov Ilkin Khayaladdin oglu**, namely left-sided S1 radiculopathy of discogenic origin in incomplete remission; healed skin scars following primary surgical treatment of blind shrapnel wounds of the anterior surface of the left lower leg and the right buttock region; barotrauma; and left-sided tinnitus, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 345 dated 22 February 2024, the injuries sustained by **Karimov Yusif Ganbar oglu**, namely a blind shrapnel wound at the level of the seventh cervical vertebra and blunt trauma to the occipital region, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

Page 714

According to forensic medical expert opinion No. 341 dated 22 February 2024, the injuries sustained by **Huseynov Huseyn Hasanoglu oglu**, namely bilateral chronic cochlear neuritis resulting from barotrauma; severe bilateral sensorineural hearing loss, with whispered speech perceived at a distance of 4.5 metres in both ears; blast trauma; the condition following closed craniocerebral trauma; and vegetative vascular dystonia following concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing

explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 343 dated 22 February 2024, the injuries sustained by **Umarov Emil Fuad oglu**, namely barotrauma; the condition following bilateral acute cochlear neuritis; and a healed skin scar following a tangential shrapnel wound of the right lower leg, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 346 dated 22 February 2024, the injury sustained by **Ismayilli Farid Seymur oglu**, namely a sprain of the ligaments of the right ankle joint, was caused by blunt trauma resulting from the muscles, joint and ligaments being stretched beyond their physiological range. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 274 dated 17 February 2024, the injuries sustained by **Abishov Alim Hasan oglu**, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; barotrauma; bilateral chronic cochlear neuritis; and bilateral sensorineural hearing loss, with whispered speech perceived at a distance of five metres in both ears, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. The injuries were sustained on 20 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 273 dated 22 February 2024, the injuries sustained by **Zeynalov Alasgar Saday oglu**, namely barotrauma; bilateral chronic cochlear neuritis; and bilateral sensorineural hearing loss, with whispered speech perceived at a distance of four metres in both ears, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. The injuries were sustained on 20 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 29 dated 13 February 2024, the injuries found on the body of **Rustamov Akbar Mehman oglu**, namely barotrauma; tinnitus; a mild stress reaction resulting in mild asthenia; and an acute reaction to stress, were caused by the impact of a projectile during an explosion. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 284 dated 14 February 2024, the injuries found on the body of **Ismayilov Sahib Azer oglu**, namely shrapnel wounds of the right thigh and right lower leg, were caused by fragments generated during the explosion of an explosive projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 366 dated 7 March 2024, the injury sustained by **Hasanov Imamali Aghaverdi oglu**, namely rupture of the left tympanic

membrane accompanied by left-sided acute cochlear neuritis and barotrauma, was caused by the combined blast wave generated during the explosion of an explosive projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1389 dated 14 November 2023, the injuries found on **Guluzada Shahray Elshan oglu**, namely wounds of the posterior surfaces at the level of the bones of both hands and of the anterior surface of the middle third of the left lower leg, were caused by a sharp-edged object.

Page 715

According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 347 dated 22 February 2024, the injuries sustained by **Abdulzada Rafail Rovshan oglu**, namely the condition following primary surgical treatment of a blind shrapnel wound of the left knee joint and a foreign object—a metal fragment—in the soft tissues of the left thigh, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 433 dated 1 March 2024, the injuries sustained by **Abdullayev Kamal Aladdin oglu**, namely blind shrapnel wounds of the soft tissues of the upper thirds of both thighs resulting from blast trauma; penetrating gunshot wounds of both ankle-joint regions; an open comminuted displaced fracture of the distal metaphysis of the left tibia; the condition following primary surgical treatment of the wounds, removal of a foreign object—a metal fragment—and immobilisation of the left ankle joint with a plaster splint; sufficiently united fractures; healed skin scars; and contracture of the left ankle joint, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties and by firearm shots. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 76 dated 16 February 2024, the injuries sustained by **Yulchiyev Murad Ildirim oglu**, namely scars following shrapnel wounds of the right lateral surface of the chest; postoperative scars on the anterolateral surface of the lower third of the left lower leg and the lateral surface of the right thigh; a shrapnel wound with a skin defect on the lateral surface of the lower third of the right lower leg; contusion of both lungs; displaced fractures of the right eighth and ninth ribs; multiple blind shrapnel wounds of the anterior and posterior surfaces of the right half of the chest not penetrating the cavity; extensive blind and tangential shrapnel wounds with soft-tissue defects of the right thigh and lower leg and the anteromedial surface of the lower third of the left lower leg; and the condition following bilateral acute cochlear neuritis, were caused by an explosion, fire and the blast wave. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 392 dated 1 March 2024, the injuries sustained by **Mammadov Elvin Jafar oglu**, namely open craniocerebral trauma resulting from blast trauma; severe haemorrhagic contusion of the brain; subarachnoid haemorrhage; multiple fractures of the skull base, left parietal and frontal bones, the superior, lateral and medial walls of the left orbit, the squamous part of the right temporal bone, the right mastoid process, the greater wing of the sphenoid bone, the lateral and inferior walls of the maxillary sinus, the nasal bones, the superior wall of the right orbit, the right zygomatic arch and the lateral and medial walls of the right maxillary sinus; diastasis of the coronal suture; dry traumatic perforation of the right tympanic membrane; haemosinus; haemotympanum; a double comminuted displaced fracture of the middle third of the left ulna; traumatic amputation of the first finger of the left hand at the level of the distal end of the proximal phalanx; traumatic amputation of the fourth finger at the level of the proximal phalanx; open displaced fractures of the proximal and distal phalanges of the first finger and the base of the first metacarpal bone; an open displaced fracture of the medial condyle of the left humerus; total contracture of both lungs; bilateral reactive pleuritis; extensive soft-tissue defects of both upper extremities; multiple blind shrapnel wounds of the right half of the scrotum, anterior surface of the chest and left lateral wall of the abdominal cavity; contused and lacerated wounds of the right side of the face; and a lacerated and contused wound of the right temporozygomatic region with a soft-tissue defect and a foreign object—a metal fragment—for which primary surgical treatment, external fixation of the ulna, secondary surgical treatment of the wounds and autodermoplasty were performed

and the condition following conservative treatment; conjunctival stump following evisceration and implantation of a silicone sphere performed because of a penetrating injury to the right eye accompanied by prolapse of intraocular contents; anophthalmia resulting in reduction of visual acuity to zero without correction, with visual acuity of 1.0 in the left eye, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 417 dated 1 March 2024, the injuries sustained by **Mustafayev Nusrat Tarlan oglu**, namely blast trauma; the condition following closed craniocerebral trauma; vegetative vascular instability following concussion of the brain; bilateral chronic cochlear neuritis resulting from blast trauma; secondary post-traumatic repair of both tympanic membranes; severe bilateral sensorineural hearing loss, with whispered speech perceived at a distance of five metres in both ears; and a healed skin scar following primary surgical treatment of a tangential shrapnel wound of the right popliteal region, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 377 dated 29 February 2024, the injury sustained by **Isayev Elchin Teymur oglu**, namely a tangential gunshot wound of the soft tissues of the parietal region, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1787 dated 19 October 2023, the injuries found on **Majidli Yusif Ilham oglu**, namely blind shrapnel wounds of the left lower leg and right thigh, and barotrauma of the right ear accompanied by right-sided acute cochlear neuritis, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 45 dated 17 February 2024, the injury sustained by **Suleymanov Nurlan Mayil oglu**, namely a blind shrapnel wound of the soft tissues of the left thigh, was caused by fragments generated during the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 92 dated 15 February 2024, the injuries sustained by **Dadashli Izzat Salamat oglu**, namely a penetrating gunshot wound of the upper third of the left upper arm on the upper posterior surface of the left half of the chest, accompanied by an open comminuted displaced fracture of the upper third of the shaft of the left humerus and right-sided haemothorax, were caused by a bullet fired from a firearm. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as grievous harm to health.

According to forensic medical expert opinion No. 38 dated 15 February 2024, the injury sustained by **Garayev Seymur Ramig oglu**, namely a superficial blind shrapnel wound of the left eyebrow region, was caused by an explosion on 20 September 2023. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 411 dated 1 March 2024, the injuries sustained by **Guliyev Hasan Ilgar oglu**, namely blast trauma; the condition following closed craniocerebral trauma; and vegetative vascular instability following concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 745 dated 24 April 2024, the injuries sustained by **Hasanli Hasan Samir oglu**, namely the condition following bilateral

acute cochlear neuritis and post-traumatic perforation of the right tympanic membrane resulting from blast trauma, were caused by the blast wave generated by the explosion of a

substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 84 dated 19 February 2024, the injury sustained by **Hasratov Zamin Zahid oglu**, namely a blind shrapnel wound of the left infraorbital—cheek—region, was sustained on 19 September 2023 and, according to its degree, was classified as minor harm to health.

According to forensic medical expert opinion No. 348 dated 22 February 2024, the injuries sustained by **Huseynov Mahir Ilgar oglu**, namely blast trauma; the condition following closed craniocerebral trauma; astheno-neurotic manifestations following concussion of the brain; bilateral chronic cochlear neuritis resulting from blast trauma; secondary repair of post-traumatic perforation of the right tympanic membrane; severe bilateral sensorineural hearing loss, with whispered speech perceived at a distance of four metres in both ears; the condition following surgery for open fractures of the second, third and fourth metatarsal bones and the cuboid bone of the left foot; united fractures; healed skin scars; tendon- and joint-related contracture of the toes; hallux valgus deformity of the first toe; osteoarthrosis of the joints of the left foot and Chopart joint; blast trauma; healed skin scars following blind shrapnel wounds of both lower-leg regions; a united fracture of the proximal metaphysis of the left tibia; and metallic foreign objects—fragments—in the soft tissues of both lower legs, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 149 dated 16 February 2024, the injuries sustained by **Guliyev Nihad Elman oglu**, namely motor and sensory impairment of both lower extremities; severe reduction in muscle strength; post-traumatic injury to the right peroneal and right tibial nerves; a flail ankle joint; multiple shrapnel wounds of the left buttock region, right forearm and posterior surfaces of both lower extremities, were caused by the blast wave and fragments generated during the explosion of military ammunition possessing explosive properties. The injuries were sustained on 20 September 2023 and, because they resulted in permanent loss of 35% of general working capacity, were classified as grievous harm to health.

According to forensic medical expert opinion No. 111 dated 14 February 2024, the injuries sustained by **Asgarov Tehrun Rasul oglu**, namely scars following shrapnel wounds of the right temporal region and the neck, were sustained on 19 September 2023 and, according to their degree, were classified overall as minor harm to health.

According to forensic medical expert opinion No. 892 dated 1 December 2023, the injury sustained by **Guliyev Habil Ayaz oglu**, namely an abraded wound of the left lower leg, was caused by the impact of a blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 115 dated 16 February 2024, the injury sustained by **Javadov Anar Allahverdi oglu**, namely barotrauma accompanied by cranialgia, was caused by the blast wave. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 439 dated 1 March 2024, the injuries sustained by **Hasanzada Jasarat Gulagha oglu**, namely a blind shrapnel wound of the occipital region penetrating the cranial cavity; open craniocerebral trauma; haemorrhagic contusion of the cerebellum; haematoma; foreign objects; and a fracture of the occipital bone, for which primary surgical treatment of the wounds was performed on 20 September 2023

and the condition following surgery, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 424 dated 12 March 2024, the injuries sustained by **Mutallimli Arif Telman oglu**, namely shrapnel wounds of the right upper extremity, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1507 dated 13 November 2023, the injuries sustained by **Hasanov Farman Rafig oglu**, namely a non-displaced fracture of the proximal metaphysis of the right tibia; a penetrating wound of the soft tissues of the lower third of the right thigh accompanied by post-traumatic neuropathy of the right tibial nerve; and a blind wound of the middle third of the left lower leg, were caused by firearm shots. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 59 dated 27 February 2024, the injuries sustained by **Mustafayev Rahman Rasim oglu**, namely traumatic amputation of the right thigh below the lower third; an open comminuted fracture of the left femur; blind shrapnel wounds of the right thigh, left mandibular angle, both upper extremities and perineal region; second-, third-A- and third-B-degree thermal burns covering 9% of the left upper arm and forearm; closed craniocerebral trauma; concussion of the brain; perforation of the left tympanic membrane; and the condition following left-sided acute cochlear neuritis, were caused by fragments generated during an explosion, the fire that occurred after the explosion, and the blast wave. Because the injuries resulted in permanent loss of more than one-third of general working capacity, they were classified as grievous harm to health.

According to forensic medical expert opinion No. 413 dated 1 March 2024, the injuries sustained by **Rustamov Galib Habil oglu**, namely a healed skin scar following an abraded wound of the posterior surface of the right hand; barotrauma; dry post-traumatic perforation of the right tympanic membrane; and the condition following acute cochlear neuritis, were

caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 429 dated 1 March 2024, the injuries sustained by **Aghakishiyev Kamal Kamil oglu**, namely post-traumatic neuropathy resulting from blast-related injury to the left radial nerve at the level of the middle third of the forearm; a healed skin scar following a blind shrapnel wound of the left upper extremity; and a foreign object—a metal fragment—in the soft tissues of the left forearm and the projection of the fourth finger of the left hand, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 421 dated 1 March 2024, the injury sustained by **Alasgarov Amin Natig oglu**, namely healed skin scars following primary surgical treatment of a penetrating gunshot wound of the middle third of the right thigh, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 88 dated 21 February 2024, the injury sustained by **Yusifov Yusif Aliagha oglu**, namely an abrasion of the scapular region, was caused by a tangential bullet impact during a shot fired from a firearm loaded with a bullet. The injury was sustained on 19 September 2023 and, since it did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1762 dated 29 November 2023, the injury was found on **Hasanov Firdovsi Vahid oglu**, namely a gunshot wound of the right temporal lobe of the brain

accompanied by severe haemorrhagic contusion of the right temporal lobe and a comminuted fracture of the temporal bone, was caused by a firearm shot. According to its degree, the injury was classified as grievous harm to health.

According to forensic medical expert opinion No. 369 dated 22 February 2024, the injury sustained by **Shirinli Ibadat Abulfat oglu**, namely multiple shrapnel wounds of the frontal region of the head, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. The injury was sustained on 19 September 2023 and, according to its degree, was classified as minor harm to health.

According to forensic medical expert opinion No. 1781 dated 18 October 2023, the injury found on **Asadov Nahid Razim oglu**, namely a sprain of the ligaments of the left ankle joint, was caused by blunt trauma resulting from abrupt movement of the joint inward, outward,

forward and backward beyond its physiological range. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 370 dated 22 February 2024, the injury sustained by **Hasanov Sahil Elmidar oglu**, namely a scar in the left supraorbital region, was caused by a hard blunt object striking either the injured region or the injured region striking such an object. The injury was sustained on 19 September 2023 and, since it did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1478 dated 11 April 2024, the injuries sustained by **Gasemi Nemati Erol Mahammad Taghi oglu**, namely blind wounds of the soft tissues of the lateral surface of the left knee joint and the right heel region, were caused by primary fragments and blunt-force secondary fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1646 dated 20 October 2023, the injury sustained by **Karimli Sarkar Namig oglu**, namely a shrapnel wound of the left half of the scrotum, was caused by a fragment generated during the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1396 dated 29 September 2023, the injuries found on **Rustamli Intigam Agha oglu** during forensic medical examination, namely wounds at the root of the nose, on the right wing of the nose and extending from the mucosal border of the mouth to the right corner of the mouth; barotrauma; blunt trauma to the nose; and contusion of the right eye, were caused partly by the blast wave and partly by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1574 dated 20 October 2023, the injuries sustained by **Movsumov Najafali Fakhraddin oglu**, namely a tangential wound of the upper-lip region and a penetrating wound of the soft tissues of the right upper arm, were caused by bullets fired from a firearm. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 334 dated 23 February 2024, the injury found on the body of **Suleymanov Ramiz Rauf oglu**, namely swelling of the right hand, was caused by the impact of a hard blunt object. The injury was sustained on 19 September 2023 and, since it did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 477 dated 2 April 2024, the injuries sustained by **Hudulov Rashad Izzat oglu**, namely closed craniocerebral trauma; concussion of the brain; and blind shrapnel wounds of the right thigh and right knee joint, were caused by the combined powerful blast wave and fragments generated during the explosion of an

explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

Page 720

According to forensic medical expert opinion No. 191 dated 23 February 2024, the injuries sustained by **Mammadov Elshad Elshan oglu**, namely a blind gunshot wound of the right thigh; an open comminuted displaced fracture of the distal metadiaphysis of the femur; and acute moderate-to-severe post-haemorrhagic anaemia, were caused by a firearm shot. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 720 dated 5 April 2024, the injuries sustained by **Huseynov Murad Mubariz oglu**, namely a soft-tissue defect of the middle third of the right thigh resulting from blast trauma; an open comminuted displaced fracture of the middle third of the right femoral shaft; the condition following primary surgical treatment of a blind shrapnel wound of the right lateral abdominal wall, repositioning of the fracture fragments, external fixation, secondary surgical treatment of the wounds, autodermoplasty of the defect area, removal of the fixation device from the right femur, closed repositioning of the fracture fragments and intramedullary locked pin osteosynthesis; and the condition following post-traumatic neuropathy of the right sciatic nerve, were caused by the blast wave and fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 478 dated 2 April 2024, the injuries sustained by **Salimov Rufat Rovshan oglu**, namely multiple shrapnel wounds of the frontal region and foreign objects—metal fragments—in the soft tissues, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 680/A dated 3 April 2024, the injury sustained by **Malikov Maharram Afsar oglu**, namely a tangential shrapnel wound of the nape region, was caused by fragments generated during the explosion of a projectile possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 837-A dated 26 April 2024, the injury sustained by **Aliyev Hasan Tehmuraz oglu**, namely a penetrating gunshot wound of the left hand accompanied by a comminuted fracture of the middle phalanx of the first finger, was caused by a firearm shot. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 476 dated 29 March 2024, the injuries sustained by **Adigozalov Heydar Sabir oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain and astheno-neurotic manifestations, were caused by

the combined powerful blast wave generated during the explosion of an explosive projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 552 dated 5 April 2024, the injuries sustained by **Heydarov Ali Farmayil oglu**, namely:
a) closed craniocerebral trauma; concussion of the brain; post-traumatic perforation of both tympanic membranes; post-traumatic nystagmus; multiple blind shrapnel wounds of the left upper extremity; an open comminuted displaced fracture of the shaft of the third metacarpal bone of the left hand; and superficial abrasions of both lower extremities; and
b) thermal burns of the face, both auricles, left temporal region, left hand and the posterior surface of the left forearm,
were caused respectively by fragments and the combined powerful blast wave generated during the explosion of an explosive projectile, and by the local effects of high temperature, including flame. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 555 dated 16 April 2024, the injuries sustained by **Bakhishov Sabir Elsevar oglu**, namely:
a) bilateral chronic cochlear neuritis and

Page 721

closed craniocerebral trauma accompanied by bilateral sensorineural hearing loss; vegetative vascular instability following concussion of the brain; blind shrapnel wounds of the right half of the thoracic and abdominal regions, including the right lumbosacral region and the lateral surface of the upper third of the right lower leg, accompanied by open haemopneumothorax; right-sided thoracocentesis; a foreign object—a metal fragment—in the soft tissues of the right hip joint; and
b) thermal burns of the face, both auricles and the right hand covering 6% of the body surface and classified as second-, third-A-degree burns,
were caused respectively by fragments and the combined powerful blast wave generated during the explosion of an explosive projectile, and by the local effects of high temperature, including flame. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1331 dated 20 October 2023, the injuries sustained by **Yahyayev Jeyhun Yahyabay oglu**, namely barotrauma accompanied by bilateral acute cochlear neuritis and multiple wounds of the anterior surfaces of the left and right lower legs, were caused by fragments and the blast wave generated during the explosion of military ammunition—a projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1537 dated 5 April 2024, the injuries sustained by **Aliyev Namig Yashar oglu**, namely multiple blind wounds of the soft tissues of the right frontal surface, anterior surface of the lower jaw, lower eyelid, lateral surface of the

middle third of the left thigh, anterior surface of the right shoulder girdle, lower third of the left upper arm, upper third of the left forearm and posterior surface of the fourth finger of the right hand, were caused by fragments generated during the explosion of an explosive projectile. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1778 dated 18 October 2023, the injuries found on **Khudiyev Mehrab Mukhtar oglu**, namely a penetrating gunshot wound of the right ankle-joint region accompanied by an open fracture of the right scaphoid bone; a sprain of the ligaments of the left ankle joint; and barotrauma of the right ear accompanied by right-sided acute cochlear neuritis, were caused respectively by a firearm shot, blunt trauma involving abrupt movement of the joint beyond its physiological range, and the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the gunshot wound was classified as less grievous harm to health, the barotrauma as minor harm to health, and the sprain was not assigned a degree of severity because it did not cause harm to health.

According to forensic medical expert opinion No. 553 dated 16 April 2024, the injuries sustained by **Abdullayev Khayal Mitalim oglu**, namely closed craniocerebral trauma resulting in vegetative vascular instability following concussion of the brain; left-sided chronic cochlear neuritis; and left-sided sensorineural hearing loss, were caused by the combined powerful blast wave generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 554 dated 16 April 2024, the injuries sustained by **Mammadov Oruj Mammad oglu**, namely closed craniocerebral trauma accompanied by bilateral chronic cochlear neuritis, bilateral sensorineural hearing loss and concussion of the brain, were caused by the combined powerful blast wave generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 463 dated 29 March 2024, the injuries sustained by **Rzayev Nadir Tahir oglu**, namely:
a) closed craniocerebral trauma; concussion of the brain; vegetative vascular instability; bilateral chronic cochlear neuritis; post-traumatic perforation of the right tympanic membrane; post-traumatic perforation of the left tympanic membrane

Page 722

left-sided sensorineural-type and right-sided mixed-type severe hearing loss; and post-traumatic neuropathy of both ulnar nerves, were caused by the combined powerful blast wave generated during the explosion of an explosive device; while thermal burns of the face, the right half of the neck, the right auricle and both upper and lower extremities, covering 40% of the body surface and classified as first-, second-, third-A- and third-B-degree burns, were

caused by the local thermal effects of high temperature, including flame. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 446 dated 5 March 2024, the injury sustained by **Gulmalizada Sahil Mahi oglu**, namely a sprain of the ligaments of the left ankle joint accompanied by swelling and pain of the left lateral malleolus, was caused by blunt trauma resulting from excessive stretching of the ligaments and muscles beyond their physiological limits. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 881-A dated 1 May 2024, the injuries sustained by **Alifov Khalid Hummat oglu**, namely shrapnel wounds of the left upper arm, left forearm and left wrist region, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1616 dated 20 October 2023, the injuries sustained by **Umudov Huseyn Taleh oglu**, namely shrapnel wounds of the upper third of the right lower leg, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 112 dated 27 February 2024, the injuries sustained by **Gasimov Novruzali Shukur oglu**, namely a shrapnel wound of the right lower leg; a foreign object—a fragment; and prolonged post-traumatic stress disorder, were caused by fragments and the blast wave generated during the explosion of an artillery projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 858 dated 30 April 2024, **Abuzarov Galib Shirinbala oglu** was diagnosed by the forensic medical commission with “dissociative manifestations.” This is currently assessed by the investigation as an injury whose degree of severity has not been determined.

According to forensic medical expert opinion No. 101 dated 28 February 2024, the injuries sustained by **Samadov Soltan Aydar oglu**, namely a superficial shrapnel wound and a penetrating shrapnel wound of the left eye, were caused by fragments generated during the explosion of a projectile. The injuries were sustained on 19 September 2023 and, because they resulted in permanent loss of 35% of general working capacity, were classified as grievous harm to health.

According to forensic medical expert opinion No. 100 dated 28 February 2024, the injury sustained by **Gurbanli Fuad Mansur oglu**, namely amputation of the middle third of the right lower leg, was caused by a fragment generated during the explosion of a projectile. The

injury was sustained on 19 September 2023 and, because it resulted in permanent loss of 50% of general working capacity, was classified as grievous harm to health.

According to forensic medical expert opinion No. 756 dated 24 April 2024, the injury sustained by **Khalilov Elnur Aladdin oglu**, namely a blind shrapnel wound of the left buttock region, was caused by a fragment generated during the explosion of an explosive projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 841-A dated 26 April 2024, **Garabayli Hikmat Jovdat oglu** was diagnosed with a "dissociative reaction." This is currently assessed by the investigation as an injury whose degree of severity has not been determined.

Page 723

According to forensic medical expert opinion No. 1489 dated 11 April 2024, the injury sustained by **Aghabalayev Telman Rasim oglu**, namely a penetrating wound of the right hand accompanied by an open comminuted displaced fracture of the fourth metacarpal bone, was caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 512 dated 6 March 2024, the injuries sustained by **Ismayilov Vugar Elburus oglu**, namely a wound with a soft-tissue defect on the plantar surface of the right foot; a lacerated wound of the lateral surface of the lower third of the right lower leg; open comminuted displaced fractures of the lower thirds of the right tibia and fibula; and open comminuted displaced fractures of the bases of the third, fourth and fifth metatarsal bones of the right foot, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 871 dated 14 November 2023, the injuries found on **Bayramov Knyaz Telman oglu**, namely two blind wounds of the scrotum, were caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 349 dated 28 February 2024, the injuries found on the body of **Gurbanov Abdullali Gurban oglu**, namely open craniocerebral trauma; contusion of the left frontal lobe of the brain; subarachnoid haemorrhage; a shrapnel wound of the frontal region accompanied by a comminuted displaced fracture of the frontal bone; and shrapnel wounds of the left thigh, were caused by fragments generated during the explosion of an explosive projectile; while first- and second-degree thermal burns of the face, both hands and nasal region were caused by high temperature. The injuries were sustained on 19 September 2023 and, according to their degree, were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 747 dated 24 April 2024, the injuries sustained by **Malikov Atamali Akif oglu**, namely blast trauma; a wound penetrating the thoracic and abdominal cavities; multiple injuries to the small intestine; intestinal resection; end-to-end anastomosis; colostomy; sanitation and drainage of the abdominal cavity; the condition following primary and secondary surgical treatment of the wounds; haemopneumothorax; and fractures of the left eighth and ninth ribs, were caused by a firearm shot and by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 863 dated 26 December 2023, the injury sustained by **Aliyev Amrah Sabir oglu**, namely a wound of the soft tissues of the lateral surface of the right lower leg, was caused by a bullet fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 635 dated 26 December 2023, the injury sustained by **Mustafayev Rovshan Sahib oglu**, namely a penetrating wound of the soft tissues of the neck, was caused by a bullet fired from a firearm. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 643 dated 23 September 2023, the injuries found on the body of **Rustamov Ramal Vidadi oglu**, namely a penetrating wound of the abdominal cavity accompanied by thrombosis of the left external iliac artery and common femoral artery, third- to fourth-degree haemorrhagic-traumatic shock, haemoperitoneum and damage to the S-shaped intestine; and a penetrating wound of the soft tissues of the left lower-leg region, were caused by firearm shots.

Page 724

According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 578 dated 13 March 2024, the injuries sustained by **Karimli Orkhan Nizami oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain; barotrauma of both ears accompanied by bilateral acute cochlear neuritis; and blind shrapnel wounds of the soft tissues of both lower legs and the right hand, were caused by the combined effects of the blast wave and fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 842 dated 26 April 2024, the injuries sustained by **Najafov Samir Vatan oglu**, namely closed craniocerebral trauma accompanied by astheno-neurotic manifestations and vegetative vascular instability following concussion of the brain, were caused by the blast wave generated during the explosion of an explosive projectile. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 577 dated 13 March 2024, the injury sustained by **Farzaliyev Elmir Vagif oglu**, namely a blind shrapnel wound of the soft tissues of the right forearm, was caused by fragments generated during the explosion of an explosive projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 116 dated 28 February 2024, the injuries sustained by **Huseynov Bakhtiyar Etibar oglu**, namely a healed dissociative reaction; secondary emotional flattening; blast trauma; blind shrapnel wounds of the right scapular and lumbar regions, palmar surface of the left hand and left heel region; and lacerated wounds of the anterior and posterior surfaces of both forearms, were caused by fragments and the blast wave generated during the explosion of an artillery projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 115 dated 28 February 2024, the injuries sustained by **Guliyev Nurlan Firuz oglu**, namely multiple shrapnel wounds of the left upper arm, left ankle joint, left forearm and right thigh, were caused by fragments generated during the explosion of an artillery projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1315 dated 20 October 2023, the injuries sustained by **Huseynov Shamkhal Asif oglu**, namely abrasions of the right lower-leg region, were caused by the impact of a hard blunt object. Since the injuries did not cause impairment of health, their degree of severity was not determined.

According to forensic medical expert opinion No. 2059 dated 3 November 2023, the injuries sustained by **Valiyev Zaka Majnun oglu**, namely closed craniocerebral trauma accompanied by concussion of the brain, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 451 dated 29 February 2024, the injuries sustained by **Nazarli Sultanali Gulali oglu**, namely a thoracoabdominal firearm wound; displaced fractures of the right third and fourth ribs; right-sided haemopneumothorax, for which right-sided thoracocentesis, pleural drainage and abdominal surgery were performed; and the postoperative condition, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including a firearm shot. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 446 dated 29 February 2024, the injuries sustained by **Hasanov Kamran Mehman oglu**, namely blast trauma and injuries to both lower

extremities; the condition following primary surgical treatment of wounds caused by an open fracture of the third and fourth metatarsal bones of the right foot; sufficiently united fractures following immobilisation with a plaster splint; healed skin scars; a small foreign object—a metal fragment—in the soft tissues; and temporary impairment of function, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 440 dated 29 February 2024, the injuries sustained by Ismayilov Farhad Khudaverdi oglu, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 447 dated 29 February 2024, the injuries sustained by Bayramov Ramil Shakir oglu, namely a firearm injury; postoperative skin sutures following primary surgical treatment of an incised and abraded wound of the submandibular region; a firearm wound; the condition following closed craniocerebral trauma and concussion of the brain, were caused by a firearm shot and by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 449 dated 29 February 2024, the injuries sustained by Nasibov Elchin Khazar oglu, namely the condition following left-sided acute cochlear neuritis resulting from blast trauma and one metal fragment in the soft tissues of the lateral wall of the left maxillary sinus and the left half of the face, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 443 dated 29 February 2024, the injuries sustained by Jabbarli Vusal Jamil oglu, namely a gunshot wound penetrating from the left half of the chest into the pleural and abdominal cavities and accompanied by injury to the left lung, left hemidiaphragm and spleen; the condition following laparotomy, inspection of the abdominal cavity, evacuation of a haematoma, splenectomy, sanitation and drainage of the abdominal cavity, left-sided thoracocentesis, pleural drainage and primary surgical treatment of the wounds, were caused by a firearm shot. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 1429 dated 27 March 2024, the injuries sustained by Aghayev Nurlan Ibrahim oglu, namely wounds of the soft tissues at the root of the nose and both eyebrow regions and blunt trauma to the head accompanied by haematomas in both paraorbital regions, were caused by the impact of a hard blunt object. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 748 dated 24 April 2024, the injuries sustained by Mammadov Zaur Shahabbas oglu, namely an old, sufficiently united fracture of the fifth metacarpal bone of the right hand accompanied by pain syndrome, were caused by a hard blunt object striking either the injured region or the injured region striking such an object. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1453 dated 13 March 2024, the injuries sustained by Baghiyev Izzat Zohrab oglu, namely a blind wound of the soft tissues of the left lower-leg region and a foreign object—a metal fragment—in that region, were caused by fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified as minor harm to health.

Page 726

According to forensic medical expert opinion No. 153 dated 28 February 2024, the injuries found on the body of Hasanov Elnur Alviz oglu, namely an open perforated non-displaced linear fracture of the right tibia resulting from blast trauma; scars following blind shrapnel wounds of the right lower leg, right knee joint, left thigh and left heel regions, were caused by fragments generated during the explosion of a projectile. The open perforated non-displaced linear fracture of the right tibia was classified as less grievous harm to health, while the remaining injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 79 dated 5 March 2024, the injuries sustained by Ismayilov Jafaragha Elshad oglu, namely a blind shrapnel wound of the right elbow-joint region; open comminuted defective intra-articular fractures of the distal metaphysis of the right humerus and the proximal metaphysis of the right forearm bones; complete destruction of the elbow joint; an extensive soft-tissue defect; and a foreign object in the soft tissues, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 749 dated 24 April 2024, the injury sustained by Suleymanli Huseyn Nadir oglu, namely the condition following a firearm wound accompanied by a comminuted displaced fracture of the middle third of the right femur, was caused by a firearm shot and primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified as grievous harm to health.

According to forensic medical expert opinion No. 196 dated 2 March 2024, the injury found on the body of Gurbanov Vusal Alovsat oglu, namely a penetrating firearm wound of the middle third of the right forearm accompanied by injury to the right median nerve, was caused by a firearm shot. The injury was sustained on 19 September 2023 and, according to its degree, was classified as less grievous harm to health.

According to forensic medical expert opinion No. 365 dated 29 February 2024, the injury found on the body of Hajizada Zamin Ramin oglu, namely swelling of the left hand, was caused by the impact of a blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 494 dated 3 April 2023, the injuries sustained by Ibrahimov Samir Abulfaz oglu, namely:

a) a penetrating gunshot wound of the lower third of the right forearm accompanied by an open oblique displaced fracture of the lower third of the radial shaft and post-traumatic neuropathy of the right median and radial nerves; penetrating and tangential gunshot wounds of the right auricle, right half of the face and right mastoid region; and

b) closed craniocerebral trauma and vegetative vascular instability following concussion of the brain,

were caused respectively by firearm shots and by the combined powerful blast wave generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 878-A dated 1 May 2024, the injury sustained by Aghayev Huseyn Mail oglu, namely blunt trauma to the right knee joint accompanied by superficial abrasions and contusion of the soft tissues, was caused by the impact of a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 641 dated 23 September 2023, the injuries found on the body of Adishli Rafig Rahil oglu, namely loss of the right lower extremity at the level of the upper third of the lower leg; third- to fourth-degree traumatic-haemorrhagic shock; traumatic rupture of the right lower extremity at the level of the lower third of the lower leg; post-traumatic neuropathy of the sensory branch of the tibial nerve; and a blind wound of the left

lower-leg region accompanied by a foreign object in the soft tissues and right-sided acute cochlear neuritis, were caused by the blast wave, primary fragments and blunt-force secondary fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified overall as grievous harm to health. The loss of the right lower extremity at the level of the upper third of the lower leg was also classified as grievous harm to health because it resulted in permanent loss of 60%—more than one-third—of general working capacity.

According to forensic medical expert opinion No. 1955 dated 21 November 2023, the injuries sustained by Huseynli Bahruz Arif oglu, namely complete loss of vision in both eyes and destruction of both eyeballs; displaced fractures of all walls of the left maxillary sinus, the left zygomatic arch, all walls of the left orbit, the anterior wall of the right maxillary sinus and the inferior wall of the right orbit; a displaced fracture of the nasal bones; a contused and lacerated wound of the external nose; perforation of the nasal septum; bilateral maxillary, frontal and ethmoidal haemosinus; and a penetrating gunshot wound of the head passing through the left preauricular region and accompanied by cerebral contusion, were caused by a firearm shot. According to their degree, the injuries were classified as grievous harm to health because they resulted in permanent loss of more than one-third of general working capacity—complete blindness.

According to forensic medical expert opinion No. 1608 dated 20 October 2023, the injury sustained by Muradov Egan Azer oglu, namely a wound of the medial surface of the left knee region, was caused by fragments generated during the explosion of a projectile possessing explosive properties. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 1527 dated 17 October 2023, the injuries sustained by Yusibli Shams Anar oglu, namely penetrating wounds of the right thigh and barotrauma of the left ear accompanied by left-sided chronic cochlear neuritis and left-sided sensorineural hearing loss, were caused respectively by a firearm shot and by the blast wave generated during the explosion of a projectile possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1957 dated 1 December 2023, the injuries found on Mustafayev Ali Mobil oglu, namely open craniocerebral trauma accompanied by severe contusion of the brain and the right temporal lobe; a displaced comminuted fracture of the left temporal bone; dislocation of the left condylar process and head of the mandible from the articular fossa; blind shrapnel wounds of the left supraorbital and neck regions, were caused by the combined effects of fragments and the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as grievous harm to health. Separately, the open craniocerebral trauma was classified as grievous harm to health, while the blind shrapnel wounds of the left supraorbital and neck regions were classified as minor harm to health.

According to forensic medical expert opinion No. 1555 dated 5 April 2024, the injury sustained by Sofiyev Rasul Fikrat oglu, namely closed craniocerebral trauma, was caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 751 dated 24 April 2024, the injuries sustained by Yolchuyev Taleh Yadigar oglu, namely the condition following primary surgical treatment of a blind shrapnel wound of the right buttock region; bilateral acute cochlear neuritis resulting from blast trauma; closed craniocerebral trauma; the condition following

concussion of the brain; and a moderately expressed acute reaction to stress accompanied by mild asthenia

Page 728

a moderately expressed acute reaction to stress accompanied by mild asthenia, and microcytosis, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1318 dated 20 October 2023, the injuries sustained by Sultanmuradov Elchin Zaur oglu, namely wounds on the posterior surfaces of the middle phalanges of the second and third fingers of the right hand, were caused by the local effects of high temperature. Since the injuries did not cause impairment of health, their degree of severity was not determined.

According to forensic medical expert opinion No. 846 dated 1 November 2023, the injury sustained by Hashimov Ismayil Arif oglu, namely a blind shrapnel wound of the right lower extremity, was caused by fragments generated during the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 403 dated 1 March 2024, the injuries sustained by Baladov Orkhan Natig oglu, namely blind shrapnel wounds of the soft tissues of the right hand and barotrauma of both ears resulting in bilateral chronic cochlear neuritis and bilateral sensorineural hearing loss, were caused by the combined effects of fragments and the blast wave generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1481 dated 13 March 2024, the injury sustained by Ismayilov Valeh Ashraf oglu, namely a blind wound of the left foot accompanied by an open comminuted displaced fracture of the fifth metatarsal bone, was caused by a projectile—a bullet—fired from a firearm. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 506 dated 5 March 2024, the injuries sustained by Allahverdiyev Rufat Abdulazim oglu, namely a closed marginal avulsion fracture of the head of the left femur; dislocation of the femur; closed displaced fractures of the metadiaphyses of the right tibia and fibula; and rupture of the tibiofibular syndesmosis, were caused by the impact of a hard blunt object. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 752 dated 24 April 2024, the injury sustained by Huseynov Farid Huseyn oglu, namely a healed skin scar following a penetrating

gunshot wound of the right thigh and lower leg, was caused by a firearm shot. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 374 dated 1 March 2024, the injury found on the body of Mammadov Eldar Rahman oglu, namely a shrapnel wound of the right thigh, was caused by fragments generated during the explosion of an explosive projectile. The injury was sustained on 19 September 2023 and, according to its degree, was classified as minor harm to health.

According to forensic medical expert opinion No. 503 dated 5 March 2024, the injuries sustained by Vahabov Elvan Shahlar oglu, namely haemopneumothorax—accumulation of blood and air in the right pleural cavity; open comminuted fractures of the right fifth, sixth and seventh ribs; a blind gunshot wound of the right half of the chest penetrating the thoracic cavity; and a blind gunshot wound of the soft tissues of the right hand, were caused by firearm shots. According to their degree, the injuries were classified overall as grievous harm to health. Separately, the blind gunshot wound of the soft tissues of the right hand was classified as minor harm to health, while the blind gunshot wound penetrating the right half of the thoracic cavity was classified as grievous harm to health.

Page 729

According to forensic medical expert opinion No. 510 dated 4 April 2024, the injuries sustained by Maharramov Amin Karrar oglu, namely comminuted displaced fractures of the right humerus and right femur, were caused by firearm shots. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1455 dated 27 March 2024, the injuries sustained by Hatamov Nurlan Shakir oglu, namely an open wound of the second finger of the left hand accompanied by an open comminuted displaced fracture of the proximal phalanx; a blind wound of the soft tissues of the left lateral surface of the middle third of the neck accompanied by injury to the strap muscle and a metallic foreign object—a fragment; and a blind wound of the soft tissues of the anterior wall of the left half of the chest accompanied by injury to the pectoralis major muscle and a metallic foreign object—a fragment, were caused by fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1792 dated 20 October 2023, the injury sustained by Hatamov Vasif Fikrat oglu, namely a superficial abraded wound of the posterior third of the right thigh, was caused by the impact of a hard blunt object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 121 dated 4 March 2024, the injuries sustained by Mirsalehli Murad Alakbar oglu, namely rupture of the right tympanic membrane and a sprain of the right knee joint, were caused by the blast wave generated by an explosive

substance. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1493 dated 11 April 2024, the injuries sustained by Teymurov Taleh Alish oglu, namely open comminuted displaced fractures of the right tenth and eleventh ribs and the right transverse process of the eleventh thoracic vertebra; contusion of the lower lobe of the right lung; and a blind wound of the right posterolateral wall of the chest not penetrating the cavity, were caused by a projectile—a bullet—fired from a firearm. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 126 dated 29 March 2024, the injuries found on the body of Verdiyev Murad Mubariz oglu, namely blast trauma and blunt trauma to various regions of the body, were sustained on 19 September 2023 as a result of an anti-tank missile strike. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 126 dated 29 March 2024, the injuries sustained by Allahyarov Bahram Sakit oglu, namely blast trauma and blunt trauma to various regions of the body, were sustained on 19 September 2023 as a result of an anti-tank missile strike. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 662 dated 26 December 2023, the injury sustained by Aliyev Ali Mais oglu, namely blunt trauma to the right knee-joint region accompanied by reactive oedema, swelling, contusion of the soft tissues and an abraded wound, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 97 dated 4 March 2024, the injuries found on the body of Mammadov Parviz Vali oglu, namely blast trauma; blunt trauma to various regions of the body; barotrauma; and the condition following bilateral acute cochlear neuritis, were sustained on 20 September 2023 as a result of shelling. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 103 dated 11 March 2024, the injuries found on the body of Mutallimli Tofig Mammad oglu, namely blast

trauma and blunt trauma to various regions of the body, were sustained on 20 September 2023 as a result of shelling and the impact of fragments. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1469 dated 13 March 2024, the injuries sustained by Aslanov Arzu Aflatun oglu, namely multiple blind wounds of the soft tissues of the lateral surfaces of the right lower leg and right knee joint, were caused by fragments

generated during the explosion of firearm ammunition. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 14-H dated 11 March 2024, the injuries found on Alakbarli Shahriyar Bakhtiyar oglu, namely an open comminuted fracture of the right calcaneus; lacerated and crushed soft tissues of the right heel region; and abraded wounds of the right forearm and the dorsal surface of the second finger of the right hand, were caused by fragments generated during blast trauma. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 17-H dated 11 March 2024, the injuries found on Imanov Royal Araz oglu, namely open craniocerebral trauma; contusion of the left frontal lobe of the brain; subarachnoid haemorrhage; comminuted displaced fractures of the left zygomatic bone, frontal bone, superior and inferior medial walls of the left orbit and the anterior wall of the maxillary sinus; lacerated and torn wounds of the forehead, right auricle, upper and lower lips and tongue; a metallic foreign object—a fragment—in the tongue; lacerated wounds of the lower eyelid, conjunctiva and sclera of the right eye; perforation of the left eyelid and eyeball; left-sided perforative otitis; and deviation of the nasal septum, were caused by fragments generated during blast trauma. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 545 dated 12 March 2024, the injuries sustained by Hasanov Azimbala Valis oglu, namely blind shrapnel wounds of both lower extremities, including the thighs and lower legs; the left forearm; groin; and left mandibular region, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1552 dated 10 October 2023, the injuries sustained by Rustamov Murad Igbal oglu, namely blind shrapnel wounds of the posterior surface of the left thigh and the left axillary region, were caused by multiple fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1827 dated 27 October 2023, the injuries found on Javadov Fagan Jamal oglu, namely a blind shrapnel wound of the neck region and abrasions and lacerated wounds of the left side of the neck, the posterior surface of the left forearm and the fourth and fifth fingers of the left hand, were caused respectively by fragments generated during the explosion of a projectile possessing explosive properties and by the impact of a hard blunt object. Overall, the injuries were classified as minor harm to health. Separately, the shrapnel wound was classified as minor harm to health, while the abrasions and lacerated wounds were not assigned a degree of severity because they did not cause harm to health.

According to forensic medical expert opinion No. 546 dated 12 March 2024, the injury sustained by Aghayev Elmar Elkhan oglu, namely barotrauma of both ears, was caused by the

blast wave generated during the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 541 dated 9 March 2024, the injuries sustained by Aghayev Elmar Elman oglu, namely barotrauma of the right ear accompanied by right-sided acute cochlear neuritis and closed craniocerebral trauma accompanied by concussion of the brain…

Page 731

were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1545 dated 15 April 2024, the contusion sustained by Musayev Aykhan Agil oglu in the forearm region of the right upper extremity was caused by the impact of a hard blunt object. His other injuries, namely barotrauma and closed craniocerebral trauma, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1457 dated 27 March 2024, the injuries sustained by Hasanzada Yavar Bakhtiyar oglu, namely multiple blind wounds of the soft tissues of the right upper-arm region; metallic foreign objects—fragments; a blind wound of the right hand accompanied by displaced open fractures of the middle phalanx of the fifth finger and the fifth metacarpal bone; and a fracture of the lower third of the left radius, were caused by primary fragments and blunt-force secondary fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1530 dated 26 January 2024, the injuries sustained by Mirzayev Muslim Vusal oglu, namely vegetative vascular instability; closed craniocerebral trauma accompanied by astheno-neurotic syndrome; concussion of the brain; left-sided cochlear neuritis; barotrauma complicated by left-sided sensorineural hearing loss; and a foreign object—a metal fragment—in the soft tissues of the nasal dorsum, were caused by the blast wave and multiple fragments generated during the explosion of a projectile possessing explosive properties. Both separately and collectively, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 132 dated 28 March 2024, the injuries sustained by Hajiyev Alirza Zahir oglu, namely blast trauma; first-, second- and third-A-degree flame burns covering 6% of the scalp, face, right auricle, right upper arm and forearm; the condition following primary surgical treatment of blind shrapnel wounds of various regions of the body; metallic foreign objects—fragments—in the soft tissues; traumatic perforation of both tympanic membranes; mixed hearing loss in both ears; closed

craniocerebral trauma; and concussion of the brain, were caused by fragments generated during the explosion, the fire that occurred after the explosion and the blast wave of the mine explosion. The injuries were sustained on 19 September 2023 and, because they were life-threatening at the time they were inflicted, were classified as grievous harm to health.

According to forensic medical expert opinion No. 67 dated 8 March 2024, the injuries found on the body of Yusubov Rahman Kamil oglu, namely an open fracture of the mastoid process of the right temporal bone, the right auricle and the postauricular region, were caused by a firearm shot resulting from artillery fire from the opposing side. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 561 dated 18 March 2024, the injuries sustained by Musayev Asaf Gazanfar oglu, namely blunt trauma to the left eye; periorbital haematoma; conjunctival oedema; foreign objects in the conjunctiva; traumatic retinopathy; a chorioretinal macular scar resulting in reduction of visual acuity in the left eye to light perception; post-traumatic perforation of the left tympanic membrane; closed craniocerebral trauma accompanied by astheno-neurotic manifestations following concussion of the brain; and blind shrapnel wounds of the left cheek, forehead, zygomatic region, left auricle and lower lip, accompanied by multiple fractures of the medial wall of the left orbit, were caused by the combined effects of the blast wave and fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as grievous harm to health because they resulted in permanent loss of more than one-third of general working capacity.

Page 732

According to forensic medical expert opinion No. 65 dated 7 March 2024, the injury found on the body of Jafarov Hojjatali Safar oglu, namely a contused wound of the lateral surface of the upper third of the left thigh, was caused by firearm impact resulting from artillery fire on 20 September 2023. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 149 dated 9 March 2024, the injuries found on the body of Mammadov Yusif Rahib oglu, namely an open transverse displaced fracture of the middle third of the right femoral shaft; post-traumatic sensory loss of the sciatic nerve; post-traumatic neuropathy of the right peroneal nerve; and motor impairment in the form of monoparesis of the right lower extremity, were caused by the blast wave generated during the explosion of a projectile fired in the course of hostilities. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as grievous harm to health.

According to forensic medical expert opinion No. 1445 dated 13 March 2024, the injury sustained by Abbasov Amin Gadir oglu, namely a blind wound of the soft tissues of the right upper-arm region, was caused by fragments generated during the explosion of firearm ammunition. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 131 dated 1 April 2024, the injuries found on the body of Aliyev Jamil Ali oglu, namely blast trauma and blunt trauma to the left shoulder-girdle region, were sustained on 19 September 2023 as a result of an anti-tank missile strike. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 229 dated 13 March 2024, the injury found on the body of Rustamov Aykhan Vagif oglu, namely a blind gunshot wound of the left suprascapular region accompanied by fractures of the left scapula and the spinous processes of the fourth and fifth thoracic vertebrae, was caused by a firearm shot. The injury was sustained on 19 September 2023 and, according to its degree, was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1562 dated 20 October 2023, the injuries sustained by Aghayev Bahlul Shamsaddin oglu, namely a penetrating firearm wound of the lower third of the left forearm; an open comminuted displaced fracture of the lower third of the radius; and post-traumatic polyneuropathy of the left hand, were caused by a firearm shot. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 198 dated 14 March 2024, the injury found on the body of Kamalov Elmar Mahammad oglu, namely a firearm shrapnel wound of the right iliac region, was caused by a firearm projectile. The injury was sustained on 19 September 2023 and, according to its degree, was classified as minor harm to health.

According to forensic medical expert opinion No. 75 dated 16 February 2024, the injuries found on the body of Rahimov Sarkhan Sarvan oglu, namely closed craniocerebral trauma; concussion of the brain; a penetrating shrapnel wound of the left shoulder-girdle region; an avulsion fracture of the head of the left humerus; the condition following compression-ischaemic neuropathy of the left median nerve; left-sided acute cochlear neuritis; haematoma, oedema and bruising of the left periorbital region; an abraded wound of the eyebrow region; and multiple fragments in the body, were caused by an explosion and fire on 19 September 2023. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 440 dated 4 April 2024, the injury found on the body of Huseynov Eyvaz Vidadi oglu, namely an open fracture of the right femur

was caused by fragments generated during the explosion of an explosive projectile. The injury was sustained on 19 September 2023 and, according to its degree, was classified as grievous harm to health.

According to forensic medical expert opinion No. 597 dated 15 March 2024, the injuries sustained by Asgarov Shukur Ilkin oglu, namely barotrauma of the left ear accompanied by left-sided acute cochlear neuritis and closed craniocerebral trauma accompanied by concussion of the brain, were caused by the blast wave generated during the explosion of a

projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 593 dated 16 April 2024, the injuries sustained by Sharifov Fikrat Balakhan oglu, namely comminuted displaced fractures of the first and fourth lumbar vertebrae; a fracture of the body and arch of the fifth lumbar vertebra; injury to the cauda equina nerve fibres of the spinal cord; and a blind gunshot wound entering through the lumbar region and penetrating the spinal canal at the level of the fourth and fifth lumbar vertebrae, were caused by a firearm shot. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 1890 dated 31 October 2023, the injuries found on Shikhiyev Parviz Shamladdin oglu, namely a gunshot wound of the upper third of the left upper arm accompanied by an open fracture of the humerus, and a blind shrapnel wound of the posterior surface of the right half of the chest not penetrating the thoracic cavity and accompanied by right-sided pneumothorax, were caused respectively by a firearm shot and by the blast wave generated during the explosion of a projectile possessing explosive properties. Overall, the injuries were classified as grievous harm to health. Separately, the shrapnel wound was classified as minor harm to health, while the gunshot wound was classified as grievous harm to health.

According to forensic medical expert opinion No. 1557 dated 28 March 2024, the injuries sustained by Guliyev Rahman Tofig oglu, namely closed craniocerebral trauma accompanied by concussion of the brain, barotrauma aggravated by left-sided acute cochlear neuritis and astheno-neurotic manifestations, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1767 dated 30 November 2023, the injury found on Alizada Nijat Rahman oglu, namely a penetrating gunshot wound of the upper third of the left lower leg accompanied by an open comminuted displaced fracture of the proximal metadiaphysis of the left tibia, was caused by a firearm shot. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 754 dated 24 April 2024, the injuries sustained by Abdiyev Vugar Niyaz oglu, namely traumatic perforation of both tympanic membranes resulting from blast trauma and unhealed skin scars following shrapnel wounds of the forehead and posterior surface of the right wrist, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1548 dated 13 November 2023, the injuries sustained by Eyyubov Seyidbala Eldaniz oglu, namely bilateral acute cochlear neuritis; closed craniocerebral trauma; concussion of the brain; and damage to the left tympanic

membrane, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

Page 734

According to forensic medical expert opinion No. 755 dated 24 April 2024, the injuries sustained by Chaparzada Aziz Ziyafat oglu, namely blast trauma; the condition following closed craniocerebral trauma; and the condition following concussion of the brain, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1573 dated 27 November 2023, the injury sustained by Imanov Khalid Gurban oglu, namely a tangential gunshot wound of the right upper-arm region accompanied by bruising, was caused by a firearm shot. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 1523 dated 13 November 2023, the injury sustained by Mamiyev Vusal Igrar oglu, namely a wound of the lower third of the left upper arm accompanied by a foreign object in the soft tissues, was caused by a fragment generated during the explosion of a projectile possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 755 dated 22 April 2024, the injuries sustained by Aydamirov Farid Fuadovich, namely a penetrating gunshot wound of the right buttock region entering the abdominal cavity and accompanied by damage to the serous membrane of the caecum; subtotal traumatic amputation of the first finger at the level of the base of the metacarpal bone; and penetrating gunshot wounds of the first finger of the left hand and the right hip region accompanied by an open comminuted fracture of the wing of the iliac bone, were caused by firearm shots. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 2089 dated 25 November 2023, the injuries found on Guliyev Mehman Abbas oglu, namely injuries to the left elbow region accompanied by open comminuted intra-articular fractures of the distal end of the left humerus and the proximal ends of the left forearm bones and damage to the radial and ulnar nerves; and gunshot wounds of the right shoulder girdle accompanied by open comminuted fractures of the right scapula and clavicle, right-sided brachial plexopathy, contusion of the right lung and right-sided haemopneumothorax, were caused by firearm shots. According to their degree, the injuries were classified overall as grievous harm to health. Separately, the injuries to the right shoulder girdle and the gunshot wound of the left elbow region were each classified as grievous harm to health.

According to forensic medical expert opinion No. 1804 dated 8 December 2023, the injuries sustained by Ibrahimli Ibrahim Bayram oglu, namely a blind wound of the right shoulder region not penetrating the thoracic cavity and accompanied by a comminuted fracture of the distal end of the right clavicle and an open non-displaced fracture of the body of the right scapula; and a penetrating gunshot wound of the left elbow-joint region, were caused by firearm shots. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 2148 dated 25 November 2023, the injuries found on Rustamli Ali Hamzagha oglu, namely injuries to the left elbow region accompanied by an open displaced fracture of the ulna and neuropathy of the left ulnar nerve; injuries to the left ankle joint accompanied by fractures of the calcaneus and talus; and a penetrating gunshot wound of the right foot accompanied by fractures of the right navicular and cuboid bones, were caused by a firearm shot. According to their degree, both collectively and separately, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1839 dated 6 December 2023, the injuries sustained by Khalilov Emin Zahir oglu, namely blind shrapnel wounds of both buttock regions

Page 735

were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1820 dated 27 October 2023, the injuries found on Mammadov Urfan Kamil oglu, namely wounds of the frontal region, nasal dorsum and posterior surface of the neck; a blind wound of the left hand; a fracture of the fifth metacarpal bone of the left hand; and barotrauma of both ears accompanied by bilateral acute cochlear neuritis, were caused by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 638 dated 27 October 2023, the injuries found on the body of Allahyarov Ramil Jalal oglu, namely an open wound of the right elbow-joint region accompanied by an open intra-articular fracture of the ulna; traumatic amputation of the distal phalanx of the third toe of the right foot; and a blind wound of the right foot, were caused by the blast wave, primary fragments and blunt-force secondary fragments generated during the explosion of firearm ammunition. According to their degree, the injuries were classified overall as less grievous harm to health requiring prolonged treatment.

According to forensic medical expert opinion No. 1824 dated 27 October 2023, the injuries found on Sharbatov Goshgar Ilgar oglu, namely blind shrapnel wounds of the soft tissues of the right hand; closed craniocerebral trauma accompanied by concussion of the brain; and barotrauma of the right ear accompanied by right-sided acute cochlear neuritis, were caused

by the blast wave generated by the explosion of a projectile possessing explosive properties. According to their degree, both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 442 dated 4 April 2024, the injuries found on the body of Aliyev Kamil Firdovsi oglu, namely closed craniocerebral trauma; concussion of the brain; abrasions on the posterior surfaces of both hands and the left side of the neck; and a contused and lacerated wound of the right temporal region, were caused by the explosion of an explosive projectile. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as minor harm to health.

According to forensic medical expert opinion No. 1504 dated 13 November 2023, the injuries sustained by Mikayilov Sagif Azer oglu, namely a gunshot wound of the right heel region accompanied by open displaced comminuted fractures of the right calcaneus, navicular and lateral cuneiform bones, were caused by a firearm shot. According to their degree, the injuries were classified as less grievous harm to health.

According to forensic medical expert opinion No. 138 dated 14 March 2024, the injuries found on the body of Huseynov Yusif Abdul oglu, namely the effects of a blast wave and blunt trauma to the chest, were sustained on 19 September 2023 as a result of a blast-wave impact. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 649 dated 28 March 2024, the injuries sustained by Sharifov Anar Rufulla oglu, namely closed craniocerebral trauma accompanied by concussion of the brain and abraded wounds of the right thigh and right lower-leg regions, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties and by the impact of a hard blunt object. According to their degree, the injuries were classified collectively as minor harm to health.

According to forensic medical expert opinion No. 1575 dated 20 October 2023, the injuries sustained by Ganbarov Habil Gabil oglu, namely multiple wounds of the soft tissues of the right upper arm and both hands, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

Page 736

According to forensic medical expert opinion No. 139 dated 15 March 2024, the injuries found on the body of Guliyev Amin Elnur oglu, namely skin scars following blind shrapnel wounds of the lateral corner of the left eye, the posterior surface of the third finger of the left hand and the medial surface of the right lower leg, were sustained on 19 September 2023 as a result of an explosion, fire and blast wave. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 160 dated 14 March 2024, the injury sustained by Mammadov Aghadadash Ilham oglu, namely a sprain of the ligaments of the right knee joint, was caused by muscle tension. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 88 dated 18 March 2024, the injuries found during the forensic medical examination of Mammadov Gunduz Novruz oglu, namely open comminuted displaced fractures of the lower third of the bones of the right lower leg; fractures of the heads of the fourth and fifth metatarsal bones of the right foot; displaced fracture-dislocations of the calcaneus, cuboid, medial and lateral cuneiform and navicular bones; and a wound of the plantar surface of the right foot accompanied by a soft-tissue defect, were caused by fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 613 dated 1 April 2024, the injury sustained by Guliyev Yahya Saleh oglu, namely an abraded wound of the anterior surface of the left lower leg, was caused by a hard blunt object striking either the injured region or the injured region striking such an object. Since the injury did not cause harm to health, its degree of severity was not determined.

According to forensic medical expert opinion No. 577 dated 1 April 2024, the injuries sustained by Khammadov Eldar Hasan oglu, namely blast trauma; the condition following closed craniocerebral trauma and concussion of the brain; barotrauma; traumatic perforation of the left tympanic membrane; and the condition following left-sided acute cochlear neuritis, were caused by the blast wave generated by the explosion of a substance possessing explosive properties. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 576 dated 1 April 2024, the injuries sustained by Bakhshaliyev Mehman Bakhshali oglu, namely a sufficiently united fracture of the middle third of the shaft of the left tibia; a comminuted, intra-articular, non-displaced fracture of the distal metaphysis of the left fibula; the condition following immobilisation of the left lower leg with a posterior plaster splint; left-sided chronic cochlear neuritis resulting from blast trauma; severe left-sided sensorineural hearing loss, with whispered speech perceived at a distance of five metres in the left ear and six metres in the right ear; myopia of the right eye of 0.75 dioptres resulting in visual acuity reduced to 0.6 and corrected visual acuity, with visual acuity of 1.0 in the left eye; and astheno-neurotic manifestations of somatogenic origin, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 762 dated 22 April 2024, the injuries sustained by Khalilov Alafaddin Huseyn oglu, namely a blind gunshot wound of the right half of the chest accompanied by displaced fractures of the tenth and eleventh ribs and

contusion of the right lung; a lacerated wound of the right forearm; and a blind gunshot wound of the thigh accompanied by an open comminuted displaced fracture of the right femur, were caused by firearm shots. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1959 dated 24 October 2023, the injuries found on Gasimov Nijat Movlud oglu, namely closed craniocerebral

trauma; concussion of the brain; multiple blind shrapnel wounds of the lumbar region; post-traumatic neuropathy of the right L5 lumbar and S1 sacral nerves; blind shrapnel wounds of the pelvic and right lower-extremity regions; and an open fracture of the sacrum, were caused by the combined effects of fragments and the blast wave generated during the explosion of a projectile or device possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

Separately, the closed craniocerebral trauma accompanied by concussion of the brain; multiple blind shrapnel wounds of the lumbar region; multiple metallic fragments at the L5–S3 level of the spine; post-traumatic neuropathy of the right L5 and S1 nerves; and blind shrapnel wounds of the pelvic and right lower-extremity regions were classified as minor harm to health. The open comminuted fractures of the sacrum at the S2–S3 level were classified as less grievous harm to health.

According to forensic medical expert opinion No. 633 dated 26 December 2023, the injuries sustained by Mammadov Rahib Ayat oglu, namely first- and second-degree thermal burns of the forehead and the right temporal and zygomatic regions, covering 3% of the total body surface; blind wounds of the dorsal surfaces of both hands; and a small metallic foreign object in the soft tissues of the second finger of the left hand, were caused by flame and fragments generated during the explosion of military ammunition possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 24-H dated 9 April 2024, the injuries sustained by Aliyev Tavakkul Elimdar oglu, namely contusion of the lower back and pelvis; a post-traumatic stress reaction; paresis of the lower extremities and mutism accompanied by hysterical manifestations and signs of aggression, were caused by mine-blast trauma. The injuries were sustained on 19 September 2023 and, according to their degree, were classified as less grievous harm to health.

According to forensic medical expert opinion No. 1505 dated 13 November 2023, the injuries sustained by Mahmudov Hamza Mahmud oglu, namely an extensive wound with a soft-tissue and bone defect on the lateral surface of the middle third of the right forearm, accompanied by displaced fractures of the right ulna and the fifth metatarsal bone of the right foot; a wound of the lateral surface of the right hand; and multiple isolated wounds of the posterior

surface of the left hand, were caused by multiple fragments generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 763 dated 24 April 2024, the injuries sustained by Abbaszada Abbas Azer oglu, namely moderately expressed prolonged post-traumatic stress disorder; bilateral chronic cochlear neuritis resulting from blast trauma; bilateral sensorineural hearing loss, with whispered speech perceived at a distance of four metres in the right ear and five metres in the left ear; and healed skin scars following blind shrapnel wounds of the right temporal region, right forearm, posterior surface of the right hand, fourth finger of the left hand and both lower legs, were caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties, including the blast wave. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 876-A dated 1 May 2024, the injury sustained by Sharifov Sanan Sharif oglu, namely contusion of the soft tissues of the left heel accompanied by reactive oedema, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 667 dated 23 April 2024, the injuries sustained by Mammadov Vasif Asif oglu, namely barotrauma; a sprain of the right ankle joint; and ptosis of the right eyelid, were caused by the blast wave generated by the explosion of a substance possessing explosive properties.

Page 738

According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 1826 dated 24 October 2023, the injury sustained by Karimov Mahammad Vilayat oglu, namely a penetrating gunshot wound of the anterior surface of the neck accompanied by a non-displaced fracture of the thyroid cartilage of the larynx and paralysis of both vocal cords, was caused by a firearm shot. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1913 dated 8 December 2023, the injuries sustained by Ibrahimov Sahib Soltan oglu, namely right-sided haemothorax; contusion of the lung; injury to the right lobe of the liver and the right kidney; and a blind gunshot wound penetrating from the right lateral wall of the chest into the abdominal cavity, were caused by a firearm shot. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1848 dated 6 December 2023, the injuries sustained by Humbatli Huseyn Joshgun oglu, namely metallic foreign objects—fragments—in the soft tissues of both lower legs; a blind shrapnel wound of the right knee joint resulting

in post-traumatic synovitis; and subchondral damage to the medial condyle of the femur, were caused by fragments generated during the explosion of an explosive projectile. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1855 dated 13 October 2023, the injury found on Sukurov Malik Mukhtarovich, namely a penetrating firearm bullet wound of the posterior neck region and the left shoulder girdle, accompanied by a displaced comminuted fracture of the spinous process of the fifth cervical vertebra, was caused by a firearm shot. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 1542 dated 15 April 2023, the injuries sustained by Akhundov Rasif Zakir oglu, namely a crushed wound of the soft tissues of the chest, were caused by the impact of a hard blunt object, while the barotrauma and closed craniocerebral trauma were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as minor harm to health.

According to forensic medical expert opinion No. 823 dated 26 April 2024, the injuries sustained by Isayev Tural Elburus oglu, namely the condition following closed craniocerebral trauma accompanied by the condition following concussion of the brain; post-traumatic perforation of the left tympanic membrane accompanied by left-sided cochlear neuritis; and a comminuted fracture of the lower third of the left radius, were caused by the combined effects of fragments and the blast wave generated during the explosion of a projectile possessing explosive properties. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 772 dated 25 April 2023, the injuries sustained by Mammadov Huseyn Abulfaz oglu, namely amputation of the left lower leg at the level of its upper third; open displaced fractures of the base of the fifth metatarsal bone of the right foot; and multiple skin scars on the abdomen, both thighs, both buttock regions and the posterior surface of the right lower leg, were caused by fragments generated during the explosion of an explosive projectile. Because the injuries resulted in permanent loss of more than one-third of general working capacity, they were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 1467 dated 8 April 2024, the injuries sustained by Qayyumlu Mahammadali Seyidagha oglu, namely an open wound of the left lower-leg region accompanied by a fracture of the fibula and injury to the peroneal nerve; and multiple blind wounds of the soft tissues of the left

thigh, right lower leg, right heel, both hands and right foot, were caused by primary fragments and blunt-force secondary fragments generated during the explosion of firearm

ammunition. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 760 dated 24 April 2024, the injury sustained by Khankishiyev Ramil Namig oglu, namely a penetrating injury to the right eye resulting from blast trauma and a traumatic cataract that reduced visual acuity to 0.2 without correction, while visual acuity in the left eye remained 1.0, was caused by primary and/or secondary fragments generated by the explosion of a substance possessing explosive properties. According to its degree, the injury was classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 843 dated 27 April 2024, the injury found on the body of Abdullayev Isa Ilkin oglu, namely a blind wound of the upper third of the left upper arm, was caused by fragments generated during the explosion of military ammunition possessing explosive properties. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 2438 dated 15 January 2024, the injuries sustained by Abbasov Teymur Akif oglu, namely closed craniocerebral trauma accompanied by concussion of the brain; barotrauma of both ears accompanied by complete deafness on the left and acute sensorineural hearing loss on the right, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. Strain of the thoracolumbar region of the spine and contusion of the soft tissues of both thighs were caused by the impact of a hard blunt object. According to their degree, the injuries were classified collectively as less grievous harm to health resulting in significant permanent loss of less than one-third of general working capacity.

According to forensic medical expert opinion No. 1765 dated 11 October 2023, the injuries found on Mehdiyev Huseynali Ilham oglu, namely a blind gunshot wound of the lower third of the right lower leg resulting in an open comminuted intra-articular displaced fracture of the distal metadiaphysis of the right tibia and a comminuted perforated fracture of the calcaneus; and a penetrating gunshot wound of the soft tissues of the right buttock region, were caused by firearm shots. According to their degree, the injuries were classified overall as grievous harm to health. Separately, the penetrating gunshot wound of the soft tissues of the right buttock region was classified as minor harm to health, while the blind gunshot wound of the lower third of the right lower leg was classified as grievous harm to health.

According to forensic medical expert opinion No. 677-A dated 5 April 2024, the injuries sustained by Aghayev Rasul Avtandil oglu, namely second-degree traumatic haemorrhagic shock; impaired blood circulation and ischaemia of the right foot; ischaemic necrosis of the first, second, third, fourth and fifth toes; injury to the anterior tibial artery; subtotal amputation at the level of the lower third of the right lower leg; and open comminuted displaced fractures of the lower thirds of the shafts of the lower-leg bones accompanied by a bone-tissue defect, were caused by a firearm shot. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 2441 dated 19 January 2024, the injury sustained by Mammadov Ramazan Habib oglu, namely a blind wound of the left upper arm, was caused by a fragment generated during the explosion of an explosive projectile. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 2440 dated 9 February 2024, the injuries sustained by Beydullayev Elmir Yadigar oglu, namely shrapnel wounds of the second and third fingers of the right hand, were caused by a fragment generated during the explosion of an explosive projectile. According to their degree, the injuries were classified as minor harm to health.

Page 740

According to forensic medical expert opinion No. 2442 dated 9 February 2024, the injury sustained by Rahimov Ilkin Eldaniz oglu, namely a wound of the right elbow, was caused by a fragment generated during the explosion of an explosive device. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 848 dated 29 April 2024, the injury sustained by Hasanov Royal Sahibaddin oglu, namely a blind shrapnel wound of the palmar region of the right upper extremity, was caused by a fragment generated during the explosion of an explosive device. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 97 dated 18 April 2024, the injuries found on the body of Ismayilov Sadiq Isbat oglu, namely an open comminuted displaced fracture of the proximal phalanx of the second finger of the right hand; a broad wound with a tissue defect in the lower third of the left lower leg; and multiple blind shrapnel wounds of the face, were caused by fragments resulting from a firearm shot. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 787 dated 29 April 2024, the injuries sustained by Rzabayli Elturk Ali oglu, namely a blind shrapnel wound penetrating from the lumbar region into the abdominal cavity and accompanied by damage to the small intestine and a fracture of the left ninth rib; a wound of the lower third of the left thigh accompanied by an extensive soft-tissue defect; an open comminuted displaced fracture of the distal metaphyses of the left lower-leg bones; bilateral chronic cochlear neuritis; bilateral sensorineural hearing loss; and post-traumatic impairment of cerebral circulation accompanying craniocerebral trauma, were caused by fragments and the combined powerful blast wave generated during the explosion of an explosive device. According to their degree, the injuries were classified overall as grievous harm to health.

According to forensic medical expert opinion No. 368 dated 5 October 2023, the injury sustained by Aliyev Ilkin, namely blast trauma resulting in an asthenic reaction and bilateral

cochlear neuritis, was caused by barotrauma sustained during an explosion. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 225 dated 16 April 2024, the injury sustained by Aslanov Rashad Kamal oglu, namely post-traumatic epididymitis and left-sided varicocele, was caused by the blast wave generated during an explosion on 19 September 2023. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 226 dated 16 April 2024, the injury sustained by Alisultanov Farid Vugar oglu, namely first-degree thermal burns of both lower legs, was caused by the effects of flame generated as a result of an explosion on 19 September 2023. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 224 dated 16 April 2024, Ahmadov Musa Rizvan oglu was found to have closed craniocerebral trauma; concussion of the brain; and multiple superficial wounds of both lower extremities and the posterior surfaces of both hands. These injuries were caused by the impact of a blunt object with a limited contact surface, possibly a fragment generated during the explosion of a projectile. The injuries caused short-term impairment of health and were therefore classified as minor harm to health.

According to forensic medical expert opinion No. 575 dated 16 April 2024, the injuries found on the body of Muradli Ramiz Anar oglu, namely blind shrapnel wounds of both buttock regions, were caused by fragments generated during the explosion of an explosive device. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 574 dated 16 April 2024, the injuries found on the body of Karimov Rafail Mustafa oglu, namely multiple foreign objects in the corneas and conjunctivae of both eyes and keratopathy

Page 741

were caused by fragments generated during the explosion of a dual-action explosive device. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 1823 dated 12 October 2023, the injuries found on Rasulov Allahverdi Bahruz oglu, namely bilateral acute cochlear neuritis; traumatic perforation of the tympanic membranes; and barotrauma of both ears, were caused by the blast wave generated during the explosion of a projectile possessing explosive properties. Both collectively and separately, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 819 dated 26 April 2024, the injury sustained by Talibov Shahin Hasan oglu, namely a shrapnel wound of the first toe of the right foot, was caused by fragments generated during the explosion of an explosive projectile or device. According to its degree, the injury was classified as minor harm to health.

According to forensic medical expert opinion No. 795 dated 26 April 2024, the injuries sustained by Shabizada Ramal Jamil oglu, namely neuropathy accompanied by damage to the median nerve; an open comminuted displaced fracture of the left humerus; and a penetrating gunshot wound of the left upper-arm region, were caused by a firearm shot or shots. According to their degree, the injuries were classified as grievous harm to health.

According to forensic medical expert opinion No. 809 dated 26 April 2024, the injuries sustained by Mirzamov Nijat Safiyulla oglu, namely closed craniocerebral trauma and concussion of the brain, were caused by the combined powerful blast wave generated during the explosion of an explosive device. According to their degree, the injuries were classified as minor harm to health.

According to forensic medical expert opinion No. 759 dated 24 April 2024, the injury sustained by Garayzada Anar Mais oglu, namely a fracture of the second metatarsal bone of the right foot, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 843 dated 27 April 2024, the injuries found on the body of Aghayev Rashad Kamil oglu, namely thermal burns caused by flame to the scalp, face, both auricles, the right half of the neck, the right thigh, lower leg and foot, covering 22% of the body surface; a comminuted open fracture of the third metatarsal bone; and an open fragmented fracture of the fourth metatarsal bone, were caused by fragments generated during the explosion of military ammunition and by flame. According to their degree, the injuries were classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 1779 dated 3 October 2023, the injury found on Abdullayev Nizami Eynullah oglu, namely a closed slightly displaced fracture of the distal metaphysis of the right radius, was caused by the impact of a hard blunt object. According to its degree, the injury was classified as less grievous harm to health.

According to forensic medical expert opinion No. 840 dated 26 April 2024, the injuries sustained by Nazarov Rahib Vagif oglu, namely:

a) closed craniocerebral trauma; concussion of the brain; left-sided acute cochlear neuritis; traumatic amputation of the right lower extremity at the level of the knee joint; and an open comminuted fracture of the left lower-leg bones, caused by fragments and the combined powerful blast wave generated during the explosion of an unidentified explosive device; and

b) first-, second- and third-A-degree thermal burns of the face, the anterior surface of the trunk and both upper extremities, caused by high temperature, including the local effects of flame,

were classified overall as grievous harm to health because they resulted in permanent loss of more than one-third of general working capacity.

According to forensic medical expert opinion No. 762 dated 24 April 2024, the injury sustained by Mammadov Elvin Gurban oglu, namely blast trauma and healed skin scars following primary surgical treatment of blind shrapnel wounds of the posterior surface of the neck, the anterior surfaces of the middle thirds of the left thigh and lower leg, and the dorsal surface of the left foot

was caused by primary and/or secondary fragments generated during the explosion of a substance possessing explosive properties. According to its degree, the injury was classified overall as less grievous harm to health.

According to forensic medical expert opinion No. 2016 dated 13 October 2023, the injury sustained by Ibrahimov Farid Fagan oglu, namely a sprain of the ligaments of the left ankle joint, was caused by a blunt mechanism involving stretching of the joint ligaments and muscles beyond their physiological limits, while the wound of the right lower leg was caused by the impact of a hard blunt object. Since the injuries did not cause harm to health, their degree of severity was not determined.

According to forensic medical expert opinion No. 190 dated 22 April 2024, the findings identified on the body of Hajibalayev Rovshan Aliheydar oglu, namely arachnoid granulations located within the parietal bones of the skull and a minimal increase in the thickness of the left maxillary sinus, resulted from the blast wave. According to their degree, the findings were classified as minor harm to health.

According to forensic medical expert opinion No. 277 dated 26 April 2024, the injury found on the body of Mammadov Raul Eldar oglu, namely perforation of both tympanic membranes resulting from the blast wave generated during the explosion of a projectile, was classified as minor harm to health.

According to forensic medical expert opinion No. 846 dated 27 April 2024, the injury sustained by Zohrabov Namig Asgar oglu, namely a penetrating gunshot wound of the neck accompanied by severe injury to the spinal cord at the C4-C6 level; comminuted fractures of the posterior elements of the C4, C5 and C6 vertebrae; tetraplegia; and severe impairment of the functions of the cervical spinal cord and pelvic organs, was caused by a firearm shot. The injury was classified as grievous harm to health.

According to ballistic expert opinion No. 3/84 dated 16 February 2022, the examined objects had been manufactured by an industrial method using equipment appropriate for that purpose and materials typical of such devices. They had been neatly made and, based on their shape, manufacturing characteristics, traces present on them and other features, constituted parts of an industrially manufactured explosive device or devices.

However, because the metal fragments were small, had been deformed during manufacture and explosion and had not been preserved in their original condition, it was impossible to

determine the device to which they had belonged, its intended purpose, make, technical characteristics, place of manufacture or date of manufacture.

According to forensic medical expert opinion No. 151/MES dated 16 April 2022, the injuries found on Rahimli Anar Mahammad oglu, namely traumatic shock; a penetrating gunshot wound of the upper third of the left forearm accompanied by damage to the radial and ulnar nerves; and multiple comminuted displaced open fractures of the left radius and ulna, were caused by a shot fired from a firearm loaded with a bullet cartridge. The open fracture of the fifth metacarpal bone of the right hand and the crushed and lacerated wounds of the right hand were caused by the impact of a hard blunt object.

The traumatic shock; damage to the radial and ulnar nerves; penetrating gunshot wound of the upper third of the left forearm; and multiple comminuted displaced open fractures of the radius and ulna were classified as grievous harm to health. The open fracture of the fifth metacarpal bone of the right hand and the crushed and lacerated wounds of the right hand were classified as less grievous harm to health.

According to forensic motor-vehicle commodity expert opinion No. 9/774 dated 2 March 2022, the cost of the parts requiring replacement for the repair of the Mitsubishi L200, registration plate 99-JK-820, was assessed at 6,865 manats, while the repair work was assessed at 2,940 manats, for a total of 9,805 manats. Depreciation was applied to the value of the parts requiring replacement.

Page 743

After depreciation was applied, the value of the parts requiring replacement was assessed at 4,603 manats, while the repair and restoration work was assessed at 2,940 manats, for a total of 7,543 manats.

According to forensic medical expert opinion No. 299 dated 28 September 2023, an examination of Hasanov Mehman Fikrat oglu revealed a shrapnel wound in the right knee region. The time at which the injury was sustained corresponded to 19 September 2023 and, according to its degree, the injury was classified as minor harm to health.

Page 744

In addition to the expert reports, inspection protocols were also examined in court.

It follows from the protocol on the inspection, dated **27 September 2023**, of the items found on **Ruben Vardanyan** at the time of his detention that in one black bag there were found: one photograph showing Ruben Vardanyan together with members of his family; one wallet containing a plastic card with the inscription **“TaTever”** on the upper part and the words **“VIP CARD”** on the lower part; the foreign passport of the Republic of Armenia belonging to Ruben Vardanyan, No. **AU**[redacted]; and one driving licence belonging to the said person. Inside the passport it was also possible to see that Ruben Vardanyan had visas belonging to

the **United States of America**, No. [redacted], and the **French Republic**, No. [redacted]. In addition, during the continuing inspection it was established that, after Ruben Vardanyan had unlawfully arrived in the Karabakh region of the Republic of Azerbaijan in early September 2022, he several times left the territory of the country, travelled to various countries, and later again unlawfully returned to the territory of the Republic of Azerbaijan.

During the inspection, inside the same bag there were found: a document containing information about **Operation "Nemesis"**; documents with the headings **"Achievements obtained within 100 days," "The initiative group and political parties of Artsakh (and Armenia?) must take the following steps:"**, and **"Assemblies of the All-Artsakh population"**; one **Nokia** mobile phone; one **BlackBerry** mobile phone; and one **iPad** tablet.

It follows from the protocol of inspection dated **22 November 2023** of the **BlackBerry** and **Nokia** mobile phones belonging to **Ruben Karlenovich Vardanyan** that the memory of those phones contained numbers relevant to the case, including **"Vova Vartanov"** [redacted] **"SS"** [redacted] **Arman Jilavyan** [redacted] and others.

It was established that in the **WhatsApp** application on Ruben Vardanyan's **BlackBerry** phone he was a member of the following groups: **Group List** — Ruben Vardanyan Karlenovich, Goar Pomoshnik Artura, Masha Pomoshnik, Kristina Serobyan, Olga Sushina, Alexey Anischenko, Alexey Murzin, Ara Bagdasaryan, Kirill Sobolev, Tatiana Suslova; **La Familia** — Seda Ambartsumian, Veronika Zonabend, Alex Ambartsumian, Beniamin, David, Amiliya, Ira; **Semya** — Georgy Vardanyan, Masha Banditka, Veronika Zonabend, David, Margarita, Veronika; **GFOC Advisory Board** — Vahe Vardanyan, Lysi Ezdi, Marta Albert, Dorne, Emma Frith, James D, John Stevenson, Mike, Patricia Armstrong; **Vardazabendi** — Margarita, Georgy Vardanyan, Masha Banditka, Veronika Zonabend, Zhonna Nurgalieva; **Aurora** — Noubar Afeyan, Armen Jilavyan; and **Judging Aurora** — Noubar Afeyan, Armen Jilavyan, Darzi Ara.

It follows from Ruben Vardanyan's correspondence dated **12 November 2022** in the **WhatsApp** application on his **BlackBerry** phone with **Arman Jilavyan**, Chief Executive Officer of the **Aurora** humanitarian initiative group, that on **12 November 2022**, at **06:24**, he sent to Arman Jilavyan his correspondence with **Ernest Arustamyan**, a full member of the **Russian Academy of Engineering**, concerning reaching an agreement with the **Liaz** company operating in the **Czech Republic** on the purchase of unmanned aerial vehicles and obtaining technical documentation for the construction of a plant in **Yerevan** that would manufacture those vehicles, and instructed him to deal with the matter. The text of that correspondence is as follows:

(The language of the conversation is Russian)

"Ruben Vardanyan: Briefly on the essence of the matter. I have held negotiations with the Czech company **Liaz**, a manufacturer of vertical-takeoff UAVs, or helicopters. They agreed not only to sell, but also to transfer the technical documentation for the construction of a plant

in Armenia. This is a unique case. I am dealing with this issue in Yerevan at the level of the Military-Technical Committee. Everything is not simple here. The UAVs, for observation, reconnaissance, and monitoring, have good characteristics. Few countries produce UAVs of this technical level. We have conducted a preliminary market analysis. Such reconnaissance helicopters, in combination with kamikaze drones, which Armenia has, would be useful in Artsakh. If there is a bank guarantee, the project could be implemented using loans from Czech banks under insurance coverage from the Czech state insurance company, EGAP. If the issue interests you, I am ready to provide you with all the necessary information. On **22.11.22**, I am flying to—

Page 745

—Moscow. On the **11th–13th** I will be in **Sisian**. I want to help Armenia and Artsakh. If my assistance is needed.

If there is a bank guarantee, the project could be implemented using loans from Czech banks under insurance coverage from the Czech state insurance company, **EGAP**. If the matter interests you, I am ready to provide you with all the necessary information. I am flying to Moscow on **22.11.22**. On the **12th–13th** I will be in **Sisian**. I want to help Armenia and Artsakh. If my assistance is needed, I will be glad to meet and discuss. **Ernest Sanatrukovich Arustamyan**."

It follows from the correspondence conducted by **Ruben Vardanyan** on **5 October 2020** in the **WhatsApp** application with **Arman Jilavyan**, Chief Executive Officer of the **Aurora** humanitarian initiative group founded by him, that he conducted an arrangement whereby Armenian billionaires living abroad — in this specific case, Armenian billionaire **Noubar Afeyan**, living in Canada — would transfer millions in funds to the **Aurora** foundation under the name of humanitarian aid for the Armenian population of Karabakh, and they would openly appropriate half of it personally.

The text of that correspondence is as follows:

Ruben Vardanyan: "I spoke with Noubar, he will write to you now, then call me, everything is great, 1 mil+1 mil."

Arman Jilavyan: "Wow. OK."

Ruben Vardanyan: "50 — Vartan, 100 — me, the difference, he 850 to Fund Armenian, and 1 mil, together we raise it, whatever remains, the difference half-and-half."

During correspondence through the **WhatsApp** mobile application installed on the inspected **BlackBerry** mobile phone, Ruben Vardanyan, using mobile phone number [redacted] corresponded with the user of mobile phone number [redacted] saved under the name **"Vova Vartanov"** (head of the **"VOMA"** terrorist organization). The latter sent him a message in Armenian on **22 May 2022**, at around **02:21**, with the following content:

Vova Vartanov: “Hello, dear Vardanyan, although late, I am sending the list of instructors who will use the free cable car:

1. **Akopyan Armen Volodyayi**.

Page 746

2. **Ohanyan Harut Arayiki**.
3. **Dalakyan Khachik Sevadayi**.
4. **Akopyan Mikael Arturi**.
5. **Isayan Hovannes Sasuni**.
6. **Bakhshyan Albert Artakl**.
7. **Hovannisyan Hovannes Mikaeli**.”

After that, the person saved under the name **“Vova Vartanov”** continued the correspondence and, on **22 May 2022**, at around **02:21**, sent a voice message in Russian and Armenian with the following content:

Vova Vartanov: “Hello, dear Ruben. I sent the list I spoke about a few months ago. These instructors can use the Tatev cable car free of charge and come from village to village.”

On **22 May 2022**, at around **02:22**, the same person sent a voice message in Russian with the following content:

Vova Vartanov: “More precisely, I am forwarding it to you. This was sent to me by our coordinator for the Goris district.”

The accused person, **Ruben Vardanyan**, using the **Signal** mobile application installed on the phone, through mobile phone number [redacted] conducted correspondence in Russian with the user of mobile phone number [redacted] saved under the name **“SS”** — **Vladimir Poghosyan** — with the following content:

Ruben Vardanyan: “Volodya, please call me.”
2 July 2023, 04:12

SS: “Who is this?”
2 July 2023, 06:18

Ruben Vardanyan: “To whom were you explaining the situation yesterday evening?

Please send:

1. What you propose.
2. What resources you have.
3. What resources you need.
4. To whom and how you will be subordinate.

5. Where you personally will be — here or there."
2 July 2023, 07:08

SS: "1. My resources are people in Armenia and abroad, professionals. If you heard Hasanov's interview, he was talking about what we do not have and what I have been proposing for many years.

2. First of all, the state — Artsakh — and what follows from that. Individual resources may also be considered.
3. If we are creating the **NCSOF** — the National Center of Special Operations Forces — then it is under the state's subordination. The **NCSOF** is centrally subordinated; all operations, analysis, plans, area of activity, complete secrecy.
4. The **NCSOF** center is in Artsakh; the commander and his two deputies are there, and two are here; the matrix is in Armenia.

It would be better to discuss the rest; there will be such questions that we would be corresponding for days. I will explain in a constructive framework what thoughts there are and how. I can say that if we create this, it will be very difficult for the practitioner; its philosophy is to be active, not to sit in defense. From defensive lines to the depth behind the enemy's rear, etc. I will explain in more detail.

That is, I mean that in this case I can take Artsakh out of the situation with major enemy losses. Even by striking them. Our chances are great. Although time has been lost, for now there is still some. There is no other philosophy and strategy, and there cannot be."
2 July 2023, 08:43

Ruben Vardanyan: "What does it mean to be subordinate to the state? To the President?"
2 July 2023, 08:44

SS: "Yes."
2 July 2023, 08:48

Ruben Vardanyan: "OK, did he somehow react to this?"
2 July 2023, 08:49

SS: "Not yet."
2 July 2023, 08:49

Ruben Vardanyan: "What relations will it have with the Ministry of Defense of Artsakh?"
2 July 2023, 08:49

Page 747

SS: "Planning on general issues will of course be joint. But the special-purpose units of the Ministry of Defense, the National Security Service, and the Ministry of Internal Affairs will

transfer to the **NCSOF**. They will destroy it anyway, and in those formations there is no such knowledge.

I wrote it by mistake."
2 July 2023, 08:53

Ruben Vardanyan: "OK."
2 July 2023, 08:54

SS: Voice message: "By the way, I have agreed with my friends in Europe, from **Krasukha** I can bring a cheaper **KEM**, mobile, and effective. It operates on the horizon from '0', from **300 megahertz to 8 gigahertz**, has **12 channels**, and the library of frequencies of all unmanned aerial vehicles is on it. Training is one week to ten days. We can bring it to Armenia. We can even cover **50 kilometers** from our depth, and so on. I am saying all this not to write it down; if there is serious intent, let us discuss it."
2 July 2023, 09:06

After that, numerous voice calls were made between these persons, and on **5 July 2023**, at **03:36**, the user of mobile phone number [redacted] saved under the name **"SS,"** wrote Ruben Vardanyan a message in Russian with the following content:

SS: "Perhaps one could think about your return to Armenia."

Ruben Vardanyan's correspondence with a person named **Artur Alaverdyan** in the **Telegram** application:

Artur Alaverdyan: "The Ministry of Defence of Great Britain has provided Ukraine with heavy **Malloy** unmanned aerial vehicles; those unmanned vehicles can carry ammunition.

The wounded can also be evacuated with their help. The drone's payload capacity is **180 kg**, and its range is **70 km**.

If the British would sell them, such drones could be purchased."

Ruben Vardanyan: "Yes, great, dear Artur, find out whether it is possible to buy them or not, or whether there are analogues in other countries."

Artur Alaverdyan: "Unfortunately, there are no such connections with Great Britain. We are also afraid that their size is large."

Ruben Vardanyan's correspondence with a person named **Aik Ovakimian** in the **Telegram** application:

Aik Ovakimian: "This will be the end of sovereign Armenia. We need weapons, we need instructors from the West, and we need time. No one will leave this defeat as it is, but throwing oneself into trouble now with a bare backside — this is a fact, it can be seen openly — will not solve any issue."

Ruben Vardanyan: “Inside Artsakh they told me this clearly — both the elite and most of the population. Inside, many have blamed me from the first day, saying that supposedly I want there to be blood and victims. When I say that, as in a Russian fairy tale, either you will lose the homeland, the horse, or dignity, the sword, or you may lose your head, a relative majority said that they do not want any of these options; let someone else decide for us. Believe me, I do not doubt you for even one second, nor the **120 people** we have trained over the last three months, but this is a drop in the ocean.”

During the continuing inspection investigative action, on the **Telegram** social platform, in a section named **“One Drive,”**a Russian-language document dated **23 June 2022** entitled **“Anti-Aircraft Missile System”** was identified. In the document entitled **“Investment capital for product development,”** it was stated that **“AQUA company is carrying out research and development work on a defense product — an air-defense missile system, an anti-aircraft missile system — for the purpose of subsequently launching it into serial/mass production. The result of product development will be a tested pre-production prototype of the air-defense missile system.**

The composition of the air-defense missile system:

1. **ZUR-1** — anti-aircraft guided missile;
2. **TPK-1** — transport and launch container;
3. **PTPC-1** — package transport and launch container;
4. **SOC** — target detection station;
5. **BAR** — battery and radio-transmitting device;
6. **ZPS** — measuring and testing station.

Upon completion of product development, the total estimated value of **AQUA** will be at least—

Page 748

—**USD 4,000,000**.

The final estimated value of **AQUA** company includes the following:

1. costs of developing and producing the prototype;
2. costs of laboratory, firing, bench, integrated, and full-scale testing of the prototype;
3. fixed assets, in particular: laboratory measuring equipment, computer equipment, servers, tools, office equipment, test benches, technological equipment;
4. an intellectual-property portfolio in the form of applications for inventions, with patents obtained in Armenia and other countries;
5. an intellectual-property portfolio in the form of applications for utility models, with patents obtained in Armenia and other countries;
6. an intellectual-property portfolio in the form of applications for industrial designs, with patents obtained in Armenia and other countries;

7. intellectual property in the form of production secrets, or know-how;
8. developed software;
9. design documentation developed for the products;
10. operational documentation developed for the products;
11. technological documentation developed for the products;
12. established organizational and cooperation chains, logistics links;
13. risks incurred;
14. the developed high competence of the development team;
15. trademark.

Taking into account the work already completed and the expenses incurred, the need for additional investments in **AQUA**company amounts to **USD 1,200,000**.

The shareholders invite the Fund to mutually beneficial and effective cooperation and propose that it invest **USD 600,000** by acquiring a **15%** share in **AQUA** company. The investments may be made in installments in accordance with an agreed payment schedule.

The Fund may have a representative on the board of directors of **AQUA**.

The Fund undertakes not to exit **AQUA** company for **5 years**, and not to sell or transfer its shares to third parties. If after **5 years** the Fund wishes to exit **AQUA** company by selling and transferring its shares, the Fund first undertakes to offer all of the available **15%** of shares to the shareholders of **AQUA**, and the shareholders of **AQUA** have a preferential right to purchase all **15%** of the **AQUA** shares belonging to the Fund at the entry price, in the currency in which the contribution was made. If, during the company's operations, the parties agree on the necessity of attracting additional investments into **AQUA** company, then the parties must additionally finance the company in proportion to their shares.

Product manufacturing

After completion of the work on obtaining the product, it will be necessary to launch it into mass production. Excluding the costs of acquiring or leasing the necessary production facilities, the estimated cost of establishing a manufacturing company for mass production of one product will be **USD 2,000,000**.

The shareholders are prepared to participate in the establishment of the manufacturing company and, upon investing **USD 600,000**, to invite the Fund to mutually beneficial and effective cooperation with a **30%** share.

If the Fund is unable to fulfill its obligations or wishes to withdraw from the transaction, then the shareholders of **AQUA**company have a preferential right to buy back from the Fund all **30%** of the shares of the manufacturing company owned by the Fund upon its entry, at the entry price, in the currency in which the contribution was made.

The Fund undertakes not to exit the manufacturing enterprise for **5 years**, and not to sell or transfer its shares to third parties. If after **5 years** the Fund wishes to exit the manufacturing

company by selling or transferring its shares, then the Fund first undertakes to offer all of the available **30%** of shares to the **AQUA** shareholders, and the **AQUA** shareholders have a preferential right to purchase from **AQUA**—

Page 749

—the **AQUA** shareholders, and the **AQUA** shareholders have a preferential right to purchase from the Fund all **30%** of the manufacturing-company shares belonging to the Fund, at the entry price, in the currency in which the contribution was made.

If, during the company's operations, the parties agree on the necessity of attracting additional investments into the manufacturing enterprise, then the parties must additionally finance it in proportion to their shares in the company.

IP licensing activities

AQUA grants the manufacturing company licences to use the necessary IP and receives royalties from each unit of goods manufactured/sold or from a percentage of total sales. **AQUA** may license IP to third-party defence-product companies or third-party manufacturers for the purpose of receiving royalties or one-time payments.

Development of third-party products

If the Fund additionally proposes to develop its own products and the parties agree, **AQUA** will develop those products. At the same time, the product may later be manufactured both at the manufacturing enterprise and at other third-party manufacturing enterprises designated by the Fund. In the event of product manufacturing at the manufacturing company, equal partnership is envisaged: **50%** to the **AQUA** shareholders and **50%** to the Fund.

If production is carried out at third-party manufacturing enterprises designated by the Fund, a mutually beneficial decision acceptable to all parties is adopted.

There are three options for ownership of the rights to the product proposed by the Fund:

1. **AQUA** develops the product and is the full copyright holder;
2. **AQUA** develops the product and is not the copyright holder, that is, it transfers all rights to the product to the Fund or to a third party designated by the Fund;
3. joint ownership of rights, divided between **AQUA** and the Fund and satisfying all parties. Below is the distribution of product ownership, financing, licensing, and production."

It follows from the protocol dated **29 October 2023** on the inspection of one dark-gray **Apple iPad Pro** tablet belonging to **Ruben Vardanyan** that in the **"Photos"** section of the tablet's main menu there was a photograph dated **17 September 2015** showing Ruben Vardanyan's son in military field clothing. During the continued inspection, a video with a total duration of **41 seconds** was found. The video had entered the **"Photos"** section of the tablet on **3**

August 2023. During the inspection of that video, at the **00:01** second, it was established that on a paper attached to a board there were the inscriptions: **"ASALA, Nemesis, Artsakh, Avangard, Aramo, Shushi, Winchester, Bloods."** At the **00:03** second, an image was visible with a tree depicted on it and an Armenian-language inscription printed on it reading **"Artsakh Security and Development Front."** During the continued inspection, from the **00:04** second to the **00:12** second of the video, Ruben Vardanyan was seen dancing with persons wearing military field uniforms. From the **00:12** to the **00:37**second of the video, the persons in military field uniforms continued dancing. At the **00:38** second of the video, Ruben Vardanyan was seen taking a photograph with persons wearing military field uniforms. Three seconds later, the video ended.

During the continued inspection, another video lasting **1 minute 7 seconds** was found. The video had entered the **"Photos"** section of the tablet on **13 August 2023**. During the inspection of that video, the accused in the case, **Ruben Vardanyan**, and other persons wearing military field uniforms were visible. In the video, those persons in military field uniforms were seen conducting military training with firearms in their hands; the flag of the Republic of Armenia was visible on the right shoulder area of the persons in military uniform; and at the **00:29** second of the video Ruben Vardanyan was also seen speaking. From the **00:40** to the **00:43** second of the video, Ruben Vardanyan was seen dancing with those persons in military field uniforms. Most of the persons in military field uniforms visible in the video appeared to be underage boys and girls. The video ended with words written on a black background: **"DAVID BEK military sports"** and **"Youth Clubs ALLIANCE."**

During the continued inspection, another video lasting **45 seconds** was found. In that video, in English, the following text was displayed: **"Drones can help carry casualties, supplies and even—**

Page 750

—weapon systems to help keep our armed forces safe and support them on the front line. Uncrewed aerial systems like these can lift up to 180 kg and have a range of around 70 km. Malloy and Hydra drones are an impressive result of the British Army's work with UK industry to help solve challenges faced on the battlefield including those encountered by our allies in Ukraine."

In the **Telegram** mobile application in the main menu, a group named **"АТР Мы — Наши Горы"** (**"We Are Our Mountains"**) was identified. During the inspection of the correspondence in that group, it was established that on **14 September 2023**, at **14:58**, **Ruben Vardanyan** wrote the following Russian-language sentences in response to a message sent to him that same day at **14:54** by **Artur Alaverdyan**: **"Давайте, проработаем этот вариант. Минобороны Великобритании передало Украине тяжелые беспилотники Malloy, которые могут перевозить припасы и оружие. Также с их помощью можно эвакуировать раненых. Грузоподъемность дрона**

составляет 180 кг, а дальность — 70 км. Можно было бы такие купить, если Британия продадут."

Translation: **"Let us work through this option. The Ministry of Defence of Great Britain has supplied Ukraine with heavy Malloy unmanned aerial vehicles; those unmanned vehicles can carry ammunition and weapons. The wounded can also be evacuated with their help. The drone's payload capacity is 180 kg, and its range is 70 km. Such drones could be bought if the British sell them."** He also sent the above-mentioned **45-second** video.

It follows from the protocol of inspection dated **4 October 2023** of the garden house where **Ruben Vardanyan** lived, located in **Kolatagh** village, **Aghdara District**, that in the bedroom located to the left of the entrance door, on the wall to the right of the bedroom's entrance door, a photograph was found hanging with the note **"Artsakh"** on its reverse side; on the cupboard located to the right of the entrance door, a notebook and a book were found; and on the wall to the right of the entrance door of the inspected room, a photograph of Ruben Vardanyan and his parents was found and seized. During the inspection of the container-type storage area located in the yard, it was established that there were **14** sets of military-purpose field bedding intended for overnight stays in field conditions, and **3** of those field sets were packed and seized in the prescribed manner as samples.

It follows from the protocol of inspection dated **3 October 2023** of the building located in the centre of **Khankendi** city, which **Vardanyan Ruben Karlenovich** used as an office and residence, that the building consisted of a basement and two floors. During the inspection of the office located on the second floor of the building, it was established that there were **3** work desks and **3** computers. The said computers and documents belonging to the **Aurora** organization, as well as other documents found in the office, were placed into **2** boxes, packed in the prescribed manner, and seized. During the inspection of that office, a small piece of paper containing telephone numbers and names was found. On that paper, Ruben Vardanyan's internal telephone number and name were recorded for the room he used on the second floor opposite the office room as another office; thus, it was established that the inspected building as a whole was used by Ruben Vardanyan. During the continued inspection on the second floor of the building, one processor was found in the room where network equipment was located, packed in the prescribed manner, and seized.

During the continued inspection on the first floor of the building, it was established that there was a large conference hall. On the table located in the conference hall, there were found **2** notebooks in which records of manufactured products were kept, and a large album; on the wall there was a large piece of paper in Russian reading **"The road to Sumgait passes through Aghdam"**; and opposite the entrance door, field bedding sets were found. The said notebooks, album, and large pieces of paper bearing the inscription **"The road to Sumgait passes through Aghdam,"**—

—as well as employment record books, were packed in the prescribed manner and seized, taking into account that they could be of significance to the case.

During the inspection of the basement part of the building, it was established that there were **5** metal helmets intended for use for military purposes, **1** radio set, **5** bulletproof vests, and field bedding sets. Of the said items, **1** helmet, **1** radio set, **1**bulletproof vest, and **1** of the field bedding sets, whose total number was **26**, were packed and seized. During the continued inspection in the basement, **2** boxes containing books and notebooks with various notes on them, as well as **1** box containing seals, were packed in the prescribed manner and seized, taking into account that they could be of significance to the case.

During the inspection of another room located in the basement part of the building, it was established that there were various placards with different headings used at mass gatherings, as well as a metal safe. When that safe was opened in the prescribed manner, it was established that **7 F-1 hand grenades**, **3 magazines** belonging to an automatic weapon, and **1,705 cartridges** belonging to an **AK-74** automatic weapon had been hidden there. The said various placards with headings, as well as the **7 F-1 hand grenades**, **3 magazines** belonging to an automatic weapon, and **1,705 cartridges** belonging to an **AK-74** automatic weapon, were packed in the prescribed manner and seized, taking into account that they could be of significance to the case.

It follows from the protocol of inspection dated **26 October 2023** of the items found during the inspection of **Vardanyan Ruben Karlenovich's** office located in **Khankendi** city that on a paper entitled **"Internal numbers"**, it was established that the name of the accused in the case, Ruben Vardanyan, and his internal telephone number **100** were recorded, as well as the internal telephone number **102** of his assistant David, the internal telephone number **101** of his manager Alik, the internal telephone number **301** of security, and the internal telephone number **200** of the restaurant. In addition, it was established that there was a document in Russian bearing the heading **"I consider the following to be the main achievements obtained within 100 days:"**, and the document contained information about measures carried out within 100 days.

During the continued inspection, the following were identified: a notebook with the words **"VARDANYAN RUBEN"** written in Latin letters; **"Information on the expenditure of monetary funds"**; **"Aurora Humanitarian Initiative"**; **"Aurora Artsakh"**; certificates concerning relations between the companies **"EVE," "SB," "Eve construction," "SB and petrol service,"** and **"PB"**; **"Duties and responsibilities of selected members of the Artsakh Security and Development Fund; program of honour and dignity"**; documents with headings reading **"The initiative group and political parties of Artsakh (and Armenia?) must take the following steps:"** and **"Assemblies of the All-Artsakh population"**; as well as lists with various names.

It follows from the inspection protocol dated **2 November 2023** of the **HP Pavilion PC a 6000** processor/system unit, which was found and seized during the inspection of the office of the accused **Vardanyan Ruben Karlenovich** located in the centre of **Khankendi** city, that in the **"C"** partition of the hard drive installed on it, lists in Armenian entitled **"Nominal list of the community"** and **"Soldiers of Kolatagh village/community of Mardakert District of the Artsakh Republic,"** as well as lists of members of the illegal armed formation from **Kolatagh** village, indicating name, surname, patronymic, date of birth, and military position, were found.

The persons whose names were listed in the list entitled **"Soldiers of Kolatagh village/community of Mardakert District of the Artsakh Republic"** were: **1) Avanesyan Seyran Aharoni, 2) Avanesyan Gevorg Aharoni, 3) Hakobjanyan Albert Edvardi, 4) Hakobjanyan Garik Edvardi, 5) Aghasyan Samvel Aregi, 6) Aghasyan Mher Rashidi, 7) Gabrielyan Gagaik Manveli, 8) Gabrielyan Suren Manveli, 9) Aghasyan Sasun Hranti, 10) Aghasyan Shahen Arturi, 11) Gabrielyan Arkadiy Arkadyayi, 12) Gabrielyan Arsen Arkadyayi, 13) Balasyan Davit Onik, 14) Harutyunyan Harut Kamoyi, 15) Aghasyan Vahram Ilyazi, 16) Babayan Samvel Arturi, 17) Avanesyan Paylak Hranti, and 18) Yesayan Tatul Rashidi.**

In addition, in the lists of members of the illegal armed formation from **Kolatagh** village, indicating name, surname, patronymic, date of birth, and military position, the following were shown:

Page 752

1) Captain Avanesyan Seyran Aharoni, born in **1986**, community head;
2) Private Avanesyan Hayk Alekseyi, born in **1978**, rifleman;
3) Private Aghasyan Mher Rashidi, born in **1978**, rifleman;
4) Private Gabrielyan Gagik Manveli, born in **1988**, machine gunner;
5) Private Harutyunyan Zaven Kamoyi, born in **1992**, rifleman;
6) Lieutenant Yesayan Tatul Rashidi, born in **1968**, rifleman;
7) Private Khachatryan Nver Grigori, born in **1972**, rifleman;
8) Private Avanesyan Gevorg Aharoni, born in **1991**, rifleman;
9) Private Harutyunyan Andranik Bhaturi, born in **1946**, rifleman;
10) Private Gabrielyan Mkhitar Hovhannesi, born in **1965**, rifleman;
11) Private Gabrielyan Arman Arkadiyayi, born in **1989**, rifleman;
12) Private Gabrielyan Arsen Arkadyayi, born in **1987**, rifleman;
13) Private Avanesyan Hrant Artemi, born in **1961**, rifleman;
14) Private Babayan Artur Beniki, born in **1966**, rifleman;
15) Private Aghasyan Vrej Ilyazi, born in **1982**, rifleman;
16) Private Hakobjanyan Garik Eduardi, born in **1973**, rifleman;
17) Private Avanesyan Areg Sergeyi, born in **1966**, rifleman;
18) Private Hakobyan Narine Arturi, born in **1992**, head of the army corps; and
19) Private Grigoryan Seyran Mikhayeli, born in **1981**, mortar operator.

It follows from the inspection that the list of other members of the illegal armed formations was as follows: **1) Sergeant Aghasyan Vahram Ilyazi**, born in **1981**, rifleman; **2) Private Harutyunyan Harut Kamoyi**, born in **1992**, rifleman; **3) Private Hakobjanyan Suren Gariki**, born in **1992**, rifleman; **4) Private Babayan Samvel Arturi**, born in **1994**, grenade launcher; **5) Private Balasyan Davit Oniki**, born in **1987**, rifleman; **6) Lieutenant Aghasyan Samvel Yeregi**, born in **1982**, machine gunner; **7) Private Hakobjanyan Albert Eduardi**, born in **1982**, rifleman; **8) Private Gabrielyan Kamo Alyoshayi**, born in **1960**, rifleman; **9) Private Zakaryan Davit Andraniki**, born in **1982**, rifleman. As the "necessary items" for those persons, the list included: **helmets — 9**, **armored vests — 9**, **communications equipment**, **sleeping bags — 9**, **grenade**, and **tent-cloaks — 9**.

The protocol of the inspection of the camp located near the village of Badara in the Khojaly region, intended for military training, dated November 1, 2024, shows that the area is located on the right bank of the river, near the dirt road leading toward the Aghdara region, among the mountains near the village of Badara in the Khojaly region. To enter the area where the accused in the case, Vardanyan Ruben Karlenovich, organized training for illegal armed groups, there is a path surrounded by vegetation leading from the dirt road toward the river. Access to the training area was gained by crossing a bridge consisting of wooden and metal parts located over the river and using an iron staircase. That bridge and iron staircase were captured in video footage recorded during the training of illegal armed groups under the leadership of Ruben Vardanyan. A sign was placed at the entrance to the area stating that it belonged to the "Artsakh Sports Tourism Federation" and that entry by outsiders was prohibited.

The area on the left bank of the river where the training was held, as reflected in the video footage recorded during the training of illegal armed groups led by Ruben Vardanyan, was identified as containing a building with sports equipment consisting of painted metal structures, a military tent for recreation with beds, a dining area, seating, a bathroom and a toilet, as well as supplies.

During the inspection of the above-mentioned area, it was determined that the individuals participating in illegal armed training led by Ruben Vardanyan were trying to hide their tracks by scattering the items there while leaving the training center. During the inspection of the building where the equipment was located, a plastic box believed to have been used for carrying military equipment arriving from Domodedovo Airport in Moscow, the Russian Federation, to the city of Yerevan, the Republic of Armenia, was found, and 1 tear gas canister was found in a rocky area of the camp. Since the 1 tear gas canister found in the inspected area constituted significant evidence in the case, it was packed and taken away.

On October 3, 2023, during a search conducted at the office located in the city of Khankendi belonging to the accused Vardanyan Rubei Karlenovich, 7 "Ф-1" type hand grenades and 7 of their igniters, a total of 1,705 automatic cartridges of 7.62 mm caliber, and 3 AK-type automatic rifle magazines were found and seized from an iron safe located in the basement of the office. They were recognized as material evidence and handed over to the Main Department of Material-Technical and Social Security of

the State Security Service of the Republic of Azerbaijan for storage until the relevant court decision.

Page 753

On November 1, 2024, during an inspection of the area located on the left bank of the river near the dirt road leading to the Aghdara region, in the mountains of Badara village, Khojaly region, where the accused Vardanyan Ruben Karlenovich organized and participated in training for illegal armed groups, 01 (one) anti-gas canister, which was appropriately packaged and seized, was recognized as material evidence in the case and handed over to the material evidence room of the Main Investigation Department of the State Security Service of the Republic of Azerbaijan for storage until the relevant court decision.

The following items, packed and seized in the prescribed manner during the inspection conducted on **3 October 2023** of the office of the accused **Vardanyan Ruben Karlenovich** located in **Khankendi** city, were recognized as material evidence in the case: **one tactical helmet**, considered military equipment; **one bulletproof vest**; **one field bedding set**; **one radio set**, considered a special communication device; **one notebook**; **one document containing information about Operation "Nemesis"**; **one paper bearing the inscription "Внутренние номера"**; **one document whose heading contained the words "Achievements obtained within 100 days"**; **one document whose heading contained the words "The initiative group and political parties of Artsakh / and Armenia? / must take the following steps:"**; **one document whose heading contained the words "Assemblies of the All-Artsakh population"**; and, during the inspection conducted on **4 October 2023** of the garden house and yard area in **Kolatagh** village, **Aghdara District**, where the accused **Vardanyan Ruben Karlenovich** had previously lived, **one photograph** depicting Ruben Vardanyan and his parents, an elderly woman and an elderly man, as well as **three field bedding sets**, considered military equipment.

The said **one tactical helmet**, **one bulletproof vest**, **four field bedding sets**, **one radio set**, considered a special communication device, **one photograph**, and **one notebook** were handed over to the material-evidence room of the Investigation Main Department of the **State Security Service** for responsible storage until their fate is decided by the final and legally effective judgment of the court. The said **one document containing information about Operation "Nemesis"**, **one paper bearing the inscription "Внутренние номера"**, **one document whose heading contained the words "Achievements obtained within 100 days"**, **one document whose heading contained the words "The initiative group and political parties of Artsakh / and Armenia? / must take the following steps:"**, and **one document whose heading contained the words "Assemblies of the All-Artsakh population"** were attached to the materials of the criminal case.

It follows from the materials of the criminal case that, during the examination of criminal case No. **202006081**, which was in the proceedings of the Investigation Department of the **Prosecutor General's Office of the Republic of Azerbaijan**, it was established that

members of the criminal organization, or association, acting in accordance with the common criminal intent and purpose of the association and of each of its members, planted numerous tank and anti-personnel mines of various brands, models, and places of manufacture in a planned manner, on different dates and at locations close to one another, in the Karabakh region of the Republic of Azerbaijan, setting ambushes and creating mined areas for the purposes of the said criminal organization.

Thus, it was established that on **1 January 2021**, at around **11:00**, **Zabil Gabil oglu Babayev**, born on **26 May 1981**, a resident of **Shukurbeyli** village, **Fuzuli District**, while in the territory of **Gorgan** village, **Fuzuli District**, liberated from occupation, stepped on an anti-personnel mine that had previously been deliberately planted there by Armenian armed formations. As a result of its explosion, he sustained injuries and, despite being taken to hospital, died from those injuries.

According to the protocol dated **1 January 2021** on the inspection of the scene, conducted with photo and video recording, it was established that the place where the mine explosion occurred was on a dirt road in the territory of **Gorgan** village, **3.5 km** away from the end of **Shukurbeyli** village. Artificial mounds had been created on the right and left sides of the dirt road by Armenian armed formations during the occupation period for camouflage. The place where the explosion occurred was the trench area on the dirt road.

Page 754

In addition, it was established that **Nuru Aslan oglu Nuriyev**, born on **26 October 1976**, a resident of **Zobujug-2** settlement, **Fuzuli District**, and **Elnur Aydin oglu Hashimov**, born on **1 June 1982**, a resident of **Horadiz** city, while in the territory of **Ashaghi Abdurrahmanli** village, **Fuzuli District**, liberated from occupation, on **8 July 2021**, at around **13:00**, stepped on one of the mines that Armenian armed formations had planted there in advance during the occupation period. As a result of the explosion, **Nuru Aslan oglu Nuriyev** died at the scene, while **Elnur Aydin oglu Hashimov** sustained bodily injuries.

According to the protocol dated **8 July 2021** on the inspection of the scene, conducted with photo and video recording, it was established that the place where the mine explosion occurred was an area where a military fortification had been built in the territory of **Ashaghi Abdurrahmanli** village, **Fuzuli District**, liberated from occupation, and that as a result of the mine explosion near the structure, that is, in the trench area, a crater had formed in the ground.

In addition, it was established that on **30 September 2022**, at around **20:00**, one of the mines previously and deliberately planted during the occupation period by Armenian military formations in **Yukhari Yaghlyvand** village of liberated **Fuzuli District** exploded, as a result of which residents of **Alkhanli** village, **Fuzuli District** — **Amid Fatulla oglu Asadov**, born on **28 December 1986**, and **Charkaz Bahadir oglu Guluzade**, born on **6 October 2007** — sustained bodily injuries and died at the scene.

It was established in court that on **2 February 2021**, at around **17:00**, **Azad Aydin oglu Mukhtarov**, born on **11 May 1992**, **Rafis Mahaddin oglu Mamishov**, born on **29 January 1984**, and **Bahruz Telman oglu Imanov**, born on **3 April 1981**, were travelling in a **GAZ-53** truck, state registration plate **11-BF-263**, driven by the latter, in the territory of **Yukhari Yaghlyvand** village, **Fuzuli District**, liberated from occupation, when they drove over and detonated an anti-tank mine that Armenian armed formations had previously and deliberately planted in the area during the occupation period. As a result, **Bahruz Imanov** died at the scene, while **Azad Mukhtarov** and **Rafis Mamishov** sustained bodily injuries.

According to the protocol dated **1 October 2022** on the inspection of the scene, conducted with photo and video recording, it was established that the mine explosion incident occurred in the area of **Yukhari Yaghlyvand** village, **Fuzuli District**, liberated from occupation, on the **Fuzuli–Aghdam** road. At the place where the explosion occurred, near the truck that had become unusable, a crater **120 cm** deep had formed in the ground as a result of the explosion. It was established that at the same scene, on **2 February 2021**, at around **17:00**, a mine explosion had also occurred; as a result of that incident, **Rafis Mahaddin oglu Mamishov** and **Azad Aydin oglu Mukhtarov** sustained injuries, while **Bahruz Telman oglu Imanov** died.

In addition, on **1 May 2023**, at around **18:00**, in **Horadiz** village of liberated **Fuzuli District**, one of the anti-tank mines previously and deliberately planted during the occupation period by Armenian armed forces exploded, as a result of which **Ogtay Bayram oglu Alishov**, born on **3 June 1964**, a resident of **Gazakhlar** village, **Fuzuli District**, died at the scene.

According to the protocol dated **1 May 2023** on the inspection of the scene, it was established that the place where the mine explosion occurred was **Horadiz** village, **Fuzuli District**. The surrounding areas were mined. It was possible to access the scene and remove the body from the area only after safety measures had been taken by employees of the **Mine Action Agency of the Republic of Azerbaijan**. Near the body of the injured person **Ogtay Alishov**, a crater **85 cm** deep and **50 cm** in diameter had formed in the ground as a result of the explosion of an anti-tank mine.

In addition, it was established that during the occupation period Armenian military formations, using cluster munition warheads prohibited under the norms of international law, fired heavy artillery shells in the direction of **Garakhanbeyli**, **Fuzuli District**. On **12 July 2021**, at around **11:00**, the unexploded remnant of a bomb separated from those heavy artillery shells exploded, as a result of which **Elshan Eyvaz oglu Khalilov**, born on **1 December 1987**, who worked as a driver at **"Korpu-Bina Tikinti" LLC**, sustained bodily injuries.

Page 755

According to the protocol dated **12 July 2021** on the inspection of the scene, it was established that the place where the explosion occurred was **Garakhanbeyli** village, **Fuzuli District**, where **"Korpu-Bina Tikinti" LLC** was building a bridge over the **Kondalan** River

for the construction of a motor road. Twenty meters from the beginning of that bridge, near a booth, unexploded remnants of a cluster bomb were found on the ground.

In addition, it was established that employees of **"Alpha Demining" LLC**, which carried out mine-clearance work in the liberated territories on the basis of a subcontract with the **Mine Action Agency of the Republic of Azerbaijan** — namely, mine-search group leader **Gilman Nidayat oglu Huseynov**, born on **1 June 1976**, a resident of **Mahmudlu** village, **Shamkir District**; mine-searcher **Rovshan Ruslan oglu Alizade**, born on **20 October 1991**, a resident of **Ahmadalilar** village, **Fuzuli District**; and another mine-searcher **Yadigar Dilavar oglu Shukurov**, born on **18 August 1990**, a resident of **Ahmadalilar** village, **Fuzuli District** — while performing their official duties on **2 August 2022**, at around **10:00**, in the territory of **Garakhanbeyli** village, **Fuzuli District**, liberated from occupation, sustained bodily injuries as a result of the explosion of an anti-personnel mine. That fact was once again confirmed by the protocol dated **2 August 2022** on the inspection of the scene, conducted with photo and video recording.

In addition, according to the protocol dated **22 January 2021** on the inspection of the scene, it was established that on that date, at around **10:00**, an employee of the **Mine Action Agency of the Republic of Azerbaijan**, **Azar Ali oglu Sultanov**, born on **26 October 1974**, a resident of **Horadiz** city, **Fuzuli District**, while carrying out mine-clearance work together with his colleagues in the territory of **Mehdili** village, **Jabrayil District**, liberated from occupation, sustained bodily injuries as a result of the explosion of one of the anti-personnel mines planted there by Armenian military formations during the occupation period.

In addition, according to the protocol dated **25 February 2021** on the inspection of the scene, it was established that **Guloghlan Imran oglu Mirzaliyev**, born on **10 October 1964**, a resident of **Jojug Marjanli** village, **Jabrayil District**, while grazing his small livestock on **25 February 2021**, at around **14:00**, in the territory of **Mehdili** village, **Jabrayil District**, liberated from occupation, stepped on one of the anti-personnel mines planted in that area by Armenian servicemen during the occupation period. As a result of the explosion, he sustained bodily injuries.

In addition, according to the protocol dated **14 July 2022** on the inspection of the scene, it was established that on that day, at around **14:00**, **Shamil Farahim oglu Mammadov**, born on **21 March 1996**, a resident of **Khubyarly** village, **Imishli District**, while driving a **Shacman** vehicle with state registration plate **90-VG-134** in **Daghtumas** village, **Jabrayil District**, liberated from occupation, drove over one of the mines planted in that area by Armenian armed formations during the occupation period. As a result of the explosion, both the vehicle became unusable and he sustained bodily injuries. At the same time, after the first explosion, as a result of the vehicle moving slightly forward due to the force of the blast, another mine explosion occurred. The location of the mine explosion was situated in **Daghtumas** village, **Jabrayil District**, **1.4 km** southwest in a straight line from the historical monument called **"Bashikesik"**mausoleum, at geographic coordinates **39°21′35″ N, 46°45′22″ E**.

In addition, according to the protocol dated **2 November 2022** on the inspection of the scene, it was established that on that day, at around **12:00**, **Ilgar Heybat oglu Ahmadov**, born on **1 February 1976**, a resident of **Korgoz** settlement, **Garadagh District**, Baku city, who worked as a driver at **"Improtex Industries" LLC**, which carried out mine-clearance work under a contract concluded with the **Mine Action Agency of the Republic of Azerbaijan**, sustained bodily injury in **Mehdili** village, **Jabrayil District**, liberated from occupation, as a result of the explosion of a mine previously and deliberately planted by Armenian armed persons. The place where the incident occurred was located **2.8 km** in a straight line from the building of the complete secondary school of **Jojug Marjanli** village, **Jabrayil District**, at geographic coordinates **39°37′98.720″ N, 47°29′85.450″ E**.

Page 756

Since **27 September 2020**, as a result of explosions of mines and other similar devices in the territory of **Gubadli District**, a total of **three civilians** sustained bodily injuries of varying severity.

According to the protocol dated **23 April 2022** on the inspection of the scene, it was established that while the Karabakh region and surrounding territories were under occupation, members of the Armenian armed forces and illegal armed formations had previously and deliberately planted anti-personnel mines. On **22 April 2022**, at around **18:00**, one of those mines exploded in the territory of **Teymur Muskanli** village, **Gubadli District**, as a result of which **Beybala Jabrayil oglu Nasirov**, born on **16 August 1993**, who worked as an excavator operator at **"Protean Construction" OJSC** under an employment contract, sustained traumatic amputation injuries at the level of the shin of his left leg. The mine explosion occurred **1,600 meters** west of **Teymur Muskanli** village, **Gubadli District**, **29 meters** from the right side of the road leading to **Davudlu** village. As a result of the explosion, a crater **35 cm** deep formed in the ground.

In addition, according to the protocol dated **1 August 2022** on the inspection of the scene, it was established that **Surat Musakhan oglu Aghamaliyev**, born on **1 January 1994**, a resident of **Musali** village, **Jalilabad District**, while harvesting grain with a combine harvester on **1 August 2022**, at around **15:00**, in a grain field in the area called **Yaziduzu** in **Malikahmadli** village, **Gubadli District**, liberated from occupation, sustained bodily injury as a result of the explosion of one of the mines planted in that area by Armenian armed formations during the occupation period.

In addition, according to the protocol dated **30 August 2022** on the inspection of the scene, it was established that **Najmaddin Abdulla oglu Huseynov**, born on **30 May 1984**, an employee of the **Mine Action Agency of the Republic of Azerbaijan** and a resident of **Karimbeyli** village, **Fuzuli District**, while carrying out mine-clearance work on **30 August 2022**, at around **10:00**, in the territory of **Teymur Muskanli** village, **Gubadli District**, in a mined area where a large number of mines had been previously and deliberately planted by

Armenian armed formations during the occupation period, sustained injury as a result of an explosion; a specially trained dog was also killed.

According to the protocol dated **14 July 2023** on the inspection of the scene, it was established that **Sahib Isa oglu Aliyev**, born on **19 July 1964**, a resident of **Seyidlar** village, **Kalbajar District**, while engaged in beekeeping in **Seyidlar** village, **Kalbajar District**, on **13 July 2023**, at around **20:00**, stepped on one of the mines previously and deliberately planted by Armenian military formations. As a result of the explosion, he sustained bodily injury. The place where the mine explosion occurred was located **15 km** from **Seyidlar** village, **Kalbajar District**, **350 meters** east of the **Levchay mercury deposit**, in an area close to the **Armenia–Azerbaijan** border. Since the said area was mined, it was not possible to inspect it from close range.

Since **27 September 2020**, as a result of explosions of mines and other similar devices in the territory of **Goygol District**, a total of **three civilians** were killed.

According to the protocol on the inspection of the scene dated 15.07.2021, it was determined that on 14.07.2021, **Ojagguliyev Ramal Kamal oglu**, a resident of Mollajelilli, Goygol district, born on 03.08.1990, died at the scene from injuries sustained as a result of the explosion of one of the numerous mines planted by the Armenian armed forces in the area during the occupation period, while grazing his large horned animals near the area called "Banovshali Yaylag" in the Goygol district, between the Kalbajar and Goygol districts, which had been under the control of the Armenian armed forces for a long time during the occupation.

In addition, according to the protocol on the inspection of the scene dated 25.08.2023, it was determined that **Alakbarli Afgan Sayyaf oglu**, a resident of Bolsulu village, Beylagan district, born on 15.07.1987, a mechanic-driver at "Agroservis" OJSC, was injured as a result of an explosion that occurred when he fell into one of the mines deliberately planted in advance by illegal Armenian armed forces while driving a tractor in the liberated territory of Sighnag village, Khojaly district, on 24.08.2023.

The mine explosion occurred in Sighnag village, on the edge of the field. As a result of the explosion, a hole with a diameter of approximately 1 meter was formed in the ground.

In addition, according to the protocol dated **2 October 2022** on the inspection of the scene, it was established that **Rasif Nusrat oglu Karimzade**, born on **1 April 2002**, a resident of **Poladtughay** village, **Sabirabad District**, while carrying out repair and construction work on a bridge being built on a motor road in the territory of **Taghaverd** village, **Khojavend District**, liberated from occupation, on **2 October 2022**, at around **11:00**, sustained bodily injuries as a result of the explosion of one of the mines that had been previously and deliberately planted in that area by Armenian armed formations. The place where the explosion occurred was a forested area covered with shrubs and bushes. There were **8**

unexploded mines in the area that could be visually observed. Taking into account that the area was mined, it was not possible to conduct a detailed inspection of the scene.

During the inspection, it was established that Armenian armed forces, acting as a criminal association and using methods of warfare capable of causing significant destruction in order to wage an aggressive war, had planted explosive devices, namely mines, in the territory of **Yusifjanli** village, **Aghdam District**, which they had kept under occupation from **23 July 1993** until **20 November 2020**. Around that area there were ruins and structures in unusable condition. The mined area was surrounded by trenches. The surface of the ground consisted of soil and grass cover.

Farman Tavakkul oglu Hagverdiyev, who participated in the inspection of the scene, pointed from a distance to the place where the mine on which **Anar Huseyn oglu Huseynov**, **Razi Akif oglu Huseynov**, **Bayram Akif oglu Huseynov**, **Akif Mukhtar oglu Huseynov**, and **Bahruz Nadir oglu Abdulov** had stepped exploded, and stated that on **16 March 2021** the above-named persons had stepped on a mine in that area. Mine searchers of Military Unit No. **161** opened a safety line **1 meter** wide in the mined area, and, after closely examining the place where **Anar Huseynov**, **Razi Huseynov**, **Bayram Huseynov**, **Akif Huseynov**, and **Bahruz Abdulov** had stepped on a mine, it was established that the brothers **Razi** and **Bayram Huseynov** had died, while **Anar Huseynov**, **Akif Huseynov**, and **Bahruz Abdulov** had sustained injuries. During the inspection of the scene, **3** unexploded **PMN-E** anti-personnel blast-type mines were discovered.

Since the said scene was a mined area, it was not possible to inspect it over a wide radius, and no physical evidence of any significance to the substance of the case was discovered.

The protocol dated **26 April 2021** on the inspection of the scene states that the scene was a mined area in the part of **Marzili** village, **Aghdam District**, that had not previously been occupied. The ground surface consisted of grass cover. During the inspection, a safety line **1 meter** wide was opened in the mined area from the earthen embankment of the trench to the scene, that is, to the place of the explosion, over a distance of approximately **800–900 meters**, and **5** unexploded **PMN-E** anti-personnel blast-type mines were detected and neutralized with a mine-search device. **Orkhan Jahid oglu Verdiyev**, who participated in the inspection of the scene, pointed to the place where he had found **Shahin Verdiyev**, **Aydin Verdiyev**, and **Firdovsi Guliyev** lying down and stated that the explosion had occurred in that area. At the scene there were found **1** crowbar, and, **38 centimeters** from it, **1** cap belonging to **Shahin Verdiyev** with stains resembling blood on it; between that cap and the crowbar there was a stain resembling blood; **124 centimeters** from that stain resembling blood, part of an exploded anti-personnel mine was found; **2 meters** from that, **1** shovel with damage to its working part was found; **334 centimeters** from that shovel, **1** jacket belonging to **Shahin Verdiyev** with stains resembling blood on it; and in front of that jacket, parts of an anti-tank mine and **trotyl** were found.

During the inspection of the scene, the **1** crowbar, **1** cap, stain resembling blood, part of an exploded anti-personnel mine, **1** shovel, **1** jacket, parts of an anti-tank mine, and trotyl were

seized in the prescribed manner, packed into envelopes, and sealed with the **“For envelopes”** seal of the **Aghdam District Prosecutor’s Office**.

It follows from the protocol in the criminal case that on **16 June 2021** an inspection of the scene was conducted and it was established that the scene was located on the **Aghjabadi–Aghdam** main—

Page 758

—asphalt road, in the section passing through the territory of **Sarijali** village of the **Aghdam** district representative office, on the right side of the road, near the defensive point of former checkpoint No. **23** of Military Unit No. “N” of the **Armed Forces of the Republic of Azerbaijan**, in the neutral zone. **Rza Nazil oglu Abbasov**, chairman of the **Garadaghli** municipality of **Aghdam District**, who participated in the inspection, stated that both the right and left sides of the asphalt road belonged to the administrative territory of **Sarijali** village of the district, and that the said area bordered **Seyidli** village of the district. On both sides of the asphalt road, signs bearing the word **“mine”** were installed on metal posts. Both sides of the main road were covered with yellowed natural grass. To the right of that main road was the trench of the defensive point of former checkpoint No. **23** of Military Unit No. “N” of the Armed Forces of the Republic of Azerbaijan.

After **Namiq Abdulrahim oglu Huseynov**, head of the 5th division of the **Mine Action Agency of the Republic of Azerbaijan**, who participated in the scene inspection, opened a safety line with a **VALON VMN 3** device, the place where the corpse had been found was inspected. Since a trench was located between the scene and the asphalt road, the safety line was used by entering that trench. The safety line had been fixed to wooden stakes along the trench using red tape. The depth of that trench was **4 meters**, and its width was **2 meters**. The upper part of the trench was covered with an earthen rampart, and the height of the rampart was **1.20 meters**. Inside the trench, a defensive fortification had been made along the ditch using concrete posts, and the inside was covered in some places with barbed wire. The distance from the place where the corpse was found to the asphalt road was **145 meters**. The distance between the corpse and the trench was **2.80 meters**.

To the west of the place where the corpse was found there were orchards, and to the east there were concrete posts left over from former vineyards and buried in the ground. The ground cover was covered with yellowed natural grass. The corpse was conditionally numbered with the numbers **1** and **2** during inspection. The corpse was male, lying on its back, with the head relatively toward the west and the feet toward the east; the hair on the head was black, approximately **3–4 centimeters** long; the eyes were closed; the legs were separated from each other. The corpse had undergone an advanced decomposition process. The corpse was wearing black trousers with a brown belt at the waist, and a black T-shirt of which only half remained. The left trouser leg was torn from the side, and the right trouser leg was missing. The corpse’s left leg had undergone traumatic amputation below the knee, with the shin bone remaining; a black shirt had been wrapped and tied around the knee part of

the left leg like a bandage. Since no muscle tissue remained on the corpse's left arm, bone parts remained, and the part below the wrist was missing. The clothes on the corpse were damaged.

At a distance of **1.80 meters** from the corpse, conditionally numbered **1**, on the upper part of the trench conditionally numbered **2**, there were circular stains resembling blood absorbed into the ground. **Rustam Aslan oglu Guliyev**, who participated in the inspection of the corpse, stated that the corpse belonged to his sister's son **Jasarat Siyafat oglu Hatamkhanov**. He stated that, based on the structure of the corpse's face, it belonged to his sister's son **Jasarat Hatamkhanov**.

In addition, **Namiq Huseynov**, head of the 5th company of the **Mine Action Agency of the Republic of Azerbaijan**, who participated in the inspection, stated that he assumed that **Jasarat Hatamkhanov** had sustained injuries and died as a result of the explosion of a **PMN** anti-personnel mine, plastic type. When that mine explodes, no parts remain. Anti-personnel mines mainly injure a person's lower limbs. Namiq Huseynov further stated that **30 centimeters** to the right of the circular stains resembling blood absorbed into the ground, conditionally numbered **2**, at a distance of **1.80 meters** from the corpse conditionally numbered **1**, on the upper part of the trench, there were signs of traces of an exploded mine. When the safety line was being laid, soil had been poured onto that place, and therefore it had been leveled.

During the inspection of the scene, one handful of soil was taken from the area where there were circular stains resembling blood absorbed into the ground, packed in the presence of attesting witnesses and protocol participants, sealed with the **"For envelopes"** seal of the **Aghdam District Prosecutor's Office**, and seized. In addition, since no physical evidence of significance was found during the inspection of the scene, nothing else was seized.

It follows from the protocol in the criminal case that on **29 January 2021** an inspection of the scene was conducted and it was established that the scene was the right side of the motor road passing through the territory of **Shurabad** village, **Aghdam District**, on the **Barda–Aghdam** road. It was visible that mine-clearance work was being carried out in the area—

—the surface of the ground consisted of soil and grass. At a distance of approximately **50–55 meters** from the road, there was a railway line. Safety lines had been set up on the right and left sides with wooden stakes. The width of the safety line at the entrance was **2 meters**. At a distance of **2.30 meters** from the entrance line, armored clothing and a **"visor"** were found. On the right and left sides of the safety line, **4** large wooden stakes had been driven into the ground, and the distance between the large wooden stakes was **5 meters**. On the left side, in front of the fourth wooden stake, there was an X-shaped wooden structure considered to be a stop sign. The end of the first working line ended at a distance of **15 meters**. The distance from the wooden stake to which the first working line was attached to the small wooden stake in the newly opened second working line was **1 meter**. On the right and left sides of the

second working line, **3** small wooden stakes had been driven into the ground, and the distance between the small wooden stakes was **1 meter**. The distance from the second small wooden stake to the stop sign was **0.7 meters**. The distance from the third wooden stake driven into the ground on the second working line to the place where the mine had exploded was approximately **1.5 meters**; one telephone was found at that place. At a distance of **5.1 meters** from the right side of the safety line, one boot was found. On the right and left sides of the safety line, on the roadside, there were warning signs bearing the word **"mine"**, at distances of **10** and **28 meters**, respectively.

Sadiq Khanlar oglu Piriyev, who participated in the inspection of the scene, pointed to the place where the injured person **Elmaddin Tofig oglu Mirzayev** had stepped on a mine and stated that on **29 January 2021**, while Elmaddin Mirzayev had moved him out of the working line to a safe distance and was checking the quality of the work he had performed, he had stepped beyond the safe working line by approximately **1.5 meters** and stepped on a mine. The boot found at the scene was numbered **1**, and the armored clothing and **"visor"** were numbered **2**, seized in the prescribed manner, packed into envelopes, and sealed with the **"For envelopes"** seal of the **Aghdam District Prosecutor's Office**. Since the telephone found at the scene was in a mined area, it was not possible to seize it.

According to the protocol dated **16 March 2023** on the inspection of the scene, it was established that **Amid Huseyn oglu Hasanov**, born on **5 April 1987**, and **Israil Ibrahim oglu Hasanov**, born on **1 July 1999**, residents of **Safarli** settlement, **Aghdam District**, while moving in the territory of **Yusifjanli** village, **Aghdam District**, liberated from occupation, on **15 March 2023**, at around **19:00**, in order to search for a lost domestic animal, stepped on a mine, as a result of which both died at the scene. It was established that the place where the incident occurred was in the territory of **Yusifjanli** village, on the opposite bank of the **Gargar** River after **Afatli** village, which was located on the former line of contact with Armenian armed formations, in an area that had been a vineyard before the occupation, and there were many iron posts buried vertically in the ground in that area. At the scene, a crater had formed in the ground as a result of the mine explosion.

According to the protocol dated **8 October 2022** on the inspection of the scene, it was established that employees of **"Korpu-Bina-Tikinti" LLC**, which was carrying out construction of a motor road in the liberated territories of **Aghdam District** — namely **Ramin Amir oglu Aliyev**, born on **24 June 1989**, a resident of **Seyfali** village, **Shamkir District**; **Parviz Sozali oglu Najafov**, born on **27 September 1986**, a resident of **Garayazi** settlement, **Aghstafa District**; and **Sakhavat Aladdin oglu Abdulkhaligov**, born on **3 January 1983**, a resident of **Uludash** village, **Gabala District** — sustained bodily injuries on **8 October 2022**, at around **17:00**, as a result of the explosion of two mines that had been previously and deliberately planted in those areas by Armenian armed formations during the occupation period. The place where the incident occurred was a land plot **380 meters** to the left of the road, at the **6th kilometer** of the newly constructed **Aghdam–Fuzuli** motor road passing through the territory of **Yusifjanli** village.

In addition, according to the protocol dated **18 March 2023** on the inspection of the scene, it was established that **Elmir Islam oglu Yusibov**, born on **31 August 1976**, a resident of **Afatli** village, **Aghdam District**, while carrying out land-clearing work with a **Volvo** tractor bearing state registration plate **02-BA-147** on **18 March 2023**, at around **13:00**, in the liberated territories between **Yusifjanli** village and **Afatli** village, **Aghdam District**, drove over one of the mines deliberately planted in that area by Armenian servicemen during the occupation period, as a result of which he sustained bodily injury and the equipment he was operating became unusable.

Page 760

According to the protocol dated **19 February 2021** on the inspection of the scene, conducted with photo and video recording, it was established that the injured person **Bakhtiyar Mahmud oglu Mahmudov** had gone to the place where the mine explosion occurred in a **Niva** vehicle bearing state registration plate **01-BC-845**, which he had been using. The scene was located in **Talysh** village, **Tartar District**, **60 meters** from a dirt road. As a result of the explosion, the vehicle became unusable.

In addition, according to the protocols dated **28 and 29 April 2023** on the inspection of the scene, it was established that as a result of the explosion of one of the anti-tank mines previously and deliberately planted by Armenian armed forces in **Talysh** village, **Tartar District**, liberated from occupation, on **28 April 2023**, at around **19:00**, the following persons died at the scene: employees of **"PB Group of Companies" LLC**, who were travelling at that time in a **Mitsubishi** vehicle bearing state registration plate **90-UH-894** and who were carrying out photo and video recording by drone of the territories liberated from occupation for the purpose of carrying out mine-clearance work — **Nadir Panah oglu Yusifov**, born on **24 September 1982**, a resident of **Ahmadalilar** village, **Fuzuli District**; **Sakhavat Ismayil oglu Gozalov**, born on **27 September 1981**, a resident of **Ahmadalilar** village, **Fuzuli District**; and **Farid Mehman oglu Sadiyev**, born on **6 June 1996**, a resident of **Sumgayit** city. The vehicle in which they were travelling was destroyed.

In addition, according to the protocol dated **1 October 2022** on the inspection of the scene, it was established that **Nicat Novruz oglu Jabbarov**, born on **19 April 1990**, and **Rafail Kocheri oglu Bayramov**, born on **11 September 1976**, residents of **Sahlabad** village, **Tartar District**, on **1 October 2022**, at around **12:00**, in the area of **Giziloba** village, **Tartar District**, which had been liberated from the enemy during the First Karabakh War but had remained under the control of Armenian armed formations until the Second Karabakh War, in the direction of the former **Aghdara** District, near military posts liberated from the enemy, sustained injuries as a result of the explosion of mines that had been previously and deliberately planted there by Armenian military formations during the occupation period. During the inspection of the scene, it became clear that the area was completely mined and that two craters had formed in the ground as a result of two mine explosions. There was a trench around the place where the incident occurred.

In addition, according to the protocol dated **23 October 2022** on the inspection of the scene, it was established that **Samir Buruz oglu Alizade**, born on **21 December 1996**, a resident of **Seyidimli** village, **Tartar District**, while intending to collect scrap metal in the liberated territories of **Chayli** village, **Tartar District**, on **23 October 2022**, at around **17:00**, stepped on one of the mines that Armenian armed formations had previously and deliberately planted during the occupation period, and sustained injuries to the foot area as a result of the explosion. The place where the incident occurred was **300 meters** from the trench area created by Armenian armed formations along the former line of contact in **Chayli** village. That area was surrounded by barbed wire, and the surroundings consisted of strip-shaped mined areas.

In addition, according to the protocol dated **26 April 2023** on the inspection of the scene, it was established that **Khazar Taryel oglu Babashov**, born on **11 March 1990**, a driver of the **International Eurasia Press Fund**, which carried out mine-clearance work in territories liberated from occupation in the territory of the Republic of Azerbaijan, and a resident of **Shukurbeyli** village, **Fuzuli District**, on **26 April 2023**, at around **09:00**, in **Sugovushan** village, **Tartar District**, in a bushy area on hilly terrain near the **12th kilometer** of the **Seyidimli–Sugovushan** motor road, stepped on one of the mines previously and deliberately planted during the occupation period by Armenian servicemen and sustained bodily injuries as a result of the explosion.

In addition, according to the protocol dated **27 May 2023** on the inspection of the scene, it was established that **Masim Hasan oglu Asgarov**, born on **25 December 1986**, a resident of **Ashaghi Surra** village, **Neftchala District**, who worked as a labourer at **"Mugansutikinti" LLC**, which was carrying out repair work on the **"Karabakh"** water canal, on **27 May 2023**, at around **15:00**, while carrying out cleaning work in the area of the water canal in the liberated territory of **Chayli** village, **Tartar District**, during the occupation period and armed conflicts, Armenian—

Page 761

—Armenian military formations, which had been thrown into the area and had not exploded, exploded, as a result of which he sustained an injury to the left hand area.

On **4 December 2020**, at around **11:00**, soldier **Mammad Vahid oglu Salimov**, who served as a grenade launcher operator in the 2nd squad of the 1st platoon of the 6th company of the 2nd battalion of Military Unit No. "N", while serving at combat position No. **12** near **Hasangaya** village, **Tartar District**, climbed onto the trench where he was serving in order to find out where the sound of an explosion heard from afar had come from. As a result of the explosion of a mine previously planted by Armenian military formations, soldier **Mammad Vahid oglu Salimov** sustained injury and was evacuated to hospital.

According to the protocol dated **4 December 2020** on the inspection, it was established that the scene was a trench near combat position No. **12** near **Hasangaya** village, **Tartar District**. A crater had formed in the trench as a result of the mine explosion. Several samples of

bloodstains were taken from that trench. Since the area was dangerous, it was not possible to take samples of mine remnants from there for expert examination.

It was established that servicemen of the 5th battalion of Military Unit No. "N", soldiers **Vusal Taghi oglu Rahimli** and **Murad Vugar oglu Ahmadov**, on **6 December 2020**, at around **13:30**, while moving on foot in the performance of their service duties in the territory of **Shahar** settlement, **Khojavend District**, where the battalion was temporarily concentrated, sustained injuries as a result of the explosion of anti-personnel mines previously planted in the ground by unknown members of Armenian armed formations. **V.T. Rahimli** sustained injuries classified as serious harm to health: "mine-blast injury, multiple shrapnel wounds of the right hand and lower limb, traumatic avulsion of the right foot." **M.V. Ahmadov** sustained injuries classified as serious harm to health: "mine-blast injury, traumatic avulsion of the right lower limb at the ankle-joint area, and multiple shrapnel wounds to the soft tissues of the left lower limb." They were evacuated to Military Hospital No. "N" and from there to a hospital.

According to the certificate drawn up on **23 December 2020** regarding the inspection of the scene, it was established that, in connection with injuries sustained by servicemen of the 5th battalion of Military Unit No. "N" of the Ministry of Defense, temporarily stationed in a settlement of **Khojavend District** — soldiers **Vusal Taghi oglu Rahimli** and **Matlab Mahammad oglu Jafarov** — as a result of the explosion of an anti-personnel mine planted by Armenian servicemen, it was not possible to inspect the scene in the indicated area, because, due to the prior planting of mines there by Armenian servicemen, there was a real danger to human life and health.

On **8 December 2020**, at around **14:00**, in **Shahyeri** village, **Khojavend District**, servicemen of Armenian military formations, whose identities and exact number were unknown, opened fire with **7.62-mm** and **5.45-mm** automatic firearms with the intent to kill two or more persons on the grounds of national hatred and enmity. As a result, they killed **Warrant Officer Ragib Vidadi oglu Azizov**, a serviceman of Military Unit No. "N" of the Ministry of Defense, by inflicting serious bodily injury on him in the form of diffuse destruction of the brain accompanied by open multi-fragment fractures of the bones of the cranial vault as a result of multiple firearm bullet wounds. They attempted to kill **Warrant Officer Elchin Ziyadkhan oglu Guliyev**, a serviceman of Military Unit No. "N", who had been assigned to service in that area. Later, with the intent to kill two or more persons on the grounds of national hatred and enmity, they opened fire on **Seymur Aghajan oglu Rzayev**, who was travelling from **Hadrut** settlement, **Khojavend District**, in the direction of the upper villages in a **VAZ-2121 Niva** vehicle, state registration plate **99-AN-801**, belonging to **Azercell Telecom LLC**, for the purpose of checking electrical lines; on **Sevindik Dilavar oglu Aghayev**, who was travelling in a **Mitsubishi** vehicle, state registration plate **90-PF-384**; and on Lieutenant **Elnur Mazahir oglu Hasanov**, a serviceman of Military Unit No. "N". As a result, they inflicted on **Seymur Aghajan oglu Rzayev** bodily injury classified as **less serious harm to health**, accompanied by a firearm wound to the left upper-arm area and causing long-term impairment of health. In addition, on the windshield of the **VAZ-2121**

vehicle, state registration plate **99-AN-801**, an oval through-damage measuring **1 x 1 cm**, with uneven edges and—

Page 762

—cracking, was formed, and on the vehicle's speedometer, damage measuring **7 x 4 cm** was formed.

It follows from the protocol contained in the materials of the criminal case that the scene was inspected and it was established that it was a two-storey private house located in the centre of **Shahyeri** village, **Khojavend District**, built of cut stone; there was a basement on the first floor of the house, and the entrance to the basement was through a wooden door **2–4 meters** high. The basement consisted of two rooms. Upon entry, in one of the rooms, **6** mattresses and blankets, empty canned-food containers, cylinders, and drink bottles were observed on the floor. Access to the second floor of the house was by stairs made of cut stone. During the inspection, stains resembling blood were identified on the **6th–8th** steps of the stairs, and **2** cartridge cases were found on the **7th** step. The entrance door to the second floor of the house was made of brown wooden material. On the floor of the room, **3** empty cartridge cases were found. In addition, **1** cartridge case was found in front of the refrigerator; **1** cartridge case was found among items scattered on the floor in the centre of the second room; and an empty cartridge case was found among household items scattered on the floor in the third room. A stain resembling blood, as well as **8** cartridge cases, were seized in the prescribed manner, taking into account their evidentiary significance.

During the inspection of the **VAZ-2121** vehicle, state registration plate **99-AN-801**, it was established that on the windshield of the vehicle there was an oval through-damage measuring **1 x 1 cm**, with uneven edges and cracking, and that on the speedometer of the vehicle there was damage measuring **7 x 4 cm**.

On **9 December 2020**, during the inspection of the body of **Warrant Officer Ragib Vidadi oglu Azizov**, a serviceman of Military Unit No. **213** of the Ministry of Defense, it was established that on the surface of the body, in the area of the left mandibular joint, there was a wound measuring **0.5 x 0.6 cm** with a central tissue defect, characteristic of a bullet entry hole. In the right temporal-occipital area there was a wound measuring **12 x 5 cm**, with uneven edges, characteristic of a bullet exit hole, from the opening of which an open fracture of the bones of the cranial vault and crushed and destroyed brain tissue were visible. During probing with a probe, it was established that both wound channels were connected in a channel-type manner. In the area of the right eye, on the upper eyelid, there was a wound measuring **0.5 cm**, characteristic of a bullet entry hole, accompanied by crushing and destruction of the eyeball. In the middle of the occipital area there was a wound measuring **9 x 3 cm**, with uneven edges, characteristic of a bullet exit hole, in the opening of which a fracture of the occipital bone and crushed and destroyed brain tissue were visible. During probing with a probe, it was established that both wound channels were connected in a channel-type manner. In the right subclavian area there was a wound **0.6 cm** in diameter, with

a central tissue defect, characteristic of a bullet entry hole. On the right half of the posterior surface of the chest, along the posterior axillary line at the level of the **III** rib, there was a wound measuring **1.5 x 1 cm**, with uneven edges and liquid blood flowing from the centre, characteristic of a bullet exit hole. During probing with a probe, it was established that both wound channels were connected in a channel-type manner. On the anterior surface of the chest, in the middle, at the level of the xiphoid process, there was a wound **0.5 cm** in diameter, with a central tissue defect, characteristic of a bullet entry hole. On the left lateral surface of the chest, along the mid-axillary line at the level of the **X** rib, there was a wound measuring **1.2 x 0.7 cm**, characteristic of a bullet exit hole. During probing with a probe, it was established that both wound channels were connected in a channel-type manner. In the right lumbar area there was a wound measuring **0.6 x 0.5 cm**, with a central tissue defect, characteristic of a bullet entry hole. On the anterior surface of the middle one-third of the right lower leg there was an abrasion measuring **2 x 0.5 cm**, obliquely oriented, reddish in colour, covered with a scab located above the skin level, against a greenish bruise measuring **8 x 4 cm**. On the anterior surface of the upper one-third of the right lower leg there was a bruise measuring **7 x 5 cm**, with a purplish centre and greenish periphery. No other visible injuries or traces of injuries were found on the surface of the body.

Ulfat Namaz oglu Abbasov, driver of the motor-transport squad of the material and technical support platoon of the 3rd battalion of Military Unit No. "N" of the Ministry of Defense; Lieutenant **Rashad Yaver oglu Abbasov**, commander of the communications platoon of that battalion, who had been appointed senior of the vehicle; soldier **Shahvaran Fazail oglu Safarov** of the material and technical support platoon; and soldier **Raul Borisovich Kovalskiy** of the communications platoon, on **9 December 2020**, at around **17:10**, while returning after delivering dinner to the personnel of the 9th company located in the territory of **Marzili** village, **Aghdam District**, liberated from Armenian armed formations, using a **KamAZ-43114** vehicle belonging to the material and technical support platoon—

Page 763

—bearing military registration plate **D588QQ**, fell onto an anti-tank mine planted by Armenian armed formations on the supply road passing through the territory of that village. As a result of the explosion of that mine, the servicemen in the vehicle — **Ulfat Abbasov** and **Rashad Abbasov** — sustained injuries accompanied by the diagnosis of "blast-wave barotrauma"; **Shahvaran Safarov** sustained injuries accompanied by the diagnosis of "blast trauma, barotrauma, atheroma of the parietal area of the head, and an abrasion wound of the right lower leg at the one-third level"; **Raul Kovalskiy** did not sustain any injury; and material damage was caused to the **KamAZ-43114** vehicle, military registration plate **D588QQ**.

It follows from the materials of the criminal case that **Sarukhan Sarukhanov**, chief of staff and deputy commander of Military Unit No. **161**, submitted a certificate to the **Karabakh Military Prosecutor's Office**. It appears from that certificate that, due to the fact that on **9**

December 2020, at around **17:10**, the **KamAZ-43114** vehicle belonging to the military unit, bearing military registration plate **D588QQ**, became unusable as a result of a mine explosion in the territory of **Marzili** village, **Aghdam District**, and because the area was presumed to be a mined area, movement to that place was restricted.

It follows from the protocol dated **30 December 2020** on the inspection of items and objects that the **KamAZ-43114**vehicle, military registration plate **D588QQ**, which had fallen onto an anti-tank mine in the territory of **Marzili** village, **Aghdam District**, on **9 December 2020**, was inspected.

According to the protocol dated **22 January 2021** on inspection, the remains of a "**Great Wall"** vehicle, military registration plate **7311QQ**, were inspected.

Extracts from orders contained in the materials of the criminal case were examined in court.

According to the extract from Order No. **308** dated **29 October 2019** of the commander of Military Unit No. "N", Senior Lieutenant **Asaf Abid oglu Aghayev** was appointed commander of the radio platoon of the communications company.

According to the extract from Order No. **338** dated **29 November 2019** of the commander of Military Unit No. "N", soldier **Asif Javad oglu Ismayilov** was appointed driver of the 1st motor-transport squad of the motor-transport platoon of the material and technical support company.

According to the extract from Order No. **196** dated **24 July 2020** of the commander of Military Unit No. "N", Major **Elmdar Hasan oglu Eminov** was appointed senior assistant for planning to the head of the operations section.

According to the extract from Order No. **329** dated **10 December 2020** of the commander of Military Unit No. "N", Major **Elmdar Hasan oglu Eminov** was removed from special-norm ration support as of **10 December 2020**.

According to the extract from Order No. **331** dated **11 December 2020** of the commander of Military Unit No. "N", Senior Lieutenant **Asaf Abid oglu Aghayev** and soldier **Javad Asif oglu Ismayilov** were removed from special-norm ration support as of **10 December 2020**.

On **19 December 2020**, a **KamAZ-43114** vehicle, military registration plate **E727QQ**, while entering from the asphalt road into the area to be searched, was struck by an anti-tank mine previously planted in the area by unknown members of the illegal armed formations created by Armenian armed formations with national and hostile intent. As a result of the explosion of that mine, the driver of the vehicle, **Mahabbat Maharram oglu Gurbanli**, sustained injuries described as "traumatic amputation at the level of the middle one-third of the right lower leg, wounds of the left lower leg with tissue defect, through-and-through shrapnel wounds of the left thigh, open shrapnel fractures of the left lower-leg bones, closed craniocerebral trauma, brain concussion, traumatic hemorrhagic shock of the **III** degree." **Tarlan Tajaddin oglu Gurbanov**, who was in the cabin of the vehicle, sustained injuries

described as “mine-blast injury, abrasion wound of the anterior surface of both lower legs and of the right hand, and subungual hematoma of the first toe of the left foot,” while **Etibar Javid oglu Huseynli** sustained injuries described as “abrasion wounds of the right eyelid and right knee.”

It follows from the protocol dated **19 December 2020** on the inspection of the scene that the area where the incident occurred was the territory of **Jabrayil District**.

Long-term active-duty servicemen of the motor-transport squad of the motor-transport platoon of the headquarters and supply company of Military Unit No. “N” — soldier **Vusal Elbrus oglu Mammadov**, soldier **Elmir Rayil oglu Ganbarov**, and Sergeant **Sabuhi Suraj oglu Kalbaliyev**—

Page 764

—on the instructions of the command of the military unit, for the purpose of collecting weapons and ammunition remaining on the battlefield during the fighting in the territory of **Fuzuli District** and handing them over to the military unit, on **27 December 2020**, at around **11:00**, set out in an **Elral** cargo vehicle, military registration plate **E906QQ**, driven by soldier **V.E. Mammadov**, from the support point located in **Hadrut** settlement, **Khojavend District**, where the military unit was temporarily stationed. Until around **14:00**, they collected the weapons and ammunition in the area and continued moving in the direction of **Atagut** village, **Khojavend District**. At around **15:00**, while in that village, **E. Ganbarov** got out of the vehicle and entered the yard of one of the houses in the village, while **V.E. Mammadov** and **S.S. Kalbaliyev** stood near the vehicle and began waiting for him. Approximately **5–6 minutes** later, **E. Ganbarov**, in front of the stairs of the house he had entered, encountered servicemen of Armenian armed formations who were hiding in the house. As a result of fire opened by them from automatic firearms, he sustained injuries classified as serious harm to health and dangerous to life — “two through-and-through firearm bullet wounds to the chest and one to the abdominal cavity, injuries to the organs of the chest and abdominal cavities, and acute internal bleeding” — and died at the scene.

V.E. Mammadov and **S.S. Kalbaliyev** informed the command of the military unit about the incident and left the place where they were located. After being informed of the incident, an evacuation group formed by the command of the military unit was immediately sent to the scene. The place where the servicemen of the Armenian armed formations were located was identified, and they were offered surrender. However, the Armenian servicemen hiding on the roof of the house did not surrender and suddenly opened fire on the servicemen of the evacuation group. As a result, long-term active-duty servicemen of Military Unit No. “N” — soldier **Emin Suleyman oglu Aliyev** sustained injuries classified as serious harm to health: “through-and-through bullet wounds to the soft tissues of the right scapular area and the anterior surface of the upper one-third of the right upper arm; a blind bullet wound to the right knee area; an open marginal avulsion fracture of the distal metaphysis of the left humerus; and a small-fragment open fracture of the medial condyle of the right femur.”

Sergeant **Ramil Ali oglu Rahimov** sustained injuries classified as less serious harm to health: "blind shrapnel wound of the anterior surface of the right hand and of the fifth finger of the left hand; marginal avulsion fracture of the phalanx of the fifth finger of the left hand." Six servicemen of the Armenian armed formations who were hiding in the house were neutralized.

According to the protocol dated **28 December 2020** on the inspection, it was established that the scene was on the first floor of a two-storey building located on the right side, **130 meters** from the entrance to **Atagut** village, **Khojavend District**. The said village is located on a mountainside. After its liberation from occupation, servicemen of the Azerbaijani army were stationed in the village.

According to the letter sent to the **Fuzuli Military Prosecutor's Office** by the head of the medical unit of Military Unit No. "N", soldier **Emin Suleyman oglu Aliyev** of Military Unit No. "N" was evacuated to Military Unit No. "N", and a corresponding surgical operation was performed. At that time, the clothing items he had been wearing were completely cut off and removed. However, as is known, on the dates in question, counteroffensive operations were being conducted against the illegal armed formations of the Republic of Armenia, and since numerous wounded servicemen were being brought to the military hospital and surgical operations were being carried out, the clothing items became mixed together, rendered unusable, and were destroyed.

According to the decision dated **15 April 2021**, the following were recognized as material evidence in the criminal case: **5 AK-74 automatic rifles** numbered **1185383**, **980235**, **4337283**, **4347654**, and **817899**; **14** automatic-rifle magazines; **277**cartridges of **5.45-mm** caliber; **4** cartridge cases; **1** bullet; and a tunic, military field-type trousers, long-sleeved warm undershirt, warm under-trousers, gray T-shirt, underwear, **1** pair of boots, and **1** pair of socks belonging to **E.R. Ganbarov**. The said military weapons and ammunition are stored at Military Unit No. **335** of the Ministry of Defense, while the tunic, military field-type trousers, long-sleeved warm undershirt, under-trousers, gray T-shirt, underwear, **1** pair of boots, and **1** pair of socks belonging to **E.R. Ganbarov** are stored in the Special Investigation Department.

From **27 September 2020** to **10 November 2020**, after the combat operations conducted by the Armed Forces of the Republic of Azerbaijan in the direction of counteroffensive operations for the purpose of preventing the attack of Armenian military formations, in the liberated—

Page 765

—liberated area located near **Hasangaya** village, **Tartar District**, Captain **Vusal Zabit oglu Shabanov**, commander of the 1st engineer platoon of the obstacle-removal company of Military Unit No. "N", who had been seconded in advance to that area and was engaged in clearing the territory of combat position No. **12** of that military unit, located near **Hasangaya** village, **Tartar District**, from mines previously planted by Armenian servicemen, on **29**

December 2020, at **11:15**, while carrying out mine-search work in the area located behind that combat position, sustained injuries classified as **serious harm to health**, causing permanent loss of more than one-third of general working capacity — namely "traumatic amputation of the left lower limb at the Chopart joint level, compartment syndrome of the muscles of the left lower leg, and fasciotomy of the muscles of the left lower leg" — as a result of one of the mines previously planted by Armenian servicemen being activated and exploding. He was evacuated to Hospital No. "N" and from there to the Main Clinical Hospital of the Armed Forces.

According to the protocol dated **29 December 2020** on the inspection of the scene, it was established that the scene was the area located on the right side of the vehicle-supply road leading from the support point of the 2nd battalion of Military Unit No. "N", located in **Hasangaya** village, **Tartar District**, to combat position No. **12** of the 6th company of that battalion, liberated from Armenian occupation, behind the trench used for observing the positions of Armenian servicemen at combat position No. **12**. The distance from the commandant post at the entrance to **Hasangaya** village to the battalion support point was **2 kilometers** as the crow flies, and the distance from the battalion support point to the scene was **3 kilometers** as the crow flies. The said supply road had a dirt surface, and its right and left sides consisted of flat areas and hills of undefined size. According to participant **Murad Kazimov**, the area where the incident occurred had been the territory of a combat position where Armenian servicemen had previously been stationed. It was liberated after the Patriotic War and was conditionally named combat position No. **12**. On the right and left sides of the area where the incident occurred, numerous wooden boards planted into the ground bearing the inscription **"Minefield"** were observed. After entering the mined area from the dirt road, participant Captain **Murad Kazimov** was asked to show the scene; proceeding along the path opened on the dirt road to the place where the explosion had occurred, a crater **5–15 centimeters** deep and **1.5 meters** in radius was found. That crater was presumed to be the explosion site. The soil in the crater was burned and boiled from the inside. Participant **Murad Kazimov** stated that combat position No. **12** and the area behind it where the explosion had occurred had been liberated from Armenian occupation after the Patriotic War, and that, since those areas had been under the control of Armenian servicemen until liberation, numerous mines had been planted in the area by Armenian servicemen.

It follows from the protocol dated **26 December 2020** on the inspection of the scene that the scene was located in an area shortly before reaching combat position No. **24**, located on the height called **"1353"** in the territory of **Talysh** village, **Tartar District**. Soldier **Asim Fakhraddin oglu Pashayev**, a long-term active-duty serviceman serving as driver of the motor-transport squad of the material and technical supply platoon of the 4th battalion of Military Unit No. "N", who participated in the inspection, showed the inspection participants the place shortly before reaching combat position No. **24**on the height called **"1353"**, as well as the place where he had stopped the vehicle halfway while travelling to that position, and that place was described in detail. Thereafter, soldier **Asim Pashayev** showed the participants the place where the mine had exploded on the left side of the dirt vehicle road leading to combat position No. **24**. During the inspection, stains resembling blood, torn parts of military

trousers, as well as parts of a destroyed tank that had belonged to Armenian armed formations, were found at that location. A diagram of the scene was also drawn and attached to the protocol.

According to the protocol dated **21 January 2021** on the inspection of the scene, it was established that the scene was located at the combat post of the 5th company of the 2nd battalion of Military Unit No. "N" of the Ministry of Defense, in the territory of **Ashaghi Veysalli** village, **Fuzuli District**.

According to the protocol dated **21 January 2021** on the inspection of the corpse, it was established that as a result of the mine explosion, the body of soldier **Rashad Farzali oglu Javadov** had become unrecognizable.

Page 766

It was established in court that on **4 February 2021**, at **13:30**, in the territory of **Shelli** village, **Aghdam District**, the following servicemen sustained injuries as a result of an explosion: long-term active-duty serviceman soldier **Aykhan Karimkhan oglu Mamedov**, sanitary instructor of the 1st battery of the artillery division of Military Unit No. "N" of the Ministry of Defense; compulsory active-duty serviceman soldier **Afgan oglu Zeynalov**, chief aimer of the 1st gun of the 2nd platoon of that battery; compulsory active-duty serviceman soldier **Nemat Novruz oglu Babayev**, crew member of the 1st gun of the 2nd platoon of that battery; compulsory active-duty serviceman soldier **Balagadash Mubariz oglu Malikmammadov**, crew member of the 2nd gun of the 2nd platoon of that battery; and compulsory active-duty serviceman soldier **Gubad Islam oglu Zeynalov**, crew member of the 2nd gun of the 1st platoon of that battery. While they were being evacuated to Military Hospital No. "N", soldier **Gubad Islam oglu Zeynalov** died on the way.

According to the protocol dated **4 February 2021** on the inspection, the scene was the central part of the road leading from **Shelli** village, **Aghdam District**, in the direction of **Shikhbaba** village.

It was established in court that soldier **Alihasan Tumar oglu Hasanov**, rifleman of the 1st squad of the 2nd platoon of the 3rd company of the 1st battalion of Military Unit No. "N" of the Ministry of Defense, on **13 February 2021**, while resting between combat-duty shifts at combat position No. **27** on the height called **"1047"** in the territory of liberated **Sugovushan** village, **Tartar District**, began moving together with officials who had come from Military Unit No. **130** to install a surveillance camera in order to detect in advance any possible provocation in the area of that position, for the purpose of organizing their armed protection, through the forested area located on the right side of the position. At around **12:40**, while moving about **500 meters** to the right through the forested area from the height, he sustained injuries classified as **serious harm to health** — namely "traumatic avulsion of the right lower limb at the ankle-joint level, abrasion wounds of the anterior surface of the left lower leg, and second-degree traumatic hemorrhagic shock" — as a result of the activation and explosion of an anti-personnel mine previously buried in the ground, under unknown

circumstances, by unidentified members of Armenian armed formations. He was evacuated to Military Hospital No. “N” and from there to the Main Clinical Hospital of the Armed Forces.

According to the protocol dated **15 February 2021** on the inspection, the scene was located in a forested area in the territory of combat position No. **27**, about **500 meters** to the right of the height called **“1047”**, situated in the territory of **Sugovushan** village, **Tartar District**. The area consisted of small trees and earthen hills. Near the scene, numerous mines planted by Armenian armed forces and removed from the ground were lined up.

It was established in court that on **20 March 2021**, at around **11:00**, in the area of observation post No. **31** of the 9th company of the 3rd battalion of Military Unit No. “N”, located in the territory of **Kuropatkino** village, **Khojavend District**, as a result of the explosion of a **PMN**-type anti-personnel mine planted by unidentified members of Armenian military formations with the intent to intentionally kill two or more servicemen of the Armed Forces of the Republic of Azerbaijan on the grounds of national hatred and enmity, the following persons, who were carrying out a combat assignment at that combat post, sustained injuries: Warrant Officer **Ruhid Alim oglu Hajizade**, deputy commander of the 1st platoon of the military company, sustained injuries classified as **serious harm to health** — traumatic avulsion of the left lower limb at the ankle-joint level, accompanied by third-degree traumatic-hemorrhagic shock; superficial abrasion wounds of the anterior surface of the left lower leg and knee joint, and abrasion wounds of the anterior surface of the left forearm and the anterior and posterior surfaces of the left hand; soldier **Siraj Javid oglu Guliyev**, crew member of the company’s 2nd machine-gun squad, sustained injuries classified as **minor harm to health**, causing short-term impairment of health — multiple blind shrapnel wounds of the left half of the face, the left forearm, the dorsal area of the left hand, and the left lateral wall of the abdomen, accompanied by left-sided acute cochlear neuritis; soldier **Hazar Vahid oglu Bandaliyev**, aimer of the 2nd squad of the company’s 1st platoon, sustained injuries classified as minor—

Page 767

—harm to health, causing short-term impairment of health — non-penetrating blind shrapnel wounds of the right half of the face, the lower one-third of the left forearm, the dorsal area of the left hand, and the left half of the abdomen; and soldier **Rashad Faraj oglu Aslanov**, rifleman and crew member of that squad, sustained injuries classified as **minor harm to health**, causing short-term impairment of health — multiple blind shrapnel wounds of both upper limbs and the right half of the abdomen.

According to the protocol dated **20 March 2021** on the inspection of the scene, the place where Warrant Officer **Ruhid Alim oglu Hajizade**, soldiers **Siraj Javid oglu Guliyev**, **Hazar Vahid oglu Bandaliyev**, and **Rashad Faraj oglu Aslanov** sustained injuries was the area of observation post No. **31** of the 9th company of the 3rd battalion of Military Unit No. “N”; that post was located in the territory of **Kuropatkino** village, **Khojavend District**. The direct scene was the trench behind the soldiers’ dormitory at the observation post. During the

inspection of the scene, the right slipper made of rubber material that had been on Warrant Officer **Ruhid Hajizade's** foot at the time of the incident, three fragments of the left slipper rendered unusable as a result of the explosion, and a soil mass from the crater formed by the mine explosion were collected. On the basis of the decision dated **25 March 2021**, clothing items worn by Warrant Officer **Ruhid Alim oglu Hajizade** at the time of the incident were collected from the relevant medical institution by a protocol on seizure drawn up on the same date, and during the inspection of those items, damage was found on them.

It was established in court that **Etibar Javid oglu Huseynli**, while serving with the rank of lieutenant as commander of the headquarters and supply company of Military Unit No. "N" of the Ministry of Defense, on **16 February 2021**, while participating, on the basis of an assignment given by the leadership of the military unit, in an operation to clear agricultural fields in the territory of **Amirvarli** village, **Jabrayil District**, liberated from occupation, from mines, at around **12:00** that day sustained injuries accompanied by the diagnosis of "chopped wound of the sole of the left foot, closed displaced fracture of the lower one-third of the left lower-leg bones, open shrapnel fracture of the 1st and 2nd metatarsal bones of the left foot, and superficial shrapnel wound of the sclera of the right eye," as a result of the explosion of an anti-personnel mine previously placed with the intent to kill by unidentified members of the illegal armed formations created by Armenian separatists with national hatred and hostile intent. He was immediately evacuated to Military Hospital No. "N" of the Ministry of Defense and from there to the Main Clinical Hospital of the Armed Forces. The intent of the person or persons who placed the said anti-personnel mine in that area was precisely to kill the injured person, but they were unable to complete the crime for reasons beyond their control.

It was established in court that the **KamAZ** bus vehicle belonged to Military Unit No. "N" of the Ministry of Defense, bearing military registration plate **G-698-QQ**, in which employees of television channels and news agencies who had been seconded to liberated **Kalbajar District** in connection with the performance of their official duties, as well as territorial representatives of the Head of the **Kalbajar District Executive Authority**, were travelling, struck and detonated an anti-tank mine in **Susuzluq** village, **Kalbajar District**, on **4 June 2021**, at around **11:00**. As a result, civilians **Arif Aghalar oglu Aliyev**, **Siraj Abish oglu Abishov**, and **Maharram Ali oglu Ibrahimov** died from their injuries, and **4** other persons in the vehicle — **Etibar Imamverdi oglu Aliyev**, **Emin Hasan oglu Mammadov**, **Shohrat Elshan oglu Jafarov**, and **Kamil Salim oglu Abdullayev** — sustained bodily injuries of various degrees.

According to the protocol dated **4 June 2021** on the inspection of the scene, the scene was approximately the entrance area of **Susuzluq** village, **Kalbajar District**. On the right half of the carriageway, a circular crater, presumed to have been formed as a result of the explosion, was observed. The crater measured **230 x 240 centimeters**. Soil samples were taken for expert examination from the blackened parts of the crater walls. Wooden, rubber, and plastic items that could be of significance to the case were also taken from inside the crater. On the northern side of the crater, a vehicle rendered unusable was observed. Part of the rear of the

vehicle had gone beyond the left side of the road; its front was standing toward the right direction of the road and occupied the main carriageway. The distance between the lower corner of the vehicle's right front tire and the crater was **230 centimeters**. The other tires of the vehicle were in place and had not deflated. The right wheel of the vehicle's middle axle was completely unusable, and it was precisely that—

Page 768

—wheel that had run over mine. The cabin of the vehicle and the rear area intended for carrying passengers had completely burned. At a distance of **640 centimeters** from the left front wheel toward the centre of **Susuzluq** village, irregular reddish-brown stains resembling blood were observed; **19 meters** from that stain toward the village centre, stains resembling blood were found, and, according to the inspection participants, the bodies of two persons who had died had been removed from the place where those stains were located. It was also stated that, during a search in the ravine on the left side of the road, the body of a third person had been found.

According to the protocol dated **6 December 2020** on the inspection, as a result of the explosion of a mine planted at the **10th kilometer** of the **Kalbajar–Zar** road passing through the territory of **Zar** village, a crater had formed on the left carriageway, and the cabin of a **KamAZ-43114** vehicle bearing military registration plate **H 692 QQ** had completely burned and become unusable.

According to the protocol dated **19 May 2021** on the inspection, the place where the incident occurred was close to the state border, near **Yukhari Ayrim** village, **Kalbajar District**, close to Armenia. The road was **3 meters** wide. When standing opposite the Republic of Armenia, a crater was found on the left side of the road. Its dimensions were **310 x 308 centimeters**. It was established that a **KamAZ** vehicle belonging to the military unit had struck a mine at that place. A metal object was found in the centre of the crater and collected.

By decision dated **17 September 2021**, **2** small metal objects, **3** small plastic objects, a short-sleeved shirt, sleeveless undershirt, trouser fragment, underwear, and **1** pair of socks belonging to **Maharram Ali oglu Ibrahimov**; a short-sleeved shirt, sleeveless undershirt, trousers, underwear, **1** boot, and **1** pair of socks belonging to **Siraj Abish oglu Abishov**; parts of a jacket, a short-sleeved shirt, sleeveless undershirt, trouser fragment, underwear, **1** shoe, and **1** pair of socks belonging to **Arif Aghalar oglu Aliyev**, collected during inspections of the scenes, were recognized as material evidence and attached to the criminal case materials.

It was established that soldier **Orkhan Ilyas oglu Heydarli** of the 3rd squad of the 2nd platoon of the 1st company of the 1st battalion of Military Unit No. **130**, on **20 June 2021**, at **08:45**, on the height conditionally called **1353**, located in the territory of **Talysh** village, **Tartar District**, slipped on a basket made of stones and his left foot stepped on a mine, as a result of which he sustained an injury described as **"post-traumatic amputation of the foot area of the left foot."**

According to the protocol dated **20 June 2021** on the inspection, the scene was the support point of the 1st company, position No. **22**, located on the height conditionally called **1353**, liberated from Armenian armed formations, in the territory of **Talysh** village, **Tartar District**. When viewed from **3 meters** behind the trench where that position was located, it was observed that the soil had subsided at the place where the explosion occurred, and that there were pieces of wood around it. The distance between the position where Armenian armed formations were located and position No. **22**was approximately **300–350 meters**. During the inspection, stains resembling blood were identified on white stones and on the ground opposite the dormitory and were packed and collected. According to the certificate of Military Unit No. **130**, the anti-personnel mine on which **Orkhan Ilyas oglu Heydarli** had stepped was, by its destructive force and other characteristics, an anti-personnel mine planted not by themselves but by Armenian armed formations.

Chief technician of the engineering-road section of Military Unit No. "N", Chief Warrant Officer **Sakit Ahliman oglu Dadashov**, on **6 July 2021**, at around **17:45**, while carrying out engineering-road work on the supply-evacuation road leading to combat position No. **24** of the 12th company of the 4th motor-rifle battalion of Military Unit No. "N", located in the territory of **Aliaghali** village, **Aghdam District**, sustained injuries classified as **serious harm to health**, dangerous to life, as a result of fire opened from firearms from the positions of unidentified members of Armenian armed formations with the intent to intentionally kill on the grounds of national hatred and enmity.

On **6 July 2021**, Senior Assistant of the **Karabakh Military Prosecutor's Office**, **Samir Kamran oglu Sadikhov**, inspected the place where Chief Warrant Officer **Sakit Ahliman oglu Dadashov**, who served with the rank of Chief Warrant Officer as chief technician of the engineering-road section of Military Unit No. **341**, had sustained injuries as a result of fire opened while engineering-road work was being carried out. The scene was assigned to the 12th company of the 4th battalion of Military Unit No. "N"—

Page 769

—of Military Unit No. "N", and was the supply-evacuation road leading to combat position No. **24**, located in the territory of **Aliaghali** village, **Aghdam District**, liberated from occupation.

According to the protocols dated **14 July 2021** on the inspection of the scene, the scene was the area near the position conditionally called **"Mil-1"**, located in the territory of **Sadarak District**, belonging to Military Unit No. "N", on the border with Armenian armed formations.

According to the protocol dated **16 July 2021** on the inspection of clothing, damage was found on the tunic.

According to the protocol dated **3 August 2021** on the inspection, the clothes worn by **Mahammad Ilham oglu Gilmizliyev** at the time of the incident were inspected.

According to the protocol dated **3 August 2021** on the inspection, the clothes worn by **Murtuz Farman oglu Namazov** at the time of the incident were inspected.

It was established by the protocol dated **16 July 2021** on the inspection of the scene that, mainly, at the **"Mil-1"**observation position of Military Unit No. "N", one of the bullets fired from the Armenian side at the time of the incident wounded **Mustafa Rasim oglu Aghayev**. During the inspection of the place where the incident occurred, there was found a cabin made of metal material for observation, and in that cabin an iron pipe intended for firing a weapon; a bullet mark was identified on that pipe. The bullet fired from the Armenian side struck the pipe in the observation cabin and then hit the mouth area of **Mustafa Rasim oglu Aghayev**. No trace or bloodstain was found at that observation point.

It follows from the decision dated **20 August 2021** on recognition as material evidence that **4** metal fragments presented during the inspection of the scene were recognized as material evidence, since they had evidentiary significance, and were handed over to the material-evidence room of the prosecutor's office.

According to the protocol dated **17 July 2021** on the inspection of the scene, the scene was the position conditionally called **"Mil-1"**, located in the territory of **Sadarak District**, **Nakhchivan Autonomous Republic**.

According to the protocol dated **20 July 2022** on the inspection of the scene, the scene was the position conditionally called **"Vagon 2"**, located in the territory of **Sadarak District**, **Nakhchivan Autonomous Republic**.

According to the protocol dated **20 July 2021** on the inspection of an item, damage was found on **one pair of trousers** among the seized items.

According to the protocol dated **13 August 2021** on the inspection of items, a through-and-through injury and stains resembling blood were found on the bush jacket worn by **Nusrat Gunduz oglu Orujov** at the time of the incident. A through-and-through injury and stains resembling blood were found on the military field sweater and warm undershirt worn by **Roman Ramil oglu Dadashov** at the time of the incident. A through-and-through injury was found on the bush jacket and military field summer shirt worn by **Bakhtiyar Asaf oglu Huseynov** at the time of the incident.

Servicemen of Military Unit No. "N" of the Ministry of Defense serving as long-term active-duty soldiers — **Hasan Nizami oglu Pira**, **Abbas Hasan oglu Gafarov**, and **Khosrov Maharram oglu Allahverdiyev** — on **2 August 2021**, at around **00:20**, while moving in a **Ural-432006** vehicle bearing military registration plate **G503QQ** in the **Aghagollar** area of **Kalbajar District**, in order to transport material support to posts along the line of contact, at a distance of approximately **500 meters** from the **"Pora"** post located in that area, were affected by the explosion of a mine that had previously been buried in the area by unknown members of Armenian armed formations. As a result, **H.N. Pira** sustained injuries classified as **minor harm to health** — "perforation of both eardrums accompanied by conductive

severe hearing impairment as a result of barotrauma" — while **A.H. Gafarov** sustained "abrasion injuries to the left cheek area," the degree of which was not determined because they did not cause harm to health. They were evacuated to Military Hospital No. "N" of the Ministry of Defense, while the **Ural-432006** vehicle, military registration plate **G503QQ**, was rendered partially unusable.

According to the protocol dated **6 August 2021** on the inspection, the scene was located in the **Alagollar** area of **Kalbajar District**, approximately **500 meters** from the **"Pora"** post under the control of the 2nd battalion of Military Unit No. "N", on a land area at an altitude of **2,550 meters**. In the western direction, at a distance of approximately **100 meters**, it was near the line of contact with Armenian armed forces.

Page 770

At a distance of **100 meters** east of the scene, the **Gurbaghachay** River flows from the south-western direction toward the east. From the support point of the 6th company of the 2nd battalion located east of the river to the scene, the distance was **15 kilometers**; to the **"Pora"** post, the distance was **2 kilometers**; from the **"Pora"** post to the scene, the distance was **500 meters**; and from the scene to the nearest post, the **"Sarhad"** post, the distance was **3.5 kilometers**. The area in general was mountainous, with uneven relief and grassy land. At the scene, one circular crater, presumed to have formed as a result of the explosion, was observed. The dimensions of the crater were **93 x 87 centimeters**, and its depth was **62.5 centimeters**. The crater narrowed downward. No material evidence of significance to the case was found at the scene.

According to the protocol on inspection, it was established that the left middle wheel of the **Ural-432000** vehicle bearing registration plate **G503QQ**, and the rim opening of that wheel, were out of order. The vehicle's fuel tank was punctured; the body of the vehicle was dented inward on the left side; the upper cover had been torn off; some parts located on the left upper part of the body were destroyed; the left and front windows in the cabin were broken; and the left door was dented in various places. The vehicle was partially unusable.

According to the protocol dated **9 August 2021** on the inspection of the scene, the scene was located near **Zar** village, **Kalbajar District**, around height **3335**, at the combat position called **"Tanker"**, on stony-gravel land at an altitude of **2,500 meters**. Positions belonging to Armenian armed forces were located in the northern direction at an altitude of **2,350 meters**, at a distance of **1,500 meters**; in the southern direction at an altitude of **2,400 meters**, at a distance of **1,500–1,700 meters**; and in the western direction at an altitude of **2,700 meters**, at a distance of **1,700–1,800 meters**. In the eastern direction, parallel to the said positions, there were combat posts belonging to the Armed Forces of the Republic of Azerbaijan. As a result of the incident, the rear window of a **Caterpillar D-6R** engineering vehicle bearing military number **H830QQ** was completely broken; the rear part of the seat, the military-number plate, and the base of the rear hook were pierced by bullet impact. The vehicle was

rendered partially unusable and required cosmetic repair. No material evidence of significance to the case was found at the scene.

According to the protocol dated **9 August 2021** on the inspection of the **Caterpillar D-6R** engineering vehicle bearing military number **H830QQ**, although the rear window of the vehicle had been pierced at the time of the incident, it broke completely when the vehicle was set in motion, and a temporary cellophane cover had been installed in its place. In the cabin, the rear part of the seat, the military-number plate, the rear and upper parts of the body, and the base of the rear hook were damaged by bullet impact. In total, **6** bullet-impact marks with a diameter of **12.7 millimeters** were found on the vehicle. At the same time, the engineering vehicle required cosmetic repair. No other damage affecting the intended use of the vehicle was found. An artificial cover had been attached in place of the vehicle's rear window, and it was being used for its intended purpose.

It was established that on **11 June 2021**, at approximately **16:00–17:00**, Junior Sergeant **Asif Azar oglu Tamjidi**, a long-term active-duty serviceman of Military Unit No. "N" of the Ministry of Defense, bulldozer operator of the 3rd engineering-road squad of the 1st engineering-road platoon of the 1st engineering-road company of Military Unit No. **343**, while carrying out engineering work with the **NEW HOLLAND** engineering vehicle bearing military number **H175QQ** assigned to him, in the area of combat position No. **5**, where the 5th battalion of Military Unit No. **191** was located in **Yellija** village, **Kalbajar District**, was fired upon from the direction of **Basarkechar District** by unknown servicemen of the Armed Forces of Armenia using heavy machine-gun weapons. As a result, the **NEW HOLLAND** engineering vehicle bearing military number **H175QQ** was rendered partially unusable.

The protocol dated **9 August 2021** on the inspection of the scene established that the scene was combat position No. **5**, where the 3rd battalion of Military Unit No. "N" of the Ministry of Defense was located in **Yellija** village, **Kalbajar District**. The road leading to the 3rd battalion of that military unit was a dirt and stone road. Combat position No. **5** was an area with earthen cover, grass, and stones. Combat position No. **5**, where the 3rd battalion of Military Unit No. **191**was located, was situated at an altitude of **2,613 meters**. At that combat position there was **one** white field tent measuring **3 x 4.2 meters** and **2.3 meters** in height. To the north-east of the tent—

Page 771

—at a distance of **700 meters** behind it, there was a position of Armenian armed formations. The position of the Armenian armed formations was located in a rocky area at an altitude of **2,700 meters**. To the north-west of the tent, **2 meters** in front of it, a shelter had been constructed, and it was located at a distance of **50 meters** from the position of the Armenian armed formations. The engineering vehicle, an excavator, began to be fired upon with heavy-caliber weapons from the positions of Armenian armed formations located **700 meters** away in the north-eastern direction; as a result of fire opened in those directions, the shells fired struck the vehicle in various places and damaged it. In order to protect himself from the fire

opened by Armenian servicemen, **A. Tamjidi** took shelter in a trench he had previously dug, located **2 meters** behind the north-eastern rear part of the tent erected at combat position No. **5**, where the 3rd battalion was located, and waited because the weather was foggy. After the firing stopped, when **A. Tamjidi** inspected the vehicle, he saw that as a result of the firing, the right, left, and rear windows of the **NEW HOLLAND** engineering vehicle bearing military number **H175QQ** had been broken; the right side of the working arm, the cylinder on the right side of that arm, and the iron oil pipe of the cylinder on the left side had been punctured; the fuel tank had been punctured in **2** places; the radiator probe hose, the oil-level dipstick, and the engine oil-filler cap had been broken.

The protocol dated **9 August 2021** on the inspection of the scene established that the right, left, and rear windows of the **NEW HOLLAND** engineering vehicle bearing military number **H175QQ** had been broken; the right side of the working arm, the cylinder on the right side of that arm, and the iron oil pipe of the cylinder on the left side had been punctured; the fuel tank had been punctured in **2** places; the radiator probe hose, the oil-level dipstick, and the engine oil-filler cap had been broken. Some of the damage caused to the **NEW HOLLAND** engineering vehicle bearing military number **H175QQ** had been repaired, and the vehicle was currently in working condition.

According to the protocol dated **26 April 2023** on the inspection of the scene, it was established that **Khazar Taryel oglu Babashov**, born on **11 March 1990**, a driver of the **International Eurasia Press Fund**, which was carrying out mine-clearance work in the territories liberated from occupation within the territory of the Republic of Azerbaijan, and a resident of **Shukurbeyli** village, **Fuzuli District**, on **26 April 2023**, at around **09:00**, in **Sugovushan** village, **Tartar District**, in a bushy area on hilly terrain near the **12th kilometer** of the **Seyidimli–Sugovushan** motor road, stepped on one of the mines previously and deliberately planted by Armenian servicemen during the occupation period and sustained bodily injuries as a result of the explosion.

It was established in court that on **16 August 2021**, at **20:50**, servicemen of the 4th battalion of Military Unit No. **191** of the Ministry of Defense, deployed in the territory of **Kalbajar District** — soldiers **Abdulaziz Elshad oglu Abdullayev** and **Khayal Mikayil oglu Muradov** — while serving at the combat position conditionally called **“Goycha 5”**, were fired upon by unknown servicemen of the Armed Forces of Armenia from their positions in the territory of **Zarkand** village, **Basarkechar District**, using small arms and heavy-caliber weapons, with national hatred and hostile intent. As a result, soldier **A.E. Abdullayev** sustained injuries classified as **minor harm to health**, causing short-term impairment of health — “blind shrapnel wounds of the right temple area and the right half of the chest, blind shrapnel wounds of the upper one-third of the right upper arm, and foreign bodies in the soft tissues”; and soldier **Kh.M. Muradov** sustained injuries classified as **minor harm to health**, causing short-term impairment of health — “a blind shrapnel wound of the dorsal surface of the left hand and a foreign body in the soft tissues.”

According to the protocol dated **18 August 2021** on the inspection of the scene, the scene was the combat position called **“Goycha 5”**, located in the territory of **Zar** village, **Kalbajar**

District, belonging to deployed Military Unit No. “N” of the Ministry of Defense of the Republic of Azerbaijan.

According to the protocol dated **26 August 2021** on the inspection of the scene, the scene was the territory of the **3rd border combat point** of the **8th border outpost** of the **3rd border commandant’s office** of Military Unit No. “N” of the State Border Service, located in the territory of **Chayzami** village, **Gubadli District**.

Page 772

According to the protocol dated **26 August 2021** on the inspection of clothing, there was damage and stains resembling blood on the tunic worn by **R.N. Shiraliyev**; stains resembling blood were found on military-type trousers; and damage and stains were found on a military field-type assault vest.

It was established in court that Sergeant **Nicat Yalchin oglu Khalilov**, a serviceman of Military Unit No. “N”, on **10 July 2021**, at around **09:00**, while dismantling wooden structures in the trench of an Armenian post located in the territory of **Alikhanli** village, **Fuzuli District**, on the basis of an assignment given by the command of the military unit, stepped on an anti-personnel mine buried in the ground by unknown members of Armenian armed formations. As a result, he sustained injuries classified as **serious harm to health** — “traumatic avulsion of the left lower leg at the lower one-third level, extensive destruction of muscles with tissue defect, extensive wounds with tissue defect on the anterior surface of the right lower limb, wounds with soft-tissue defect of the first finger, palmar surface, and fingers of the right hand, and third-degree traumatic-hemorrhagic shock” — and was evacuated to Military Hospital No. “N”.

It was established by the protocol dated **10 July 2021** on the inspection of the scene that the scene was the **“Goyarchin”**combat post located in an excavated trench in a flat area in **Alikhanli** village, **Fuzuli District**, belonging to Military Unit No. “N”. Directly to the north of the said open area, there was a soldiers’ barracks, previously used as soldiers’ quarters, and a shade structure built adjoining the barracks. The barracks was built of cut stone and covered with slate. The shade structure attached to the front wall of the soldiers’ barracks was **5.1 meters** long, **2.9 meters** wide, and **2.2 meters** high. One side of the shade structure was fixed on iron posts buried in the ground in the front, and the other side was fixed onto the front wall of the soldiers’ barracks. The top, left, right, and front sides of the shade structure were covered with iron slate. An open area was left on the front side of the shade structure for entry into the barracks. No item, object, trace, or mark of significance to the case was found or seized in the soldiers’ barracks. When standing opposite the squad’s soldiers’ barracks, the communication trench leading to the firing position behind the barracks began from the right side of the barracks, from the right corner of the shade structure adjoining the barracks.

It was established in court that on **18 September 2021**, at around **18:05**, the Armed Forces of Armenia opened fire with heavy- and small-caliber weapons, violating the ceasefire. At that time, soldier **Valeh Mali oglu Hasanov** went to the **KPVT** position of the **“Mil-1”** post with

a machine-gun weapon in order to suppress the fire. At that moment, fire was opened in that direction with a heavy-caliber weapon from the direction of the Armenian positions. One of the bullets fired pierced through the turret part of the **KPVT** position, and the shrapnel part of the bullet struck soldier **V. Hasanov** in the left forehead area, causing him injury.

According to the protocol dated **19 September 2021** on the inspection, the place at the combat position of Military Unit No. "N" where **Valeh Mali oglu Hasanov** sustained injury was inspected.

It was established that on **29 July 2021**, at around **07:00**, servicemen of Military Unit No. "N" of the Ministry of Defense — Warrant Officer **Nazir Vidadi oglu Jalilov**, Sergeant **Arif Yanvar oglu Abbasov**, Junior Sergeant **Yusif Arif oglu Alizade**, and soldiers **Ali Ilham oglu Mikanayev**, **Vusal Tahir oglu Gurbanov**, and **Mirsaleh Mail oglu Heydarzade**— while travelling in a **GAZ-33081** cargo vehicle bearing military registration plate **D107QQ**, belonging to the 2nd battalion of the military unit, in connection with official duties to the combat position of the 4th company of that battalion, conditionally called **"29"**, located approximately **500 meters** from Armenian servicemen in the territory of **Shusha** city, were fired upon with firearms by unknown members of Armenian armed formations. As a result of the fire, the vehicle window on the side where the vehicle commander, Warrant Officer **Nazir Vidadi oglu Jalilov**, was seated was broken; the lower and upper parts of the vehicle's right wing, as well as the left side of the front protective bumper, were damaged. At that time, while the vehicle was moving, Warrant Officer **Nazir Jalilov** opened the door and threw himself to the ground, sustaining bodily injuries whose degree was not determined — "sprain of the ligaments of the left radiocarpal joint, soft-tissue contusion, and an abrasion wound of the right knee area."

On **28 September 2021**, the **GAZ-33081** vehicle bearing military registration plate **D107QQ** was inspected. During the inspection, when the vehicle engine was started—

Page 773

—damage marks measuring **1 x 1 centimeter** were found on the lower part of the vehicle's right wing; damage marks measuring **1 x 1 centimeter** were found on the upper part of the right wing; and damage marks measuring **2 x 1.8 centimeters** were found on the bumper. Participant **Nazir Jalilov** stated that those damages had been caused as a result of fire opened on **29 July 2021** by members of Armenian armed formations, and that the vehicle's right-side window had also been broken.

It was established in court that on **14 October 2021**, at **18:15**, in the direction opposite combat position No. **15** of the 2nd battalion of Military Unit No. "N", located in the territory of **Gulabli** village, **Aghdam District**, at a distance of approximately **400 meters**, in a relatively elevated area situated in the territory of **Khojavend District**, unidentified members of illegal Armenian armed formations opened numerous shots from firearms of various calibres with the intent to intentionally kill two or more persons. At that time, soldier **Afgan Bahman oglu Hamzayev**, assistant rifleman-grenade launcher of the 3rd squad of the 1st

platoon of the 5th company of the battalion, entered the tent intended for soldiers to sleep in, located within the position area, and was reporting the ceasefire violation to the battalion support point by means of communication when, as a result of fire opened by unidentified members of illegal Armenian armed formations in the direction of the combat position, he sustained an injury to the head area with the initial diagnosis of **"one through-and-through bullet wound of the head accompanied by destruction of the skull bones, destruction of the brain, and acute bleeding."** While being evacuated to the medical point because of the injury he had sustained, he died on the way.

According to the protocol dated **15 October 2021** on the inspection of the scene, it was established that, at position No. **15** of the 5th company of the 2nd battalion of Military Unit No. "N", located in the territory of **Gulabli** village, **Aghdam District**, in a tent situated in the observation sector on the left side of the road leading to the position, with stones placed in metal boxes at the rear and front, the personnel of the 2nd battalion and soldier **Afgan Bahman oglu Hamzayev** had been present. While he was in the tent, he died from an injury to the head area sustained as a result of fire opened by Armenian servicemen.

Senior Lieutenant **Davud Aliyev**, who participated in the inspection, stated that at the time of the incident soldier **A. Hamzayev** had been sitting on the first level of an additional two-level bed leaning against the right wall and transmitting information to the battalion support point by means of underground communication when he sustained injury as a result of fire opened by Armenian servicemen and fell in the direction of the bed near the right wall of the dormitory.

During inspection of the floor of the dormitory, at a distance of **323 centimeters** from the left wall and **234 centimeters** from the rear wall toward the front, stains resembling blood, irregular in form and flowing, were found on an area of the floor measuring **30 x 250 centimeters**. On the upper part of the stove, **6 centimeters** from front to rear and **1.5 centimeters** from right to left, one impact mark **1.2 centimeters** long and **0.4 centimeters** wide, shiny in appearance and **2 centimeters** deep, was observed. On the rear wall, at a distance of **155 centimeters** from the right wall toward the left wall and **109 centimeters** above the floor, a damage mark measuring **1 x 0.2 centimeters** was observed. On the outside of the tent, **190 centimeters** above the ground and at a distance of **91 centimeters** from front to rear, one damage mark measuring **0.5 x 0.5 centimeters** was recorded.

It was established in court that on **13 October 2021**, at around **14:20**, a convoy of vehicles moving from **Sugovushan** settlement, **Tartar District**, toward **Kalbajar District** along the **Aghdara–Kalbajar** route, accompanied by the peacekeeping forces of the **Russian Federation**, came under fire from firearms by unidentified members of Armenian armed formations from the forest belt, approximately **5 kilometers** before **Heyvali** village, **Kalbajar District**, in a forested area, on an uphill and winding section of the road where the vehicles were moving at low speed. As a result, **3** through-and-through firearm damages were caused to a **Niva-21214** passenger vehicle with military registration plate **M839QQ**, belonging to the **Barda Garrison Military Police Department**, in which Junior Sergeant **Beylar Etibar oglu Shabanov**, commander of the vehicle squad of the traffic controllers

platoon of the military police company of the Barda Garrison Military Police Department, and Warrant Officer **Jabbar Rasim oglu Jabbarzade**, senior instructor of the military automobile inspectorate of that department, were travelling.

Page 774

On **18 October 2021**, in **Kalbajar** city, in front of the administrative building of the military prosecutor's office, a white **VAZ-21214** vehicle with military registration plate **M839QQ**, bearing the inscription **"Military Automobile Inspectorate,"** was inspected. **10** damage marks were observed on the vehicle. Apart from those noted, no other damage or damages were found on the external surface of the vehicle or in the cabin.

It was established in court that on **30 September 2021**, at around **00:30**, Warrant Officer **Afar Mahir oglu Huseynov**, serving in a technical position in the material-technical support platoon of the 1st battalion of Military Unit No. "N" of the Ministry of Defense, while driving a **KamAZ-43114** cargo vehicle with military registration plate **D553QQ** along a supply road in the territory of **Marzili** village, **Aghdam District**, lost control of the vehicle, as a result of which the cargo vehicle left the road and struck an anti-tank mine planted by Armenian armed formations. As a result, Warrant Officer **Afar Huseynov** sustained injuries described as **"closed displaced fracture of the left heel bone and blunt trauma of the chest."** The passengers in the cargo vehicle also sustained injuries: soldier **Yusif Shahmali oglu Abdullayev**, serving as driver of the vehicle squad of the material-technical support platoon of the 1st battalion, sustained **"superficial scratched wounds of the parietal area and forehead"**; soldier **Rashad Rahim oglu Haziyev**, serving as driver of the 1st platoon of the 1st company of the 1st battalion, sustained **"a crushed-scratched wound of the sole accompanied by an open, shrapnel, displaced fracture of the left heel bone"**; soldier **Adam Nail oglu Aliyev**, serving as rifleman and crew member of the 2nd squad of that platoon, sustained **"abrasion wounds of the nose and left infraorbital area"**; and soldier **Kanan Bahlul oglu Ahadov**, serving as grenade launcher of that squad, sustained **"contused wounds of the left heel, left sole, and parietal areas, contusion of the soft tissues of the right and left shoulder girdles and the left half of the chest."**

According to the protocol dated **17 November 2021** on the inspection of the vehicle, the vehicle was a **KamAZ-43114**cargo vehicle belonging to the 1st battalion of Military Unit No. "N" of the Ministry of Defense. The cargo vehicle bore military registration plate **D553QQ**. The cargo vehicle was kept in the vehicle park of Military Unit No. **161**. The left side of the cargo vehicle's cabin was deformed as a result of the impact. Head of vehicle service **Anar Jafarov**, presenting the cargo vehicle, stated that the said vehicle had become unusable as a result of striking a mine planted by the Armenian side. The inspection was thereby completed. During the inspection, no item or object that could be of significance to the case was found.

It was established in court that on **16 November 2021**, at around **11:00**, servicemen of the armed formations of Armenia, with the aim of blocking the supply roads leading to the

combat positions of the Ministry of Defense located in the area called the **“4th district”** in **Lachin District**, seizing position No. **42** and other combat positions in that area, and intentionally killing, on the grounds of national hatred and enmity, the servicemen of the Armed Forces serving there, carried out an attack operation using firearms and artillery of various calibres until **18:45** that day.

While repelling that Armenian attack operation, among the servicemen of the Ministry of Defense serving in that area, Lieutenant **Umud Oruj oglu Niftaliyev** and Warrant Officer **Orkhan Hatam oglu Jabbarov** of Military Unit No. “N” died on the battlefield from serious bodily injuries they had sustained. Long-term active-duty servicemen Junior Sergeant **Elchin Rovshan oglu Aliyev** sustained **“a through-and-through bullet wound of the left thigh, shrapnel wounds of the back, waist, and eyebrow areas”**; Junior Sergeant **Vugar Jahangir oglu Jahangirov** sustained **“shrapnel wounds of the facial area of the head and the right half of the chest”**; soldier **Gabil Yagub oglu Ibrahimov** sustained **“blast trauma”**; compulsory active-duty servicemen soldier **Amil Vahid oglu Mammadov** sustained **“craniocerebral trauma”**; soldier **Murad Aghagul oglu Guliyev** sustained—

Page 775

—**“a shrapnel wound of the head area and side”**; **Nurlan Mirsamad oglu Karimli** sustained **“blast trauma, barotrauma, closed craniocerebral trauma”**; Junior Sergeant **Ragib Teyyub oglu Mirzayev** sustained **“blast trauma, barotrauma, shrapnel wounds of the anterior abdominal wall”**; Senior Lieutenant **Hamid Zehin oglu Shabanli**, **Royal Tayyar oglu Huseynov**, and soldier **Nadir Azar oglu Amirov** sustained shrapnel wounds to various parts of the body.

In addition, among servicemen of Military Unit No. “N”, compulsory active-duty soldiers **Elchin Marifat oglu Aghayev**and **Murad Galib oglu Khalilov** died on the battlefield. Lieutenant **Etibar Yasin oglu Aliguliyev** sustained **“a shrapnel wound penetrating through the ankle part of the right foot”**; Medical Service Lieutenant **Muzaffar Eldar oglu Jafarov** sustained **“a bullet wound penetrating through the kneecap of the right foot”**; soldier **Murad Bakhtiyar oglu Gulaliyev** sustained **“craniocerebral trauma”**; soldier **Eltaj Bayram oglu Hasanov** sustained **“shrapnel wounds of both legs”**; **Ali Elnur oglu Mammadzade** sustained **“a bullet wound of the foot”**; Junior Sergeant **Ramin Zohrab oglu Jafarov** sustained **“blast trauma, barotrauma, closed craniocerebral trauma”**; Captain **Gafur Jamaladdin oglu Hasanov** and soldier **Murad Tahir oglu Naghiyev** sustained shrapnel injuries to various parts of the body.

Furthermore, among servicemen of Military Unit No. “N”, Junior Warrant Officer **Elchin Zaur oglu Hasanov** sustained **“craniocerebral trauma”**; soldier **Sanan Famil oglu Farzaliyev** sustained **“shrapnel wounds of the left hand and parietal area”**; soldier **Ravan Vilayat oglu Tahmazov** sustained **“shrapnel wounds of the right lower leg, left knee, both upper limbs, and the head and facial areas”**; soldier **Rahim Sadraddin oglu Shahverdiyev** sustained **“a shrapnel wound of the fourth finger of the right hand”**;

soldier **Huseyn Rovshan oglu Mehdizade** sustained **"craniocerebral trauma"**; Junior Warrant Officer **Kamran Eyvaz oglu Kazimov**, soldier **Hasan Ibrahim oglu Aliyev**, and Junior Warrant Officer **Gulu Isakhan oglu Guliyev** sustained **"shrapnel wounds of various parts of the body."**

In addition, among servicemen of Military Unit No. "N", soldiers **Elchin Ramil oglu Aliyev** and **Elmin Samir oglu Alizade** died on the battlefield. Senior Lieutenant **Sakhavat Yagub oglu Abbasov** sustained **"shrapnel wounds of the left hand and left chest"**; Warrant Officer **Natiq Abdulla oglu Nuriyev** sustained **"a shrapnel wound to the heart area"**; soldier **Samir Rasil oglu Taharov** sustained **"a shrapnel wound in the back area"**; soldier **Eljan Elman oglu Taghiyev** sustained **"a bullet wound of the kneecap of the left foot"**; soldier **Gabil Habil oglu Yusifov** sustained **"a shrapnel wound of the lower limb"**; and soldier **Oruc Nabi oglu Huseynov** sustained **"shrapnel wounds of the toes of the right foot and the right rib."**

Among servicemen of Military Unit No. "N", Senior Lieutenant **Tural Nariman oglu Khalilov** sustained **craniocerebral trauma**; Junior Warrant Officer **Tabriz Isa oglu Mamizade** sustained **"a bullet wound of the right lower leg"**; soldier **Hikmat Elman oglu Abdullayev** sustained **"shrapnel wounds in the knee area of the left foot and the finger area of the right hand"**; soldier **Sakhavat Rizvan oglu Aliyev** sustained **"a shrapnel wound of the right hand"**; soldier **Roman Ramiz oglu Teyyubzade** sustained **"shrapnel wounds of the left arm and facial area"**; Sergeant **Iskandar Nizami oglu Adigozalov** sustained **"shrapnel wounds of the knee area of the right foot and the posterior part of the right shoulder"**; soldier **Elsevar Elkhan oglu Gadirov** sustained **"craniocerebral trauma and foot sprain"**; Junior Sergeant **Namik Natiq oglu Alizade** sustained **"craniocerebral trauma"**; **Kanan Ramiz oglu Teyyublu** sustained **"blast trauma, a large-volume lacerated-destroyed wound of the left forearm with soft-tissue defect, accompanied by injury to the left radial artery"**; Warrant Officer **Eldaniz Abil oglu Mahmudov** sustained **"blast trauma, barotrauma, closed craniocerebral trauma"**; and soldiers **Elgun Nazim oglu Mammadli** and **Mazahir Alim oglu Akhundov** sustained shrapnel injuries to various parts of the body.

Among servicemen of Military Unit No. "N", soldier **Markaz Jahid oglu Sadigov** sustained **"craniocerebral trauma."**Among servicemen of Military Unit No. "N", soldier **Aslan Shahuseyn oglu Aslanov** sustained **"a blind shrapnel wound of the outer surface of the middle one-third of the right thigh,"** and Junior Sergeant **Elmar Eldar oglu Alishanov** sustained **"blast trauma and a blind shrapnel wound of the soft tissues of the right forearm."** They were immediately evacuated to the medical point and hospital and survived because timely medical assistance was provided.

In addition, as a result of the incident, **2** APCs belonging to Military Unit No. "N" burned, **1** APC and **1 SandCat** vehicle were damaged, and **1 KamAZ** cargo vehicle belonging to Military Unit No. "N" burned.

Thus, during the attack operation carried out by servicemen of the armed formations of Armenia using firearms and artillery of various calibres for the purpose of seizing the combat positions of the Ministry of Defense located in the area called the **“4th district”** of **Lachin District**, and with the intent to intentionally kill, on the grounds of national hatred and enmity, the servicemen serving there, **6** servicemen of our Armed Forces serving in that area were intentionally killed, and an attempt was made to intentionally kill other servicemen.

According to the protocol dated **18 November 2021** on the inspection of items and objects, the following items from the body of **Umud Oruj oglu Niftaliyev** were inspected: trousers of a military field uniform set, soldier’s trousers, light-gray warm under-trousers, black underwear, **2** military-type field-uniform jackets, a camouflage-type military field-uniform tunic, beige—

Page 776

—beige military field-uniform long-sleeved warm undershirt, light-gray long-sleeved warm undershirt, black undershirt, **1**pair of black long military boots, **1** pair of black long socks, **1** pair of black gloves, a name tag, shoulder boards, **2** A4 sheets bearing the inscription **“Certificate No. 933”**, an A4 sheet bearing the inscription **“Certificate”**, an A4-size sheet bearing various persons’ names and numbers, an A4-size sheet bearing the words “mechanized company” and various persons’ names and ranks, **1** A4-size sheet bearing various persons’ ranks, names, and mobile numbers, **2** banknotes of **50 AZN**, **4** banknotes of **20 AZN**, **1** banknote of **10 AZN**, **1** banknote of **5 AZN**, **1** metal coin of **0.5 AZN**, **2** metal coins of **0.2 AZN**, **2** metal coins of **0.1 AZN**, **1** service identity card No. **MN** [redacted] belonging to **Umud Niftaliyev**, **1** birth certificate, a handkerchief, a black wallet, **3** photographs measuring **3 x 4 centimeters**, **1** identity card of the Republic of Azerbaijan, series **AZE No.** [redacted], belonging to **Umud Niftaliyev**, a black wristwatch, a black plastic comb, **4** red medicinal preparations, a pen, **2** pairs of keys, **1** plastic card bearing the inscription **“BakıKart”**, **3 Kapital Bank** plastic cards bearing the inscription **“UMUD NIFTALIYEV,”** and an **International Bank of Azerbaijan** card bearing the inscription **“UMUD NIFTALIYEV.”**

According to the protocol dated **18 November 2021** on the inspection of items and objects, the following items from the body of **Elmin Samir oglu Alizade** were inspected: trousers of a military-type military field-uniform set, beige warm under-trousers, a military-type military field-uniform jacket, **1** beige military field-uniform long-sleeved warm undershirt, **1** black long-sleeved warm undershirt, **1** pair of black long military boots, **1** pair of black long socks, and a military field-type wool cap and scarf.

According to the protocol dated **18 November 2021** on the inspection of items and objects, the following items from the body of **Elchin Marifat oglu Aghayev** were inspected: a military field-uniform jacket, a khaki military field-type sweater, a yellow military field-type short-sleeved undershirt, camouflage-type military field-uniform trousers, yellow military field-type warm under-trousers, a khaki-and-black mask, a khaki military field-type neck

gaiter, **1** pair of black long military boots, **1** pair of black socks, a purple lighter, **1** banknote of **5 manats**, a pocket flashlight, **1** cartridge with the number **6074** engraved on its rear part, **1** empty cartridge case, and **2** training bullets with the numbers **050 15** and **539 87** engraved on their rear parts.

According to the protocol dated **18 November 2021** on the inspection of items and objects, the following items from the body of **Elchin Ramil oglu Aliyev** were inspected: a military field-uniform jacket, a military field-uniform tunic, a khaki military field-type sweater, a yellow military field-type long-sleeved undershirt, camouflage-type military field-uniform trousers, yellow military field-type warm under-trousers, black underwear, **1** pair of black long military boots, **1** pair of black socks, black gloves, **1 Samsung** smartphone-type telephone, a wet wipe, a whitish metal **Tissot** wristwatch, a purplish lighter, **1** badge depicting the state flags of Azerbaijan and Turkey, a razor, **3** pieces of sugar wrapped in paper, and **2** grayish metal particles/fragments measuring **3 x 1 centimeters** and **1 x 1 centimeter**.

According to the protocol dated **18 November 2021** on the inspection of items and objects, the following items from the body of **Orkhan Hatam oglu Jabbarov** were inspected: **1** pair of trousers from a military-type military field-uniform set, beige warm under-trousers, underwear, a military-type military field-uniform tunic, a beige military field-uniform long-sleeved warm undershirt, a beige long-sleeved warm undershirt, a black undershirt, colored long military boots, **1** pair of black long socks, identity card No. **AA**[redacted] and driving licence No. **AE**[redacted] belonging to **Orkhan Jabbarov**, **5 Kapital Bank** plastic cards bearing the inscription **"ORXAN CABBAROV,"** and **1** black earphone.

According to the protocol dated **18 November 2021** on the inspection of items and objects, the following items from the body of **Murad Galib oglu Khalilov** were inspected: **1** military field-uniform jacket, **1** khaki military field-type sweater, **1** yellow military field-type long-sleeved undershirt, **1** black long-sleeved undershirt, a white civilian undershirt—

—trousers, **1** pair of black long military boots, **2** pairs of black socks, black civilian underwear, a dark greenish cap, a black pocket notebook, a black pen, a handmade necklace made from a cartridge and cartridge case, and **2** grayish metal particles/fragments measuring **1.5 x 0.5 centimeters** and **2.5 x 1.8 centimeters** were inspected.

According to the protocol dated **18 November 2021** on the inspection of items and objects, **1 AK-74** weapon bearing the inscription **1967 LD1186** and **1 machine gun** bearing the inscription **NCB383 1973** were inspected.

According to the protocol dated **18 November 2021** on the inspection of items and objects, **1 AKM** automatic weapon bearing the figures and letters **"1968"** and **"MIU2214"**, **2** automatic-weapon magazines, and **60** cartridge cases were inspected.

It was established in court that, on **16 November 2021**, at around **16:00**, the Armed Forces of Armenia concentrated additional manpower, military and special equipment at border-combat positions located in the territories of **Basarkechar** and **Garakilsa** districts and, using firearms of various calibres, grenade launchers, and artillery, carried out a sudden attack on combat positions located in the territory of **Kalbajar District**, for the purpose of intentionally killing servicemen of the Armed Forces of the Republic of Azerbaijan on the grounds of national hatred and enmity. As a result, Junior Sergeant **Natiq Yusif oglu Aliyev**, a long-term active-duty serviceman of Military Unit No. "N" of the Ministry of Defense, died at the scene from injuries sustained; servicemen of that military unit — Senior Lieutenant **Ulfat Rahim oglu Humbatov** and soldier **Kamran Elshad oglu Hasanov**; Lieutenant **Sahil Sahibkhan oglu Musali**, officer of Military Unit No. "N"; long-term active-duty servicemen, soldiers **Farhad Farrukh oglu Guliyev** and **Tural Gahraman oglu Isgandarov**; soldier **Elmar Eldar oglu Alishanov**, a long-term active-duty serviceman of Military Unit No. "N"; and others sustained bodily injuries of varying degrees.

According to the protocol dated **18 November 2021** on seizure, in criminal case No. **25D/50503**, Lieutenant Colonel **Zaur Alamdar oglu Avdiyev**, head of the Rocket-Artillery Weapons Service of the Military Police Department of the Ministry of Defense, presented at the administrative building of the **Republic Military Prosecutor's Office 4 AKM**automatic weapons, calibre **7.62 millimeters**, numbered **BE 7909**, **SL 1794**, **KV 265**, and **MS 404**, and those weapons were seized.

According to the protocol dated **18 November 2021** on the inspection of a weapon, **1 AKM** automatic weapon, No. **BE7009**, was inspected in the administrative building of the Investigation Department of the **Military Prosecutor's Office of the Republic of Azerbaijan**. The inspected **AKM** automatic weapon had the figures and letters **"1974"** and **"BE7009"** engraved on it. The length of the weapon was **880 millimeters**, the length of the barrel was **415 millimeters**, and the internal diameter of the barrel was **7.62 millimeters**. There was a yellow sling on the weapon. No stains resembling blood or other stains were observed on the weapon. Its safety catch was engaged, it had no cartridge magazine, and the cartridge chamber was empty. A white piece of paper bearing writing in the Armenian alphabet was attached to it.

According to the protocol dated **18 November 2021** on the inspection of weapons, the presented **3 AK-74** automatic weapons and **3** automatic-weapon magazines, each containing **30 cartridges** of **5.45-millimeter** calibre, were inspected. Before the inspection, the automatic weapons and the automatic-weapon magazines were conditionally marked with the numbers **1, 2, and 3**. The surface and sling of the **AK-74** automatic weapon were dirty; as a result of use, the bluing on the surface of the weapon had been rubbed off and small scratches had appeared. The safety catch of the weapon was in the engaged position; there was no magazine on it. Apart from the weapon's cleaning rod, its other components, as well as its sling, were in place. The stock, the upper part of the gas tube, and the lower part were made of wood, while the grip was made of rubber material. On the side of the weapon, the figures **"1962 1794"** were engraved by factory method. The metal parts of the weapon were slightly

rusted. No stains resembling blood, or any other visible damage or trace, were found on the weapon or its sling. A white piece of paper was attached to the lower part of the weapon's gas tube, and the number **18** was written on that piece of paper.

Page 778

According to the protocol dated **18 November 2021** on the inspection of a weapon, weapons belonging to servicemen of Armenian armed formations during their commission of sabotage were inspected. On the inspected **1 AK-74** weapon, the inscription **1965 MC404** was engraved. The length of the weapon was **880 millimeters**, the length of the barrel was **415 millimeters**, and the internal diameter of the barrel was **7.62 millimeters**. There was a yellow sling on the weapon. No stains resembling blood or other stains were observed on the weapon. Its safety catch was engaged, it had no cartridge magazine, and the cartridge chamber was empty. Words in the Armenian alphabet were written on it.

It was established in court that on **19 November 2021**, at **14:15**, **Nadir Badir oglu Seyidov**, a driver working under contract at Road-Transport Department No. **1** of **"Azeravtoyol" Open Joint Stock Company**, was opening a supply road from the **4th border combat point** of the **30th border outpost** of the **8th border commandant's office** of Military Unit No. "N" of the **State Border Service**, located in **Zangilan District**, to the **5th border combat point**, using a tracked excavator **EK-230-06**, state registration plate **10901**, driven by him. When the bucket of that equipment struck an anti-tank mine buried on that road by unknown members of Armenian armed formations, the following persons nearby sustained injuries and were evacuated to Military Hospital No. "N": Junior Warrant Officer **Renad Murad oglu Aghabalayev**, commander of the engineering-support group of the protection and support platoon of the combat-support company of the 8th border commandant's office of Military Unit No. "N" of the State Border Service, who sustained an injury whose degree was not determined — **"a millimetric chopped-puncture wound in the occipital area behind the ear"**; and **Vagif Alizaab oglu Babayev**, operator of the unexploded ordnance operations group (**PHS-ƏQ**) of the **Mine Action Agency of the Republic of Azerbaijan**, who sustained injuries constituting **minor harm to health** — **"closed craniocerebral trauma, brain concussion, shrapnel wounds to the anterior part of the body, the middle one-third areas of the right and left thighs, and multiple shrapnel wounds to the face."**

According to the inspection conducted on **19 January 2021**, it was established that the scene was on the right side of a newly prepared road continuing from the **4th border combat point** of the **25th border outpost** of the **8th border commandant's office** of Military Unit No. "N" of the State Border Service, located near **Bartar** village, **Zangilan District**, in the direction of the **5th border combat position** of that border commandant's office. The said area is located **7–8 kilometers** from **Bartar** village, **Zangilan District**, in the direction of the **Bartar** height. The distance between the right and left shoulders of that road was **4 meters**. Since the road was located on elevated ground, its right side was relatively sloped, and in general it was surrounded by mountainous terrain. It was observed that part of the metal piece attached to the front of **1 tracked excavator EK-230-06** located in the area, namely **2** iron

teeth, had become unusable. It was established that the lower front glass of the cabin of that vehicle was missing and that the front glass was damaged. During the inspection, **1** broken piece of glass, **4** plastic fragments, and **1** metal object were packed and seized in the prescribed manner from the scene.

It was established in court that Junior Warrant Officer **Elgun Elkhan oglu Nazarkhanli**, group commander of the **4th border combat point** of the **30th border outpost** of the **9th border commandant's office** of Military Unit No. "N" of the State Border Service, on **30 September 2021**, at **14:50**, together with soldiers **Murad Musayev**, **Rashad Mammadov**, and **Javidan Hidatov** of that combat point, came to the area surrounding a mined zone at the **1st firing position**, located **80 meters** away, in order to search for firewood for use at the point. There, Junior Warrant Officer **E. Nazarkhanli** entered the mined area alone and, after moving approximately **30 meters** forward, stepped on an anti-personnel mine buried in the ground by unknown members of Armenian armed formations. As a result, he sustained injuries constituting **serious harm to health** — **"complete fragmentation of the bones and soft tissues of the right lower leg; traumatic avulsion of the left ankle joint; fragmentation of the soft tissues of the lower one-third of the lower leg; and fourth-degree traumatic-hemorrhagic shock"** — and was evacuated to Military Hospital No. "N".

According to the protocol dated **1 October 2021** on the inspection of the scene, it was established that the scene was a marked area near the **1st firing position** in the territory of the **4th border combat point** of the **30th border outpost** of the **9th border commandant's office** of Military Unit No. "N" of the State Border Service, in the territory of **Aghband**village, **Zangilan District**—

Page 779

—near the **1st firing position**. Since the area where the explosion occurred was located in a mined area, it was not possible to inspect the direct scene. During the examination, the surroundings of the scene and the signs relating to the mined areas were described in detail.

It was established in court that soldier **Tajaddin Gazanfar oglu Karimov**, commander of the 1st squad of the 2nd engineer platoon of the obstacle-removal company of Military Unit No. "N" of the Ministry of Defense, on **23 November 2021**, at **08:00**, together with **4** other servicemen under the command of Senior Lieutenant **Taleh Dashdamir oglu Mammadov**, began a mine search in **3** directions, each **1.5–2 meters** wide, in the liberated area for the purpose of laying a supply road from the direction of **Talysh** village, **Tartar District**, toward the direction of **Tapgaragoyunlu** village, **Goranboy District**. During the search, after engineering work had been carried out and they had advanced **25 meters**, **59 PMN-E** anti-personnel mines belonging to Armenian armed formations were found and neutralized. While the search work was continuing, at **12:30**, soldier **Tajaddin Karimov** stepped on an anti-personnel mine buried in the ground by unknown members of Armenian armed formations. As a result, he sustained injuries constituting **less serious harm to health** and was evacuated to Military Hospital No. "N".

According to the protocol dated **23 November 2021** on the inspection of the scene, it was established that the scene was an area in the direction from **Talysh** village, **Tartar District**, toward **Tapgaragoyunlu** village, **Goranboy District**, conditionally called **"Aghachug."** That area had been liberated from occupation by Armenian armed formations during the 44-day Patriotic War. The relief of the scene was mountainous and hilly, and the landscape consisted of grass, low shrubs, and trees. At the scene, numerous pieces of iron wire and iron fragments, neutralized mine holes and signs relating to them, as well as neutralized **PMN-E** mines gathered to the side, were observed. At the scene, a crater formed by the effect of the exploded mine, and, at distances of **112–189 centimeters** from it, a black sock, the left boot of a black boot, and a deformed metal piece were found, packed in the prescribed manner, and attached to the protocol.

It was established in court that **Elshan Yagub oglu Rustamov**, while serving as a long-term active-duty serviceman with the rank of Junior Sergeant, as mechanic-driver of the 2nd tank of the 2nd tank company of the 1st tank battalion of Military Unit No. "N" of the Ministry of Defense, on **15 December 2021**, at around **12:00**, while carrying out mine-search and clearance operations around the **Horadiz–Jabrayil** main road as part of the **Mine Action Agency of the Republic of Azerbaijan**, using a **T-72 M-I** tank with turret number **256**, stepped, with that tank, on an anti-tank mine buried by unknown members of Armenian armed formations on the left side of the **Horadiz–Jabrayil** main road in the territory of **Jabrayil District**. As a result, he sustained injuries constituting **minor harm to health** — **"hematoma of the left thigh and left heel areas, closed craniocerebral trauma resulting in brain concussion"** — and was evacuated to Military Hospital No. "N".

On **16 December 2021**, the scene was inspected in connection with the mine strike of the tank with turret number **256** belonging to Military Unit No. "N", seconded to the **Mine Action Agency of the Republic of Azerbaijan**, on the left edge of the **Jabrayil–Horadiz** main road. Since no fragments of the exploded anti-tank mine were found in that area, it was presumed to have been a **TM-62 P3** anti-tank mine made of plastic material. As a result of the explosion of that mine, a crater formed beneath the tank. The crater was **2.5 meters** wide, **3.6 meters** long, and **45 centimeters** deep. From the scene, **3** metal objects that had been fragmented and torn off as a result of the anti-tank mine explosion were seized as material evidence.

According to the protocol dated **10 February 2022** on the inspection of the scene and vehicle, the scene was the territory of **Garabulag** village, **Khojaly District**. **Surkhay Aliyev**, who participated in the inspection, stated that the incident had occurred **6 meters** from a building whose length was **10 meters** and width **6 meters**, and whose roof covering had been partially dismantled, toward the road. During the inspection of the scene, no items or objects of significance to the case were found.

In addition, a **MAZ 5316085** vehicle with military registration plate **D164QQ** was inspected. During the inspection, there were no traces of breakage or cracks in the windows of the cabin; there were **2** tires on the front and rear parts of the vehicle. Inspection participant **S. Aliyev** stated that on **13 December 2020**, at around **16:00**, **Sabuhi Rahimov** had sustained injury in the territory of **Garabulag** village, **Khojaly District**, as a result of fire opened by Armenian armed formations while he was loading firewood into the body of that vehicle. He also stated that at that time **S. Rahimov** was standing on the firewood loaded into the body and arranging the firewood, and that the body of the vehicle was not covered with a tarpaulin at that time. During the inspection of the vehicle, no damage marks or bullet fragments resulting from gunfire were found. Nothing of significance to the case was found in the cabin or body of the vehicle. No other circumstances of significance to the case were discovered during the inspection.

Servicemen of Military Unit No. "N", Warrant Officer **Nemat Mirza oglu Mammadov** and soldier **Shohrat Arif oglu Aslanov**, on **1 June 2021**, at around **13:00**, while carrying out a mine-clearance operation in the territory of **Sarijali** village, **Aghdam District**, with a **T-72** tank bearing turret number **239**, were affected when the **KTM-7** mine trawl belonging to the tank struck **2** anti-tank mines buried by unknown members of Armenian armed formations. As a result, tank commander Warrant Officer **N.M. Mammadov** sustained injuries not causing harm to health — **"contusion of the tissues of the crown of the head, back, and waist"**; and the mechanic-driver of the tank, soldier **Sh.A. Aslanov**, sustained injuries not causing harm to health — **"contusion of the soft tissues of the forehead and crown of the head."** They were evacuated to Military Hospital No. "N".

According to the protocol dated **30 November 2021** on the inspection, the scene was located on the left side of the carriageway of the road passing through the occupied territory of **Sarijali** village, **Aghdam District**, parallel to that road and **5.6 meters** away from it. The width of the road passing near the scene was **6 meters**, and the road was asphalted. During the inspection, participant soldier **Shohrat Aslanov** of Military Unit No. "N" stated that on **1 June 2021**, when he was the mechanic-driver of the tank with turret number **239**, he struck an anti-tank mine buried by Armenian servicemen at the indicated place.

On **4 December 2021**, the **T-72** tank trawl was inspected, photographs were taken, and a table was drawn up.

According to the protocol dated **19 December 2021** on the inspection of the scene, the scene was the road in **Lachin District**, in the area conditionally called the **4th district**, where units of the 12th company of the 4th battalion of Military Unit No. "N" of the Ministry of Defense were located, including the road leading from post No. **25** to post No. **27**. There were two roads from post No. **25** to post No. **27**. The first road was the long road, **3 kilometers** in length, used mainly as a vehicle road. The other road was the short road, **1.6 kilometers** in length, but it was dangerous because it was located at a close distance to units belonging to Armenian armed formations.

According to the protocol dated **7 April 2022** on the inspection, the military trousers worn by **Amid Aliverdi oglu Guliyev**, sent from Military Unit No. "N" on **27 March 2022**, were torn and had stains resembling blood on them; the under-trousers had stains resembling blood on them; and there were no stains resembling blood or damage on the tunic, jacket, undershirt, T-shirt, or underwear.

It was established in court that **Aykhan Mobil oglu Jamalzade**, commander of the 2nd squad of the 2nd platoon of the engineer-sapper company of Military Unit No. "N", a long-term active-duty serviceman, on **19 April 2022**, at around **13:30**, while serving in the area of combat position **Z1A**, conditionally called **"Arif,"** located in the territory of **Yenikand**village, **Kalbajar District**, stepped on an anti-personnel mine buried in the ground by unknown members of Armenian armed formations. As a result, he sustained injuries constituting **serious harm to health** — **"traumatic amputation of the right lower limb at the level of the middle one-third of the lower leg, accompanied by I–II degree traumatic-hemorrhagic shock, and blind wounds to the soft tissues of the left lower leg"** — and was evacuated to Military Hospital No. **524**.

Page 781

According to the protocol dated **14 May 2022** on conducting an inspection, the military clothing worn by **Aykhan Mobil oglu Jamalzade** was inspected, photographs were taken, and they were attached.

It follows from the certificate dated **19 April 2022** that, because the place where the incident occurred was a mined area and the mines there had not yet been cleared, it was not possible to conduct an inspection.

It was established in court that **Vurgun Idris oglu Abilov**, Major, chief of staff of the 9th border commandant's office of Military Unit No. "N" of the **State Border Service**, on **18 April 2022**, at **10:20**, while moving in the area during the establishment of a new firing position at the 2nd combat border point located in the territory of **Vejnali** village, **Zangilan District**, sustained injuries as a result of stepping on an anti-personnel mine buried in the ground by unknown members of Armenian armed formations.

It follows from the protocol dated **18 April 2022** on the inspection of the scene that the scene was located in the territory of **Vejnali** village, **Zangilan District**, at the 2nd combat point of the 28th border outpost of the 9th border commandant's office of Military Unit No. "N" of the **Gubadli Separate Border Division**. The area is located at an altitude of **1,370 meters** above sea level. The 2nd border combat point faces Armenian positions and has a total of **5** firing positions.

It was established in court that on **17 August 2021**, at around **22:00**, in the territory of **Shusha** city, as a result of fire opened by Armenian armed formations in violation of the ceasefire in the direction of combat position No. **31** of Military Unit No. "N", soldier **Mirsadiq Miragha oglu Mirsadiqov**, who served as a rifleman in the 1st squad of the 2nd

platoon of the 6th company of the 2nd battalion of the military unit, sustained a bodily injury accompanied by a **“wound of the glabellar area”**; since it did not cause harm to health, its degree was not determined.

According to the protocol dated **16 June 2022** on conducting an inspection, the scene was the area in the direction of **Gaybali** village of **Shusha** city where the 3rd squad of the 3rd platoon of the 4th company of the 2nd battalion of Military Unit No. “N” was serving; previously it had been called combat post No. **31**, and at present it is called combat position No. **20**. To reach that area, the **Lachin–Khankendi** road is crossed. Senior Lieutenant **Turan Huseynov**, who participated in the inspection, stated that although at the time of the incident construction and fortification work had not been carried out extensively there, construction and fortification work was currently being carried out at that position; metal baskets filled with earth and stones had been arranged on the side facing the Armenians, and vehicle tires had been placed on top of them. **Turan Huseynov** showed the ravine gap from which they had been fired upon and the place where they themselves had been standing. It was established that the said distance was **26 meters**. When looking from the indicated position toward the ravine gap, Armenian positions were observed at an approximate distance of **1,000 meters** in a straight line.

It was established in court that **Elchin Anvar oglu Zeynalzade**, while serving in compulsory active military service with the rank of soldier as aimer of the 3rd squad of the 2nd platoon of the 7th company of the 3rd battalion of Military Unit No. “N” of the Ministry of Defense, on **24 August 2022**, at around **13:00**, while conducting observation with **BDS111**binoculars at combat position No. **3** of that battalion, located in **Marzili** village, **Aghdam District**, sustained serious harm to health as a result of a laser beam being directed by Armenian armed formations located on the opposite side into his right eye area with the intent to intentionally kill **E. A. Zeynalzade** on the grounds of national hatred and enmity. The injury was accompanied by the diagnoses **“radiation maculopathy of the right eye, resulting in reduction of visual acuity to hand movement, not correctable; visual acuity in the left eye 1.0,”** and caused permanent loss of more than one-third of working capacity.

According to the protocol dated **26 January 2023** on conducting an inspection, evidence of significance to the case was discovered at the place where **Elchin Anvar oglu Zeynalzade** was wounded while serving at post No. **3** of Military Unit No. “N”.

According to the protocol dated **10 September 2022** on inspecting a vehicle, the vehicle was a **KamAZ** vehicle with military registration plate **C897-QQ**. The said vehicle belonged to Military Unit No. “N”. The **KamAZ** vehicle with military registration plate **C897-QQ** belonged to the cargo-transport group of military vehicles. The vehicle was intended for transporting personnel, ammunition, military-technical—

—property, and other military cargo. The cabin and platform tarpaulin of the inspected vehicle were khaki in colour. The vehicle had **3** axles and a **6x6** wheel arrangement. The

vehicle without trailer was **7,366 millimeters** long, **2,500 millimeters** wide, and **2,870 millimeters** high. The width of the vehicle's tires was **30 cm**, and the distance between the right and left wheels was **2 meters 50 centimeters**. The vehicle consisted of **2** parts — cabin and body — and **24** persons could be accommodated on the rear platform. The cabin of the vehicle was metal, three-seat, two-door, and equipped with enhanced heat and sound insulation, ventilation and heating systems, and an adjustable driver's seat.

At the time of the incident, the vehicle was near the **KS-15** combat position located in the territory of **Zeylik** village. On the vehicle's windshield, front section, and also on its left door, there were damage marks caused by bullets fired from the Armenian side. In addition, bullet marks of various sizes caused by fire were observed on the left side door, cabin section, and rear cargo platform of the **KamAZ** vehicle with military registration plate **C897-QQ**. In general, the vehicle was in working condition; the vehicle's engine was operational. At present it is used in the military unit for its intended purpose.

The said **UAZ** vehicle with military registration plate **C916QQ** was a military vehicle. That vehicle belonged to Military Unit No. "N". The **UAZ** vehicle with military registration plate **C916QQ** belonged to the cargo-transport group of military vehicles. The vehicle was intended for transporting personnel, ammunition, military-technical property, and other military cargo. The cabin and platform tarpaulin of the inspected vehicle were khaki in colour. The vehicle had **2** axles and a **4x4** wheel arrangement. The vehicle consisted of **2** parts — cabin and body — and **10** persons could be accommodated on the rear platform. The cabin of the vehicle was metal, three-seat, two-door, and equipped with enhanced heat and sound insulation, ventilation and heating systems, and an adjustable driver's seat. At the time of the incident, the vehicle was near the **KS-15** combat position located in the territory of **Zeylik** village. On the vehicle's front section, and also on its left door, there were damage marks caused by bullets fired by Armenians. In addition, bullet marks of various sizes caused by fire were observed on the left side door, cabin section, rear cargo platform, and rear cover section of the **UAZ** vehicle with military registration plate **C916QQ**. In general, the vehicle was in working condition; the vehicle's engine was operational. At present it is used in the military unit for its intended purpose. Since no item or samples of investigative significance were identified during the inspection, nothing was seized.

According to the protocol dated **27 September 2022** on conducting an inspection, the iron helmet worn on the head of Junior Sergeant **Farhad Nazir oglu Rzayev** on **2 September 2022**, the tunic he was wearing, and the wool sweater worn by **Musa Azar oglu Ahmadov** were inspected, and the following was established.

One tunic was khaki in colour; the length of the tunic from the back was **87 centimeters**, and the length of the sleeves was **52 centimeters**. On the rear part of the tunic, in the neck area, there was damage measuring **0.1 x 0.1 centimeters**. There were places for name tags on the front of the tunic. The military rank of **"Junior Sergeant"** was attached to both sleeves of the tunic. In addition, there was a chevron on the left sleeve with the inscription **"Azerbaijani Army."** The surface of the tunic was clean; no other visible damage was found on the tunic.

The length of one wool sweater from the back was **64 centimeters**, and the length from the front neck section was **46 centimeters**. Damage measuring **1 x 0.5 centimeters** was observed on the upper part of the left sleeve of the sweater. The surface of the sweater was clean. No other visible damage was found on the sweater.

One iron helmet had khaki-coloured military fabric sewn onto it; the diameter of the helmet from the inside was **28 x 25 centimeters**. On the iron helmet, damage marks measuring **3 x 2 centimeters** and **2 x 1.5 centimeters**, presumed to be bullet entry and exit holes, were observed. No other visible damage was found on the iron helmet.

It was established by the protocol dated **2 September 2022** on the inspection of the scene that servicemen of Military Unit No. "N" of the Ministry of Defense — long-term active-duty servicemen Junior Sergeant **Shahin Oktay oglu Muradli**, soldier **Omar Vagif oglu Nasirov**, and compulsory active-duty servicemen soldiers **Khayal Gadir oglu Mammadov**, **Yunus Arif oglu Bakhishov**, **Nariman Adalat oglu Huseynov**, **Gabil Valeh oglu Suleymanov**, **Anar Maharram oglu Muradov**, and **Shahruz Matlab oglu Rustamli**—

Page 783

—while carrying out work, on the basis of the relevant order of the commander of the military unit, to inspect unexploded ordnance and clear minefields in the territory of **Mukhtarkend** village, **Khojaly District**, which had been used by Armenian servicemen during the Patriotic War that lasted from **27 September 2020** to **10 November 2020**, sustained various injuries on **2 September 2022**, at around **13:00**, as a result of the explosion of a cluster-warhead rocket projectile used with the intent to intentionally kill by members, whose identities and exact number were unknown, of illegal armed formations created by Armenian separatists on the grounds of national hatred and enmity.

It was established in court that on **13 August 2022**, as a result of the explosion of a fragmentation combat element of a **300-millimeter 9M55K "Smerch" cluster-warhead rocket projectile**, used during combat operations that lasted from **27 September 2020** to **10 November 2020** but remaining unexploded in the area at that time, with the intent to intentionally kill by members of Armenian armed formations whose identities and exact number were unknown, the servicemen of the military unit who were there sustained injuries: Lieutenant **Ali Chingiz oglu Rahimov** sustained **"a blind shrapnel wound of the anterior surface of the chest penetrating into the cavity, the dorsal surface of the right hand, the right thigh, and the dorsal surface of the right hand; a lacerated-disrupted wound of the right auricle; and right-sided pneumohemothorax"**; long-term active-duty servicemen soldiers **Sahib Soltan oglu Ibrahimov**sustained **"barotrauma"**; **Mahammad Adil oglu Naghizade** sustained **"a fracture of the occipital bone and a through-and-through shrapnel wound of the occipital area"**; **Ibrahim Ilham oglu Ganbarov** sustained **"a blind shrapnel wound of the right temple area"**; **Farzani Yashar oglu Najafzade** sustained **"a blind shrapnel wound penetrating into the abdominal cavity"**; **Mahabbat Tabriz oglu Guliyev** sustained **"contusion of the soft tissues of the buttock area"**; and compulsory

active-duty serviceman soldier **Anar Safar oglu Dadashzade** sustained injuries diagnosed as **"small-sized shrapnel wounds of the face and body areas."** They were immediately evacuated to Hospital No. "N" and also to **Fuzuli District Central Hospital**.

It was established by the protocol on inspection of the scene that the place where the explosion occurred was located on a hill near **Hadrut** settlement, **Khojavend District**, at a distance of **1,310 meters** in a straight line from the headquarters building of Military Unit No. "N" of the Ministry of Defense. At the site of the explosion, charcoal remnants were found, and near the centre of the explosion red tapes, presumed to have been attached to the head section of cluster bombs, were discovered.

in the territory of **Aghdam District** — **9,222 anti-personnel mines**, **6,112 anti-tank mines**, and **10,053 unexploded ordnance items**;
in the territory of **Aghdara District** — **4 anti-personnel mines**, **38 anti-tank mines**, and **932 unexploded ordnance items**;
in the territory of **Jabrayil District** — **4,887 anti-personnel mines**, **2,856 anti-tank mines**, and **10,259 unexploded ordnance items**;
in the territory of **Fuzuli District** — **8,911 anti-personnel mines**, **5,723 anti-tank mines**, and **21,234 unexploded ordnance items**;
in the territory of **Gubadli District** — **835 anti-personnel mines**, **1,504 anti-tank mines**, and **1,304 unexploded ordnance items**;
in the territory of **Tartar District** — **2,409 anti-personnel mines**, **1,507 anti-tank mines**, and **2,525 unexploded ordnance items**;
in the territory of **Khankendi District** — **4,859 anti-personnel mines**, **112 anti-tank mines**, and **172—

—unexploded ordnance items; in the territory of **Khojaly District** — **72 anti-personnel mines**, **1 anti-tank mine**, and **1,886 unexploded ordnance items**; in the territory of **Khojavend District** — **77 anti-personnel mines**, **196 anti-tank mines**, and **7,528 unexploded ordnance items**; in the territory of **Zangilan District** — **925 anti-personnel mines**, **510 anti-tank mines**, and **1,161 unexploded ordnance items**; in the territory of **Tovuz District** — **2 anti-personnel mines**; in the territory of **Kalbajar District** — **1,434 blast-type PMN-2 and PMN-E anti-personnel mines**, of which **50** were manufactured in **Armenia in 2018**, **312** were manufactured in **Armenia in 2019**, and **740** were manufactured in **Armenia in 2021**; **322 Russian-made anti-tank mines** of the **TM-57**, **TM-62P2**, and **TM-62M** types, with unknown dates of manufacture; and **2,131 unexploded ordnance items**; in the territory of **Lachin District** — **2,113 blast-type PMN-2 and PMN-E anti-personnel mines**, of which **1** was manufactured in **Armenia in 2012** and **2,021** were manufactured in **Armenia in 2021**; **43 Russian-made TM-62P2 and TM-62M anti-tank mines**, with unknown dates of manufacture; and **162 unexploded ordnance items**; in the territory of **Shusha District** — **116 blast-type PMN-E anti-personnel mines**, of which **20** were manufactured in **Armenia in 2021**; **13 Russian-made TM-62P2 anti-tank mines**, with unknown dates of manufacture; and **2,445 unexploded ordnance items**; in the territory of **Dashkasan District** — **796 anti-personnel mines**, including **613 Armenian-made PMN-E and PMN-2 blast-type mines manufactured in 2016**, and **5 Armenian-made OZM-72E mines** with unknown dates of manufacture; and **4 Russian-made TM-62M anti-tank mines** with unknown dates of manufacture. In total, **31,964 anti-personnel mines**, **19,110 Russian-made anti-tank mines** of the **TM-62M**, **TM-62P2**, **TM-57**, and **TM-62R** types, and **67,204 unexploded ordnance items** were found and neutralized.

According to the protocol dated **27 September 2022**, on that date an inspection was conducted of the places where **543 PMN-E blast-type anti-personnel mines** and **8 TM-62M anti-tank mines** had been buried in the **Alagollar** area of **Kalbajar District** by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the protocol dated **27 September 2022**, on that date, with the participation of specialist Lieutenant Colonel **Vugar Ahyaddin oglu Azizov**, an inspection was conducted in the **Alagollar** area of **Kalbajar District** of **543 Armenian-made PMN-E blast-type anti-personnel mines** and **8 TM-62M anti-tank mines** which had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the protocol dated **28 September 2022**, on that date an inspection was conducted in the territory of **Keshishkend** village, **Kalbajar District**, at the foot of **Kongur** Mountain, of the places where **52 PMN-E blast-type anti-personnel mines** and **22 TM-62M anti-tank mines** had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the protocol dated **28 September 2022**, on that date, with the participation of specialist Lieutenant Colonel **Vugar Ahyaddin oglu Azizov**, an inspection was conducted in the territory of **Keshishkend** village, **Kalbajar District**, at the foot of **Kongur** Mountain, of **51 PMN-E blast-type anti-personnel mines** and **22 TM-62M anti-tank mines**which had

been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the protocol dated **28 September 2022**, on that date an inspection was conducted of the place where **72 PMN-E anti-personnel mines** had been buried by Armenian servicemen in an area located **2 kilometers south of the Zod deposit** in **Kalbajar District**, in the eastern part of a combat position, at the foot of a mountain, and where those mines had been neutralized by servicemen of the Republic of Azerbaijan, removed, and destroyed by detonation.

According to the protocol dated **28 September 2022**, on that date an inspection was conducted of the place where **50 PMN-E anti-personnel mines** had been buried by Armenian servicemen in an area located **2 kilometers southeast of the Zod deposit** in **Kalbajar District**, on the right edge of the road leading to a combat position, at the foot of a mountain, and where those mines had been neutralized by servicemen of the Republic of Azerbaijan, removed—

Page 794

—and destroyed by detonation.

According to the protocol dated **28 September 2022**, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was conducted in the territory of **Ikinci Ipak** village, **Lachin District**, in the ravine on the left side of the supply road leading to the combat position called **"LM-17"**, located southeast of **Finge** settlement, of **148** out of **168 E-001M anti-personnel mines** which had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the protocol dated **28 September 2022**, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was conducted in the territory of **Ikinci Ipak** village, **Lachin District**, in the ravine on the left side of the supply road leading to the combat position called **"LM-17"**, located northwest of the **Sarybaba** mountain range, of the area where **991 E-001M anti-personnel mines** had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the protocol dated **28 September 2022** on conducting an inspection, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was conducted in the territory of **Ikinci Ipak** village, **Lachin District**, in the ravine on the left side of the supply road leading to the combat position called **"LM-17"**, located southeast of **Finge** settlement, of the area where **168 E-001M anti-personnel mines** had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the protocol dated **28 September 2022** on conducting an inspection, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was

conducted in the territory of **Ikinci Ipak** village, **Lachin District**, in the ravine on the left side of the supply road leading to the combat position called **"LM-17"**, located northwest of the **Sarybaba** mountain range, of **28** out of **100 E-001M blast-type anti-personnel mines** which had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed, as well as of the area where those mines had been buried.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date an inspection was conducted in **Dashkasan District**, at the foot of **Bughdadagh** Mountain, of the area where **8 PMN-2 anti-personnel mines** and **4 TM-62M anti-tank mines** had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

According to the inspection protocol dated 29.09.2022, an inspection was conducted on that date at the site where 8 PMN-2 anti-personnel mines and 4 TM62-M anti-tank mines, which had been buried by Armenian military personnel and neutralized and removed by military personnel of the Republic of Azerbaijan, were found at the foot of Mount Bugdadagh in the Dashkesan region.

According to the inspection protocol dated 09.2022, an inspection was conducted on that date at the site where 6 TM62-M anti-tank mines were discovered, which had been buried by Armenian military personnel and defused and removed by military personnel of the Republic of Azerbaijan, near Bugdadagh Mountain in the Dashkesan region, at the foot of an unnamed hill.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date an inspection was conducted in **Dashkasan District**, near **Bughdadagh** Mountain, at the foot of an unnamed height, of the place where **6 TM-62M anti-tank mines** had been found after being buried by Armenian servicemen and neutralized and removed by servicemen of the Republic of Azerbaijan.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date, with the participation of specialist Lieutenant Colonel **Vugar Ahyaddin oglu Azizov**, an inspection was conducted in **Dashkasan District**, near **Bughdadagh** Mountain, at the foot of an unnamed height, on a dirt communication road, and **500 meters** ahead of that place, on the right and left sides of the road, as well as on the road itself, of a total of **70 TM-62M anti-tank mines** which had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed.

Page 795

According to the protocol dated **29 September 2022** on conducting an inspection, on that date an inspection was conducted in **Dashkasan District**, near **Bughdadagh** Mountain, at the foot of an unnamed height, of the area where **64 TM-62M anti-tank mines** had been buried by Armenian servicemen, neutralized by servicemen of the Republic of Azerbaijan, and removed, including the dirt road and the right and left sides of the road.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was conducted in the territory of **Lachin District**, at the northern foot of **Boyuk Ishigli** Mountain, in the hollow on the right side of the supply road leading to a combat position, of **122 E-001M blast-type anti-personnel mines** which had been buried by Armenian servicemen and neutralized and removed by servicemen of the Republic of Azerbaijan, as well as of that area.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was conducted in the territory of **Lachin District**, at the northern foot of **Boyuk Ishigli** Mountain, in the hollow on the right side of the supply road leading to a combat position, of **99** out of **100 E-001M blast-type anti-personnel mines** which had been buried by Armenian servicemen and neutralized and removed by servicemen of the Republic of Azerbaijan, as well as of that area.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was conducted in the territory of **Lachin District**, at the northern foot of **Boyuk Ishigli** Mountain, in the rocky area on the right and left sides of the supply road leading to a combat position, of **90 E-001M blast-type anti-personnel mines** which had been buried by Armenian servicemen and neutralized and removed by servicemen of the Republic of Azerbaijan, as well as of that area.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date, with the participation of specialist **Murad Mirkazim oglu Kazimov**, an inspection was conducted in the territory of **Lachin District**, at the southwestern foot of **Kichik Ishigli** Mountain, in the rocky area on the left side of the supply road leading to the combat position located in the **Boyuk Ishigli** mountain range, of **89** out of a total of **100 E-001M blast-type anti-personnel mines** which had been buried by Armenian servicemen and neutralized and removed by servicemen of the Republic of Azerbaijan, as well as of that area.

According to the protocol dated **29 September 2022** on conducting an inspection, on that date an inspection was conducted in the territory of **Lachin District**, at the **3rd kilometer** of the **Lachin–Gubadli** motor road, on the left side of the road, in an area that had previously been used as a motor road but was currently not in use, of **3 TM-62P2 anti-tank mines**, as well as of the area where those mines had been found.

According to the protocol dated **6 October 2022** on conducting an inspection, on that date an inspection was conducted in **Dashkasan District**, in the ravine on the right side of **Bughdadagh** Mountain, of the area where **213 PMN G001-M anti-personnel mines**, manufactured in **2016**, had been buried by Armenian servicemen and neutralized and removed by Azerbaijani servicemen.

According to the protocol dated **6 October 2022** on conducting an inspection, on that date an inspection was conducted in **Dashkasan District**, in the ravine on the right side of

Bughdadagh Mountain, of **213 PMN G001-M anti-personnel mines**, manufactured in **2016**, which had been buried by Armenian servicemen and neutralized and removed by Azerbaijani servicemen.

According to the protocol dated **6 October 2022** on conducting an inspection, on that date an inspection was conducted in **Dashkasan District**, in the ravine on the right side of **Bughdadagh** Mountain, of the area where **400 PMN G001-M anti-personnel mines**, manufactured in **2016**, had been buried by Armenian servicemen and, except for **3** of them, all had been neutralized and removed by servicemen of the Republic of Azerbaijan.

Page 796

According to the protocol dated **6 October 2022** on conducting an inspection, on that date an inspection was conducted in **Dashkasan District**, in the ravine on the right side of **Bughdadagh** Mountain, of **400 PMN G001-M anti-personnel mines**, manufactured in **2016**, which had been buried by servicemen of the Armed Forces of Armenia and neutralized and removed by servicemen of Military Unit No. "N".

On **27 December 2022**, investigator of the **Gubadli Military Prosecutor's Office Vural Aghali** inspected the clothing items worn by soldier **Nurullayev Nurali Yusif oglu** at the time of the incident.

It was established in court that soldier **Ismayil Shikhi oglu Malikov**, rifleman of the 3rd squad of the 2nd platoon of the 1st company of the 1st battalion of Military Unit No. "N" of the Ministry of Defense, while at the combat position of the military unit where he served, located in the territory of **Zar** village, **Kalbajar District**, conditionally called **"KCh-24,"**on **10 October 2022**, at around **18:40**, as a result of the explosion of an anti-personnel mine installed by servicemen of the Armed Forces of Armenia, whose identities and exact number were unknown, with national hatred and hostile intent and with the purpose of intentional killing, sustained injuries constituting **serious harm to health** — namely **"traumatic amputation of the right lower limb at the level of the lower one-third of the lower leg, resulting in loss of the right lower limb at the level of the middle one-third of the lower leg, accompanied by traumatic-hemorrhagic shock of II–III degree; contusion and abrasion wounds of the soft tissues of the middle one-third of the left lower-leg area."**

On **24 October 2022**, investigator of the **Kalbajar Military Prosecutor's Office Fuad Gasimzade** inspected the clothing items worn by soldier **Ismayil Shikhi oglu Malikov** at the time of the incident.

According to the protocol dated **12 October 2022** on the inspection of the scene, it was established that the scene was the territory of combat position No. **129** of the **7th border commandant's office**, located in the territory of **Razdara** village, **Zangilan District**. The area conditionally called the **129th border combat point** is located **1,256 meters** above sea level. The distance from that area to the 129th border combat position of the **2nd border commandant's office** located in that same area is **5 kilometers**. The distance between the

127th border combat position and the 129th border combat position located in that area is **700 meters**. The incident occurred in a wooded part of a ravine **8 meters** deep from the road, on the left side of the road leading to the 129th border combat position.

Siyasat Ziyadkhan oglu Allahverdiyev, driver-operator of **"Telecommunication Service" LLC**, which had been engaged to lay optical communication lines in **Kalbajar District**, was driving a tractor with state registration plate **10-AC-864** on a dirt road in the territory of **Chiragli** village, **Kalbajar District**, when on **14 December 2022**, at around **17:00**, the tractor struck an anti-tank mine. As a result, **S. Z. Allahverdiyev** and **Rodik Shamsaddin oglu Panahov**, a cable worker employed by the same company who was walking behind the tractor, sustained injuries. After that, servicemen of the Ministry of Defense and other company employees placed them into the cargo bed of a **GAZ** flatbed-tarpaulin truck belonging to the company, state registration plate **99-JV-396**, and, after the vehicle moved approximately **15–20 meters** in the direction of **Kalbajar District**, the vehicle's right front wheel struck another anti-tank mine, causing an explosion. As a result of both explosions, serviceman of Military Unit No. "N" of the Ministry of Defense, Warrant Officer **Zohrab Mammad oglu Hummatov**, sustained injuries constituting **serious harm to health** and died at the scene; long-term active-duty servicemen Junior Sergeant **Rza Yusif oglu Akhundov**, soldier **Murad Isa oglu Shirinov**, soldier **Gabil Adalat oglu Ibishli**, and company employees **Rodik Shamsaddin oglu Panahov**, **Siyasat Ziyadkhan oglu Allahverdiyev**, **Sadir Heydar oglu Aliyarov**, and **Tofig Hajimirza oglu Balakishiyev** sustained various injuries.

On **15 December 2022**, prosecutor-criminalist of the Criminalistics and Information Technologies Department of the **Military Prosecutor's Office of the Republic of Azerbaijan**, **Sabuhi Zamanli**, inspected the scenes, and the objects at the scenes were packed and seized.

On **15 December 2022**, investigator of the **Kalbajar Military Prosecutor's Office**, Justice Lieutenant **Elgun Ilyasov**, inspected the body of Warrant Officer **Zohrab Mammad oglu Hummatov**.

Page 797

Junior Sergeant **Ramil Subhi oglu Manafov**, a serviceman of the rapid operations battalion of Military Unit No. "N" of the **State Border Service**, serving in the combat-support platoon, while seconded to Military Unit No. **2051**, on **20 March 2023**, at around **03:00**, during combat duty at the **1st border combat point** of that military unit located in the area of the **Aghbashyurd** height in **Zangilan District**, while preventing a provocation committed by Armenian servicemen, sustained injuries constituting **serious harm to health**, diagnosed as **"left-sided hemopneumothorax, hemorrhagic shock, and a through-and-through bullet wound of the left half of the III–IV chest area,"** and was evacuated to hospital.

According to the protocol dated **20 March 2023** on conducting an inspection, the scene was located in the **Aghbashyurd**ridge of **Zangilan District**. Near the point are the border combat

points of the **23rd** and **24th border outposts** of the **9th**and **8th border commandant's offices**. From that point to the positions where Armenian armed forces were located, the closest distance is **750 meters**, and the farthest distance is **1,500 meters**. In that direction, the Armenian positions numbered **151, 152, 153, 154, 155, and 156** are located.

On **11 April 2023**, at around **17:00**, while the personnel of Military Unit No. "N" of the Ministry of Defense were carrying out engineering-fortification work at the combat position of the **1st battalion** of that military unit located in **Zabukh** village, **Lachin District**, newly liberated from the Armenians, as a result of fire opened from sniper and automatic weapons from the positions of the opposing Armenian military formations located in the territory of **Tex**village, **Gorus District**, servicemen of Military Unit No. "N" — Warrant Officer **Elshad Gabil oglu Hasanov**, Warrant Officer **Vidadi Nizami oglu Zalov**, and soldier **Sabuhi Gunduz oglu Taghiyev** — sustained various injuries and died at the scene. Servicemen of the same military unit — Captain **Shahin Elsevar oglu Safarov**, Lieutenant **Murad Elshan oglu Hajiyev**, soldier **Basharaddin Kamil oglu Aliyev**, soldier **Elmir Bashir oglu Rustamov**, soldier **Mahammad Shafi oglu Guliyev**, soldier **Nurlan Ibrahim oglu Ibrahimov**, soldier **Renat Zaur oglu Najafov**, and soldier **Ramish Yolchu oglu Zamanov** — sustained bodily injuries of varying degrees.

It was also established that during the armed attack that occurred on **11 April 2023**, as a result of damage to a **UAZ**vehicle with military registration plate **O-400-QQ** belonging to Military Unit No. "N", and a **UAZ** vehicle with state registration plate **O-400-QQ** belonging to **Qartal Tikinti Firm**, material damage in the amount of **350 manats** was caused to Military Unit No. "N", and material damage in the amount of **2,119.46 manats** was caused to **Qartal Tikinti Firm**.

According to the protocol dated **12 April 2023** on conducting an inspection, the scene was determined to be an expanded area located in front of the combat position conditionally called **"H 5"**, belonging to the **1st battalion** of Military Unit No. "N" of the Ministry of Defense, located in **Zabukh** village, **Lachin District**, newly liberated from the Armenians, on the direct line of contact with Armenian servicemen. The nearest settlement to that area is **Zabukh** village of **Lachin District**. In that area there is a combat position conditionally called **"H 5"**, located on the direct line of contact with Armenian servicemen. When moving **100 meters** along the dirt road before reaching that position, Armenian combat positions are visible both to the right and to the left. To the north of the scene is **Lachin** city; to the north-east is **Zabukh**village of **Lachin District**; to the south is **Tex (Digh)** village of **Gorus District** of the Republic of Armenia; and to the west is **Jaghazur** village of **Lachin District**. The scene is located at an altitude of **1,300 meters** above sea level. The terrain of the scene consists mainly of mountainous and ravine areas, and partly of relatively flat terrain. Opposite the scene are also the combat positions of Armenian military formations located in the territory of **Tex (Digh)** village of **Gorus District**. The combat position conditionally called **"H 5"** is surrounded on three sides by the combat positions of Armenian servicemen. On the earthen rampart surrounding the position, the tricolour state flag of the Republic of Azerbaijan was flying, attached to an iron pole buried in the ground. The place where the

incident directly occurred was the expanded area located in front of the combat position conditionally called **“H 5.”** That area is the territory of the Republic of Azerbaijan. Part of that area was surrounded by an earthen rampart. The size of the expanded area surrounded by the earthen rampart was **35 x 20 meters**. After that, the service vehicle of the military-unit commander, with military registration plate **O 400QQ**, located in that area, was inspected. During the inspection, it was established that on the vehicle’s front windshield, on the upper right side—

Page 798

—there was **one** damage mark; on the right side of the vehicle, in the middle part of the opening-and-closing window of the rear passenger door, there was **one** damage mark; on the glass located to the left of that door, in the upper left part, there was **one** damage mark; and on the upper part of the rear passenger door, on the roof covering of the vehicle, there were **two** damage marks — in total **four** damage marks characteristic of damage caused by shots fired from a firearm. On the rear of the vehicle, there was **one** damage mark near the handle intended for opening the luggage-compartment door, and **one** damage mark on the upper right part of the glass of the luggage-compartment door — in total **two** damage marks. On the left side of the vehicle, in the upper right part of the front door, on the roof covering of the vehicle, there was **one** damage mark; on the glass located to the right of the rear passenger-door window, in the middle left part, there was **one** damage mark; and on the upper left part of that glass, on the roof covering of the vehicle, there were **two** damage marks — in total **four** damage marks characteristic of damage caused by shots fired from a firearm. The glass of the rear passenger door on the left side of the vehicle had completely shattered and fallen to the ground as a result of shots fired from a firearm. In addition, on the windows at which shots had been fired, there were also crack marks characteristic of bullet impact.

On **14 June 2023**, a silver-coloured **Mitsubishi L200** vehicle with state registration plate **50-AA-743**, belonging to **Qartal Tikinti Firm**, was inspected and photographs were taken.

Soldier **Elchin Rahim oglu Rahimli**, a long-term active-duty serviceman serving as driver of the 1st vehicle squad of the vehicle platoon of the material-technical support company of Military Unit No. “N”, had, due to service necessity, been seconded by Order No. **116** of the commander of the military unit dated **20 April 2023** to Military Unit No. “N” of the Ministry of Defense located in **Shusha** city. During his secondment, on **22 April 2023**, while driving a **GAZ-3308**vehicle belonging to Military Unit No. “N”, with military registration plate **E-062-QQ**, to deliver supplies to the **7th combat position** of the machine-gun squad of the **10th company** of the **4th battalion** of the military unit located in the territory of **Allahgulular** village, **Shusha District**, at **17:03** that day, while moving **353 meters** north-east of the **8th combat position**, the vehicle’s front right wheel struck an anti-tank mine previously buried in the area by unknown members of Armenian armed formations. As a result, he sustained injuries constituting **minor harm to health**, namely **“blast trauma, closed craniocerebral trauma, brain concussion, chopped wound of the left temporal-parietal area, and contusion of the soft tissues of the chest.”**

The vehicle commander who was in the same vehicle, **Vusal Firad oglu Mammadov**, Warrant Officer, commander of the commandant and security platoon of the headquarters and supply company of Military Unit No. "N", who had also been seconded to Military Unit No. "N" by an order of the commander of Military Unit No. "N" of the same date, sustained **"compression fracture of the body of the L5 vertebra, multi-fragment displaced fracture of the right heel bone,"**and **"chopped wounds of the parietal and temporal areas."**

After the explosion, from among the personnel who came to assist them, soldier **Nihad Orucali oglu Aliyev**, rifleman of the security squad of the commandant and security platoon of the headquarters and supply company of Military Unit No. "N", at **17:12**, as a result of stepping on an anti-personnel mine buried by members of those armed formations, sustained injuries described as **"mine-blast trauma, avulsion of the right heel bone, open multi-fragment fractures of the neck of the talus and of the II–III metatarsal bones, subluxation of the ankle joint, displaced fracture of the medial malleolus, multiple shrapnel wounds of both lower legs, the right hand, and the face, and traumatic hemorrhagic shock of the II degree."**

After the incident, as a result of checking the area with mine-search devices, **19 Armenian-made PMN-E anti-personnel mines** and **2 TM-62P2 anti-tank mines** were found and neutralized.

According to the protocol dated **22 April 2023** on conducting an inspection, the scene was a dirt-covered supply road leading from the **8th combat position** of the machine-gun squad of the **3rd company** of the **4th battalion** of Military Unit No. "N" of the Ministry of Defense to the **7th combat position** of that squad, located **2,300 meters** south-east of **Imangulular** settlement of **Shusha District**, surrounded on the left and right by relatively forested areas. That road is located in the territory of **Allahgulular** village, **Shusha District**. When moving along the **4.6-meter-wide** dirt road from the **8th combat position** of the machine-gun squad toward the **7th combat position** in the north-eastern direction, at a distance of **353 meters**, a **GAZ-3308** vehicle with military registration plate **E-062-QQ** was observed standing across the width of the road, with its left side facing the 8th position.

Page 799

The vehicle's front right wheel was missing, while the left wheel was in place and undamaged. The engine-compartment cover was missing, and black liquid had flowed from the engine compartment onto the ground. The vehicle's windshield was missing; the steering wheel was in place and undamaged. On the dashboard in front of the steering wheel, there were wide red stains resembling blood. On the outer sides of both doors, there were wide red, snake-like stains. Under the cabin, on the ground, there was **one Varta** battery; it was damaged. The vehicle's fuel tank was in place and undamaged. The cover surrounding the cargo area of the vehicle was torn on the right side and undamaged on the left side. Both rear wheels of the vehicle were in place and undamaged. The cargo-area door and rear lights were

in place and undamaged. On the rear-left side of the vehicle, below the cargo area, the military registration plate **E-062-QQ** was attached and undamaged. In addition, at a distance of **2.4 meters** from the vehicle's front right wheel and **1.8 meters** from the left side of the road, there was **one** crater with a diameter of **2.4 meters** and a depth of **65 centimeters**. In addition, in front of that crater, it was observed that the vehicle's front glass had shattered and become unusable, and **70 centimeters** in front of the glass, the engine-compartment cover of the vehicle, made of iron material, had been twisted and rendered unusable.

Soldier **Ehtibar Hasankhan oglu Abasguliyev**, while serving as a long-term active-duty serviceman as excavator operator of the 1st squad of the 5th platoon of the engineer-sapper company of Military Unit No. "N" of the Ministry of Defense, on **8 May 2023**, at around **10:00**, while carrying out excavation work in the territory of **Zabukh** village, **Lachin District**, using a **Doosan** excavator with military registration plate **O428QQ**, sustained damage to the front windshield of the excavator as a result of fire opened from firearms by unknown members of Armenian military formations. Since **E. Abasguliyev** immediately got out of the excavator and moved away from that area, the servicemen of the Armenian military formations were unable to achieve their intent.

On **8 May 2023**, an orange **Doosan DX225LCA** excavator with military registration plate **O428QQ** was inspected, and it was established that, as a result of fire opened from firearms by Armenians, the front windshield of the excavator's cabin had completely shattered and fallen to the ground. During the inspection of the excavator, bullet marks visible to the naked eye were observed on the front and rear parts of that equipment.

According to the certificate of the Chief of Staff and Deputy Commander of Military Unit No. "N", on **17 May 2023**, it was not possible to inspect the scene — namely the combat position conditionally called **"K-22"**, where Junior Sergeant **Novruz Hagverdi oglu Aliyev**, commander of the 1st squad of the 1st platoon of the 10th company of the 4th battalion of Military Unit No. **172**, a long-term active-duty serviceman, had sustained injury — because that combat position was located on the line of contact with Armenian servicemen, was under visual observation by Armenian servicemen, the combat clash was continuing, and the area was being intensively fired upon by Armenians using attack drones and small-arms/artillery weapons.

According to the protocol dated **11 July 2023** on conducting an inspection, Acting Senior Investigator of the **Aghdam Military Prosecutor's Office**, Justice Captain **Hasan Akif oglu Bakhshaliyev**, inspected the clothing worn by **Ali Shukur oglu Bakirov** at the time of the incident. As a result of the inspection, blood traces were identified on the trousers he had been wearing at the time of the incident.

On **11 July 2023**, as a result of fire opened by unknown members of Armenian military formations, soldier **Huseyn Arif oglu Abdullayev**, operator of the anti-tank guided missile squad of the 2nd anti-tank platoon of the anti-tank company of Military Unit No. "N" of the Ministry of Defense, sustained a through-and-through firearm bullet wound of the soft tissues of the right scapular area and the middle one-third of the right upper arm.

The certificate attached to the criminal case stated that, since the area where the incident occurred was directly under observation from several Armenian posts and was being intensively fired upon, and therefore was directly dangerous to the life and health of the employees of the military prosecutor's office, it was not possible to go to that area and conduct an inspection of the scene there.

Page 800

It was established in court that **Sergeant Habibov Khayal Gabil oglu**, while serving as commander of the motor-vehicle section of the commandant platoon of the headquarters company of the **N-numbered military unit** of the Ministry of Defence, on **20 July 2023**, at around **11:00**, while travelling in a **Volkswagen Amarok** vehicle with registration plate **99-KU-898** near **Gorchu** village, **Lachin District**, sustained injuries as a result of the vehicle hitting an anti-tank mine previously planted in that area by unidentified servicemen of Armenian military formations.

According to the protocol dated **20 July 2023** on the inspection of the scene, the place where the **Volkswagen Amarok** vehicle with registration plate **99-KU-898**, driven by **Sergeant Habibov Khayal Gabil oglu**, hit a mine belonged to the territory of **Gorchu** village, **Lachin District**. The place of the mine explosion had a diameter of approximately **3 metres** and a depth of **70 centimetres**. When the inside of the explosion area was examined, metal fragments scattered around as a result of the mine explosion were visible. Looking north from the scene, on the right side, facing the ravine, **three** information signs with the inscription **"Hamza bulaghi"** were visible.

Looking from the scene toward the lower right side, in the direction of the ravine, a white vehicle that had rolled into the ravine as a result of the explosion was visible. During the inspection of the scene, **two** metal fragments scattered inside the explosion area were duly packaged and taken for submission to expert examination. During the inspection of the vehicle, a vehicle registration certificate numbered [redacted] and a power of attorney numbered [redacted] for the use of the vehicle were found and seized from the lower part of the front seat of the vehicle.

It was established in court that on **19 September 2023**, starting at **13:02**, illegal Armenian armed formations, having violated the ceasefire regime once again with the purpose of committing terrorist acts — that is, explosions, arson, or other actions creating a danger of death to people, causing harm to their health, inflicting substantial property damage, or leading to other socially dangerous consequences — in order to undermine public security, create panic among the population, and influence decision-making by state authorities or international organizations, attacked the positions of the Ministry of Defence of the Republic of Azerbaijan located in the directions of **Kalbajar**, **Gubadli**, **Aghdam**, **Fuzuli**, **Khojavand**, **Khojaly**, and **Shusha** districts. They opened intensive fire from large-calibre weapons, mortars, and artillery systems of various calibres. As a result, **205 servicemen** of the Armed

Forces of the Republic of Azerbaijan were killed and **1,004 servicemen** sustained bodily injuries of varying severity; substantial property damage was also caused.

During the preliminary investigation, the bodies of the **205** fallen servicemen were inspected. Their close relatives were recognized and questioned as legal successors of the victims, and the **1,004** injured servicemen were recognized and questioned as victims. Forensic medical and other necessary expert examinations were ordered in respect of the killed and injured persons, and it was ensured that samples were taken for the identification of those whose identities were unknown.

According to the protocol dated **19 September 2023** on the inspection of the body of **Isayev Ismayil Charkaz oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, various injuries of different sizes and shapes were present on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Zamanli Ahmad Azad oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, various injuries of different sizes and shapes were present on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Canbakhishov Khayal Kheyrulla oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Iskandarov Murad Alaga oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were present on the body.

Page 801

According to the protocol dated **19 September 2023** on the inspection of the body of **Khanaliyev Ismayil Ziyad oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and shapes were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Hamidli Mikayil Vugar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the face of the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Abbasov Ruslan Abilfat oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Khanmammadov Huseyn Mayis oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Mirzayev Sanan Vugar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Garayev Elmin Rafat oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Huseynzade Mirmusa Vugar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Mammadov Royal Asif oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Khalilli Mahammad Ilgar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **19 September 2023** on the inspection of the body of **Mammadov Tural Suleyman oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of an unidentified body conditionally marked with the number **"1"**, in the occipital area of the body there was **one** through-and-through wound, formed by two connected wounds measuring **3 x 0.7 centimetres** and **5 x 0.7 centimetres**, located **2 centimetres** apart from each other, with fractured fragments of the occipital bone and destruction of brain tissue visible at the base, with bleeding, as well as other injuries.

Since the unidentified body conditionally marked with the number **"1"** was presumed to belong to **Gafarov Savalan Isfandiyar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, that body was presented for identification to his father, **Gafarov Isfandiyar Nuraddin oglu**, on the basis of the protocol dated **20 September 2023**, and he confirmed that the body belonged to his child, **Savalan Gafarov**.

According to the protocol dated **20 September 2023** on the inspection of the body of **Aliyev Sarkhan Rabil oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the lower extremities of the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Balabayli Elcan Vasif oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Nasibov Agshin Vasif oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Teymurov Rasul Yusif oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

Page 802

According to the protocol dated **20 September 2023** on the inspection of the body of **Aliyev Shahriyar Bakhtiyar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Gasimli Nijat Elshan oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of varying degrees were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Samadov Elchin Akif oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of varying degrees were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Aghjabeyov Tural Tabriz oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, the lower one-third of the left lower leg was deformed, there was pathological mobility, crepitation of bone fragments during movement, and numerous injuries were also found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Karimov Elnur Adil oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous lacerated and torn wounds were found on the body in various areas, accompanied by large defects of subcutaneous soft tissue and muscle tissue, with fractured bone fragments visible.

According to the protocol dated **20 September 2023** on the inspection of the body of **Mehdizade Mirpasha Yagub oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Mammadaliev Niyazi Samir oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Ibrahimli Elchin Sadig oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, the body was deformed, the upper part of the torso was connected to the lower part by numerous flaps, and numerous injuries were present on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Bilalov Sarkhan Ismat oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, the body consisted of **three** parts, was deformed, and had been burned and charred.

According to the protocol dated **20 September 2023** on the inspection of the body of **Aghayev Jeyhun Etibar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, the body had been burned, charred, and rendered unrecognizable.

According to the protocol dated **22 September 2023** on the inspection of the remaining parts of the body of **Aghayev Jeyhun Etibar oglu**, the body parts consisted of bone fragments exposed to high-temperature pressure, and all bone fragments in the bag were taken for DNA examination.

According to the protocol dated **20 September 2023** on the inspection of the body of **Shahriyarov Vusal Tabiyyat oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Alakbarov Ramal Elnur oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, in the occipital area of the body there was **one** wound measuring **1.8 x 0.5 centimetres**, with relatively smooth edges and blunt angles, penetrating the cranial cavity, with a fractured fragment of the occipital bone and destroyed brain tissue visible at the base.

According to the protocol dated **20 September 2023** on the inspection of the body conditionally marked as **"Unknown No. 2"**, the surface of the body had been burned and charred, and the right upper limb was in a state of traumatic amputation at the level of the upper one-third of the arm.

According to the protocol dated **20 September 2023** on the inspection of the body conditionally marked as **"Unknown No. 3"**, the right upper limb was amputated at the level of the shoulder joint, the left upper limb at the level of the radiocarpal joint, the right lower limb at the level of the hip joint…

Page 803

…the ankle joint level, and the left lower limb was amputated at the knee-joint level. The head, neck, shoulder areas, and the left upper limb of the body had been subjected to fourth-degree thermal burns.

According to the protocol dated **20 September 2023** on the inspection of the body of **Jalilov Devid Raufovich**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, it was established that the body part had been deformed and that numerous injuries were found on it.

According to the protocol dated **21 September 2023** on the inspection of the body of **Salmanov Elchin Habil oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body conditionally marked as **"Unknown No. 4"**, the skull of the body was deformed, and numerous injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Guluzade Nihat Gasim oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, both lower-leg areas of the body were deformed, and numerous injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Amirov Tural Matlab oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Khalafov Tapdig Vidadi oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, the left lower limb of the body was incompletely traumatically severed at the ankle-lower-leg joint level, and numerous injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Rustamov Vusal Rustam oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Jafarov Oleg Glich oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, in the right temple and occipital areas of the body there was a wound whose opening contained bloodless brain tissue and broken bone fragments protruding outward, connected to one another by a wound canal, as well as numerous other injuries.

According to the protocol dated **21 September 2023** on the inspection of the body of **Aliyev Valiyulla Elmanovich**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Safarov Gokhan Ilgar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries of various sizes were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Nurmahammadov Ramazan Nurahmadovich**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries of various sizes were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Aliyev Sabuhi Tahir oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, numerous injuries were found on the body.

According to the protocol dated **22 September 2023** on the inspection of the body of **Imamaliyev Etibar Hijran oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to the protocol dated **22 September 2023** on the inspection of the body of **Jafarov Mahir Asif oglu**, a junior sergeant and long-term active-duty serviceman of the **N-**

numbered military unit of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to the protocol dated **22 September 2023** on the inspection of the body of **Huseynov Sabuhi Mahbub oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to the protocol dated **23 September 2023** on the inspection of the body of **Rasulov Nuraddin Akif oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, a large penetrating shrapnel wound measuring **12.5 x 5 centimetres** was found in the anterior wall of the abdominal cavity, entering the abdominal cavity.

According to the protocol dated **23 September 2023** on the inspection of the body of **Ismayilov Vugar Mammadgasim oglu**, a lieutenant and serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to the protocol dated **23 September 2023** on the inspection of the body of **Sumbatzada Vusal Barat oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to the protocol dated **23 September 2023** on the inspection of the body of **Gahramanov Alimardan Samad oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, in the upper one-third of the left anterior thoracic area there was a wound characteristic of a bullet-entry hole, with a central tissue defect measuring **1.2 x 2 centimetres**, and, in the same area, another wound measuring **3.5 x 2 centimetres**, characteristic of a bullet-exit hole penetrating into the abdominal cavity.

According to the protocol dated **23 September 2023** on the inspection of the body of **Mirzayev Farid Namiq oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, **two** bullet wounds were found on the body.

According to the protocol dated **23 September 2023** on the inspection of the body of **Zulfugarov Javid Javanshir oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to the protocol dated **23 September 2023** on the inspection of the body of **Mammadov Samir Mammad oglu**, a junior sergeant and long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and forms were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Shamsiyev Ilham Sakir oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Hasanov Hasan Zabit oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Gasimov Sanan Farman oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Yusifli Shamistan Shukran oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of varying degree were found on the surface of the body as a result of exposure to a deforming blow.

According to the protocol dated **20 September 2023** on the inspection of the body of **Jahangirov Tural Galamhuseyn oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of varying degree were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Huseynov Shikar Huseyn oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of varying degree were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Rajabov Vaqif Yaqub oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries of varying degree were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Samadov Jamal Vugar oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Nabiyev Farid Kamran oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Ahmadov Elvin Galandar oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Babayev Sahi Saribala oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Aliyev Zahir Sadi oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Valizada Rashad Rasim oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Sadigov Samir Jabrayil oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Mammadov Azar Sulduz oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Huseynov Ramin Rovshan oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, the upper part of the body above the navel had completely burned and turned to ash.

According to the protocol dated **21 September 2023** on the inspection of the body of **Mehdiyev Suleyman Mansur oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

Page 813

According to the protocol dated **21 September 2023** on the inspection of the body of **Gadirov Amid Gurban oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Samadov Khayyam Mirazim oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Abdullayev Asim Javanshir oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Mustafayev Huseyn Ali oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Orujov Niftali Gafar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Mirzazada Mirzali Kamran oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Lalayev Ruslan Akif oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Huseynov Rashad Rahim oglu**, a serviceman of the **N-numbered military unit** of the Internal Troops of the Ministry of Internal Affairs, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Ahadov Eltaj Aydar oglu**, a serviceman of the **N-numbered military unit** of the Ministry of Defence, the body was in a sharply deformed and fragmented condition.

According to the protocol dated **21 September 2023** on the inspection of the body of **Huseynov Mahammad Safahat oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, the body was in a sharply deformed and fragmented condition.

According to the protocol dated **20 September 2023** on the inspection of the body of **Akbarov Agil Fayaddin oglu**, a major and serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Tahmazov Mirali Mirfattah oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **21 September 2023** on the inspection of the body of **Najafi Elkhan Shukur oglu**, a major and serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **20 September 2023** on the inspection of the body of **Dashdamirov Sahib Natiq oglu**, a chief lieutenant and serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found on the body.

According to the protocol dated **28 January 2024** on the inspection of the body of **Gasimov Hajali Tahir oglu**, a chief lieutenant and serviceman of the **N-numbered military unit** of the Ministry of Defence, festering trophic skin wounds, as well as surgical and other wounds, were found on the surface of the body.

According to the protocol dated **7 April 2024** on the inspection of the body of **Baghirov Ulvi Hanifa oglu**, a chief lieutenant and serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries were found in the right parietal area of the body, as well as in other areas.

According to the protocol on the inspection of the body of **Gasimov Kamal Huseyn oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence…

Page 814

According to the protocol dated **22 September 2023** on the inspection of the body of **Gasimov Kamal Huseyn oglu**, a long-term active-duty serviceman of the **N-numbered military unit** of the Ministry of Defence, injuries of various sizes and shapes were found on the body.

According to the protocol dated **29 December 2021** on the inspection of the scene, it was established that the scene of the incident was the area known as **"Yeddi Khirman"**, located in **Jinli** village, **Aghdam District**, in the direction of **Pirlar** village, **Khojaly District**, which had been liberated from occupation. During the inspection, **Pashayev Rashad Asif oglu** indicated the place where the **Mitsubishi L200** vehicle with state registration plate **99-JK-820**, which had been in his use, had overturned after his leg was injured by a mine, and stated that the incident had occurred on **29 December 2021**, at around **14:00**.

The distance between the scene and the vehicle was approximately **150–160 metres**. It was observed that a post made of stones had been set up near that location. During the inspection, it was determined that the post belonged to Armenian armed formations. When they had approached that place to inspect it, the Armenian armed persons serving at the post did not allow them to move and demanded that they return. It was then determined that the vehicle had overturned.

The vehicle was lying overturned on the left side of the dirt road leading from the area known as **"Yeddi Khirman"**toward **Pirlar** village of **Khojaly District**, at a distance of **8 metres** from the road. **Rashad Pashayev** indicated that, after losing their way, they had moved toward the wrong Armenian post, and, after realizing that the post belonged to Armenian armed formations, he and **Rahimli Anar Mahammad oglu** tried to return by moving the vehicle backwards. However, at that moment, the Armenian armed persons serving at the post fired several times at the vehicle with automatic firearms, and, as a result, bullets passed through the underside of the steering wheel of the vehicle and struck his leg.

During the inspection of the vehicle, it was established that the passenger compartment had become completely unusable. During the inspection, six perforating damages caused by shots fired from different directions were found on the left front and rear doors, where the front door intersected with its mirror, on the lower-left part of the front windshield, on the lower-right part, and on the lower part of the steering wheel. The exit point of the damage under the steering wheel was marked during the inspection as shot point **"6,"** and it was determined that the entry point of that damage coincided with the injury to **Anar Rahimli**. At the scene, **three** samples from blood-like stains found on the outer covering of the right side of the vehicle and on the seats inside the passenger compartment were taken with cotton swabs, duly packed, and seized.

The testimony given during the preliminary investigation by **Mammadli Musayib Igbal oglu**, a representative of **"Smartkom" Limited Liability Company**, was read out in court. In his testimony, he stated that he had worked at **"Smartkom" LLC** since **2010**. By order dated **30 November 2018**, he worked as the company's financial director. The executive director of the company was **Atlasi Mammad Vali oglu**. The company operated in the field of communications and information technologies. Its main activity consisted of installing mobile base stations and providing services in that field.

After the Patriotic War ended in November 2020, the company began operating in the **Karabakh** region, as well as in **Eastern Zangazur**, in connection with reconstruction work being carried out in the territories liberated from occupation, including in the territory of **Aghdam District**. For that purpose, part of the company's employees were sent to those areas by the relevant orders. One of those employees was **Rahimli Anar Mahammad oglu**. **Anar Rahimli** was assigned as driver, and a **Mitsubishi L200** vehicle with state registration plate **AZ 99-JK-820**, belonging to the company, was entrusted to him.

On the basis of a contract concluded between the company and **"Texnocell" Limited Liability Company**, the employees were engaged in the work of installing mobile base stations in the territories liberated from occupation. On **29 December 2021**, at around **14:00**, in accordance with the schedule drawn up, **Anar Rahimli**, driving the vehicle, went together with **Pashayev Rashad Asif oglu**, an employee of **"Texnocell" LLC**, to inspect the installed tower in the territory of **Jinli** village, **Aghdam District**, and to carry out planning work. However, after losing their way, they entered an area where a combat position had been unlawfully established by Armenian armed formations in the territory. They were fired upon with automatic weapons. As a result, **Anar Rahimli** sustained an injury to his left arm, and the vehicle belonging to the company became seriously damaged and unusable. A short time after the incident, **Rashad Pashayev** informed the company by mobile phone about the incident.

Page 815

Later, the relevant investigation was also conducted by the **State Labour Inspectorate Service** under the Ministry of Labour and Social Protection of the Population of the Republic of Azerbaijan in connection with the incident. After that, they were informed that the collected materials had been sent to the Prosecutor General's Office through the **Aghdam District Prosecutor's Office**. As a result of the vehicle overturning at the time of the incident, material damage of approximately **10,000 manats** was caused to the company.

It was further established that **Zulfuqarli Vugar Natiq oglu**, born on **13 June 1996**, a resident of **Horadiz** city, **Fuzuli District**, on **23 February 2022**, at around **09:00**, while reversing a **HOWO** cargo vehicle with state registration plate **77-CB-134**, which was in his use, inside a quarry located in **Ashaghi Seyidahmadli** village of **Fuzuli District**, liberated from occupation, drove the vehicle onto an alternative section of the road, where a mine

exploded. As a result, he sustained an injury to the sole area of his left foot, and the vehicle in his use became unusable.

According to the protocol dated **23 March 2022** on the inspection of the scene, carried out with the participation of an employee of the **Mine Action Agency of the Republic of Azerbaijan**, it was established that the place where the explosion occurred was the edge of the vehicle road located in **Ashaghi Seyidahmadli** village, **Fuzuli District**, liberated from occupation. At the scene, the explosion had created a crater on the ground measuring **270 centimetres** in diameter and **120 centimetres** in depth. Next to the crater there was a cargo vehicle whose front part had been completely destroyed. It was also established that, around the scene, on the road surface and on the roadside, there were numerous unexploded **TM-62M** anti-tank mines.

It was further established that, in **Ashaghi Seyidahmadli** village of **Fuzuli District**, which had been liberated from occupation, as a result of the explosion on **26 February 2022**, at around **20:00**, of one of the mines previously and deliberately planted during the occupation period by Armenian armed formations, **Salmanov Ilham Bakhtiyar oglu**, born on **7 July 1989**, a resident of **Shukurbayli** village, **Fuzuli District**, a police officer of the post-patrol service platoon of the **Fuzuli District Police Department**, died.

According to the protocol dated **27 June 2022** on the inspection of the scene, carried out with photo and video recording, it was established that the mine explosion had occurred in **Ashaghi Seyidahmadli** village of **Fuzuli District**, liberated from occupation, on the left side of the dirt road, at the edge of the road, near the building that had operated as a tea factory and approximately **281 metres** from the main asphalt road. Thus, the said location had been under the control of Armenian armed formations during the occupation period and formed part of mined areas. Remnants of a detonated anti-personnel mine were found and seized from the crater that had formed in the ground as a result of the explosion.

According to the protocol dated **3 November 2020** on the inspection of the scene, it was established that on **2 November 2020**, at around **14:30**, **Zeynalov Telman Babir oglu**, born on **11 June 1967**, a resident of **Ahmadalilar** village, **Fuzuli District**, an employee and deminer of the **Mine Action Agency of the Republic of Azerbaijan**, while performing his service duties in **Mahdili** village, **Jabrayil District**, and carrying out mine-clearance operations to remove mines deliberately planted in advance by Armenian military formations during the occupation period, was exposed to an explosion of one of those anti-personnel mines and sustained injuries, as a result of which his left leg was amputated.

It was further established that, according to the protocol dated **8 November 2021** on the inspection of the scene, on **7 November 2021**, at around **16:00**, **Aslanov Khanlar Fazil oglu**, born on **25 August 1967**, a resident of **Cocuq Marjanli**village, **Jabrayil District**, while moving on foot in a cotton field in **Chojuq Marjanli** village — which had been liberated from occupation in April 2016 and was located near the line of contact with illegal armed formations until **27 September 2020** — stepped on an anti-personnel mine planted by illegal armed formations and sustained bodily injuries. It was established that the explosion

occurred at the geographical coordinates **39°23'13"N, 47°17'39"E**, in **Cocuq Marjanli**village. As a result of the explosion, a crater measuring **40 centimetres** in diameter was formed on the ground.

Page 816

It was further established that, according to the protocol dated **29 November 2021** on the inspection of the scene, on that date, at around **15:00**, **Mammadov Natiq Vali oglu**, born on **19 June 1980**, a resident of **Kalbajar District**, working as a cargo-truck driver at **"Mirakl-Dent" LLC**, stepped on one of the anti-personnel mines deliberately planted during the occupation period by Armenian military formations in **Mahdili** village, **Jabrayil District**, which had been liberated from occupation, and sustained bodily injuries as a result of the explosion. As a result of the mine explosion, a crater **80 centimetres** in diameter was formed on the ground. The explosion occurred at the geographical coordinates **39°23'25"N, 47°16'57"E**. That area is located at the **eighth kilometre** of the newly constructed **Baku–Nakhchivan railway line**, passing through the territory of **Mahdili** village.

It was further established that, according to the protocol dated **25 March 2022** on the inspection of the scene, on **17 March 2022**, at around **13:00**, **Aliyev Safar Ahliman oglu**, born on **4 November 1983**, a resident of **Aghjabadi** city, stepped on one of the mines previously and deliberately planted during the occupation period by Armenian military formations, while removing unattended metal waste in the territory of **Mahdili** village, **Jabrayil District**, liberated from occupation, and sustained bodily injuries as a result of the explosion. The place of the incident was located near the newly constructed **Baku–Nakhchivan railway line**, at the geographical coordinates **39°23'26.0"N, 47°16'59.1"E**.

It was further established that, according to the protocol dated **19 June 2022** on the inspection of the scene, on that date, at around **11:00**, **Shukurov Ali Shirali oglu**, born on **4 February 1992**, a resident of **Boyuk Bahmanli** village, **Fuzuli District**, an employee of the **Mine Action Agency of the Republic of Azerbaijan**, while carrying out mine-clearance operations in **Khudafarin** village, **Jabrayil District**, stepped on one of the mines previously planted during the occupation period by Armenian armed formations and sustained bodily injuries as a result of the explosion. The place of the mine explosion was located **103 metres** north-east of the **Second Khudafarin Bridge** over the **Araz River**, at the geographical coordinates **39°09'06"N, 46°56'27"E**.

It was further established that, according to the protocol dated **17 June 2022** on the inspection of the scene, on that date, at around **09:00**, employees of the **Mine Action Agency of the Republic of Azerbaijan** — **Mustafayev Mahir Husamaddin oglu**, born on **10 December 1988**, **Gozalov Samir Arif oglu**, born on **4 September 1995**, **Valiyev Ruhin Sultan oglu**, born on **31 March 1991**, **Rzayev Gahraman Bilal oglu**, born on **20 February 1991**, **Cabrailli Farid Zakir oglu**, born on **14 September 2001**, **Guliyev Alasgar Asif oglu**, born on **28 June 1990**, and **Qismat Rasin oglu Guliyev**, born on **19 June 1990** — while carrying out mine-clearance operations in **Khudafarin** village, **Jabrayil District**, stepped on

one of the mines previously planted during the occupation period by Armenian armed formations and sustained bodily injuries as a result of the explosion. The place of the mine explosion was located **103 metres** north-east of the **Second Khudafarin Bridge** over the **Araz River**, at the geographical coordinates **39°09'06"N, 46°56'27"E**.

Starting from **27 September 2020**, as a result of the explosion of mines and other similar devices in the territory of **Lachin District**, a total of **four** civilians were killed, and **five** civilians sustained bodily injuries.

During the investigation, with respect to each of the incidents mentioned, inspections of the scenes were carried out, the bodies of the deceased persons were examined by forensic medical experts, forensic medical and other relevant expert examinations were ordered concerning the injuries sustained by the wounded persons and the material evidence seized from the scenes, the legal successors of the deceased persons were recognized and questioned, decisions recognizing the injured persons as victims were adopted and executed, witnesses were questioned, and other investigative actions were carried out.

Thus, it was established that **Pashazade Javid Vidadi oglu**, deputy chief of the **Fuzuli District Police Department**, with the rank of police first lieutenant, submitted a report on **23 November 2020** to the **Fuzuli District Police Department**, stating that on **22 November 2020**, at around **18:00**, **Suleymanov Vusal Zeyni oglu** and **Karimov Ramil Karim oglu** had been found in the **Vazgilid** area of **Lachin District**, and that the relevant information had been sent to the **Lachin District Prosecutor's Office** for investigation.

Page 817

During the investigation, it was established that on **22 November 2020**, **Suleymanov Vusal Zeyni oglu**, **Karimov Ramil Karim oglu**, **Yaqubov Fakhraddin Yaqub oglu**, and **Gahramanov Uzeyir Khalil oglu**, who had voluntarily assisted in the evacuation of killed and wounded servicemen from the occupied territories in a **99-TX-074** state-registered emergency medical vehicle during the armed conflict that had arisen as a result of Armenian aggression starting from **27 September 2020**, were in **Gulabird** village, **Lachin District**, which had been liberated from occupation, when the vehicle they were driving struck a mine planted by Armenian servicemen. As a result, **Vusal Suleymanov** and **Ramil Karimov** sustained bodily injuries of varying degrees, while **Fakhraddin Yaqubov** and **Uzeyir Gahramanov** died at the scene from their injuries.

It was further established that, according to the protocol dated **29 April 2022** on the inspection of the scene, **Salahov Parvin Famil oglu**, born on **14 February 1992**, a resident of **Dashkasan** village, **Aghstafa District**, who worked as a warehouseman at **"Amazone"** construction company, which was carrying out road repair and construction work in **Lachin District** liberated from occupation, was killed on **29 April 2022**, at around **14:00**, as a result of bodily injuries sustained from a mine explosion after stepping on one of the mines planted by Armenian armed formations during the occupation period in the territory of **Safiyan** village, **Lachin District**. It was established that the place where the incident occurred was

located on the left side of the village road in the village area, approximately **20 metres** from the vehicle road, and that a crater approximately **30 centimetres** deep had formed on the ground as a result of the mine explosion.

It was further established that, according to the protocol dated **21 October 2022** on the inspection of the scene, **Hamidov Elsevar Sovet oglu**, born on **20 April 1977**, and **Hasanov Sabuhi Telman oglu**, born on **10 December 1977**, both residents of **Suarasi** village, **Lachin District**, sustained bodily injuries on **21 October 2022**, at around **18:00**, as a result of the explosion of one of the mines previously and deliberately planted during the occupation period by Armenian armed formations in **Suarasi** village, **Lachin District**. The incident occurred while the **Mitsubishi L200** vehicle with state registration plate **77-FE-279**, driven by **Hamidov Elsevar Sovet oglu**, was moving along a dirt road leading to the highlands in **Suarasi** village and drove over one of the said mines. As a result of the explosion, a crater with a diameter of **1 metre 39 centimetres** was formed on the ground. As a result of the incident, the vehicle became unusable. Around the scene, there were numerous unexploded anti-tank mines.

It was further established that, according to the protocol dated **28 September 2021** on the inspection of the scene, **Bayramov Qismat Allahverdi oglu**, born on **20 October 2010**, a resident of **Alakhanchalli** village, **Dashkasan District**, and **Rustamov Ulfat Hikmat oglu**, born on **25 December 2000**, a resident of the same village, left their homes on **30 July 2021** and travelled on horseback along the **Dashkasan** and **Kalbajar** districts' common mountain road in the direction of **Kalbajar District**, which had been liberated from occupation. However, after losing their way, they headed toward the **Murovdagh** range, in the area bordering **Goygol District**, **Kalbajar District**, and **Dashkasan District**, and, in an area known as a pasture during the occupation period, around the military post called **"Janavar sagh"** created by Armenian servicemen, they stepped on one of the mines planted there, as a result of which they died at the scene.

During the inspection, it was established that parts of the clothing belonging to **Qismat Bayramov** and **Ulfat Rustamov**, part of the skeletal bones of **Qismat Bayramov's** body, and a mobile phone belonging to **Ulfat Rustamov** were found at a location on the **Goygol–Kalbajar** road, in the **Murovdagh** range, approximately **350 metres** north-east of the area where the former **"Canavar sagh"** military post had been created by Armenian armed formations during the occupation period. It was determined that the area was completely mined. It was possible to inspect that area only after safety measures had been taken by military personnel. At the same time, it was established that the two horses used by **Ulfat Rustamov** and **Qismat Bayramov** to reach the scene had also probably perished there.

In order to carry out genetic examination, biological samples were taken from the close blood relatives of each of the deceased persons and submitted to the Criminalistics…

…according to the opinion of the Criminalistics Research Department dated **9 December 2021**, No. **011-11607-1221**, it was established that the samples of human remains discovered during the inspection of the scene belonged to **Allahverdi Bayramov**.

Starting from **27 September 2020**, as a result of the explosion of mines and other similar devices in the territory of **Goranboy District**, a total of **two** civilians sustained bodily injuries of varying severity.

According to the protocol dated **20 November 2021** on the inspection of the scene, it was established that on **20 November 2021**, at around **13:00**, **Garayev Shahin Gadir oglu**, born on **10 October 1972**, a resident of **Tapgaragoyunlu** village, **Goranboy District**, was watching the animals belonging to his private household in an area called **"Yanikh dagh"** in that village, on the left side of the **Inja River**. At that time, he stepped on an anti-personnel mine deliberately planted in advance by Armenian armed formations, and as a result of the explosion of that mine, he sustained bodily injuries. Since the area where the incident occurred was mined, it was not possible to inspect it from a close distance. Since the indicated area was mined, bordered the **Talish** and **Suqovushan** summer pastures, and had long been under the control of Armenian armed forces, it had been placed under observation.

According to the protocol dated **9 December 2021** on the inspection of the scene, it was established that on **9 December 2021**, at around **09:00**, **Khanatov Orkhan Nazim oglu**, born on **12 December 1999** in **Gobustan**, registered in **Goydara**village and working as a labourer at **"Voltac Podratci" LLC**, and **Gandiyev Vusal Firdun oglu**, born on **2 October 1992** in **Gurbanefendi** village, **Ismayilli District**, registered in that village and working as a labourer at **"Cengiz Insaat" LLC**, were carrying out their work duties at the **97th kilometre** of **Victory Road**, in **Dashalti** village, **Shusha District**. At that time, they stepped on mines deliberately planted in advance by Armenian armed formations, and as a result of the explosion of those mines, they died at the scene. It was also established that **three** craters had formed next to one another on the ground as a result of the mine explosions. At the same time, there were also unexploded mines near the explosion site. The bodies of the persons harmed by the explosion were found on the ground and on the road surface.

It was established that on **22 September 2023**, at around **12:00**, **Ibrahim Gormez Ali oglu**, born on **21 January 1965**, a citizen of the **Republic of Turkey**, who was performing work in the area of **Khalfali** village, **Shusha District**, on the basis of a subcontract with **"Kolin Insaat Turizm Sanayi ve Ticaret Anonim Shirketi"**, stepped on one of the mines deliberately planted in advance by Armenian armed formations in the direction of the road from the post of the Russian peacekeeping forces stationed in **Shusha District** toward **Shusha** city. As a result, he sustained bodily injuries, and the bulldozer suffered material damage.

According to the protocol dated **22 September 2023** on the inspection of the scene, the place where the mine explosion occurred is a dirt road located in **Khalfali** village, **Shusha District**, near the **Khalfali River**, approximately **2.5 kilometres** from the post of the Russian peacekeeping forces, in the direction of **Shusha** city. The road in question begins at a

forested area. It appears that the **90H435** state-registered bulldozer belonging to **"Kolin Insaat Turizm Sanayi ve Ticaret Anonim Sirketi"** struck a **TM-62P3** anti-tank mine and that the mine exploded. As a result of the mine, the part of the right side of the bulldozer that was in contact with the ground was crushed and damaged. During the inspection, **Ibrahim Gormez Ali oglu** stated that on **22 September 2023**, at around **12:00**, while he was clearing the **Khalfali** road with the bulldozer, a mine planted by Armenian armed formations exploded; as a result, the bulldozer was damaged, and he sustained bodily injuries when pieces of one of the windows of the cabin entered his eye.

According to the protocol dated **7 December 2023** on the inspection of the scene, it was established that one of the mines deliberately planted by Armenian armed formations in an area under their occupation on **19 September 2023**, near a building in **Khankendi** city, **Shusha** city, which had operated under the name **"Star Seven,"** exploded on **7 December 2023**, at around **12:00**…

Page 819

…as a result of which **Habibov Rahim Shirmammad oglu**, born on **2 June 1987**, head of the engineering-geodesy department of the Engineering-Survey Directorate of **"Azerbaijan Scientific-Research and Design-Prospecting Energy Institute" LLC**, who was performing his work duties there, sustained bodily injuries. It was established that near the place where the mine exploded there were signs left by Armenian armed formations.

In addition, according to the protocol dated **2 February 2022** on the inspection of the scene, it was established that on **1 February 2022**, at around **16:00**, **Mikayilov Ismayil Vidadi oglu**, born on **15 May 1996** in **Govdar** village, **Dashkasan District**, and residing in **Veysli** village, **Goranboy District**, was grazing animals belonging to his private household in the direction of **"Garabagh II."** At that time, he died at the scene as a result of the explosion of one of the unexploded cluster bomblets of a cluster-bomb warhead attached to a rocket projectile that had previously been deliberately fired at that area by Armenian military formations during the Second Karabakh War. Thus, in the area where the incident occurred, more than **ten** unexploded cluster bomblets were detected and cleared by employees of the **Mine Action Agency of the Republic of Azerbaijan**. At the same time, there were brownish stains on the ground near one of the exploded bomblets, which confirmed that the deceased had died precisely at that place.

Starting from **27 September 2020**, as a result of the explosion of mines and other similar devices in the territory of **Khojaly District**, a total of **three** civilians sustained bodily injuries of varying severity.

According to the protocol dated **22 July 2021** on the inspection of the scene, it was established that employees of **"Kolin Insaat Sanayi ve Ticaret Anonim Sirketi,"** which was carrying out road-construction work in territories liberated from occupation — **Mahmudov Tahir Polad oglu**, born on **20 September 1998**, a resident of **Qumlaq** village, **Jabrayil District**, and **Mehraliyev Yasin Mehdi oglu**, born on **12 October 1996**, a resident

of **Qizilkand** village, **Imishli District**— on **21 July 2021**, at around **12:00**, while carrying out road-construction work in **Sighnaq** village, **Khojaly District**, liberated from occupation, stepped on mines deliberately planted there by Armenian armed formations during the occupation period. As a result, they sustained bodily injuries. The mine-explosion site was located approximately **300 metres** from the tunnel on the motor road being built in **Sighnaq** village, **Khojaly District**. As a result of the explosion, a circular crater approximately **20 centimetres** deep and **30 centimetres** in diameter was formed on the hill.

According to the protocol dated **14 October 2023** on the inspection of the scene, it was established that, of the two mines deliberately planted on **20 September 2023** by Armenian armed forces and illegal armed formations in the area under their occupation and control, along the road from the field called **Harami duzu** to the field called **Aran duzu** on **Boyuk Oxlu** height in **Khojavand District**, one exploded on **13 October 2023**, at around **05:00**. As a result, **Abilov Fami Ilyas oglu**, born on **9 March 1987**, a resident of **Birinci Shahseven** village, **Beylagan District**, died at the scene, while **Bayramov Namaz Nabadi oglu**, born on **18 December 2000**, a resident of **Ikinci Shahseven** village, **Beylagan District**, sustained serious bodily injuries. At the same time, the **"Qaz 3302"** cargo vehicle that had been used at the scene was completely destroyed by the explosion, while the **"Mercedes-Benz Atego"** vehicle was damaged.

In addition, according to the protocol dated **14 July 2022** on the inspection of the scene, it was established that on **14 July 2022**, at around **14:00**, at the **57th kilometre** of the **Ahmadbayli–Fuzuli–Shusha** motor road, in the territory of **Taghaverd** village, **Khojavand District**, **Yalpiri Yildiray Cuma oglu**, born on **10 December 1987**, a citizen of the **Republic of Turkey** and an excavator operator working at **"Kolin Insaat Sanayi ve Ticaret Anonim Sirketi,"** sustained bodily injuries as a result of the explosion of mines deliberately planted in advance by Armenian armed formations while he was carrying out excavation work with a **CAT D8T** excavator at the exit section of tunnel **T-1**. Since numerous mines were found on the ground around the scene, it was not possible to inspect the area fully.

Page 820

The place where the incident occurred was located near the **Girmizibazar–Khankendi** motor road, which, as of **19 September 2023**, was under the control of separatist Armenian illegal armed formations.

Starting from **27 September 2020**, as a result of explosions of mines and other similar devices in the territory of **Aghdam District**, a total of **eight** civilians were killed, while **twenty-six** civilians sustained bodily injuries of varying severity.

During the investigation, inspections were carried out at the scene for each of the incidents mentioned, the bodies of the deceased persons were examined by forensic medical experts, forensic medical opinions were obtained regarding the injuries sustained by the injured persons and included in the case materials, the legal successors of the deceased persons were

identified and questioned, decisions were issued recognizing the injured persons as victims, witnesses were questioned, and other investigative actions were carried out.

On **3 March 2021**, for the purpose of determining the place where **Azimzade Hafis Salim oglu** was injured, an inspection was carried out in the territory of **Novruzlu** village, **Aghdam District**, with the participation of **Suleymanov Vasif Salim oglu**, **Ismayilov Parviz Mubariz oglu**, **Babayev Elsan Ramiz oglu**, **Zulfuqarov Zulfuqar Tofig oglu**, and others. It was established that mines that were explosive devices had been planted in the territory of **Novruzlu** village, **Aghdam District**, which had been under occupation by Armenian armed forces from **23 July 1993** to **20 November 2020**, along the road passing in front of the house belonging to **Azimzade Hafis Salim oglu**. The area consisted of a flat and treeless place, the ground surface of which consisted of soil and grass cover.

During the inspection of the scene, **Zulfuqarov Zulfuqar Tofig oglu** indicated a road approximately **one metre** wide in the mined area and, approximately **35 metres** from the place where the mine exploded, established a safety strip and, using a mine detector, detected **three** unexploded anti-personnel mines of the **PMN-E** type, which were then destroyed in an open manner using capsule detonators. During the inspection, **Babayev Elsan Ramiz oglu** showed the place where **Azimzade Hafis Salim oglu** had fallen after the mine exploded and stated that on **3 March 2021**, while walking in the direction of the water well located in the indicated area in order to check it, **Azimzade Hafis Salim oglu** stepped on a mine and sustained injuries, after which he was removed from that area with their help. At a distance of **32 metres** from the road, **one** broken walking-stick fragment was found, and **1.95 metres** from that fragment, **one** unexploded anti-personnel mine of the **PMN-E** type was found on the ground. In addition, foot-like stains were found on the ground **0.55 metres** from that mine.

On **3 April 2021**, the area along the bed of the **Khachinchay** river passing through the territory of **Garvand** village, **Aghdam District**, was inspected with the participation of **Salifov Salif Sakit oglu**, **Ibrahimov Rasim Imran oglu**, and **Shukurov Alovsat Mursal oglu**. It was established that at the scene there was a **"Hova"** cargo vehicle with state registration plate **99-JT-474**. The vehicle was damaged from the front and right sides. During the inspection of the scene, **Shukurov Alovsat Mursal oglu** stated that the driver had fallen into the place where the mine exploded; that on **3 April 2021**, while they were travelling in that vehicle, they hit a mine; as a result of the explosion, the vehicle was damaged and he himself sustained injuries. During the measurements, it was established that the depth of the place where the mine exploded was **95 centimetres**, and its diameter was **280 x 210 square centimetres**. Fragments that had exploded from the mine were found at the scene. **Ibrahimov Rasim Imran oglu**, who participated in the inspection of the scene, stated that, based on the dimensions of the mine-explosion site and the fragments found there, the exploded mine was a **TM-62M**anti-tank mine.

The fragments found during the inspection of the scene were duly collected, packed in envelopes, and sealed with the **"For envelopes"** seal of the **Aghdam District Prosecutor's Office**.

It was also established that one of the mines deliberately planted by Armenian military formations in **Sarijali** village, **Aghdam District**, exploded on **2 April 2024**, at around **10:00**, as a result of which **Aliyev Khayyam Gambar oglu**, born on **21 April 1987**, special equipment operator of the mechanical means work unit of the **Mine Action Agency of the Republic of Azerbaijan**…

Page 821

…of the Agency, and the **"LiuGong"** armoured excavator with state registration plate **10-AC-827**, belonging to the Agency, was damaged.

Thus, according to the protocol dated **2 April 2024** on the inspection of the scene, it was established that the place where the mine explosion occurred was located on the left side of the asphalt road leading from the liberated **Sarijali** village of **Aghdam District** to **Uzundara** village of **Aghdam District**. That area had been included during the occupation period in the territory of engineering fortifications established by Armenian military formations, and trenches had been dug there during the period of occupation. It was established that the **"LiuGong"** armoured excavator with state registration plate **10-AC-827**, belonging to the **Mine Action Agency of the Republic of Azerbaijan**, was completely destroyed as a result of the explosion in the rear-left section. A crater with a depth of **70 centimetres** was formed at the front of the excavator as a result of the mine explosion. According to the information provided by employees of the **Mine Action Agency of the Republic of Azerbaijan** who participated in the inspection, the cause of the explosion was precisely an anti-tank mine.

According to the protocol dated **16 December 2021** on the inspection of the scene, the place of the incident was located in the liberated part of **Bash Garvand** village, **Aghdam District**. The scene was on the left side of the **Barda–Aghdam**main motor road, in the direction of **Aghdam** city. The distance from the edge of the road to the scene was **6 metres**. During the inspection, **Ahmad Idrisov**, the excavator driver of **"Korpu-Bina-Tikinti" LLC**, stated that the mine explosion occurred while he was operating the excavator. In addition, **Namiq Balayev**, department head of the **Mine Action Agency of the Republic of Azerbaijan**, who participated in the inspection, stated that, according to the initial examination of the scene, the mine had been buried at a depth of approximately **80–90 centimetres** in the ground and therefore could not be detected by technical equipment; only the heavy machinery striking it caused the explosion. He also stated that, as a result of the explosion, all parts of the mine were destroyed and that, for this reason, it was not possible to find any part of it and determine the type of mine.

According to the protocol dated **29 December 2021** on the inspection of the scene, the place of the incident was located in the bed of the **Khachinchay** river in the territory of **Bash Garvand** village, **Aghdam District**. The scene was on the right side of the riverbed. That riverbed was circular in form, **5 metres** in diameter and **1 metre** deep. Inside the riverbed, **three** different-shaped metal objects were found. Those seized objects resembled mine casings. It was established that the seized crater was located approximately **60–70 metres**

from the river, on the right side, and that there were variously shaped river stones **10 metres** from the right edge of the riverbed. During the inspection, **Vurgun Mammadov**, who operated the **"LiuGong"** excavator with state registration plate **01-K-023**, stated that when the excavator was in an unusable condition, the anti-tank mine on the right side of the excavator exploded, breaking the front and side windows of the excavator cabin, but that he himself was not injured.

According to the protocol dated **27 March 2022** on the inspection of the scene, the place of the incident was located on the 9th kilometre of the **Aghdam–Fuzuli** motor road, in the territory of **Yusifjanli** village, **Aghdam District**, which had been liberated from occupation. During the inspection, **Xaid Mammadov** stated that, while he was carrying out construction work with a **"LiuGong"** bulldozer with state registration plate **01-K-064**, a mine exploded under the lower part of the bulldozer as it was levelling the soil surface; as a result, he was not injured, but the bulldozer sustained material damage. The place where the bulldozer was carrying out construction work was a road intended as an auxiliary road at the **9th kilometre** of the **Aghdam–Fuzuli** motor road. Although the road surface was earthen, its width was **7.80 metres**. The **"LiuGong"** bulldozer had fallen **0.6 metres** from the right side of the road, and the rear-right part had fallen into a damaged condition; the glass of the driver's cabin door and windows had shattered and scattered over the area. During the inspection, **Khalig Zulfigarov**, supervisor of the **Mine Action Agency of the Republic of Azerbaijan**, stated that as a result of the bulldozer's movement, an anti-tank mine had exploded, and that, because no mine casing was found in the area, it was not possible to determine the type of mine.

According to the protocol dated **17 April 2024** on the inspection of the scene, the place of the incident was located in the bed of the **Gargar River** in the territory of **Yusifjanli** village, **Aghdam District**. During the inspection, a **"LiuGong"**grader with state registration plate **01-K-425**…

Page 822

…became unusable after falling into the centre and changing or spreading the soil and/or road-construction materials there, and the windows of the grader driver's cabin were broken and deformed.

During the inspection, **Alim Fataliyev**, who participated in the inspection, stated that while he was levelling the riverbed in order to build a bridge in that area, a mine suddenly exploded; as a result, the machinery he was operating was put out of service, but he himself was not injured. At the same time, other persons working nearby were not injured either. **Khalig Zulfigarov**, supervisor of the **Mine Action Agency of the Republic of Azerbaijan**, who participated in the inspection, stated that the exploded mine had been carried into that area by the flow of water in the river basin, then sank into the soil at the bottom of the riverbed, and that the explosion had occurred due to the pressure of the grader's weight on the soil surface in the riverbed. He stated that the exploded mine was an anti-tank mine; as a

result, the grader had been put out of service, the grader operator had not been injured, and the other persons around him had also not been injured. Since the mine explosion occurred in a wave-like manner, no mine fragments were found at the scene.

Starting from **27 September 2020**, as a result of the explosion of mines and other similar devices in the territory of **Tartar District**, a total of **five** civilians were killed, while **sixteen** civilians sustained bodily injuries of varying severity.

On **18 February 2021**, at around **18:00**, **Mahmudov Bakhtiyar Mahmud oglu**, born on **15 June 1988**, a resident of **Chayli** village, **Tartar District**, stepped on one of the anti-tank mines deliberately planted in advance by Armenian armed formations during the occupation period in **Talish** village, **Tartar District**, and, as a result of the explosion, died at the scene.

In addition, according to the protocol dated **6 October 2023** on the inspection of the scene, it was established that **Hadiyev Yaguar Aliheydar oglu**, born on **30 January 1989**, a resident of **Hasangaya** village, **Tartar District**, on **6 October 2023**, at around **16:00**, died at the scene as a result of the explosion of one of the mines deliberately planted in advance by Armenian armed formations during the occupation period, near an old water-pipe line in the liberated territory of **Chayli** village, **Tartar District**. Thus, at the mentioned place, a crater had formed on the ground as a result of the explosion.

On **13 January 2021**, at around **11:00**, **Ojagverdiyev Alyar Hidayat oglu**, born on **1 April 1960**, tractor driver of **"Road Maintenance" LLC No. 54**, while carrying out cleaning work with a **LiuGong CLG B 160** tractor/bulldozer with state registration plate **10-A-867** around the bridge located on the **Inja River** in the territory of **Talish** village, **Tartar District**, struck an anti-tank mine planted there with terrorist intent by Armenian military formations, as a result of which the explosion occurred and **Alyar Ojagverdiyev** sustained bodily injuries.

According to the protocols dated **13 January 2021** and **14 January 2021** on the inspection of the scene related to the injury sustained by **Alyar Hidayat oglu Ocagverdiyev**, the incident occurred around the bridge built at the intersection of the asphalt road passing through **Talish** village, **Tartar District**, with a water canal. It was established that the part of the tractor's left side where the explosion occurred was completely put out of service, the windows were broken, the cabin was in an unusable condition, and a large crater had formed. Blood-like stains were found inside the cabin.

In the arable area of **110 hectares** leased by citizen **P. Y. Mustafayev** in the territory of **Qiziloba** village, **Tartar District**, the fact that a **John Deere** tractor with state registration plate **90-T75**, belonging to the **MKT-TRTR** branch of **MKT IK** LLC, struck an anti-tank mine and exploded, thereby causing physical harm to that tractor, was confirmed by the protocols dated **28 January 2021** and **27 December 2021** on the inspection of the scene.

Thus, one of the sheep grazing in the unfenced residential area of **Qiziloba** village, **Tartar District**, at a distance of **3 kilometres** from the positions of illegal Armenian armed formations and **2 kilometres** from the line of contact, stepped on an anti-tank mine in an

irrigated field measuring **8 metres** in width and **1,000 metres** in length, and, as a result, the right front wheel, front and…

Page 823

…rear engine parts and the side windows of one **John Deere** tractor with state registration plate **90-T75** were completely rendered unusable. It was also established that a crater **45 centimetres** deep had formed on the soil surface as a result of the right wheel of that tractor striking an anti-tank mine and exploding.

In addition, according to the protocol dated **18 April 2023** on the inspection of the scene, it was established that on **18 April 2023**, at around **17:00**, **Asgarov Elnur Asif oglu**, born on **11 July 1980**, a resident of **Borsunlu** village, **Tartar District**, stepped on one of the mines deliberately planted in advance by Armenian military formations during the Second Karabakh War in the liberated territory of **Borsunlu** village, **Tartar District**, and sustained bodily injuries as a result of the explosion. The place of the incident was an arable field, and numerous mines were found there. A crater had formed on the ground at the place where **Elnur Asgarov** stepped on the mine, due to the effect of the explosion.

In addition, according to the protocol dated **7 October 2023** on the inspection of the scene, it was established that, on **6 October 2023**, at around **20:00**, as a result of the explosion of one of the mines deliberately planted in advance by Armenian armed formations during the occupation period in the liberated territory of **Hasangaya** village, **Tartar District**, **Hasanov Zamaddin Galandar oglu**, born on **2 April 1986**, who had been displaced from **Kalbajar District** and was settled in **Hasanqaya** village, **Tartar District**, sustained bodily injuries.

In addition, according to the protocol dated **26 October 2023** on the inspection of the scene, it was established that, on **26 October 2023**, at around **07:00**, as a result of the explosion of one of the anti-tank and anti-personnel mines deliberately and covertly planted during the occupation period by Armenian military formations in **Shuyuk** village, **Tartar District**, **Mursalov Elchin Khanbala**, born on **1 June 1970**, a resident of **Tazakand** village, **Jalilabad District**, and **Azimov Ayaz Yusif oglu**, born on **10 June 1969**, a resident of **Uzuntapa** village, **Jalilabad District**, who at that time were engaged in irrigating a cultivated field with a **Claas-820** tractor with state registration plate **15-BA-027**, sustained bodily injuries, and the tractor they were operating was completely destroyed. During the inspection, it was established that the scene was an area completely mined during the occupation period by Armenian armed formations, and, during the inspection, employees of the **Mine Action Agency of the Republic of Azerbaijan** found **14** anti-tank mines that had been buried and had not exploded.

In addition, according to the protocol dated **3 November 2023** on the inspection of the scene, it was established that, on **3 November 2023**, at around **02:00**, as a result of the explosion of one of the mines deliberately planted in advance during the occupation period by Armenian armed formations in the liberated territory of **Borsunlu** village, **Tartar District**, **Aghalarov Ali Alibaba oglu**, born on **14 February 1999**, a resident of **Borsunlu** village, **Tartar**

District, sustained bodily injuries. In the vicinity of the place where the mine exploded, it was established that there were trenches and posts dug by Armenian military formations during the occupation period and that the area was mined.

In addition, according to the protocol dated **5 November 2023** on the inspection of the scene, it was established that, on **5 November 2023**, at around **12:00**, as a result of the explosion of one of the mines deliberately planted in advance by Armenian military formations during the occupation period in the territory of **Tapakand** village, **Tartar District**, **Huseynov Asif Novruz oglu**, born on **1 October 1960**, a resident of **Seydimli** village, **Tartar District**, sustained bodily injuries. The place where the mine explosion occurred was located in the territory of **Tapakand** village, **Tartar District**, on the left side of the **Suqovushan–Talish** motor road, approximately **3 kilometres** from the **Suqovushan** reservoir, and **1.2 kilometres** south-west of the old unusable bridge over the **Tartarchay** river in the territory of **Tapakand** village. It was established that, in the vicinity of the place where the mine explosion occurred, there were trenches and posts dug by Armenian military formations during the occupation period, and that the area was mined.

Page 824

On **3 April 2021**, an inspection of the scene was carried out, and it was established that the scene was the left-side section of the footpath leading to combat position No. **5** of the 3rd battalion of the **N-numbered military unit**, located in the territory of **Suqovushan** village, **Tartar District**. When the scene was inspected, it was seen that there was a crater on the ground in the form of an excavated trench, approximately **2 metres** long and **1.5 metres** wide. The said footpath was approximately **10 metres** from the scene and **130 metres** from combat position No. **5**. The scene, which was located on the left side of the other road, was situated on the slope of a mountainous area. From the scene, in the northern direction, **Suqovushan** village was located at an approximate distance of **2 kilometres** by air; in the south, **Aghdam** city was located at an approximate distance of **8 kilometres** by air; in the west, height **951**, where the position of Armenian formations was located, was situated at an approximate distance of **4 kilometres** by air; and in the east, **Chayli** settlement was located at an approximate distance of **13 kilometres** by air. The distance from combat position No. **5** of the **N-numbered military unit** to the position of Armenian formations was approximately **1,500 metres** by air.

According to the protocol dated **19 November 2020** on the inspection of the scene, the place of the incident was located on the western side of the **Omar** mountain range in **Goygol–Kalbajar**, in the defence strip of the 1st battalion of the **N-numbered military unit** of the Ministry of Defence. No objects of evidentiary significance were found at the scene.

According to the protocol dated **8 November 2022** on the inspection, it was established that the scene was located on the right side of the **Fuzuli–Khojavand** road, in the territory of **Veysalli** village, **Fuzuli District**. From the road passing through the checkpoint of the **N-numbered military unit**, the scene was **4 kilometres** away in the direction of **Fuzuli**city.

The width of the road where the incident occurred was **6 metres**, and the width of the right and left shoulders of the road was **2 metres**. To prevent damage from groundwater to the road surface, a water-pipe made of concrete material had been newly installed under the road.

According to the protocol dated **31 March 2023** on the inspection, while **Ahmadov Yusif Elshad oglu**, a civil servant of the **N-numbered military unit**, was being examined, the following items that had been on him at the time he was injured as a result of fire opened from an Armenian firearm were inspected: military trousers, underpants, one pair of khaki shoes, and one pair of black socks. In the lower-left part of the left trouser leg, **49.5 centimetres** from the lower end, **8 centimetres** from the inner seam toward the front, there was one damaged area measuring **47 x 8 centimetres**; on the back of the trouser leg, **50 centimetres** up from the lower-left edge and **7 centimetres** from the left side seam toward the right, there was another damaged area. The edges of those damaged areas were stained with brownish-red blood-like stains, and, on the front part of the garment, from the lower seam of the pocket to **2 centimetres** above the lower seam of the pocket, there were damaged areas of various sizes characteristic of wear.

On the back surface of the right trouser leg, **20 centimetres** above the lower edge and **8 centimetres** from the inner seam toward the right, one damaged area measuring **1 x 0.5 centimetres** was found. No objects or items were found in the trouser pocket.

On the left leg of the underpants, **30 centimetres** above the lower edge, **16 centimetres** from the inner middle seam toward the left, one damaged area measuring **0.5 x 0.5 centimetres** was found; on the back surface of the underpants, **18 centimetres** above the lower edge and **14 centimetres** from the inner seam toward the left, one damaged area measuring **5.5 x 1.2 centimetres** was found.

It was confirmed by other evidence collected in the criminal case that **Vardanyan Ruben Karleni** had committed the acts of which he was accused.

According to the copy of the employment contract dated **16 May 2023** and the copies attached to the records of that employment contract, **Gormez Ibrahim**, without a surname, was hired as a bulldozer operator at the representative office of **"Kolin Insaat Turizm Sanayi ve Ticaret Anonim Sirketi"** in the **Republic of Azerbaijan** from **16 May 2023**.

According to the reference No. **1779/23** dated **16 May 2023**, issued by **Ozturk Mustafa Hilmi oglu**, civil engineer of the representative office of **"Kolin Insaat Turizm Sanayi ve Ticaret Anonim Sirketi"** in the **Republic of Azerbaijan**, **Gormez Ibrahim Ali oglu** was appointed to the position of bulldozer operator at the company's representative office in the **Republic of Azerbaijan** on **16 May 2023**.

Page 825

According to the decision dated **13 January 2021** on recognition as material evidence, the yellow woollen sweater, camouflage-coloured military jacket, shawl, underpants, and

trousers taken from the scene were recognized as material evidence and stored in the special investigation office of the military prosecutor's office as material evidence.

In the letter of the Main Counterintelligence Department of the **State Security Service of the Republic of Azerbaijan** dated **23 September 2024**, No. **2/6489**, it was stated that, as a result of comprehensive agent-operational and operational-technical measures carried out, it had been established that terrorist and sabotage activities were carried out in the occupied territories of the **Karabakh economic region** of **Azerbaijan** by illegal armed formations formed there and other units, as well as by the contingent of Russian peacekeepers during their temporary deployment in **Karabakh** and the surrounding districts.

It was established that, within that organized group, one of the persons known on suspicion of participating in the commission of terrorist acts using firearms, financing terrorism, creating conditions for the commission of terrorism, participating in an organized group for the purpose of committing terrorist acts, unlawfully obtaining, storing, carrying, and transporting weapons, ammunition, explosive substances and devices within the organized group, and creating armed formations and groups not provided for by law, was **Vardanyan Ruben Karleni**, born on **25 May 1968** in **Yerevan**, **Republic of Armenia**, who had acquired citizenship of the **Republic of Armenia** on **15 June 2021**, was registered at **4 Ivanyan Street, Lane 1, Khankendi**, and resided in **Khankendi**.

R. Vardanyan finished secondary school in **1985** and was admitted to the Faculty of Economics of **Moscow State University**. After completing the first year, he performed active military service in the **USSR Armed Forces** in **1986–1988**, and graduated from the university in **1992**. In different years he received short-term education in foreign universities including **INSEAD**, **Harvard**, **Stanford**, and **Yale** in the United States, in the field of **"developing markets."** In **1990**, Russian-born American **Peter Derby** invited him to join his team. After that, **R. Vardanyan** began working at a company called **"Troika."** The company started operating under the name **"Troika Dialog"** on **18 March 1991**. **R. Vardanyan** rose there from expert to president. The company also had offices in the **United States** and **London**. From **2002 to 2004**, while managing the company, he also headed **Rosgosstrakh**. Since **2019**, he has been a member of the boards of directors of **KAMAZ**, **Ameriabank**, **Global Blue Russia Holdings**, and several other companies. In addition to business, he was also known in the field of education. He implemented the restoration of several religious temples in **Armenia**. He was married and had four children.

On **8 April 2022**, he obtained an identity card as a citizen of the **Republic of Armenia**, being registered at **[redacted] Street, Apartment [redacted], Yerevan**, then illegally crossed the state border of the **Republic of Azerbaijan** and came to the territory of the **Karabakh economic region**. On **5 October 2022**, he moved to **Khankendi** and lived at **1 Ivanyan Street, House 4** in **Khankendi**, and also in **Kolatag** village of **Kalbajar District**. He was received by **Araik Harutyunyan**, the **"president"** of the so-called entity, and on **10 November 2022** he was appointed **"state minister"** / **"prime minister"** of the so-called entity. His valid passport of the **Republic of Armenia**, series **AU[redacted]**, was issued on **15**

June 2021, and by Decree No. **935** of the President of the **Russian Federation** dated **22 December 2022**, he was deprived of citizenship of the **Russian Federation**.

In the "position" he held until February 23 of this year, he participated in the formation and organization of armed formations not provided for by the legislation of the Republic of Azerbaijan in the territories temporarily under the control of the Russian peacekeeping contingent in the Karabakh economic region, as well as in supplying those illegal armed formations with weapons, ammunition, explosives, military equipment, and military supplies. These formations organized attacks on institutions, organizations, and individuals that caused the death of people and other serious consequences. Furthermore, knowing that funds and other property would be used, in whole or in part, directly or indirectly, for the terrorist activities of those illegal formations, namely, for the organization and commission of explosions, fires, or other actions (terrorist acts) that posed a threat of death to people, harm to their health, significant property damage, or other socially dangerous consequences,

with the aim of violating public security, creating panic among the population, or influencing decision-making by state authorities or international organizations, he intentionally financed terrorism for that purpose.

According to information obtained by operational means, **R. Vardanyan** financed the activities of illegal armed formations in the territory of the **Karabakh economic region** by directly paying cash funds, as well as by using the capabilities of companies and charitable foundations of which he was the founder, co-founder, or with which he was affiliated, including **“Ameriabank,” “Avrora,” “Artsakh Security and Development Front”**, and the **“Biz ve Bizim Daghlar” (We and our Mountains) Territorial Development Agency**, which existed in **Khankendi** in **2008–2021**.

According to operational information obtained during the investigations, Davit Manukyan, who served as the "first deputy commander of the defense army" of the so-called organization until 2022 (his brother Gegam Manukyan is a Dashnak and a member of the Armenian Parliament), was also a member of the "Artsakh Security and Development Front" public movement established by R. Vardanyan.

In numerous interviews given by **R. Vardanyan** to Armenian and other foreign media representatives through internet resources, he admitted his participation in the formation, organization of activity, and financing of illegal armed formations located in the **Karabakh** region, as well as his illegal crossing of the state border of the **Republic of Azerbaijan** outside border-control checkpoints, specifically:

    Statement by Ruben Vardanyan on moving to Artsakh and creating a Security and Development Front

According to the operational information received, **R. Vardanyan**, with the aim of evading responsibility for the criminal acts he had committed, planned in the coming days to cross the **Lachin** border-crossing point and leave the **Karabakh** region in the direction of the **Republic of Armenia.

The letter No. 3/489 of the Main Directorate of Military Counterintelligence of the State Security Service of the Republic of Azerbaijan dated **March 14, 2024**, stated that "during the measures taken, it was revealed that the telephone numbers [redacted]

Page 827

and [redacted], belonging to the communication network of the Republic of Armenia, were in the use of Vladimir Pogosyan Sergey. Thus, it was determined that on November 11-14, 2020, the leader of the "VOMA" terrorist organization, Vova

Vartanov, had several telephone conversations with V. Pogosyan while he was in the village of Tagaverd, Khojavend region."

During the telephone conversations with **V. Pogosyan**, he drew the latter's attention to the fact that a criminal case had been opened against him in the **Republic of Azerbaijan**, that he had been declared wanted as the head of a terrorist group and organization, and that he was concerned because of this, including the need to apply to senior leadership in order to have the personal composition of the unit he was with replaced. In addition, during the conversation, **V. Vartanov** noted that the unit he commanded was in **Khankendi**, that he himself was in **Khojavand District**, in **Taghaverd** village, with approximately **200** people, and that on **14 November 2020**, according to a previously established plan, they planned to retreat from the direction of **Kalbajar District** together with **70** people. **V. Vartanov** also informed the other person about everything and asked him to help with the evacuation of his unit.

According to the information, **V. Pogosyan** served as assistant to the President of the **Republic of Armenia** on national security issues and adviser to the General Staff of the Armed Forces, and currently regularly participates as a political and military **"expert"** on live broadcasts organized on various topics on social networks, mainly on **Telegram** and **YouTube** channels.

In addition, during the research conducted on social networks, it was found that on **4 November 2020 V. Pogosyan** spoke to the media and stated that he had met in **Shusha** together with **Harutyunyan Jalal Anatolyevich**, who had been so-called **"defence minister"** of the so-called entity at that time, and his brother **Artyom**, who was the head of the police headquarters, and that on that date they had tried to gather a unit and organize the defence of the city.

According to the operational materials obtained, it became known that **V. Pogosyan** maintained regular contact with **Ruben Vardanyan**, who had been **"state minister"** of the so-called entity, and that, in the territory of the **Karabakh economic region**, they held discussions regarding the creation of a special-purpose unit within Armenian illegal armed formations not provided for by the legislation of the **Republic of Azerbaijan**, as well as the purchase of radio-electronic warfare (**REM**) equipment. Although the special-purpose unit was intended to carry out the tasks of the **"president"** of the so-called entity, the issues of financing the creation of that unit and purchasing **REM** equipment had been undertaken by **R. Vardanyan** himself. However, the plans in question were disrupted by the local anti-terrorist operations conducted on **19–20 September 2023**.

The letter of the Main Military Counterintelligence Department of the **State Security Service of the Republic of Azerbaijan** dated **28 March 2024**, No. **3/535**, stated that, during the measures carried out, it had been established that **Vladimir Tevani Vartanov** used the telephone number [redacted] from the communication network of the **Republic of Armenia**; in the **Getcontact** and **Truecaller** databases, the user of that number was registered as **"Vova Vartanov."**

According to the information, **V. Vartanov** was born on **10 December 1965** in **Yerevan**, **Republic of Armenia**, received secondary education at School No. **38** in that city, performed active military service in **special-purpose forces** of the **USSR Armed Forces** stationed in **Lagodekhi**, **Georgia**, in **1984–1986**, studied at the **Faculty of Law** of **Yerevan State University** in **1986–1994**, and joined protest actions when the **"movement"** began in **1988**. He went to the border with **Azerbaijan** and began creating illegal armed formations under the name **"self-defence units."** After forming a reconnaissance unit in **November–December 1989**, he carried out an operation toward **Qazakh District** of the **Republic of Azerbaijan**.

He was one of the founders of those illegal formations. **Sarkisyan Vazgen Zavenovich**, born on **5 March 1959** in the **Ararat** region of the **Republic of Armenia**, served as the commander of the special-purpose unit under Vartanov. He participated in battles as commander of the reconnaissance-sabotage unit in the First Karabakh War…

Page 828

In addition, there was information in the media that **V. Vartanov** was the commander of one of the units that participated in the **Khojaly genocide**.

In **2014**, **V. Vartanov** established the Armenian terrorist organization **"VOMA"** — **"the art of survival"** — in the **Republic of Armenia** and also in the occupied territories of the **Republic of Azerbaijan**. Through the organization's internet resources, extensive propaganda was carried out on topics such as the so-called **"Armenian genocide," "Great Armenia,"** territorial claims against the **Republic of Azerbaijan** and **Turkey**, as well as the activities of Armenian terrorists, etc. The members of the terrorist organization were indoctrinated with absurd ideas that the **Republic of Azerbaijan** and **Turkey** allegedly intended to occupy the lands of **Armenia** and destroy all Armenians, and they were subjected to strong ideological influence on that basis. At the same time, the necessity of every Armenian acquiring combat skills, regardless of age, profession, or gender, for the purpose of supporting the Armenian army in possible wars, was emphasized. A course was announced for citizens of the **Republic of Armenia** and of foreign countries to participate in the organization's training. In **VOMA's** camps, various types of combat were taught, and military courses were conducted on military-tactical training, emergency medical aid, operations in high-altitude areas, shooting, survival in the field, physical training, Armenian **"Kochari"** combat dances, and other such skills, on the basis of a special training programme.

In **2016–2018**, **V. Vartanov** held meetings with representatives of the Armenian diaspora in **18–35** age groups in **six** cities of the **Russian Federation** — **Moscow**, **Saint Petersburg**, **Nizhny Novgorod**, **Yaroslavl**, **Saratov**, and **Krasnodar** — with the support of the Armenian diaspora. He informed them about the activities of the centre and had various propaganda-type conversations with them regarding the necessity of participation.

During the Patriotic War, in the last **three** years, the persons trained by **V. Vartanov** in the organization were recruited to the so-called **"army"** under his command, and combat training was organized on an accelerated basis for **60** volunteers over a short period, with the participation of instructors who lived in different countries and provided support. Unlike previous training, the noted training was held in **Yerevan**, and those who had completed the training and were known as **"VOMA"** volunteers were sent to participate in combat operations. During the Patriotic War, **340** persons under the leadership of the **"VOMA"** terrorist organization took part in battles against the Armed Forces of the **Republic of Azerbaijan**. During that period, a financial fund was created in advance for the activity of the **"VOMA"** battalion, as well as for holding training, and relevant accounts were opened in banks operating in the **Russian Federation**, **France**, **the United States**, **Germany**, and **Austria**. During the war, various persons transferred **200,000 US dollars** to an account allocated for the budget of the **"VOMA"** battalion; according to information as of August **2020**, there were **26,500 US dollars** in the budget account.

It became known that the **"VOMA"** organization received support from forces connected with the **"PKK"** and **"ASALA"** terrorist organizations. **V. Vartanov** supported anti-Turkish ideology and emphasized that he was displeased with the political situation in the **Republic of Armenia**, calling the representatives of the authorities and the policy they pursued a **"child's game,"** and stated that he had no time for it, since his main idea was directed at preparing reserve fighters for the army. It was also established that he had close friendly relations with **Alek Yenigomshian**, one of the active members of the **"ASALA"** terrorist organization.

In addition, **V. Vartanov** stated that the Armenian army had already lost its strength and that, for this reason, it was essential to create an army consisting of civilians. He also intended to bring into the organization more fighters by instilling ideas about the alleged possibility of the **Republic of Azerbaijan** and **Turkey** going to war against **Armenia** in the future. His main idea was to conduct military-preparation training for young people of military age from **Armenia** and the diaspora, including those who voluntarily joined the organization, thereby ensuring the creation of a high-combat-capability reserve force.

V. Vartanov's links with the special service agencies of the **Republic of Armenia** were not excluded. At the same time, acting as a military expert, **V. Vartanov** made propaganda-type statements on the organization's existing internet pages about Armenians living in **Azerbaijan** — the **"Talish-Mugan Republic,"** the **"Lezgi Sadval"** terrorist organization, Udi, Avar, and other minority ethnic groups…

Page 829

…made propaganda-type statements. **V. Vartanov**, who called on those peoples to fight against the **Republic of Azerbaijan** "for their independence," gave false promises to gain success in that direction and emphasized the existence of national minorities living separately.

According to the information received, since **2021** the organization had been preparing operators of unmanned aerial vehicles (**UAVs**). For this purpose, funds were collected from the account ( ) opened in the name of **Ayastan Andranikovna**, a resident of **Sberbank** in the **Russian Federation**, and **six** UAVs and automatic rifles were purchased. During the opening of the organization's branch in the city of Gorus, V. Vartanov voiced the following thoughts: "Armenians should not expect help from anyone to protect the territory of their country; even Russia may stand aside at some point," and emphasized that they will make efforts to ensure that everyone can operate UAVs during the next trainings. It should be noted that the "Instigate Consulting" company operating in Georgia assisted in the purchase of UAVs and the provision of financial support to the "VOMA" terrorist organization. The head of the company is an Armenian national named Artur Azakharov, and he had a mobile phone number, , belonging to the Georgian communication network..

Currently, the organization operates a special training center in Yerevan (Nork Marash district, Armenakyan Street, 121/7, in the backyard of the “Nairi” Hotel; phones: “Vaxo Voma,” and “Hrant Manasyan,” “Eduard Bagdasaryan,” passport No. AB, Yerevan Achapnyak district, Street, house , apartment , “Harmoni Vahe Sardaryan,” “WhatsApp” and “Viber”). The monthly rent for that building was 400 US dollars. Additionally, the instructors and administrators who led the trainings were paid 2,836 US dollars per month. Training and exercises are mainly conducted in the field and cost approximately $200 per person. The organization aims to open branches in various regions and currently has branches in Gafan, Gorus, Sisian, Gavar, Echmiadzin, Yeghegnadzor, and Davtashen.

The organization was financed by taking into account the possibilities of Armenian businessmen living both inside the country and abroad. The training conducted by **“VOMA”** was submitted to the **Ministry of Defence of the Republic of Armenia** as an official proposal. Any person who successfully completed **“VOMA”** training was intended to be used within the reserve army of the **Armed Forces of the Republic of Armenia**, in the composition of this terrorist organization, when necessary. Although the organization was initially a battalion, it later became a staffed brigade structure consisting of **1,500** people. Those wishing to join its ranks included persons of Armenian nationality who wanted to come from European countries as well as from the **Russian Federation**, and the plane tickets and other travel expenses of such persons were paid for by the **“VOMA”** terrorist organization. The age range of persons wishing to join the organization was **16–55**, and one-third of them were persons arriving from abroad.

According to available information, in August **2023**, in the direction of the settlements of **Zod (Sotk)**, **Basarkechar (Vardenis)**, **Gafan**, **Gorus**, **Garakilsa (Sisian)**, and others, located on the conditional state border between the **Republic of Azerbaijan** and the **Republic of Armenia**, fire points called **“GMBET-2”** were established by the Armenian terrorist organization **“VOMA”** for the purpose of strengthening the second and third defence lines. Thus, during possible military clashes, the construction of fortifications intended for the

use of volunteers and reserve forces was carried out at the expense of donations collected from citizens of **Armenia** and abroad. There was information that approximately **200** such fortifications, each costing about **2,300 US dollars**, were currently planned.

In addition, information was shared in the media that, from **31 March to 9 April 2023**, the **"VOMA"** terrorist organization organized engineering camps in the **Republic of Armenia**; that on **22 March 2023**, its members were involved in the construction of defence fortifications; that on **7 April 2023**, a **RQP-7 simulator** worth **17,000 US dollars** was acquired in the **People's Republic of China** for use in the army of the **Republic of Armenia**; that on **27 March 2023** the organization launched an aid campaign with the aim of continuing the construction of defensive fortifications for the **Armed Forces of the Republic of Armenia**; and that on **28 April 2023** it became known that two **"Buggy"** vehicles had been purchased in the **People's Republic of China** for use in the army of the **Republic of Armenia**.

Page 830

According to other information, in April **2023**, **"VOMA"** purchased ammunition worth **20,000 US dollars**, and on **19 June 2023** members of the organization conducted firing exercises using **82-mm** and **120-mm** ammunition; on **7–16 July 2023** they held mountain-shooting training. The organization also organized a new training camp on **16 June 2023** in **Libia**, **France**, with the participation of citizens of the **Republic of Armenia**, the **United States**, **Russia**, and **Austria**.

In addition, information was obtained that in recent times the organization had posted propaganda-type calls on social media for the adoption of a law permitting citizens of the **Republic of Armenia** to possess individual firearms; that on **11 July 2023** and **27 November 2023** three-month artillery courses were launched; that on **1 December 2023** its branch in **Gafan District** began accelerated ten-day military-preparation courses; and that on **3–11 February 2024** it was planned to organize new mountain-shooting military training camps.

The internet resources belonging to the **"VOMA"** terrorist organization were the following:

- www.voma.am
- www.voma.center
- www.youtube.com/channel/UCDtGdMGedT3C5n-1UXw
- www.facebook.com/vomcenter/
- www.vk.com.voma-official
- www.instagram.com/voma.center
- t.me/s/center_voma

During the operational measures carried out, it was established that **V. Vartanov's** regular contact with **Ruben Vardanyan**, who had held the position of **"state minister"** of the so-called entity, was beyond doubt; that **V. Vartanov** had undertaken the preparation of fighters and instructors within the **"VOMA"** terrorist organization, the organization of training, and,

in this connection, the training of members of Armenian illegal armed forces located in the **Karabakh economic region**, their participation in terrorist acts against the **Armed Forces of the Republic of Azerbaijan**, and their participation in battles, while **Vardanyan Ruben Karleni** had undertaken the financing of the organization and of its members.

At the same time, during research conducted on social networks, it became known that **R. Vardanyan** had participated in the **"VOMA"** terrorist organization's training and combat-preparation exercises on **1 May 2022** (https://lurer.com/?p=463373&l=am); that he regularly participated in the organization's meetings; and that, in this connection, he personally bore certain expenses related to the organization's activities in the indicated direction.

It should also be noted that, according to operational information, **Akopyan Armen Volodyai**, **Ohanyan Harut Arayik**, **Dalakyan Xachik Sevada**, **Akopyan Mikael Artur**, **Isayan Hovannes Sasuni**, **Baxshyan Albert Artak**, and **Hovhannisyan Hovhannes Mikael** operated as instructors in the **"VOMA"** terrorist organization and participated, in the territory of **Azerbaijan**, in battles against the Azerbaijani Army within the so-called **"army"**.

The letter of the Main Department for Counterintelligence Support to the Economy of the **State Security Service of the Republic of Azerbaijan** dated **18 March 2024**, No. **4/593**, noted that, according to the materials obtained as a result of the measures carried out, **Vardanyan Ruben Karleni** had carried out the registration of the following companies in the **Russian Federation** under taxpayer identification number [redacted]:

- **"Avtoinvest" LLC** — established on **22 October 2015**; it operated in the field of **"provision of other group financial services, except for insurance and pension services"**; TIN **770433351**.
- **"Breau" LLC** — established on **21 July 2014**; it operated in the field of **"software development"**; TIN (VÖEN) **7702841840**.
- **"Kheyria Infrastructure" LLC** — established on **25 November 2014**; it operated in the field of **"provision of services in accounting, financial audit, and tax consulting"**; TIN **7701415824**.
- **"Vosxod" LLC** — established on **26 February 2015**; it operated in the field of **"securities and other activities…"**

Page 831

...operated in the field of **investments**, TIN (VÖEN): **7704306118**.

- **Q Partners LLC** – established on **17 August 2020**; engaged in business and management consulting; TIN (VÖEN): **9704027767**.

Information was also obtained regarding other legal entities owned by **R. Vardanyan**.

Troika Dialog

On **18 March 1991**, R. Vardanyan, together with Russian-born American businessman **Peter Derbi**, founded **Troika Dialog OJSC**.

In the early 2000s, the company opened offices in **New York** and **London**.

According to the company's financial statements for the end of **2010**, its assets amounted to **USD 5.75 billion**, while its equity totaled **USD 872 million**, and its net profit amounted to **USD 42.346 million**.

In **2012**, the company was transformed into the corporate investment banking division of **Sberbank CIB**.

In **2020**, the company invested in the online video interview platform **VCV**; in **2021**, it invested in the online dating service **Ins Dating** and in the electric vehicle manufacturer **Kama**.

Vardanyan, Broitman and Co.

In **2013**, R. Vardanyan, together with his partner at **Troika Dialog**, **Mikhail Broitman**, established **Vardanyan, Broitman and Co.**

The company specializes in asset management, fundraising, and transaction support.

As of **2018**, **75%** of the company's shares belonged to R. Vardanyan.

The company is a shareholder in **Ameriabank**, the transport operator **UFS**, as well as venture projects including **Lamoda**, **Pronutria**, and **NtechLab**.

In **2013**, R. Vardanyan acquired **50%** of the investment fund of **Avica Management Company**, which had been established by **Gagik Adibekyan** under the name **RD Group**.

In **2018**, the partners agreed to divide company assets worth approximately **USD 1 billion**.

As a result, the business brands **Romanov Dvor** and **Vozdvizhenka** remained under the ownership of R. Vardanyan.

Global Blue Russia

In **2018**, the company **Global Blue** and R. Vardanyan established **Global Blue Russia**.

The company was engaged in processing VAT refund services in Russia.

Information was also obtained regarding numerous companies in which **Veronika Zonabend**, the spouse of R. Vardanyan, held senior management positions.

Among these, **Q Capital LLC** appears as one of the principal entities.

The founder of that company was **TD Advisors** (registered in the **Cayman Islands**).

Companies and organizations founded by V. Zonabend include:

- Avika;
- Reklamnoye Agentstvo Mediakart;
- Innova Kosmetike;
- Grvez;
- Feniks Grupp;
- Onimedia Novarqo;

- PBVM Media;
- Upravlyayushchaya kompaniya Avika;
- Blagotvoritelny Fond Shkoli Mira.

Among other companies founded by R. Vardanyan, the investigation identified: **Krasnaya Pakhra**, **Filgud**, **AP Byuro**, **Klub Vremena Goda**.
Among entities in which he held ownership interests, the following were identified: **Lavr**, **Shkoli Mira**, **Tsentr E.M. Primakova**, **Atlanti**, **Atlanti-Innovatsii**, **Atlanti-Severo-Zapad**, **Association Skolkovo**, **Fond Cheresnevyi Les**, **Gnbisi Agro**, **Ingeo**, **VPQ**, **Klub-2015**, **Fond razvitiya ekonomicheskogo fakulteta MGU**, **Luchano**, **NTS**, **VLK Properties**, **VBP**, **Fort**, and **PAU**.
In addition, **IDEA** is a multi-purpose non-profit foundation established in Armenia. According to the foundation's official website (**www.idea.am**), the foundation was established and financially supported by **Ruben Vardanyan** and his partners.

Page 832
Among the projects of the non-profit organization are the **"Development of Dilijan"**, **"Artsakh Project"**, and the restoration of the **Holy Gevorg Church** in Tbilisi.
The **"Our Mountains and We" Regional Development Agency** was established by Ruben Vardanyan and his associates in **November 2022** with the declared objective of ensuring reliable and high-quality communication with the local population living under blockade conditions in the Karabakh region of Azerbaijan. The Agency is registered at **6 Baghramyan Avenue, Yerevan**.
According to the available information, the principal purpose of establishing the Agency was to implement projects of public significance in the so-called **"NKR"**. During its operation, the Agency reportedly spent **USD 2,717,900** on projects implemented in the so-called "NKR."
According to information published on the official website of the **Aurora Humanitarian Initiative Foundation**(*auroraprize.com*), the Foundation was established in **2015** in the Republic of Armenia at the initiative of **Vardan Gregorian, Noubar Afeyan, and Ruben Vardanyan**. The Foundation is registered at **3 Akop Akopyan Street, Yerevan**.
Aurora presents itself as a charitable foundation seeking to address humanitarian problems worldwide and to assist those living in poverty. It also states that it was established in gratitude to those who rescued survivors of the Armenian genocide.
During **2020–2023**, within the framework of the **"Aurora Artsakh"** program, the Foundation implemented humanitarian assistance projects in the so-called "NKR" in the fields of healthcare, social development, infrastructure rehabilitation, education, culture, and sports.
The persons serving on the Foundation's governing board include:

- **Noubar Afeyan** (representative and Chief Executive Officer of *Flagship Pioneering Company*);
- **Anna Afeyan** (co-founder of the Afeyan Foundation);
- **Antony Barsamyan** (member of the Board of *Hutching Barsamian Mandelcorn*);

- **Eric Esrailian** (physician, film producer, investor, philanthropist, and nominee for an Emmy Award);
- **Ara Darzi** (Imperial College London, Institute of Global Health Innovation);
- **Arisa Grinvald** (representative and director of *Memory Matters*);
- **Arman Jilavyan** (advisor to the Aurora Humanitarian Initiative Foundation since 2015);
- **Laura Kleindir** (Vice President of *Flagship Pioneering Company*).

According to information available regarding the Armenian separatist structure known as the **"Artsakh Security and Development Front,"** the movement was reportedly created in **May 2023** in the city of **Khankendi** by Armenian activists in order to **"counter existing threats"**.
It is alleged that **Ruben Vardanyan** served as the leader of the movement.
The executive committee of the **Artsakh Security and Development Front** consisted of:

- Ruben Vardanyan (Coordinator);
- Davit Manukyan;
- Narine Aghabalyan;
- Andranik Sarkisyan;
- Garik Abrahamyan;
- Nauk Avanesyan.

The movement's day-to-day activities were carried out by its executive committee.
The movement also maintained a Facebook page in Armenian under the same name (FBID: **100092774383652**).
The declared objectives of the platform were:

- to unite the political forces, organizations, initiatives, and individuals associated with the former **"Nagorno-Karabakh Republic"** and strengthen cooperation among them;
- to mobilize the diaspora potential relating to the situation in the former **"Nagorno-Karabakh Republic,"** increase awareness of developments, and undertake measures to attract international attention;
- to promote the **right of the people of Artsakh to self-determination**, prepare a comprehensive security and development plan and an **"Artsakh Road Map"**;
- to support the activities of the **Artsakh Security and Development Front** and develop ideas for the post-war reconstruction of **Artsakh** and the Armenian world.

According to Letter No. **2/1775** of **4 April 2024** issued by the Main Counterintelligence Directorate of the State Security Service of the Republic of Azerbaijan, it was established that Ruben Karlenovich Vardanyan's mobile telephone contained a contact saved under the name **"SS"**, associated with the number [redacted] registered in the GetContact application as **"Vladimir Pogosyan"** and **"Vladimir Gen K. (kam)"**.
The subscriber using that telephone number was identified as **Vladimir Pogosyan**, born on **30 July 1965**, registered at [redacted], **Apt.** [redacted], [redacted] **Avenue, Yerevan, Republic of Armenia**, who served as an adviser to the Prime Minister of the Republic of Armenia on national security matters.

It has been established that **Vladimir Sergeyevich Pogosyan**, an expert who participated in the **First Karabakh War**, served as an adviser to the **Minister of National Security of the Republic of Armenia** and as an adviser to the **Assistant to the President of the Republic of Armenia for National Security Affairs**. He is also known as a political scientist and public figure.

It has been established that V. Pogosyan maintains the Telegram channel **"t.me/VladimirPogosyan_Official"**, as well as the Instagram accounts **"instagram.com/armvsp2020"** and **"instagram.com/armvsp2020_"**. In addition, he is a regular guest on the YouTube channels **"Noyan Tapan"** (youtube.com/noyantapan) and **"Radio Van"** (youtube.com/radio_van), and hosts the local television program "A Sincere Conversation with Vladimir Pogosyan".

In one of his public speeches, V. Pogosyan made open calls directed against the Jewish people, supported the Holocaust, used slogans advocating the eradication of the Jewish nation from the face of the earth, and called upon his audience to join him. At the same time, V. Pogosyan was the founder and chairman of the pro-Western opposition movement **"Committee 27."**

V. Pogosyan publicly called for strikes against strategic and civilian facilities of the Republic of Azerbaijan.

He participated in the formation and organization of illegal armed groups in the territories of the Republic of Azerbaijan that were under occupation, in violation of the legislation of the Republic of Azerbaijan; in providing such groups, organizations and individuals with weapons, ammunition, explosives, military equipment and logistical support; in organizing and participating in combat operations; in the illegal circulation of weapons, their component parts, ammunition and explosive devices; and in organizing and carrying out the occupation of the territories of the Republic of Azerbaijan.

Operational measures established that, with the financial support of **R. Vardanyan**, V. Pogosyan carried out extensive activities aimed at ensuring that Armenians remained in the settlements where Russian peacekeepers were temporarily deployed, preventing the return of those territories to Azerbaijan, facilitating their renewed occupation, creating illegal armed special-purpose units, and acquiring unmanned aerial vehicles. Those activities were financed by R. Vardanyan. However, as a result of local counter-terrorism measures carried out by the Armed Forces of the Republic of Azerbaijan on **19–20 September 2023**, those plans were not brought to completion.

According to Letter No. **2/1105** dated **28 February 2024** of the Main Department of Counter-Intelligence of the State Security Service of the Republic of Azerbaijan, it was established that **Ruben Karlenovich Vardanyan**, born on **25 May 1968**, registered in the Russian Federation under taxpayer identification number **77070073992**, established the following companies:

- **Avtoinvest LLC** – established on **22 October 2015**; engaged in the provision of insurance and pension-related services, as well as other financial services not included in other categories; TIN (VÖEN): **7704333351**.

- **Breau LLC** – established on **21 July 2014**; engaged in the development of computer software; TIN (VÖEN): **7702841840**.
- **Xeyriyyə İnfrastruktur LLC** – established on **25 November 2014**; engaged in accounting, financial auditing, tax consultancy and related professional services; TIN (VÖEN): **7701415824**.
- **Vosxod LLC** – established on **26 February 2015**; engaged in investment activities involving securities and other financial instruments; TIN (VÖEN): **7704306118**.
- **Feel Good LLC** – established on **15 January 2020**; engaged in the development of computer software; TIN (VÖEN): **7726461484**.
- **Phoenix Group LLC** – established on **8 May 2019**; engaged in legal services; TIN (VÖEN): **7704490442**.
- **Impact Future LLC** – established on **31 August 2021**; engaged in the activities of holding companies; TIN (VÖEN): **9704085938**.
- **Avika Management Company LLC** – established on **17 December 2015**; engaged in business and management consulting; VÖEN 7704339547.

Page 834

- **Phoenix Advisors LLC** – established on **2 July 2015**; engaged in the provision of legal services; TIN (VÖEN): **7704321170**.
- **Q Partners LLC** – established on **17 August 2020**; engaged in business and management consulting; TIN (VÖEN): **9704027767**.

· In addition, **IDEA** is a multidisciplinary non-profit foundation established in the Republic of Armenia. According to information published on the Foundation's official website (**www.idea.am**), the Foundation was established through the initiative and financial support of **Ruben Vardanyan** and his partners.

According to the information available, the **"Our Mountains"** initiative was established by Ruben Vardanyan to ensure the creation of an effective communication mechanism for the local Armenian population living under blockade conditions in the Karabakh region of Azerbaijan.
According to information published on the website **auroraprize.com**, the **Aurora** initiative was established by **Vartan Gregorian**, **Noubar Afeyan**, and **Ruben Vardanyan**, and is registered in the Republic of Armenia.
According to the information published on the website, the Foundation was created to provide assistance to people facing humanitarian problems around the world and as an expression of gratitude to those who saved Armenians during the “Armenian genocide”.
According to open sources regarding the **"Artsakh Security and Development Front,"** the organization was established in **May 2023** in the city of **Khankendi** by Armenian activists, and it is likely that **Ruben Vardanyan** served as its leader.
The organization maintained a Facebook page (FBID: **100092774383652**).
According to **Letter No. 3/225 of 7 February 2024** from the Main Department of Military Counterintelligence of the State Security Service of the Republic of Azerbaijan, during

clearance operations in the vicinity of **Kolatag village, Kalbajar District**, illegal Armenian armed formations fired upon Azerbaijani military personnel from the following locations:

- the **Basarkend** residential area of **Khojaly District** (coordinates **x4437193, y8635226**), using **artillery pieces**, military equipment, numerous rounds of ammunition, and at least **one automatic firearm**;
- the area near **Hayad village, Aghdara District** (coordinates **x4434778, y8640907**), approximately **5.5 km north-west of Kolatag village**, where artillery assets belonging to the illegal armed formations were deployed.

According to operational information, the following individuals were associated with those positions:
Avanesyan Seyran Aharoni, Avanesyan Gevorg Aharoni, Hakobjanyan Albert Eduardi, Hakobjanyan Garik Eduardi, Aghasyan Samvel Aregi, Aghasyan Mher Rashidi, Gabrielyan Gagaik Manveli, Gabrielyan Suren Manveli, Aghasyan Sasun Ranti, Aghasyan Shahen Arturi, Gabrielyan Arsen Arkadyayi, Gabrielyan Armen Arkadyayi, Balasyan David Oniki, Harutyunyan Harut Kamoyi, Aghasyan Vahram Llyazi, Babayan Samvel Arturi, Avanesyan Paylak Hranti, Yesayan Tatul Rashidi, Hakobjanyan Suren Gariki, Hakobjanyan Albert Eduardi, Gabrielyan Kamo Alyoshayi, Zakaryan Davit Andraniki, Avanesyan Nauk Alexey, Gabrielyan Gagik Manveli, Harutyunyan Zaven Kamoi, Khachatryan Nver Grigori, Harutyunyan Andranik Bhaturi, Gabrielyan Mkhitar Hovhannesi, Avanesyan Hrant Artemi, Babayan Artur Beniki, Aghasyan Vrezh Ilyazi, Avanesyan Areg Sergey, Hakobyan Narine Arturi and Gngoryan Seyran Mikhail
;and others.
It was established that, during the period of occupation, these individuals used the above-mentioned weapons and ammunition, and following the local anti-terrorist measures carried out by the Armed Forces of the Republic of Azerbaijan on **19–20 September 2023**, a considerable quantity of weapons and ammunition was seized from the locations concerned.

Page 835

In addition, during the investigation of social media, attention was drawn to statements made in interviews with mass media by **Seyran Aharoni Avanesyan**, who introduced himself as the head of the **Kolatag village community of Kalbajar District**.
The following sources were identified:

According to Letter No. **3/225** dated **7 February 2024** of the **Main Counterintelligence Directorate of the State Security Service of the Republic of Azerbaijan**, it was stated that **Ruben Karleni Vardanyan** began working in **1990** at a company called **"Troyka"** at the invitation of **Petr Derbin**, an American of Russian origin.

The company, which had offices operating in the **United States** and **London**, continued its activity from **18 January 1991** under the name **"Troyka Dialog."** R. Vardanyan rose there from the position of expert to the position of president of the organization.
In **2002–2004**, while managing the company, he also served as General Director of **Rosgosstrakh**.
He was a member of the boards of directors of **Kama AO**, **Ameriabank**, **IRIS Dating**, **Philgood** (**10%**), **Global Blue Russia Holdings**, **VCV** (**New Information System**), **Petrovaks Farm** (**NGO**), and several other companies.
R. Vardanyan founded, within the territory of the **Russian Federation**, the **Skolkovo** school, the **Atlants Club**, the companies **VBP** and **Noodome**, as well as the **Dilijan United World College** (**UWC Dilijan**), and the **Aurora** and **Future Armenia** foundations. Since he possessed wealth in the amount of **USD 1 billion**, he was included in the list of the **200 richest persons** in that country.
R. Vardanyan, together with **Anatoly Chubais**, Chairman of the **Rosnano** joint-stock company of the Russian Federation, **German Gref**, Chairman of the Management Board of **Sberbank**, and also through connections with organized criminal groups, carried out **money laundering**.
Thus, sanctions were imposed against him for organizing **money laundering** through **Hungary**, but he overcame that matter through his connections in that country.
In addition, it became known that, on the basis of Decree No. **726** of the President of Ukraine dated **19 October 2022**, sanctions were imposed against R. Vardanyan in his capacity as a shareholder of the company **Volga-Dnepr**.
According to Letter No. **249** dated **30 November 2023** received from the **Main Military Counterintelligence Directorate of the State Security Service of the Republic of Azerbaijan**, it was stated that **Ruben Karlenovich Vardanyan** entered the **Faculty of Economics** of **Moscow State University** in **1985**; after completing the first year, he performed compulsory active military service in the **Armed Forces of the USSR**, and in **1992** graduated from the said educational institution.
R. Vardanyan began business activity in **1990** with the support of **Peter Derbi**, a citizen of the **United States of America** of Russian origin. He completed advanced training courses in the field of economics at educational centers in **Italy**, the **United States**, **France**, and **Great Britain**.
Thereafter, he began working at the company **"Troyka,"** which had offices in the United States and Great Britain and which, from **18 January 1991**, was called **"Troyka Dialog."** There, he rose from the position of expert to the position of president of the organization.
In **2002–2004**, R. Vardanyan managed that company and also managed **Rosgosstrakh**. In addition, he was a member of the boards of directors of **Kama AO**, **Ameriabank**, **IRIS Dating**, **Philgood**, **Global Blue Russia Holdings**, **VCV**, **Petrovaks Farm**, and several other entities.
Within the territory of the Russian Federation, he founded the **Skolkovo** school, the **Atlants Club**, the companies **VBP**and **Noodome**, as well as the **Dilijan United World College** (**UWC Dilijan**), and the **Aurora** and **Future Armenia** foundations. Since R. Vardanyan possessed wealth in the amount of **USD 1 billion**, he was included in the list of the **200 richest persons** in that country.

According to information published in open sources
(https://compromat.group/main/_investigations/82414-dengi-zachislyaem-virtualnyy-schet-shefa-chubaysa.html,
https://svoboda.org/aZ29812458.html, and
https://minval.az/news/124299110),
R. Vardanyan, together with **Anatoly Borisovich Chubais**, Chairman of the **Rosnano** joint-stock company of the Russian Federation, **German Gref**, Chairman of the Management Board of **Sberbank**, and also through connections with organized criminal groups, carried out **money laundering**.

Thus, sanctions were imposed against R. Vardanyan for organizing **money laundering** through **Hungary**...

Page 837

however, through his connections in that country, he succeeded in having the matter "resolved." In addition, it became known that, under Decree No. **726** of the President of Ukraine dated **19 October 2022**, sanctions were imposed against **R. Vardanyan** in his capacity as a shareholder of the company **"Volga-Dnepr."**

R. Vardanyan is married to **Veronika Feliksovna Zonabend**, born on **8 February 1967**, Jewish by nationality, a citizen of the **Russian Federation** and **Great Britain**, registered at **Apartment** [redacted], **Building** [redacted], [redacted] **Prospekt, Moscow**, as well as at [redacted] [redacted] **Street,** [redacted]**, London**. They have **four children**.

V. Zonabend studied economics in Great Britain and completed an advanced training course at a business school in France. According to the available information, V. Zonabend, who currently serves as director of **"UWC Dilijan" School**, together with her sister **Irina Feliksovna Zonabend**, born on **22 June 1973**, a citizen of the **Russian Federation** and **Great Britain**, founded the art paintings company **"Mount Gallery"** in London.

Their son, **David Rubenovich Vardanyan**, born in **1995**, a citizen of **Great Britain**, studied at **Westminster School** in London from **2009 to 2014**. In **2016**, he performed active military service in the "defence army" of the so-called **"Nagorno-Karabakh Republic"** and, during that period, was placed under medical treatment in connection with health problems that arose. **D. Vardanyan**, who currently lives in Singapore, works there as Deputy Director of **"Novatek Asia Development Holding RTE."**

Their daughter, **Margarita Rubenovna Vardanyan**, born in **1997**, a citizen of **Great Britain**, currently lives in **New York, USA**. **M. Vardanyan**, who works at **"Carnegie Corporation,"** is also a member of the management board of the Russian-origin company **"Noodome,"** which belongs to her father. R. Vardanyan's other children are minors.

In addition to the above, on **8 April 2022**, R. Vardanyan obtained identity card No. [redacted] of the Republic of Armenia, having been registered at **Apartment** [redacted]**, Building** [redacted]**,** [redacted] **Street, Yerevan**. On **5 October 2022**, he was registered at **Building 1, Lane 4,**

Ivanyan Street, Khankendi city, located within the **Karabakh economic region of Azerbaijan**. It was further established that, on **15 June 2021**, R. Vardanyan obtained ordinary passport No. **AU** [redacted] of the Republic of Armenia.

R. Vardanyan, who renounced citizenship of the **Russian Federation** on **1 September 2022**, was stripped of citizenship on the basis of Decree No. **935** signed by that country's President **Vladimir Putin** on **22 December 2022**. On **4 November 2022**, he was appointed **"state minister"** of the so-called **"Nagorno-Karabakh Republic"** by its president **Araik Harutyunyan**, and held that position until **23 February 2023**. During the period in which he served as "state minister" of the so-called entity, he created an organization called the **"Front for the Liberation of Karabakh."** R. Vardanyan was awarded the orders of **"Saint Mesrop Mashtots"** and **"Saint Gregory the Illuminator."**

According to the available information, representatives of the illegal regime formed in the territories of Azerbaijan that had been under occupation for many years committed environmental crimes by unlawfully exploiting the natural resources of the Karabakh region. Thus, mineral resources from the **"Gulyatag" copper mine**, located in the territory of the former **Aghdara District** — now **Tartar District** — with a total area of **498.5 hectares** (**4.98 km²**), were plundered by Armenians and transported to the **Republic of Armenia**.

Letter No. **3/1484** dated **14 August 2024**, received from the **Main Military Counterintelligence Directorate of the State Security Service of the Republic of Azerbaijan**, states that representatives of the illegal regime formed in those territories carried out large-scale mining activities there during the period before the Patriotic War, as well as during **2020–2023**. Thus, since **November 2020**, a total of **4,051** mines buried by illegal Armenian armed formations in the territories of **Dashkasan, Kalbajar, Lachin and Shusha Districts** have been discovered. The majority of those mines were produced in the territory of the **Republic of Armenia** in **2021**. As a result of mine explosions, **69 persons** — **15 military servicemen** and **54 civilians** — were killed, while **300 persons** — **166 military servicemen** and **134 civilians**— sustained bodily injuries of varying severity.

Page 838

During the operational-search measures conducted, information was received that, during the period when **Ruben Karlenovich Vardanyan** was the "state minister" of the so-called entity, mine-laying activities were further accelerated, and that he personally assumed all financial costs.
In addition, prior to the anti-terrorist operations carried out on **19–20 September 2023** against the illegal Armenian armed formations located in the territory of the Republic of Azerbaijan, it was established by our side that mine-laying activities in those territories were financed from the personal funds of **Ruben Karlenovich Vardanyan** and were carried out on the direct instructions of him and other leaders of the said entity.

Letter No. **3-25-11/2-1272/2024** dated **30 July 2024**, received from the **Main Directorate of Engineering Troops of the Ministry of Defence of the Republic of Azerbaijan**, states that, beginning from **November 2020**, the following mines, presumably planted by the Armed Forces of the Republic of Armenia in the territories of **Dashkasan**, **Kalbajar**, **Lachin**districts and **Shusha** city, were discovered:

86 anti-tank mines of the **TM-62M** type,
38 anti-tank mines of the **TM-62P2** type,
1 anti-tank mine of the **TM-57** type,
127 anti-personnel mines of the **PMN-2** type,
3,794 anti-personnel mines of the **PMN-E** type,
5 anti-personnel mines of the **OZM-72E** type,
in total **4,051** mines.

It appears from the markings on many of those mines that they were manufactured in **Armenia in 2021**.

No.	Date discovered	District	Village / area	Coordinates (SK-42 system)	Mine type	Quantity	Manufacturer country and date of manufacture

According to that letter, the following information was provided to the **Prosecutor General's Office of the Republic of Azerbaijan** regarding persons who died and sustained injuries as a result of the explosion of the mines in question, as of the date the letter was sent in **November 2020**:

Killed, persons		**Total**	**Injured, persons**		**Total**
Military servicemen	Civilians		Military servicemen	Civilians	
15	54	69	166	134	300

It was stated in Letter No. **3/1890** dated **17 October 2024**, received from the **Main Military Counterintelligence Directorate of the State Security Service of the Republic of Azerbaijan**, that, during research conducted on social networks, information was obtained concerning the establishment of a so-called **"government"** by **Ruben Vardanyan**, who had been the "state minister" of the so-called entity, and also by **Noubar Afeyan** and **Vartan Gregorian**, founders of the **Aurora** humanitarian organization.

In addition, open sources revealed information that, in the period after the Patriotic War, the **Aurora** organization implemented the **"Aurora for Artsakh"** project for persons of Armenian origin living in the territories under the control of the Peacekeeping Contingent of the Russian Federation.

In particular, **USD 2,200,000** was allocated to support **93** projects, **65** of them from Armenia, as well as projects initiated by international partners.
Furthermore, **Mirza Dinnayi**, a laureate of the **Aurora Prize** in the field of **"Awakening Humanity,"** a public figure of Yazidi Kurdish origin, born in **1973** in the Republic of Iraq and currently residing in the city of **Venice**, Republic of Italy, travelled to the city of **Khankendi** on **9 December 2020** at the invitation of **R. Vardanyan**.
During that visit, **M. Dinnayi** met with **Artak Beglaryan**, who was the "ombudsman" of the so-called entity, visited a rehabilitation centre named after **Caroline Cox**, a member of the Parliament of the United Kingdom and supporter of the so-called entity, and attended the opening of a sewing factory restored by **Aurora**.
It was also established that, during the visit, he met with the father of a 20-year-old serviceman who had fought against the Armed Forces of the Republic of Azerbaijan during the Patriotic War as part of illegal Armenian armed formations and had been killed, and subsequently visited that serviceman's grave.
It was further established that, on **21 December 2020**, **M. Dinnayi** shared on his Facebook social-media page a meeting held via the **Zoom** programme with **R. Vardanyan**, the latter's wife **Veronika Zonabend**, and members of the **Aurora** organization.
During the meeting, he shared his impressions of his latest visit to Karabakh with the founders of **Aurora** and members of the team; discussed what they could do for persons of Armenian origin who had suffered damage after the humanitarian projects and the Patriotic War; and noted that, in recent months, **20** projects with a value of **USD 200,000** had been financed at the initiative of the said organization.
In addition, in **2020**, a postage stamp dedicated to **M. Dinnayi's** visit to the Republic of Armenia was prepared and put into circulation in the Republic of Armenia.
During his visit to the Republic of Armenia, **M. Dinnayi** held meetings with representatives of local Yazidi Kurds.

According to the operational information received, on **R. Vardanyan's** instructions and in connection with the **Aurora** organization, other activities were also carried out in the city of **Khankendi**. Thus, on account of funds obtained through the projects implemented by the initiative groups established by them, persons of Armenian nationality and Kurdish origin who were members of illegal armed formations were...

Page 841

...provided them with military uniforms worth **seventy thousand** US dollars.
Further, on **22 April 2021**, under the financial support of the non-governmental organization **"Air Bridge Iraq-Luftbrücke Irak,"** headed by **M. Dinnayi**, training entitled **"Trauma Training"** was held in the Republic of Armenia for teachers working with students who had suffered psychological trauma after the war, as well as with vulnerable groups, and also for representatives of social workers. The partner of the course was **"Dilijan United World College"**(**"UWC Dilijan"**).
It was established that **M. Dinnayi** made a number of posts on social media platforms supporting the so-called entity and **R. Vardanyan**.

In addition, according to the available information, **Rüstem Bakoyan**, a deputy of Yazidi origin and member of the **"My Step"** faction in the Parliament of the Republic of Armenia, stated in a press release dated **28 September 2020** that many representatives of the Yazidi community had voluntarily enlisted and been sent to fight in Karabakh, and that, in addition to the Yazidis, a detachment called **"Karam Sloyan"** had been created on **27 September 2020** in the village of **Aknalich**, Armavir Province, Republic of Armenia. It was later noted that two more detachments were created for that purpose.

In addition, according to the information obtained, during the Patriotic War, a detachment formed by the Yazidi **Temur** and his brother **Onnik Kotoyan** fought against the Armed Forces of the Republic of Azerbaijan. Although **T. Kotoyan** was killed, his brother **O. Kotoyan** later distinguished himself in the battles around **Jabrayil**.

It was established that, in the initial period of the Patriotic War, **R. Vardanyan** launched a campaign called **"Do you recognize me? Artsakh."** / **"Recognize me? Recognize Artsakh"**, attempting to secure international public recognition of the so-called entity.

According to Letter No. **3/2178** dated **29 November 2024** of the **Main Military Counterintelligence Directorate of the State Security Service of the Republic of Azerbaijan**, it was stated that, following the local anti-terrorist operations conducted by the Armed Forces of the Republic of Azerbaijan on **19–20 September 2023** in the Karabakh economic region for the purpose of neutralizing the Armenian illegal armed formations, **three weapons and ammunition depots** created in the territory of **Khankendi city**, at the expense of funds by **Ruben Karlenovich Vardanyan** during the period when he was the "state minister" of the so-called entity, were identified:

- a facility located in **Khankendi city**, at **8 S. Kasparov Street** (**x4410740, y8650423**, according to information obtained through the **Google Maps** application), in the vicinity of the building probably belonging to the so-called entity's **"Ministry of Justice"** and the administrative building presumed to belong to the so-called entity's **"judicial authorities"**, near a **4–5-storey residential building**;
- a facility located on the road called **"Stepanakert-Lernavan-Aygestan"** (**Khankendi city**), outside the residential area (**x4412768, y8650179**, according to information obtained through the **Google Maps** application), used as an ammunition depot of the so-called entity's **"Defense Army"**;
- a facility located near the intersection of **"Tigran Mets"** Road with the area called **"Azatulyan Hraparag"**(**Khankendi city**) (**x4411833, y8651149**, according to information obtained through the **Google Maps** application), in the military settlement of the headquarters of the so-called entity's **"Defense Army."**

During the relevant investigation conducted, the following list was established of a large quantity of ammunition that had been stored in those depots, had been used by the criminal association, and, after the anti-terrorist operations, was seized as military trophies:

No.	Type	Quantity
1	5.45 mm PS cartridge	7,858,250 pcs
2	5.45 mm T cartridge	1,297,350 pcs

3	5.45 mm US cartridge	85,700 pcs
4	7.62 mm T-45 cartridge	1,205,200 pcs
5	7.62 mm PS cartridge	5,582,400 pcs
6	7.62 mm LPS cartridge	283,920 pcs

38	125 mm D-81 VBM	185 pcs
39	125 mm D-81 VBK	210 pcs
40	72.5 mm RPQ-26	24 sets

It was stated in Letter No. **3/2138** dated **25 November 2024**, received from the **Main Military Counterintelligence Directorate of the State Security Service of the Republic of Azerbaijan**, that, during research conducted on social networks, it was established that the video footage had been recorded on the slope of a hill on the bank of the **Badara River**, located in the territory of **Khojaly District** (coordinates: **39.906947, 46.655509**).

In addition, it was determined that the tree-shaped emblem in the upper-left corner of the video footage was the symbol of an organization called the **"Artsakh Security and Development Front,"** and that this organization had been established by **Ruben Karlenovich Vardanyan** on **18 May 2023**.

At the same time, information was found in open sources indicating that the idea of establishing the organization had been put forward by **R. Vardanyan** during the period when he was the "state minister" of the so-called entity. It should be noted that the commander of the **"Artsakh Defence Army"** for combat training in **2019–2021, Manukyan Davit Azatovich**,

was also a member of the board of the organization **"Artsakh Security and Development Front."**

During searches conducted on the **Facebook** social network, information was obtained that, on **17 August 2023**, with the support of the aforementioned organization, as well as the **"Youth Clubs Alliance,"** a sports and tactical games project called **"DAVIT VEK"** was implemented.

Thus, it was established that the **"DAVIT VEK"** project is a competition organized every year in the summer period for schoolchildren from various regions of the Republic of Armenia, with the aim of equipping them with military knowledge. In that competition, participants are taught how to use various weapons, survive in extreme conditions, set up tents in mountainous terrain, and assemble and disassemble weapons.

It was established that the said competition was organized in different months of **2023** with the participation of boys and girls aged **16–18**, and that its budget amounted to approximately **USD 212,000**.

For the purpose of collecting donations for the **"DAVIT VEK"** project, the **Ameribank** bank of the Republic of Armenia, the **Citibank** bank for transfers in US dollars, **Raiffeisen Bank International** for transfers in euros, and **Raiffeisen Bank Russia** for transfers in Russian rubles were used. It was also established that the project was supported by the organization **"We Are Our Mountains,"** founded by **R. Vardanyan**.

According to the operational information obtained, in the territory of the **Karabakh economic region**, training sessions were held for terrorist purposes under the name of the **"DAVIT VEK"** sports and tactical games project, involving minors as well as persons from various age groups and members of the terrorist organization **"VOMA."**

Within the framework of that project, under the pretext of providing participants with various military knowledge, instructors of the terrorist organization **"VOMA"** conducted training for terrorist purposes. This contradicts the fundamental principles on the prohibition of the use of children in armed conflicts, as reflected in the **Geneva Conventions of 1949**, the **Additional Protocols of 1977**, and the **1989 Convention on the Rights of the Child** and its **Optional Protocol of 2000**.

Thus, during the analysis of the said video footage, it was assessed that the person training the young people was the organizer of the terrorist organization **"VOMA,"** and there were grounds to conclude that he participated in the formation of units of that organization. There are sufficient photographs and video materials in open sources (**OSINT**) concerning the recruitment of minors to such training.

Thus, photographs were published on the **Instagram** social network account of the Armenian-origin photographer **David Qahramanyan**, who lives in **Khankendi city**, at www.instagram.com/davidqahramanian/, as well as on the **Facebook** social network account of the Armenian-origin blogger **Gagik Harutyunyan**, at https://www.facebook.com/GaqikIdentity. In addition, the above-mentioned video recordings showing the recruitment of minors to military training were published on the **BUDROOO NEWS** YouTube channel at https://www.youtube.com/watch?v=1 VyHNVcL5Y.

In addition, it was established that, during the period in which the illegal separatist regime existed, information posted on **7 August 2023** on the **"HAYORDI"** page of the **"Youth Clubs Alliance"** on the **Telegram** social network stated that a news item entitled **"The Artsakh Youth Training Camp is Being Held in the Artsakh Mountains"** had been shared.

It was also noted that the photographs posted on that page showed approximately **50** persons wearing uniform-type clothing climbing an artificial rock in a forested camp area, setting up camp-style tents, and that some participants were holding objects resembling weapons (t.me/youth_clubs_alliance/795, t.me/youth_clubs_alliance/820, t.me/youth_clubs_alliance/828).

In addition, according to the information obtained, after the **Patriotic War**, particularly during the period when protests began in the **Lachin corridor**, the activity of the said **Telegram** page increased. Their main purpose was to involve more young people in various public events and to draw the attention of the world to **"the danger of displacement of Armenians living in Karabakh."**

It was established that **R. Vardanyan** regularly participated in events organized by the said organization.

It was determined that **R. Vardanyan** assumed responsibility for organizing the noted military training, preparing fighters and instructors, as well as financing the organization and its members.

Page 844

Four **"processor"** units seized from the office of the accused **Ruben Karlenovich Vardanyan** in the city of **Khankendi** were recognized as material evidence in the case and handed over to the material evidence storage room of the Main Investigation Department of the State Security Service for safekeeping until their fate is resolved by a final court judgment.

One **Apple iPad Pro** tablet, one **BlackBerry** mobile phone, and one **Nokia** mobile phone belonging to the accused **Ruben Karlenovich Vardanyan** were recognized as material evidence in the case and handed over to the material evidence storage room of the Main Investigation Department of the State Security Service for safekeeping until their fate is resolved by a final court judgment.

It appears from the content of the inquiry submitted through the **"Entry–Exit and Registration" IAMAS** system in the name of the accused **Ruben Karlenovich Vardanyan** that he has never officially crossed into the territory of the Republic of Azerbaijan through border control checkpoints located at the state borders.

Pursuant to Order No. **304** dated **30 October 2020** of the commander of military unit **"N"**, in order to convene military officials called to the military training assembly, to keep the combat readiness of the Armed Forces of the Republic of Azerbaijan and the State Service for Mobilization and Conscription at a high level, and to complete unit sections, the soldier **Rahimli Vusal Taghi oglu**, who had come from the state service, was, as of **30 October 2020**, included in the personnel list of the military unit, entered into all types of supply, and appointed to duties. He was appointed as a crew rifleman of the 3rd squad of the 1st platoon of the 13th company of the 5th battalion of that military unit.

Pursuant to Order No. **28** dated **26 January 2021** of the commander of military unit **"N"**, in connection with the execution of Order No. **274** of the Minister of Defence dated **25 December 2020**, the military official called to the training assembly in the Armed Forces of the Republic of Azerbaijan, soldier **Rahimli Vusal Taghi oglu**, was, as of **21 January 2021**, removed from the personnel list of the military unit and from all types of supply and was sent

to the **Lankaran District Department** of the State Service for Mobilization and Conscription for registration.

Pursuant to Order No. **32** dated **30 January 2021** of the commander of military unit **"N"**, in order to maintain the combat readiness of the military unit at a high level and to fill vacant positions, serviceman **Ahmadov Murad Vugar** was appointed from the position of crew rifleman of the 1st squad of the 1st platoon of the 13th company of the 5th battalion of that military unit to the position of crew rifleman of the 1st squad of the 3rd platoon of the 9th company of the 3rd battalion.

During the investigation, a military overcoat, a military sweater, a sleeveless undershirt, a military scarf, military trousers, warm long underwear bottoms, one pair of soldiers' boots, one pair of socks, one **7.62 mm** cartridge case and seven **5.45 mm** cartridge cases belonging to **Azizov Ragib Vidadi oglu** were recognized as material evidence and handed over to the storage room of the Special Investigation Department for safekeeping.

It was established that, acting on incoming information that the illegal armed formations created by Armenian armed persons with national hatred and hostile intent had taken positions on **Ziyaratgah height**, located in **Aghjakend village** of the liberated **Khojavand** District, a group consisting of servicemen of military unit **"N"** was formed, and at about **01:00** on **12 December 2020**, they went to the said area. After it was determined that Armenian servicemen were present in that area, they were offered to abandon the positions they had occupied. Despite this, the members of the illegal armed formations created by the Armenians with national hatred and hostile intent carried out a sudden attack operation on positions of the Armed Forces of Azerbaijan with superior numbers of unknown individuals in order to kill them intentionally, and opened fire from weapons of various calibres. As a result, servicemen of military unit **"N"**, **Huseynov Azer Mahal oglu** and **Abbasov Avaz Mayis oglu**, were killed at the scene, while other servicemen — **Habibov Nicat Mahir oglu**, **Imanaliyev Farid Jabir oglu**, **Babayev Abbas Yadulla oglu**, **Bagiyev Rashad Gudrat oglu**, **Mammadov Elcan Elbrus oglu**, and **Javadov Khayyam Zafer oglu** — sustained bodily injuries of varying degrees and were immediately evacuated to the military hospital of military unit **"N."**

Pursuant to the decision adopted on **31 March 2021**, a military sweater, two long-sleeved undershirts, a short-sleeved undershirt, military trousers, warm...

Page 845

...lower underwear, underwear, one pair of soldier's boots and one pair of socks, and also a military long-sleeved shirt, military sweater, long-sleeved undershirt, right glove, sleeveless undershirt, back support, balaclava cap, military trousers, warm lower underwear, one pair of soldier's boots, one pair of socks and the left glove belonging to soldier **Abbasov Avaz Mayis oglu**, were recognized as material evidence in the case; due to the large volume of those items of material evidence, they were packed and placed in the material evidence storage room of the Special Investigation Department for safekeeping.

On **13 December 2020**, at around **16:20**, as a result of a mine explosion in **Shikhlar village**, **Aghdam District**, the following servicemen of military unit **"N"** of the Ministry of Defence were wounded: **Hasanli Ayaz Hasrat oglu**, chief rifleman of the 3rd squad of the 1st platoon of the 15th company of the 5th battalion; **Huseynov Samistan Sabir oglu**, serving as grenadier in that squad; **Ibragimov Vugar Ayaz oglu**, driver of that platoon; **Akbarov Samir Safar oglu**, physician of the medical station of that military unit and lieutenant of the medical service; and **Asgarov Anar Talman oglu**, commander of the 15th company of the 5th battalion, first lieutenant.

It was established that **Ibragimov Vugar Ayaz oglu**, serving as driver of the 1st platoon of the 15th company of the 5th battalion of military unit **"N"** of the Ministry of Defence, on **13 December 2020**, at around **14:00**, together with **Huseynov Samistan Sabir oglu**, serving as grenadier of the 3rd squad of the 1st platoon of that company, left the area of the unit in which they were serving in order to inspect the former positions of the Armenian armed formations located in the liberated territory of **Shikhlar village**, **Aghdam District**, and went to the combat position. While moving along a trench route, first **V. A. Ibragimov** stepped on an anti-personnel mine, as a result of the explosion of which he sustained **"blast trauma, traumatic amputation of the lower third of both lower limbs, and hemorrhagic-traumatic shock of the third degree."** Thereafter, **S. S. Huseynov**, who was following him, also stepped on another anti-personnel mine and, as a result of the explosion, sustained **"blast trauma and subtotal traumatic amputation of the lower third of the left lower limb."**

After that, **Hasanli Ayaz Hasrat oglu**, chief rifleman of the 3rd squad of the 1st platoon of the 15th company of the 5th battalion, who came to the area to assist his service comrades, stepped on an anti-personnel mine and sustained **"a fracture of the left foot, fractures of the bones of the lower third of the leg, lower-leg bone, foot-heel bone and foot-leg bones, and subtotal amputation of the first toe."**

When the physician of the medical station of the military unit, **Akbarov Samir Safar oglu**, lieutenant of the medical service, who had come to the area in order to provide medical assistance to the aforementioned servicemen, was beside **A. H. Hasanli**, another anti-personnel mine exploded. As a result of that explosion, **S. S. Akbarov** sustained **"barotrauma."**

While evacuating soldiers **S. S. Huseynov**, **V. A. Ibragimov** and **A. H. Hasanli**, the commander of the 15th company of the 5th battalion, first lieutenant **Asgarov Anar Talman oglu**, stepped on an anti-personnel mine and, as a result of the explosion, sustained **"blast trauma, shock wave injury, small-sized laceration of the right cheekbone area of the face."** Soldier **Gurbanov Jeyhun Ashraf oglu** sustained **"blast trauma, shock wave injury."** Captain **Hasanov Jamil Gadi oglu** sustained **"mine-explosion trauma, barotrauma, bilateral neurosensory hearing loss after the shock wave, grade I, and crushing injury of the soft tissues of the upper third of the right thigh,"** and they were evacuated to military unit **"N."**

Pursuant to Order No. **361** dated **15 December 2020** of the commander of military unit **"N,"** lieutenant **Hasanov Jamil Gadi oglu** was relieved of his former position and appointed assistant to the commander of that military unit for legal affairs.

It was established by the court that, on the basis of the order dated **10 December 2020** of the commander of military unit **"N"** of the Ministry of Defence, entitled **"On the preparation of positions for permanent combat operations, the preparation of observation posts, supply, evacuation and communication routes, of open and covered shelters, engineering preparation of combat positions for the winter season, and provision thereof,"** the following servicemen of the engineering-fortification battalion of that military unit — **Talibli Asif Soltanaga oglu**, chief engineer-fortifier of the 2nd platoon of the engineering-fortification team, and **Ibadov Mahammad Shahruddin oglu**, fortification specialist of the 1st section of the road-clearance team of the mine-clearance company of that battalion — on **14 December 2020**, at around **13:10**, under the leadership of chief lieutenant **Kamran Haciyev**, assistant to the chief of the engineering service of the military unit, went to the vicinity of **Marzili village** of the liberated **Aghdam District**, where an Armenian position had previously been located and

Page 846

...while carrying out mine-clearing work at the **33rd combat position**, soldier **A. S. Talibli** stepped on an anti-personnel mine. As a result of the mine explosion, he sustained injuries diagnosed as **"mine-explosion injury, traumatic amputation of the lower third of the left leg, shrapnel wounds to both lower limbs, superficial shrapnel wounds to the right calf, traumatic-hemorrhagic shock, grade II,"** causing serious harm to health resulting in the permanent loss of more than one third of general working capacity.

Soldier **M. Ş. Ibadov** sustained injuries diagnosed as **"explosion trauma, foreign bodies in the subcutaneous soft tissues of the posterior region of the right auricle, abrasions on the right side of the face and neck."** They were evacuated to military hospital **"N."**

On the basis of an inquiry by the chief of staff of military unit **"N,"** it was established that, on **14 December 2020**, at around **13:10**, on the territory of **Aghdam District**, after servicemen of the engineering-fortification company of the military unit — soldier **Talibli Asif Soltanaga oglu** and soldier **Ibadov Mahammad Shahruddin oglu** — sustained injuries as a result of a mine explosion, it was likely that the area had been mined. For that reason, movement to that location was restricted and it was not possible to conduct an inspection of the scene.

It was established by the court that **Eminov Elmdar Hasan oglu**, major and assistant to the chief of the operations department for planning of military unit **"N"** of the Ministry of Defence; **Aghayev Asaf Abid oglu**, chief lieutenant and commander of the radio section of the communications company of that military unit; and soldier **Ismayilov Javad Asif oglu**, driver of the motor-vehicle section of the material-technical supply company of that military unit, were performing a combat mission on **17 December 2020** at around **11:10** in the

territory of **Khintaghlar village**, **Jabrayil District**, travelling in a **Great Wall** vehicle with military registration plate **J311QQ**. At that time, as a result of the explosion of a tank mine laid in advance by Armenian separatists, **A. Aghayev** and soldier **J. Ismayilov** were intentionally killed, and an attempt was made to intentionally kill **E. Eminov**.

By a decision dated **29 March 2021**, a military jacket, military sweater, long-sleeved undershirt, sleeveless undershirt, military trousers, warm lower underwear, and a cap belonging to **Chief Lieutenant Aghayev Asaf Abid oglu**; a military jacket, military sweater, long-sleeved undershirt, military trousers, and warm lower underwear belonging to **Ismayilov Javad Asif oglu**; as well as a **Great Wall** vehicle with military registration plate **J311QQ**, belonging to military unit **"N"**of the Ministry of Defence, were recognized as material evidence and handed over to the storage room of the material evidence of the Special Investigation Department for safekeeping.

By a decision dated **31 December 2020**, a **KamAZ 43114** truck with military registration plate **E-727-QQ**, belonging to military unit **"N"** of the Ministry of Defence, was recognized as material evidence and handed over to the said military unit for safekeeping.

It appears from Order No. **295** dated **13 December 2020** of the commander of military unit **"N"** that **Huseynli Etibar Javid oglu**, lieutenant and commander of the headquarters and supply company, and **Gurbanov Tarlan Tacaddin oglu**, a military serviceman serving beyond the fixed term and squad commander of the headquarters and supply company, were assigned from the military unit's sub-units to search for mines in territories liberated from occupation and to detonate munitions.

It appears from Order No. **241** dated **21 August 2019** of the commander of military unit **"N"** that, since **2 August 2019**, junior sergeant **Gurbanli Mahabbat Maharram oglu** had been appointed to the position of driver and included in the personnel list of that military unit and in all types of supply.

It was established by the court that **Orucaliyev Ibrahim Burceli oglu**, deputy commander for material-technical supply of the 2nd battalion of military unit **"N"** of the Ministry of Defence, lieutenant colonel; **Mammadov Elvin Islam oglu**, commander of the economic section of the material-technical supply company of that military unit, junior sergeant; and **Hashimov Ilgar Etibar oglu**, commander of the 1st squad of that section, soldier, on **21 December 2020**, at around **16:30**, travelling in a **Ural** vehicle with military registration plate **F552QQ**, belonging to the military unit, set off for **Kechikli village** of **Zangilan District**, which had been liberated from occupation by Armenian armed formations several days earlier. While they were travelling in the area of that village to deliver equipment necessary for a strategic height,

Page 847

...the explosion of an anti-tank mine that had been planted in advance by Armenian armed formations happened. As a result of the explosion, **Lieutenant Colonel Ibrahim Orucaliyev**

sustained injuries diagnosed as **"mine-explosion injury, open wounds of the left half of the forehead and the right temple area, lacerated wounds of the left half of the upper lip, closed dislocation of the 5th metatarsal bone of the right foot and of the medial ankle, and of the left medial and lateral ankles."**

Junior Sergeant Elvin Mammadov sustained injuries diagnosed as **"mine-explosion injury, wounds to the left thigh area, lacerated wound to the posterior surface of the left hip joint, lacerated wound to the posterior surface of the right foot, open dislocation of the first toe of the right foot, closed fracture of the first metatarsal bone, hemarthrosis of the right ankle joint, lacerated-cut wounds of the posterior surface of the right hand, and open bone-defect fracture of the distal phalanx of the third finger."**

Soldier Ilgar Hashimov sustained injuries diagnosed as **"mine-explosion injury, contused wounds of the left half of the forehead and the right calf, and contusion of the soft tissues of various parts of the body,"** and, in this way, an attempt was made to intentionally kill them.

According to the decision dated **22 December 2020** on refusal to inspect the scene, **Orucaliyev Ibrahim Burceli oglu**, Lieutenant Colonel, deputy commander for material-technical support of military unit **"N"** of the Ministry of Defence and commander of the material-technical support company of that military unit; **Mammadov Elvin Islam oglu**, Junior Sergeant, commander of the vehicle section of the economic team of the material-technical support division; and **Hashimov Ilgar Etibar oglu**, Soldier, commander of the 1st vehicle section of that division, were, on **21 December 2020**, at around **16:30**, travelling in a **Ural** vehicle with military registration plate **F552QQ**, belonging to the military unit, to **Kechikli village** of **Zangilan District**, which had been liberated from the occupation of Armenian armed formations several days earlier. At that time, as a result of the explosion of an anti-tank mine planted in advance in the area, they received various bodily injuries. Taking into account that the area in question had mountainous terrain, there were no road conditions in that area, and there was a real danger that mines planted in advance by members of Armenian armed formations in that area could explode and cause danger to human life and health, it was not possible to inspect the scene.

According to the letter sent by the head of the medical unit of military unit **"N"** to the **Fuzuli Military Prosecutor's Office**, serviceman **Eliyev Emin Suleyman oglu** of military unit **"N"** was evacuated to that military unit and underwent appropriate surgical operations. The clothing he was wearing at that time was completely cut off and removed. However, since at the indicated dates servicemen with numerous injuries were brought to the military hospital during the counter-offensive operations carried out against the unlawful armed formations of the Republic of Armenia, and since surgical operations were being performed, his clothing was deemed useless and was destroyed.

By decision dated **15 April 2021**, in criminal case No. **1185383**, **980235**, **433728**, **4347654**, **817899**, and one **AK-74**assault rifle, **14** assault rifles, **14** assault-rifle magazines, **277** cartridges of **5.45 mm** calibre, **4** cartridge cases, **1** cartridge case, and a uniform jacket

belonging to **E. R. Gambarov**, camouflage-pattern military trousers, long-sleeved warm underwear, warm lower underwear, a gray T-shirt, lower underwear, one pair of boots and one pair of socks were recognized as material evidence. The military ammunition, the military jacket belonging to military unit **"N"** of the Ministry of Defence, the camouflage-pattern military trousers, long-sleeved warm underwear, lower underwear, gray T-shirt, lower underwear, one pair of boots and one pair of socks belonging to **E. R. Gambarov** were stored in the Special Investigation Department.

By decision dated **23 February 2021** on recognition as material evidence, a camouflage-pattern uniform jacket, trousers, sweater, lower underwear and one pair of soldier's boots belonging to **Shabanov Vusal Zabit oglu** and found at the scene in criminal case No. **22D/48740** were recognized as material evidence and stored in the storage room of the Special Investigation Department.

By decision dated **3 March 2021** on recognition as material evidence, a warm jacket, jacket, sweater, long-sleeved lower garment, camouflage-pattern military trousers with a white belt, civilian T-shirt, civilian lower underwear, the left sole of a soldier's boot, socks, cap, and the part of military trousers found at the scene, together with a blood sample belonging to **Q. F. Tagiyev**, were recognized as material evidence and stored in the storage room of the Special Investigation Department.

According to an extract from Order No. **338** dated **30 November 2020** of the commander of military unit **"N"** of the Ministry of Defence, soldier **Tagiyev Qiyas Fariz oglu** was appointed to the position of driver of the vehicle section of the material-technical support company of the 4th motorized rifle battalion.

Page 848

It appears from the protocol dated **2 January 2021**, drawn up by **Ibrahimli Nariman Tohit oglu**, investigator of the **Fuzuli Military Prosecutor's Office**, that the body of **Warrant Officer Maharramov Vasif Uzeyir oglu** and the military clothing that had been on him at the time of the incident were inspected with the participation of a forensic medical expert and a laboratory assistant.

According to the search report dated **15 January 2021**, drawn up by **Hasan Hasanli**, investigator of the **Fuzuli Military Prosecutor's Office**, it was not possible to inspect the scene of the incident because the place where the incident occurred was a mined area and the mines there had not yet been cleared.

By decision dated **15 March 2021** on recognition as material evidence, the camouflage-type winter jacket, camouflage-type sweater, gray long-sleeved shirt of the warm underwear set, trousers of the warm underwear set, one white T-shirt, thermal shirt of the military uniform, trousers of the field uniform set, and white lower underwear belonging to the deceased **Maharramov Vasif Uzeyir oglu**, who was the victim in the criminal case, were recognized

as material evidence and placed in the storage room of the **Special Investigation Department**.

It was established by the court that, on **23 December 2020**, at around **00:15**, near the building of **Road Maintenance LLC No. 55** of the **State Agency of Azerbaijan Automobile Roads**, located in the territory of **Chapli village**, **Kalbajar District**, at least two members of an Armenian armed group, acting with the intention of killing, due to national hatred and hostility, opened fire at close range with automatic weapons, while others opened fire from the surrounding heights, at the service vehicle of the **internal troops** and employees of the **Kalbajar District Police Department** of the Ministry of Internal Affairs, who were performing service in the area. However, as a result of return fire by the servicemen of the internal troops and the employees of the Kalbajar District Police Department, the members of that group moved away from the scene.

It was established by the court that **Mukhtarov Sarkhan Ilgar oglu**, captain and company commander of the 1st battalion of military unit **"N"** of the **State Border Service Border Troops "Gubadli" Border Detachment**, together with **Safarov Majid Jalil oglu**, soldier, line supervisor of the communications team of that battalion, were travelling in a **Mitsubishi** vehicle with military registration plate **F449QQ**, which was under the latter's control, in order to distribute fuel to the combat posts of the 1st battalion located in the territory of **Zangilan District**. On **12 January 2021**, at around **13:00**, while moving toward **Yukhari Yemazli village** of **Zangilan District**, the vehicle struck an anti-tank mine that had previously been planted by unidentified members of Armenian armed formations. As a result of the explosion, serviceman Captain **Mukhtarov Sarkhan Ilgar oglu** died at the scene from his injuries, and soldier **Safarov Majid Jalil oglu** was evacuated to military hospital **"N"** with various bodily injuries.

It was established by the court that, as a result of the mine explosion, the **Mitsubishi** vehicle with military registration plate **F449QQ**, belonging to military unit **"N,"** with an initial cost of **285 manats**, became unusable and material damage was caused to the military unit. Therefore, **Abbasov Vitaliy Shahbaz oglu**, head of the automobile service of military unit **"N,"** was recognized as the representative of the injured party; the said vehicle was handed over to **Safarov Majid Jalal oglu**, soldier of the 1st battalion of that military unit; and, as a result of the incident, it was not possible to repair the vehicle and return it to use.

By decision dated **15 March 2021** on recognition as material evidence, the camouflage-type winter jacket, camouflage-type sweater, black long-sleeved shirt of the warm underwear set, military field-uniform trousers, lower underwear, two pairs of black socks and one pair of black boots belonging to **Mukhtarov Sarkhan Ilgar oglu** were recognized as material evidence and placed in the storage room of the **Special Investigation Department**.

Pursuant to Order No. **81** dated **19 December 2020** of the commander of military unit **"N,"** Captain **Mukhtarov Sarkhan Ilgar oglu**, by Order No. **01307** dated **17 December 2020** of the Minister of Defence of the Republic of Azerbaijan, was appointed to the position of commander of the 2851st Motorized Rifle Battalion; was recorded as having arrived from

military unit **"N"** of **Gazakh District**; as of **19 December 2020**, was included in the personnel list of the military unit and in all types of supply; and began performing his duties.

By decision dated **29 April 2021**, the part of the military jacket that belonged to **Javadov Rashad Farzali oglu** and that had been on him at the time of the incident,

Page 849

... a dark-green piece resembling part of a military tunic, a light-brown long-sleeved undershirt, and a dark-green military-trouser piece with a belt, were kept in the material evidence storage room of the Special Investigation Department of the Military Prosecutor's Office of the Republic of Azerbaijan.

Pursuant to the decision dated **17 May 2021**, clothing items recognized as material evidence and belonging to soldier **Gubad Zeynalov** and the injured persons, as well as **two separated parts of "Smerch" multiple-launch rocket system shells** and **parts of the munitions of four explosive devices**, were stored at the Military Prosecutor's Office of the Republic.

Pursuant to the decision dated **29 April 2021** on recognition as material evidence, a sweater, trousers, lower trousers and one left shoe belonging to **Hasanov Alihasan Tumar oglu** in the criminal case were recognized as material evidence and stored in the storage room of the Special Investigation Department.

It appears from Order No. **16** dated **15 January 2021** of the commander of military unit **"N"** that soldier **Hasanov Alihasan Tumar oglu** was appointed from his previous position to the position of rifleman of the 1st section of the 2nd team of the 3rd company of the 1st battalion of the said military unit as of **13 January**.

It was established by the court that, on **26 February 2021**, at about **17:00**, approximately **10** servicemen of the engineering-intelligence unit of the **Gubadli Separate Border Division** of the State Border Service, in accordance with the relevant order of their commander, were carrying out mine-clearance work in the territory of **Ashaghi Khojamsagli village**, **Gubadli District**, when anti-personnel mines, which had previously been planted in the area by unknown members of Armenian armed formations, exploded. As a result, servicemen **Azizli Nureddin Gurbeddin oglu**, **Alishanov Elmaddin Chingiz oglu**, **Nagiyev Vagif Shamil oglu**, and **Ibrahimov Vugar Elkhan oglu** sustained bodily injuries of various degrees and were evacuated to the military hospital of the State Border Service. In addition, during the explosion of the second mine, **Maharramov Alim Ilgar oglu**, a junior warrant officer and serviceman of the engineering-intelligence unit, and **Nazarov Hacinazar Eldaniz oglu**, a warrant officer and feldsher of the medical station of the division, were evacuated to hospital with a diagnosis of **"barotrauma."**

Since the scene of the incident was located on the line of contact with Armenian military formations and there was a mine danger in the area, it was not possible to inspect the scene.

Pursuant to the decision dated **23 March 2021**, adopted by **Hasanli Hasan Seyfaddin oglu**, investigator of the **Fuzuli Military Prosecutor's Office**, fragments of the anti-personnel mine discovered at the scene were collected and seized in accordance with the protocol on the same date.

Pursuant to the decision dated **6 May 2021** on recognition as material evidence and the content of receipt No. **388**, a khaki-coloured uniform jacket, a gray jersey, a long-sleeved undershirt, and a military field jacket, which had been found and seized from **Hacizada Ruhid Alim oglu** and **Hacizada Anas**, who were with him at the time of the incident; olive-coloured trousers with a black belt at the waist, a gray shirt of the warm-underwear set, black trousers of the warm-underwear set and black socks; as well as three dark-red body fragments of an anti-personnel mine discovered and seized at the scene, a gray piece of soil and earth mass, and three black-coloured parts of a **PMN-type anti-personnel mine** submitted by military unit **"N"**, were recognized as material evidence and handed over, in packaged condition, to the material evidence storage room of the Special Investigation Department.

It was established by the court that, on **4 April 2021**, at around **13:20**, warrant officer **Alakbarov Sahil Dilsuz oglu**, commander of the 2nd section of the 3rd team of the 3rd rapid-reaction company of the rapid-reaction battalion of the **Gubadli Separate Border Division** of the State Border Service, together with **Ziyadov Rustam Ali oglu**, captain and deputy commander of the 8th Border Commandant's Office for material-technical supply, were travelling in a **KAMAZ**vehicle bearing military registration plate **Q-341-SQ**, driven by the latter, in the territory of **Bartaz village**, **Zangilan District**, when the vehicle struck and detonated an anti-tank mine previously planted in the area by unknown members of Armenian armed formations acting with national hatred and hostile intent. As a result, warrant officer **Alakbarov Sahil Dilsuz oglu** sustained injuries constituting serious harm to health, namely **compression fracture of the body of the seventh thoracic vertebra, dislocation fracture of the left hip and right lower-leg bones, crushing of the soft tissues of the left upper limb, and...**

Page 850

...post-traumatic brachial plexopathy," and Captain **Ziyadov Rustam Ali oglu** sustained an injury classified as causing minor harm to health, namely **"a lacerated wound of the right parietal region,"** and they were evacuated to the military hospital of the **State Border Service**.

It appears from the report dated **4 April 2021**, drawn up by **Jabbarov Tarlan Farhad oglu**, senior investigator of the **Fuzuli Military Prosecutor's Office**, a second-rank lawyer, that, because the scene of the incident was a mined area and because the mines there had not yet been cleared, the vehicle was not removed from the scene, and inspecting the vehicle and the area at the scene was dangerous to life and health.

Pursuant to the decision dated **11 June 2021** on recognition as material evidence, trousers, a gray pair of trousers, a black long-sleeved shirt and a T-shirt belonging to **Alakbarov Sahil**

Dilsuz oglu were recognized as material evidence and stored in the material evidence storage room of the **Special Investigation Department**.

It was established by the court that, on **5 April 2021**, **Haciyev Cavanshir Nadir oglu**, a serviceman serving beyond the fixed term and junior warrant officer of military unit **"N"** of the **Gubadli Separate Border Division** of the **State Border Service**, acting on instructions given by the leadership of the military unit, participated in an operation to clear mines from the area of the 1st border post of the 11th border outpost of the 4th Border Commandant's Office, located in the territory of **Ashaghi Khojamsagli village**, **Gubadli District**, which had been liberated from occupation. On the same day, at around **18:00**, he stepped on an anti-personnel mine that had previously been planted in the area by unidentified members of Armenian armed formations. As a result of the explosion, he sustained injuries causing serious harm to health, namely **"explosive injury, piercing wound of the breast, blind shrapnel wound of the area under the right shoulder, perforating wounds of the lower-left eyelid, the eyebrow arch of the left eye and the upper eyelid of the left eye, and numerous shrapnel wounds accompanied by post-traumatic amputation of the middle third of the right calf,"** and was evacuated to the hospital of the **State Border Service**.

According to the report dated **5 April 2021** drawn up by **Tagiyev Ergun Namiq oglu**, senior investigator of the **Fuzuli Military Prosecutor's Office**, and the report submitted to the Fuzuli Military Prosecutor's Office by Major General **Ramin Baghirov**, commander of the **"Gubadli" Separate Border Division, **Haciyev Cavanshir Nadir oglu**, junior warrant officer, was injured on **5 April 2021** while conducting mine-clearance work in the territory of **Ashaghi Khojamsagli village**, **Gubadli District**, after stepping on an anti-personnel mine planted in the area by Armenian armed formations. Because the scene was a mined area and had not yet been cleared of mines, it was not possible to inspect the area.

Pursuant to the decision dated **11 June 2021**, military trousers, a black long-sleeved shirt, a warm-underwear top, warm-underwear trousers, lower underwear, a T-shirt, one left half-pair of a boot, and two pairs of socks belonging to **Haciyev Cavanshir Nadir oglu** were packed in one black bag and one white sack and handed over to the material evidence storage room of the **Special Investigation Department** for storage.

It was established by the court that, on **30 December 2020**, at around **16:00**, **Karimli Sarkhan Karim oglu**, a serviceman and junior warrant officer of military unit **"N"** of the **State Border Service of the Republic of Azerbaijan**, while on assignment in military unit **"N"**, was in a guardroom of a former military unit located in a territory of **Jabrayil District**that had been liberated from occupation. In order to check an object intended for the manual detonation of unknown explosive devices placed in the corridor on the second floor, at the edge of the window of a room located above the military unit's administrative building, he picked up and inspected the detonator of a hand grenade intended for use in detonating fragmentation grenades of the **"M-DN 11," "M-DN 21," "M-DN 31," and "M-DN 61"** models, which had been secretly placed there by unidentified members of Armenian armed formations acting with national hatred and hostile intent. The detonator then fell to the floor, while its pin came out and remained in his hand. When he bent down and attempted to lift the

detonator from the floor, it exploded. As a result, **Karimli Sarkhan Karim oglu** sustained injuries classified as minor harm to health, accompanied by a short-term impairment of health, namely **"penetrating wound of the right upper eyelid, both sides of the nose, and the right cheek."**

It appears from the materials of the criminal case that, during the counter-offensive operations carried out by the **Armed Forces of the Republic of Azerbaijan** from **27 September 2020** to **10 November 2020** in order to repel attacks by Armenian military formations...

Page 851

...located in the territory of **Sugovushan settlement**, where the military servicemen of the Armenian armed forces had been stationed and which was conventionally called height **"951."** In order to search for the missing servicemen at that location, the following servicemen of military unit **"N"** had previously been dispatched to the area: **Bakhtiyar Ilgar oglu**, a serviceman serving beyond the fixed term, soldier, commander of the 2nd squad of the visual-observation platoon of the reconnaissance-observation company; **Aliyev Punhan Shaban oglu**, a serviceman serving beyond the fixed term, soldier, commander of the 1st squad of the 2nd platoon of the maneuver company of military unit **"N"**; and **Dunyamalizade Azer Imkan oglu**, a serviceman serving beyond the fixed term, sergeant, commander of the 1st squad of the 4th platoon of the same company. On **6 April 2021**, at around **14:00**, while carrying out a search for the missing servicemen in a dense forested area at height **"951,"** one of the anti-personnel mines previously planted in the area by Armenian armed forces servicemen exploded. As a result of the explosion, **P. Sh. Aliyev** sustained injuries causing serious harm to health, namely **"traumatic amputation of the right leg at the level of the lower third of the calf, lacerated-incised wounds of the left eyebrow, subconjunctival hemorrhage of the left eye, penetrating injury of the left eye, lacerated-cut wounds of the left half of the chin."** At the same time, **B. Ilgaroglu**, who had wanted to assist **P. Sh. Aliyev**, sustained injuries causing serious harm to health, namely **"traumatic amputation of the right foot at the level of the tarsal-metatarsal bones and superficial wounds of the dorsum of the right hand." A. P. Dunyamalizade**, who was present there, sustained injuries causing minor harm to health, namely **"hematoma of the right periorbital region, traumatic keratopathy of the right eye, rupture of the anterior-inner surface of the right forearm, and lacerated wounds of the right half of the waist and the right thigh,"** and they were evacuated to hospital **"N"** of the Ministry of Defence.

Pursuant to the decision dated **16 June 2021** on recognition as material evidence, a camouflage-type military jacket, camouflage-type military trousers, sweater, warm lower underwear, long-sleeved shirt, shirt, one pair of socks and one pair of soldiers' boots belonging to **Bakhtiyar Ilgar oglu**, and a camouflage-type military jacket, camouflage-type military trousers, lower underwear, belt, sweater, two shirts and a left-foot boot belonging to **Aliyev Punhan Shaban oglu**, were recognized as material evidence and placed in the storage room of the **Special Investigation Department**.

It was established by the court that **Mammadov Namiq Alicavad oglu**, while serving as an ordinary soldier and second gun driver of the 1st team of the 3rd battery of the artillery division located in the territory of **Chanagchi village**, **Khojaly District**, which had been liberated from the Armenians, of artillery division **"N"** of military unit **"N"** of the Ministry of Defence of the Republic of Azerbaijan, on **9 April 2021**, at around **10:00**, together with **Aliyev Samir Firsad oglu** and soldier **Aliyev Oqtay Mushvig oglu**, servicemen serving beyond the fixed term in the artillery division in which he served, were in a forested area located approximately **3–4 kilometers** from the division's location, at a place called **"Sighinag,"** where they dismantled usable spare parts from vehicles of Armenian armed formations that had been left in unusable condition. When soldier **Namiq Mammadov** saw that the rope of a horse they had brought with them had come loose and that the horse had crossed the stream, he crossed the stream to bring the horse back, held the rope of the horse, and, after crossing the stream again, while walking around the stream, an anti-personnel mine that had been placed in advance, under unknown circumstances, by unidentified members of Armenian armed formations, with the purpose of intentionally killing members of the enemy's national military formations, detonated. As a result of the explosion, he sustained injuries causing serious harm to health, namely **"mine-explosion injury, traumatic amputation of the lower third of the left lower limb, open fracture defect of the middle third of the right leg bones, numerous lacerated wounds of the posterior surface of the left thigh, extensive thermal burns of grades III-IV and lacerated-incised wounds on the anterior surface of the right calf, traumatic amputation of the right testicle and partial tearing of the head of the penis, numerous lacerated-incised wounds of both thighs, both hands and the face, and grade II thermal burn."**

According to Letter No. **2234** dated **9 April 2021** of military unit **"N,"** it was not possible to inspect the scene of the incident that occurred in **Chanagchi village**, **Khojaly District**, because the scene was a mined area.

Pursuant to the decision dated **30 June 2021** on recognition as material evidence, the shirt, warm undershirt, camouflage-type military trousers and underwear worn by **Namiq Mammadov**...

Page 852

...were recognized as material evidence and stored in the material evidence room of the **Special Investigation Department of the Military Prosecutor's Office of the Republic**.

It was established by the court that **Yagublu Ibad Salam oglu**, a serviceman and Chief Lieutenant serving as commander of the 1st engineering-fortification team of the engineering-fortification battalion of military unit **"N"** of the Ministry of Defence, on **15 April 2021**, at around **10:45**, together with the servicemen of the 1st engineering-fortification section of the 1st engineering-fortification team of the engineering-fortification battalion of that military unit, was returning along a trench road after carrying out the work of clearing the trenches and roads of mines in the battle position of the Armenian armed formations located in the territory of **Orta Garvand village**, **Aghdam District**, which had been liberated

from occupation, when he stepped on an anti-personnel mine previously planted by Armenians. As a result, he sustained injuries diagnosed as **"mine-explosion injury, traumatic rupture at the level of the left lower-limb ankle joint, fracture of the anterior surface of the left knee and calf, and closed fracture of the left ankle bones and left tibia, accompanied by traumatic rupture of the posterior cruciate ligament of the left knee."**

According to the relevant inquiry of the commander of military unit **"N"** of the Ministry of Defence, because the incident scene was dangerous to life, it was not possible to inspect the scene.

Pursuant to Order No. **375** dated **31 December 2020** of the commander of military unit **"N,"** Chief Lieutenant **I. S. Yagublu** was appointed, from the indicated date, to the position of commander of the 1st engineering-fortification team of the engineering-fortification battalion of military unit **"N."**

By decision dated **24 June 2021**, a military jacket, a half-wool sweater, two long-sleeved undershirts, trousers, two underpants, socks, rubber boots, rubber jacket, bandage, and wooden and soil particles taken from the incident scene, belonging to soldier **Heydarli Orkhan Ilyas oglu**, were recognized as material evidence and added to the criminal case materials.

It was established by the court that, on **14 July 2021**, at around **10:30**, as a result of Armenian armed units opening fire with automatic weapons at an observation point located in the area of the position conventionally called **"Mil-1,"** situated in the territory of **Sadarak District**, and belonging to the forces of Armenian armed formations, soldier **Mardanli Ibadulla Mahsud oglu**, who was serving there, as well as **Ahmadli Elvin Sudeyf oglu**, a Major of the Internal Service and head of the duty firefighting service of the State Fire Safety Division of the Ministry of Emergency Situations for the **Nakhchivan Autonomous Republic**, who at around **15:00** was extinguishing a fire that had broken out in that same area, were intentionally targeted for killing.

On **14 July 2021**, at around **10:30**, as a result of fire opened from weapons at the observation point located in the area of the position conventionally called **"Mil-1,"** situated in the territory of **Sadarak District**, where the Armenian Armed Forces were stationed, soldier **Mardanli Ibadulla Mahsud oglu**, who was serving there, sustained a **"through-and-through bullet wound of the soft tissues of the right cheek of the face, with the bullet touching the soft tissues of the right shoulder girdle."**

In addition, as a result of the shots fired by the Armenian armed forces from the direction of the **"Mil-1"** post, while **Ahmadli Elvin Sudeyf oglu**, Chief of the duty firefighting service and Major of the Internal Service of the State Fire Safety Division of the Ministry of Emergency Situations for the **Nakhchivan Autonomous Republic**, was extinguishing the fire that had broken out in that area at around **15:00**, he sustained injuries caused by the bullets fired by Armenian armed formations, namely **"blind bullet wound of the soft tissues of the right thigh and left lumbar region."**

By decision dated **20 August 2021**, the military armored vest, short-sleeved shirt and military jacket belonging to **Mardanli Ibadulla Mahsud oglu** that he was wearing at the time of the incident, as well as the military jacket belonging to soldier **Eyvazov Emin Haqverdi oglu** that had been hung on the entrance gate of the observation post before the incident, were recognized as material evidence, and the military armored vest was stored in military unit **"N,"** while the short-sleeved shirt and military jacket were handed over to the material evidence room of the prosecutor's office.

On **7 September 2021**, the material evidence was handed over to responsible executor **Aliovsət Abdullayev** of the Special Investigation Department.

It was established by the court that **Gilmizliyev Mahammad Ilham oglu**, serving in the engineering-fortification battalion of the **Gubadli Separate Border Division** of the **State Border Service**...

Page 853

...serving as driver of the evacuation squad of the support platoon, with the military rank of junior warrant officer, and **Namazov Murtuz Farman oglu**, serving as driver of the 3rd unexploded-obstacles and engineer-road squad of the unexploded-obstacles and engineer-road platoon of the same company, with the military rank of junior warrant officer, were, on **14 July 2021**, at around **16:50**, while travelling on the forest road from **Najaflar village** to **Shatariz village** of **Zangilan District**, liberated from occupation, pursuant to an assignment given by the leadership of the **Gubadli Separate Border Division**, subjected to an attempted intentional killing as a result of the explosion of an anti-personnel mine previously planted by Armenian armed formations with the purpose of killing them.

It was established that **Gilmizliyev Mahammad Ilham oglu**, serving in the engineering-fortification battalion of the **Gubadli Separate Border Division** of the **State Border Service**, as driver of the evacuation squad of the support platoon of the engineering-fortification company, with the military rank of junior warrant officer, and **Namazov Murtuz Farman oglu**, serving as driver of the 3rd unexploded-obstacles and engineer-road squad of the unexploded-obstacles and engineer-road platoon of the same company, with the military rank of junior warrant officer, were, on **14 July 2021**, at around **16:50**, while travelling on the forest road from **Najaflar village** to **Shatariz village** of **Zangilan District**, liberated from occupation, pursuant to an assignment given by the leadership of the **Gubadli Separate Border Division**, struck by the explosion of an anti-personnel mine, which had previously been planted in that area according to the coordinates indicated in the forms provided by the Armenian side, and as a result were wounded and immediately evacuated to the central hospital of the **State Border Service**.

The intention of the person or persons who planted the said anti-personnel mine in that area was precisely to kill the persons who suffered harm; however, for reasons beyond their control, they were unable to complete the crime.

By decision dated **16 September 2021**, the military field jacket that had been worn by **M. I. Gilmizliyev** at the time of the incident was recognized as material evidence and handed over to the material evidence storage room of the **Special Investigation Department** for safekeeping.

It was established by the court that, on **17 July 2021**, in the area of **Sadarak District** of the **Nakhchivan Autonomous Republic**, where the 4th battalion of military unit **"N"** of the **Ministry of Defence** was serving, at the position conventionally called **"Mil-1,"** soldier **Mammadov Orkhan Kheyraddin oglu**, who was carrying out engineering-fortification work for the service of the said military unit, sustained a **"through-and-through bullet wound of the lower one-third of the left calf"** as a result of fire opened by the **Armed Forces of Armenia**.

It was established that, on **17 July 2021**, at around **09:00**, as a result of fire opened from firearms by servicemen of the **Armed Forces of Armenia** at the area of the position conventionally called **"Mil-1,"** located in **Sadarak District**, where military unit **"N"** was serving, **Mammadov Orkhan Kheyraddin oglu**, who was carrying out engineering-fortification work with an excavator in that area, sustained a **"through-and-through bullet wound of the lower one-third of the left calf."**

According to the protocol dated **17 July 2021** on inspection of an item, traces of blood were found on the trousers among the items seized.

By decision dated **20 August 2021** on recognition as material evidence, the trousers belonging to **Orkhan Mammadov** were handed over to the material evidence storage room of the **Military Prosecutor's Office of the Nakhchivan Autonomous Republic**.

It was established by the court that, on **19 July 2021**, at around **23:30**, as a result of fire opened from firearms by the **Armed Forces of Armenia** at the area of the position conventionally called **"Vagon-2,"** located in **Sadarak District**, where military unit **"N"** was serving, **First Lieutenant Badalli Ramal Bahlul oglu**, who was serving there, sustained a **through-and-through bullet wound of the soft tissues of the middle one-third of the left calf**.

By decision dated **18 August 2021** recognizing items as material evidence, **one pair of sports trousers** belonging to **Ramal Badalli** and **one 7.62 mm cartridge tracer bullet** were handed over to the material evidence storage room of the **Military Prosecutor's Office of the Republic of Azerbaijan**.

Page 854

By decision dated **1 October 2021** on recognition as material evidence, a military field-type pea coat, a field-type winter shirt, a brown belt, a gray T-shirt, gray underpants, the left black high boot, a non-armored vest, and one pair of black socks belonging to **Yaqublu Farman Telman oglu** in the criminal case were recognized as material evidence and stored in the material evidence storage room of the **Special Investigation Department**.

It was established by the court that, on **28 July 2021**, at around **01:00**, the defensive posts of the 1st and 3rd motorized rifle battalions of military unit **"N,"** located in the direction of **Kalbajar District** and conventionally called **"K-1," "K-3," "K-4"** and **"Ötürücü,"** were subjected to intensive fire from various-calibre small arms and artillery installations from the direction of **Zod** and **Narimanli** villages of **Basarkechar District**, opposite the **Özbək Lake** positions, by unidentified members of the **Armed Forces of Armenia**, acting with national hatred and hostility, for the purpose of intentionally killing the servicemen serving at those posts. As a result, Major **S. N. Aliyev** sustained a **"bullet wound to the left thigh,"** Chief Lieutenant **T. A. Farhadli** sustained a **"bullet wound to the soft tissues of the posterior surface of the middle one-third of the left calf,"** Lieutenant **I. D. Imranli** sustained **"bullet wounds to the wrist and to the 2nd and 3rd fingers of the left hand,"** Warrant Officer **I. A. Babayev** sustained a **"blind bullet wound of the lower one-third of the left thigh,"** serviceman serving beyond the fixed term, soldier **M. M. Orucov**, sustained a **"bullet wound to the right arm,"** and Lieutenant **A. M. Musayev** and soldier **T. T. Ibrahimli** sustained **"barotrauma as a result of an explosion."**

By decision dated **10 November 2021** on recognition as material evidence, the tunic, military pea coat and one metal object extracted from inside the pea coat (**bullet core**) that had been on **Orucov Müzamil Mehran oglu**; the military field trousers that had been on **Aliyev Sadiq Nizami oglu**; the military field trousers that had been on **Babayev Israil Akram oglu**; the military field trousers and sweater that had been on **Farhadli Telman Arzu oglu**; and the military sweater that had been on **Imranli Imran Dilgam oglu** were recognized as material evidence, and the tunic, military pea coat and one metal object extracted from inside the pea coat (**bullet core**), three military field trousers and the military sweater were handed over for storage to the material evidence storage room of the **Special Investigation Department**.

It was established by the court that, on **29 July 2021**, at around **03:00**, the defensive posts of military unit **"N,"** located in the direction of **Kalbajar District**, were fired upon by unidentified members of Armenian armed formations. As a result of those combat operations, **Orucov Nüsrat Gündüz oglu**, a soldier serving at the combat post of military unit **"N"**conventionally called **"Zirva-2,"** and soldiers **Dadasov Raman Ramil oglu**, **Huseynov Bakhtiyar Asaf oglu**, and **Aghayev Rashad Rafat oglu** were subjected to attempted intentional killing by fire opened by members of the Armenian armed formations on the opposing side.

It was established by the court that, on **29 July 2021**, at around **03:00**, the defensive posts of military unit **"N,"** located in the direction of **Kalbajar District**, were intensively fired upon from various-calibre small arms and artillery installations by unidentified members of Armenian armed formations, acting with national hatred and hostility for the purpose of intentionally killing the servicemen serving at those posts. As a result of those combat operations, at the defensive positions of military unit **"N,"** located in **Kalbajar District**, opposite the defensive positions in **Zod** and **Narimanli**villages of **Basarkechar District**, Republic of Armenia, **Orucov Nüsrat Gündüz oglu**, soldier and commander of the 1st squad of the 1st team of the 2nd platoon of the 2nd company of the 1st battalion of military unit

"N," serving at the combat post conventionally called **"Zirva-2,"** sustained a **"bullet wound to the right shoulder area and a penetrating wound of the 2nd and 4th fingers of the right hand." Dadasov Raman Ramil oglu**, soldier and rifleman of the 1st squad of the 1st team of the 2nd platoon of the 2nd company of the 1st battalion of military unit **"N,"** sustained a **"superficial wound to the left shoulder area." Huseynov Bakhtiyar Asaf oglu**, chief rifleman of the 1st team of the 3rd reconnaissance group of the reconnaissance platoon of military unit **"N,"** sustained **"penetrating wounds of the left arm area and the left rib area." Aghayev Rashad Rafat oglu**, chief soldier, sustained **"an open fractured dislocation of the proximal phalanx bone of the fifth finger of the left hand, lacerated-through wounds of the finger, and blind wounds to the soft tissues of the lower jaw, left thigh and wrist-joint area."**

Page 855

By decision dated **11 November 2021**, the military field summer shirt, military field summer shirt and military bush jacket that **Orujov Nusrat Gunduz oglu** was wearing at the time of the incident; the military sweater and warm undershirt that **Dadashov Roman Ramil oglu** was wearing; and the military bush jacket and military field summer shirt that **Huseynov Bakhtiyar Asaf oglu** was wearing, were recognized as material evidence and handed over to the storage room of the **Special Investigation Department** for safekeeping.

Pursuant to Order No. **367** dated **19 December 2019** of the commander of military unit **"N,"** reservist soldier **Pira Hasan Nizami oglu**, on the basis of Order No. **0138Ə** dated **7 December 2019** of the commander of military unit **"N,"** was accepted from the reserve into active military service in the **Azerbaijani Army** for a period of **three years** beginning from the date of the relevant contract, appointed to the position of driver of the 3rd squad of the 1st team of the reactive artillery battery of military unit **"N,"** and, from **19 December 2010**, was included in the personnel list of the military unit, entered into all types of supply, and began performing his duties.

It was established by the court that **Shiraliyev Ruslan Nariman oglu**, soldier and serviceman of the **"Gubadli" Separate Border Division** of the **State Border Service**, on **25 August 2021**, while on sentry duty at a combat post located near a forested area in the territory of **Çayzəmi village**, **Gubadli District**, was deliberately attacked at around **15:20** by another serviceman in the military uniform of the Armenian armed forces, who stabbed him in various parts of his body with a knife, attempting to kill him.

It was established that **Şiraliyev Ruslan Nariman oglu**, soldier and serviceman of the **"Gubadli" Separate Border Division** of the **State Border Service**, on **25 August 2021**, from **12:00** to **16:00**, was assigned to sentry duty at a combat post located near the forested area in the territory of **Çayzəmi village**, **Gubadli District**.

On that day, at around **15:20**, while patrolling the area around the post and moving toward the nearby forest, approximately **29 meters** away from the direction where the positions of the Armenian armed formations were located, he observed one serviceman in military

uniform belonging to the Armenian armed forces, with an automatic rifle hanging on his shoulder, moving in the direction of the combat position where he was located. He immediately readied the automatic rifle he had with him for combat, released the safety catch, advanced approximately **15 meters** in that direction, pointed the weapon in that direction and intended to open fire.

At that moment, he heard a whistling sound from behind him and, when he turned back, saw another serviceman of the Armenian armed forces in military uniform. That person, with the intent to kill **R. N. Şiraliyev**, suddenly attacked him with the knife in his hand and inflicted blows on various parts of his body with the knife.

However, **R. N. Shiraliyev** resisted the said person and shouted to call his other service comrades. At that time, as other servicemen of the post came toward the place where he was, the Armenian serviceman abandoned his combat position, fled from there and disappeared, for reasons beyond his control failing to kill **R. N. Shiraliyev**.

As a result of the incident, **R. N. Shiraliyev** sustained injuries diagnosed as **"skin and subcutaneous penetrating and right-sided internal surface lacerations of the lower jaw,"** and was immediately evacuated to the military hospital of the **Border Troops** located in **Baku**, where medical assistance was provided to him.

By decision dated **14 October 2021**, the military field-type tunic, military field-type vest and military field-type waistcoat worn by **R. Shiraliyev** at the time of the incident were recognized as material evidence.

On **24 November 2021**, the material evidence was handed over to **Aliovsət Abdullayev**, responsible executor of the **Special Investigation Department** of the Military Prosecutor's Office of the Republic of Azerbaijan.

By decision dated **11 November 2021** on recognition as material evidence, in the criminal case, the tunic, trousers and one soldier's boot worn by sergeant **N. Y. Xəlilov** at the time of the incident were recognized as material evidence and stored in the material evidence storage room of the **Special Investigation Department**.

It was established by the court that, on **4 September 2021**, the servicemen of military unit **"N,"** Major **Farahim Mehdiyev** and Senior Soldier **Vasif Namazov**, together with servicemen of military unit **"N,"** while carrying out engineering reconnaissance of the road and area in accordance with an assignment given by the command of the military unit, for the purpose of establishing a suitable combat post at **Kongur Mountain** in the direction of **Çopurlu** and **Lev**villages of **Kalbajar District**, at around **17:50** that day...

Page 856

...while the servicemen were clearing the area of mines, Senior Soldier **Vasif Namazov**, who was moving along the left side of the road leading to the combat post intended to be established, stepped on an anti-personnel mine buried in the ground by unknown members of

Armenian armed formations. As a result, he sustained injuries classified as causing serious harm to health, namely **"traumatic-hemorrhagic shock of grades III–IV, traumatic amputation of the right foot at the level of the middle one-third of the heel, shrapnel penetrating wound of the palm area of the right hand, the right forearm and the right thigh, and a through-and-through shrapnel wound of the upper one-third of the right thigh,"** and was evacuated to military hospital **"N."**

It appears from the inspection dated **4 September 2021** that, because the scene of the incident was a mined area, it was not possible to inspect it.

Pursuant to the decision dated **15 November 2021** on recognition as material evidence, a tunic, trousers, black shirt, one pair of socks, the remaining part of the right boot, a belt, one glove, a military-equipment strap, and the remains of the right half-pair of a military boot were recognized as material evidence in the criminal case because, by their characteristics and features, they related to the incident and because traces of the incident were preserved on them. They were handed over to the material evidence storage room of the **Special Investigation Department** for storage in the prescribed manner.

It was established by the court that, pursuant to the decision dated **19 October 2021**, one bullet casing and two metal fragments contained in one envelope were recognized as material evidence and added to the criminal case because they were of evidentiary significance. It appears from the inspection dated **19 October 2021** that the coordinates of the scene were determined as **40°10′53.95″ N, 46°13′17.93″ E**.

Since the military unit in whose area the incident scene was located did not permit an inspection, no inspection was conducted.

Pursuant to the decision dated **7 January 2022** on recognition as material evidence, one sweater, T-shirt, trousers, belt, underwear and socks belonging to soldier **O. B. Hamzayev** were recognized as material evidence and stored in the storage room of the **Special Investigation Department**.

It was established by the court that, on **13 October 2021**, at around **14:20**, a convoy of vehicles moving from **Sugovushan settlement**, **Tartar District**, along the **Aghdara–Kalbajar** route in the direction of **Kalbajar District**, accompanied by the Peacekeeping Forces of the **Russian Federation**, was fired upon from firearms by unknown members of Armenian armed formations from a forest belt near **Heyvali village**, **Kalbajar District**. As a result, three through-and-through firearm injuries were inflicted on a **NIVA-21214** vehicle with military registration plate **M8390Q**, belonging to the Military Police Department of the **Barda Garrison**, travelling in that convoy, in which there were servicemen of the Barda Garrison Military Police Department: Captain **Jabrayilzade Jabbar Rasim oglu**, who was driving the military vehicle; Junior Sergeant **Shabanov Seyidrahim Toghrul Natiq oglu**; and the military vehicle specialist of that department, Senior Warrant Officer **Jabrayilzade Jabbar Rasim oglu**.

On **18 October 2021**, **Ibrahimli Toghrul Natiq oglu**, acting investigator of the **Kalbajar Military Prosecutor's Office**, with the participation of **Zamanli Sabuhi Firidin oglu**, prosecutor-criminalist of the Criminalistics and Information Technologies Department of the **Military Prosecutor's Office of the Republic of Azerbaijan**, Major of Justice, inspected a **Niva VAZ-21214** vehicle with military registration plate **M8390Q** in **Kalbajar city**, on a 50-square-meter route at the entrance to the administrative building of the military prosecutor's office. Ten areas of damage were observed on the vehicle. Apart from the foregoing, no other damage or trace was found on the exterior surface of the vehicle or in the cabin.

Pursuant to the decision dated **23 February 2022** on recognition as material evidence, the half-wool sweater and lower trousers worn by **Babayev Vagif Alizab oglu** at the time of the incident, as well as the front lower glass of an excavator and four plastic material items taken from the scene, were recognized as material evidence in the case.

It appears from the decision dated **28 December 2021** on recognition as material evidence that...

Page 857

On **3 December 2021**, **Tarverdiyev Aziz Hashim oglu**, investigator of the **Tartar Military Prosecutor's Office**, inspected all clothing items worn by **Karimov Tajaddin Gazanfar oglu**, as well as the **Ozan-type mine detector** that he had used at the time of the incident.

Pursuant to the decision dated **7 January 2022** on recognition as material evidence, the protective suit, trousers, belt, tunic, short-sleeved shirt, black boots, black socks, helmet with goggles worn by soldier **Karimov Tajaddin Gazanfar oglu** at the time of the incident, as well as the object taken from the scene, were recognized as material evidence and stored in the storage room of the **Special Investigation Department**.

It was established by the court that **Aliyev Asif Adil oglu**, serving with the military rank of soldier as a machine gunner in the 1st squad of the 3rd platoon of the 2nd company of the 1st battalion of military unit **"N"** of the **Ministry of Defence**, was on combat duty at combat position No. **KÇ-15**, conventionally called **"Zirva-4,"** located in the territory of **Zeylik village**, **Kalbajar District**, when, on **8 December 2021**, at around **21:50**, unknown members of the **Armed Forces of Armenia**, from their positions located in **Yukhari Shorja settlement**, **Basarkechar District**, intensively fired on that combat position with automatic rifles and machine guns. At that time, one of the bullets fired by the Armenians struck soldier **A. A. Aliyev** in the back, and he died at the scene as a result of the injuries he sustained.

According to the certificate dated **8 December 2021**, because the scene was under intensive fire, it was not possible to inspect it. An external examination of the body was carried out.

Pursuant to the decision dated **17 March 2022**, a military bush jacket, military sweater, long-sleeved undershirt, short-sleeved undershirt, sleeveless undershirt, military belt, military trousers, warm trousers, warm lower underwear, underpants and one pair of socks were recognized as material evidence and retained in the criminal case.

Pursuant to the decision dated **23 February 2022** on recognition as material evidence, three metal objects taken from the scene were recognized as material evidence and handed over for storage to the storage room of the **Special Investigation Department of the Military Prosecutor's Office of the Republic of Azerbaijan**.

It was established by the court that, on **13 December 2020**, at around **16:00**, while soldier **Rahimov Sabuhi Zahid oglu**of military unit **"N"** of the **Ministry of Defence** was loading firewood onto the side platform of a **MAZ** vehicle belonging to the military unit in the territory of **Garabulag village**, **Khojaly District**, members of Armenian armed formations opened fire with firearms in his direction with the intent to kill him. As a result, harm of medium gravity was caused to his health.

According to an extract from Order No. **10** dated **10 January 2021** of the commander of military unit **"N,"** soldier **Rahimov Sabuhi Zahid oglu** was appointed to the position of chief reconnaissance officer of the reconnaissance squad of the command platoon of the 1st battery of the artillery division of that military unit.

It was established by the court that, after an unmanned aerial vehicle belonging to the **Armed Forces of the Republic of Azerbaijan** was shot down by Armenian armed formations in the territory of **Kalbajar District** and information was received by the mortar battery of military unit **"N,"** located in the territory of **Baglipaya village**, **Kalbajar District**, that the unmanned aerial vehicle had fallen in the direction of that battery, instructions were given to the personnel to search for and locate the unmanned aerial vehicle in the said area.

Pursuant to those instructions, on **2 January 2022**, at **12:00**, groups consisting of the personnel of the mortar battery were formed to locate the unmanned aerial vehicle, and the search began. On the same day, at around **14:00**, soldier **Ayniyev Yusif Suleyman oglu** separated from the search group and, while moving through a forested and mountainous area, stepped on an anti-personnel mine previously buried in the area by unknown members of Armenian armed formations. As a result of the explosion, he sustained injuries classified as serious harm to health, namely **"traumatic amputation at the level of the lower one-third of the left leg, accompanied by grade I traumatic-hemorrhagic shock and post-traumatic anemia."**

On **2 January 2022**, in the territory of **Baglipaya village**, **Kalbajar District**, serviceman of active compulsory military service of military unit **"N,"** soldier…

Page 858

... **Ayniyev Yusif Suleyman oglu** had sustained injuries as a result of a mine explosion was a mined area and dangerous to life; therefore, it was not possible to inspect that location.

By decision dated **4 May 2022** on recognition as material evidence, issued by **Mirzayev Elvin Mushfiq oglu**, acting senior investigator of the **Kalbajar Military Prosecutor's Office**, a military cap, military sweater, two long-sleeved warm undershirts, a black T-shirt, military waist belt, military trousers, two warm under-trousers, the right half-pair of a

soldier's boot, and the remains of one pair of socks were recognized as material evidence and handed over to the material evidence storage room of the **Kalbajar Military Prosecutor's Office** for safekeeping.

On **4 December 2021**, **Gudratli Nihad Adalat oglu**, assistant to the **Aghdam military prosecutor**, inspected a **T-72 tank trailer**, photographed it and prepared a table.

According to an extract from Order No. **289** dated **27 June 2021** of the commander of military unit **"N," Mammadov Nemat Mirza oglu**, warrant officer, was appointed commander of the **T-72 tank** with turret No. **239** belonging to the 3rd tank company, and **Aslanov Shohrat Arif oglu** was appointed mechanic-driver.

It was established by the court that, on **18 December 2021**, at around **11:00** in the morning, pursuant to an order issued by the higher command, communication equipment at the posts of the sub-units of the 4th battalion of military unit **"N"**located in the 4th district area of **Lachin District** was to be transported to the 25th post. For this purpose, two servicemen — soldier **Gulmaliyev Kenan Gambar oglu** and soldier **Akbarov Musa Asim oglu** — were moving from the 27th post toward the 25th post with communication equipment in their hands. In order to meet them on the way, two servicemen — soldier **Huseynov Teymur Aladdin oglu** and soldier **Mustafayev Murad Mikayil oglu** — moved from the 25th post toward the 27th post.

While the latter were moving along the road from the 25th post toward the 27th post and passing near the unused 26th post, they were ambushed and captured by servicemen of the Armenian armed formations who had unlawfully crossed the state border of the Republic of Azerbaijan. At that time, an **AKM assault rifle** bearing military registration mark **139922**, which was in the possession of soldier **Huseynov Teymur Aladdin oglu** and had been assigned to soldier **Azimov Namid Namiq oglu**, together with one magazine containing **30 cartridges**, was seized by the Armenian forces. The said servicemen were handed over to the **Ministry of Defence** on **20 December 2021** in connection with an exchange of prisoners of war.

It was established by the court that **Nazarov Ayaz Azer oglu**, who was serving in the position of sanitary instructor of the 2nd company of the 1st battalion of military unit **"N"** of the **Ministry of Defence**, with the military rank of soldier as a serviceman on extended active military service, was at combat position No. **KÇ-14**, conventionally called **"Zirva-1,"**located in the territory of **Zeylik village**, **Kalbajar District**. On **11 January 2022**, at around **13:15**, as a result of intensive fire from automatic rifles and machine guns opened at that combat position by unidentified servicemen of the **Armed Forces of Armenia** from their positions located in **Yukhari Shorja village**, **Basarkechar District**, he sustained injuries amounting to serious harm to health and died at the scene.

According to the certificate dated **11 January 2022**, because the scene was under intensive fire, it was not possible to inspect it. An external examination of the body was carried out.

Pursuant to the decision dated **25 April 2022**, the military winter jacket, sweater, long-sleeved undershirt, short-sleeved undershirt, scarf, waist belt, military trousers, warm trousers, underpants, one pair of socks, one pair of soldier's boots belonging to **Nazarov Ayaz Azer oglu**, and one metal fragment taken during the examination of **A. A. Nazarov's** body, were recognized as material evidence due to their significance for the case and were retained in the criminal case.

It was established by the court that **Shirvanov Cavid Rasul oglu**, warrant officer, serving as commander of the 3rd group of the 1st platoon of the 1st company of the 1st battalion of military unit **"N"** of the **Ministry of Defence**, and **Ramazanov Ziyafaddin Nizamaddin oglu**, a serviceman on extended active military service with the military rank of sergeant, serving as reconnaissance-sapper of the 1st squad of the 1st company of the 1st battalion, were, on **25 March 2022**, at around **03:00** at night, defending their positions at the foot of **Farrukh Mountain** near **Farrukh village**, **Aghdam District**, when, by Armenian armed formations...

Page 859

...opened fire on the combat position they were defending and, as a result, warrant officer **Shirvanov Cavid Rasul oglu**sustained a **"through-and-through bullet wound to the soft tissues of the back area,"** while **Ramazanov Ziyafaddin Nizamaddin oglu** sustained various injuries, after which they were evacuated to military unit **"N."**

By decision dated **24 June 2022**, the military winter jacket, military tunic, sweater, warm undershirt, trousers, warm lower trousers and neck warmer that **Shirvanov Cavid Rasul oglu** was wearing at the time of the incident, as well as the military winter jacket, military tunic, jacket, trousers, warm lower trousers, neck warmer and one pair of soldier's boots that **Ramazanov Ziyafaddin Nizamaddin oglu** was wearing at the time of the incident, and the metal fragment extracted from **Z. N. Ramazanov's** body during surgery, were recognized as material evidence because of their significance for the case and were kept in the criminal case.

By Order No. **250** dated **3 September 2021** of the commander of military unit **"N"** of the **Ministry of Defence**, serviceman on extended active military service **Ramazanov Ziyafaddin Nizamaddin oglu** was appointed to the position of operations-intelligence officer of the 1st group of the 3rd operations battalion of the 1st operations company of military unit **"N."**

By Order No. **261** dated **13 September 2021** of the commander of military unit **"N"** of the **Ministry of Defence**, **Shirvanov Cavid Rasul oglu**, holding the military rank of warrant officer, was appointed to the position of commander of the mine-thrower group of the 1st operations team of the 1st operations company of military unit **"N."**

It was established by the court that **Guliyev Amid Aliverdi oglu**, serviceman on extended active military service, soldier, reconnaissance-operator of the 1st group of the 4th operations

team of the 4th operations company of the 2nd operations battalion of military unit **"N"** of the **Ministry of Defence of the Republic of Azerbaijan**, while performing combat duty at the combat position located in **Farrukh village, Khojaly District**, was subjected on **26 March 2022**, at around **15:00**, to intensive fire from automatic rifles and machine guns by unknown members of Armenian armed formations located in the opposing positions, acting with national hatred and hostile intent for the purpose of intentionally killing him. As a result, he sustained injuries causing serious harm to health and generally dangerous to life, and an attempt was made to kill him. However, as he was evacuated to the medical station of military unit **"N"** of the Ministry of Defence and, in connection with the medical services provided to him, was treated at military hospital **"N,"** the criminal act was not completed for reasons beyond the perpetrators' control.

According to the inquiry included in military unit **"N,"** it was not possible to inspect the place where serviceman on extended active military service, soldier **Guliyev Amid Aliverdi oglu**, was wounded, because that place was under continuous fire by Armenian armed formations.

By decision dated **24 June 2022** on recognition as material evidence, the military trousers, lower trousers, tunic, jacket, undershirt, T-shirt, underpants and sock that **Amid Guliyev** was wearing were kept in the material evidence room of the **Special Investigation Department**.

It was established by the court that **Camalzade Ayxan Mobil oglu**, serviceman on extended active military service, soldier and commander of the 2nd section of the 2nd team of the engineering-fortification company of military unit **"N,"**on **19 April 2022**, at around **13:30**, in the area of **Yenikend village, Kalbajar District**, at a service combat position conventionally called **"Arif,"** while he was on duty, stepped on an anti-personnel mine that had been buried in the ground by unknown members of Armenian armed formations. As a result, he sustained injuries causing serious harm to health, namely **"traumatic-hemorrhagic shock of grade I–II accompanied by traumatic amputation of the lower one-third of the right leg, lacerated-blind wounds of the lateral surface of the left calf and the soft tissues of the left thigh,"**and was evacuated to military hospital **"N."**

According to the inquiry dated **19 April 2022**, because the place where the incident occurred was a mined area and the mines had not yet been cleared from it, it was not possible to inspect it.

By decision dated **6 July 2022** on recognition as material evidence, the military trousers, cut military jacket, sweater, scarf...

Page 860

...cap, socks, soldier's boot, a part of a soldier's boot, and a belt were recognized as material evidence and stored in the material evidence storage room of the **Special Investigation Department**.

According to the extract from Order No. **91** dated **30 March 2021** of the commander of military unit **"N,"** soldier **Camalzade Ayxan Mobil oglu** began performing the duties of commander of the 2nd team of the 2nd company of the engineering-fortification battalion of military unit **707**.

Pursuant to the decision dated **6 July 2022** on recognition as material evidence, military field-uniform trousers, a warm undershirt, the left soldier's boot, underpants and two coloured soldier's socks were recognized as material evidence and stored in the **Special Investigation Department**.

It was established by the court that **Ishbandiyarov Vugar Tofiq oglu**, Colonel and commander of military unit **"N,"** on **26 July 2022**, at around **17:00**, while conducting observation in the service area of the combat position **"KS-1,"**conventionally called **"Kongur,"** of the 1st battalion, located in the territory of **Camilli village**, **Kalbajar District**, sustained injuries as a result of the explosion of a mine previously planted by servicemen of the **Armed Forces of Armenia**, unknown military servicemen, acting with national hatred or hostile intent. The injuries, classified as causing serious harm to health and generally dangerous to life, were diagnosed as **"grade III–IV traumatic-hemorrhagic shock accompanied by traumatic amputation of the lower one-third of the left lower limb, an open multifragmentary displaced fracture of the lower one-third of the right forearm, a wide crushed-contused wound with a tissue defect in the lower-leg and foot-ankle area, closed craniocerebral trauma with brain concussion, and bilateral acute cochlear neuritis as a result of barotrauma."** He was evacuated to the military hospital.

Pursuant to the decision dated **14 November 2022** on recognition as material evidence, a military tunic, military field-uniform trousers, a short-sleeved shirt and a black belt were recognized as material evidence and stored in the material evidence storage room of the **Special Investigation Department**.

Pursuant to the decision dated **24 November 2022** on recognition as material evidence, the tunic, trousers, belt, long-sleeved shirt, underpants, one pair of socks, one pair of soldier's boots, a broken military helmet and the objects damaged and destroyed in the incident, including the bulletproof vest, belonging to **Kazimov Anar Rustam oglu**, as well as the tunic, trousers, belt, scarf, cap, neck warmer, underpants and one pair of soldier's boots belonging to **Aghayev Huseyn Fazil oglu**, who was injured in the incident, were handed over to the material evidence storage room of the **Special Investigation Department** for safekeeping.

It was established by the court that **Aliyev Babek Asgar oglu**, serving as commander of the 7th company of the 3rd battalion of military unit **"N,"** which was deployed in the territory of **Kalbajar District**, on **5 August 2022**, at around **16:00**, while moving in the service area of the newly established outpost **"ZM-3,"** located in the direction of **Xirmanlar village**, **Kalbajar District**, sustained various injuries causing serious harm to health and generally dangerous to life as a result of the explosion of two anti-personnel mines previously planted

by unidentified members of Armenian armed formations, and was evacuated to military hospital **"N."**

It appears from the report dated **5 August 2022**, drawn up by **Abdurrahimli Toghrul Natiq oglu**, investigator of the **Kalbajar Military Prosecutor's Office**, that, because the scene of the incident was a mined area, it was not possible to conduct an inspection.

Pursuant to the decision dated **14 October 2022** of **Emil Aghayev**, senior investigator for important cases of the **Special Investigation Department**, the military field-uniform trousers, long-sleeved shirt, T-shirt, civilian underpants, socks, one pair of military boots and green belt were recognized as material evidence and handed over to the material evidence storage room.

It was established by the court that, on **5 August 2022**, at around **11:00**, servicemen of the 2nd battalion of military unit **"N"** of the **Ministry of Defence** — soldiers **Xudiyev Samir Samad oglu**, **Aliyev Tahir Chingiz oglu**, and ensign **Israfilov Elkhas Eldar oglu** — under the command of **Hasanov Elnur Elchin oglu**, Major and commander of that battalion, were moving toward **Sarbaba height**, near **Xirmanlar village**, **Lachin District**, in order to carry out a combat mission. At that time, unidentified members of the Armenian armed formations holding positions there threw a large rock fragment from above at the servicemen moving at the foot of that height. As a result, soldier **S. S. Xudiyev** sustained injuries classified as causing serious harm to health, namely **"subaponeurotic hematoma of the parietal region, damage to the aponeurosis, subarachnoid hemorrhage in both parieto-occipital parts of the brain, and in the left parietal and both temporal...**

Page 861

...contused-lacerated wounds of the region, closed craniocerebral trauma accompanied by bruising around both eyes, injury to the right lung, bleeding into the tissue of the left lung, right-sided closed hemopneumothorax, closed fracture of the right seventh rib, subcapsular hematoma of the liver and spleen, bleeding into the tissue of the pancreas, closed blunt trauma of the chest and abdomen, and multiple abrasions of the forehead, left cheekbone, right and left infraorbital regions, nasal region, both auricles, the posterior surface of the neck, the posterior surface of the torso, both shoulder girdles, both upper limbs, the left thigh and the right knee joint," and died at the scene.

Soldier **T. Ch. Aliyev** sustained injuries classified as serious harm to health dangerous to life, namely **"hematomas of both parietal lobes and the right frontal lobe of the brain; contused-lacerated wounds of both parietal regions, the left temporal region and the occipital region; bruising of the right periorbital region and the left upper eyelid; bleeding into the sclera of the right eyeball; closed craniocerebral trauma accompanied by abrasions of the parietal region, forehead, both temporal regions, both cheekbones, nasal region and submandibular region; injury to the left lung; left-sided closed hemopneumothorax; closed blunt trauma of the chest; subcapsular hemorrhage of the kidney; comminuted, displaced, closed fractures of the lower one-third of the left**

humerus; dislocation of the left elbow joint; abrasions of both lumbar regions, the right forearm region and both knee-joint regions; and multiple abrasions of the neck region, right scapular region, right lumbar region, both upper arms and forearms, the dorsal surfaces of both hands, the right buttock, the calf region and the left foot." He died on the way while being evacuated to the medical point.

Warrant officer **E. E. Israfilov** sustained injuries classified as minor harm to health causing a short-term impairment of health, namely **a contused abrasion of the left calf region and a subcutaneous hematoma**.

On **5 August 2022**, Deputy Military Prosecutor of Gubadli **Tofiqi Fuad Valeh oglu** inspected the body and clothing of serviceman of military unit **"N"** of the Ministry of Defence, soldier **Xudiyev Samir Samad oglu**, who had died while performing his service duties at **Sarbaba height** in **Lachin District** at around **11:00** on **5 August 2022**.

Pursuant to the decision dated **16 November 2022** on recognition as material evidence, a helmet, short-sleeved shirt, trousers, underpants, one pair of socks, one pair of boots belonging to **Xudiyev Samir Samad oglu**; trousers and underpants belonging to **Aliyev Tahir Chingiz oglu**; and trousers belonging to **Israfilov Elkhas Eldar oglu** were recognized as material evidence and stored in the material evidence storage room of the **Special Investigation Department**.

It was established by the court that, on **25 May 2021**, during the period from **06:00** to **08:00**, approximately **140**servicemen of Armenian armed formations attacked the combat position conventionally called **"Tanker-5,"** located in the territory of **Zar village, Kalbajar District**, in order to seize that position. By violating the state border of the Republic of Azerbaijan in that direction, they attacked **17** servicemen of the 1st company of the 1st mountain-rifle battalion of military unit **"N"** serving at the said position, and **10** servicemen of military unit **"N."**

At that time, servicemen of military unit **"N"** — Captain **Ilkin Yusifov**, soldier **Ali Imanov** — and servicemen of military unit **"N"** — Chief Lieutenant **Orkhan Jabbarli**, warrant officer **Eshgin Rahimov** and others — who attempted to repel the attack by the Armenian armed formations, resisted them; the attackers struck various parts of their bodies with weapons, kicks and helmets, thereby using force against them.

It was established by the court that **Suleymanov Vugar Nizam oglu**, while serving in the military rank of Chief Lieutenant as commander of the telephone platoon of the communications company of the main command post of military unit **"N"** of the Ministry of Defence, on **20 August 2022**, at **13:42**, while laying a communications line near **Sarbaba height** in **Lachin District**, stepped on an anti-personnel mine previously buried by members of Armenian armed formations in the territory of Azerbaijan where the peacekeeping contingent of the Russian Federation was temporarily deployed. He sustained an injury diagnosed as **"a torn and lacerated wound of the left foot"** and was first evacuated to the medical point of military unit **"N,"** and later to military hospital **"N."**

It appears from Certificate No. **957** dated **31 August 2022** of military unit **"N"** of the Ministry of Defence that, in the area of **Sarbaba height** in **Lachin District**…

Page 862

...where **Suleymanov Vugar Nizam oglu** had stepped on an anti-personnel mine planted in advance and had sustained injuries, was a mined area and posed a danger to human life and health; therefore, it was not possible to inspect the scene.

Pursuant to the decision dated **9 December 2022** on recognition as material evidence, one pair of boots, a tunic, trousers, a military winter shirt, a short-sleeved undershirt, a scarf and a belt that had been worn by **Suleymanov Vugar Nizam oglu** were kept in the material evidence storage room of the **Special Investigation Department**.

Gulmalıyev Heydar Elman oglu, a serviceman on extended active military service, with the military rank of soldier, serving as a fortification specialist of the 1st section of the 2nd platoon of the engineering-fortification company of military unit **"N"** of the **Ministry of Defence**, on **21 August 2022**, at around **16:00**, while carrying out mine-clearance activities near **Sarıbaba height** in **Lachin District**, stepped on an anti-personnel mine planted in the ground by unknown members of Armenian armed formations.

According to the certificate included in the criminal case, the area where **Gulmalıyev Heydar Elman oglu**, soldier and serviceman of the engineering-fortification company of military unit **"N,"** stepped on an anti-personnel mine and sustained injuries on **21 August 2022**, was located in a mined field and was dangerous to life; therefore, it was not possible to inspect that area.

Pursuant to the decision dated **18 November 2022** on recognition as material evidence, the military field-type trousers, short-sleeved shirt, underpants and T-shirt worn by **H. E. Gulmalıyev** were kept in the material evidence storage room of the **Special Investigation Department**.

It was established by the court that **Zeynalzade Elçin Anvar oglu**, while serving in active military service with the military rank of soldier as aimer of the 3rd section of the 2nd platoon of the 7th company of the 3rd battalion of military unit **"N"** of the **Ministry of Defence**, on **24 August 2022**, at around **13:00**, while conducting observation with **BDS111**binoculars at combat position No. 3 of that battalion, located in **Marzili village**, **Aghdam District**, sustained serious harm to health, causing permanent loss of more than one third of working capacity, after unknown members of the Armenian armed formations located on the opposite side, acting with national hatred and hostility and with the intent to kill him, directed the end of a laser beam at his right eye, resulting in diagnoses of **"radiation maculopathy of the right eye, with visual acuity reduced to hand-movement level and not correctable; visual acuity of 1.0 in the left eye."**

According to the protocol dated **26 January 2023** on inspection, evidence relevant to the case was found at the place where **Zeynalzade Elçin Anvar oglu** was wounded while serving at post No. 3 of military unit **"N."**

Pursuant to the decision dated **19 August 2023** on recognition as material evidence, one **BDS111** binocular, No. **57514**, was handed over to the representative of military unit **"N"** of the **Ministry of Defence** for safekeeping.

It was established by the court that, on **2 September 2022**, at around **17:00**, as a result of fire opened by servicemen of the **Armed Forces of Armenia** from the direction of **Yukhari Shorja** settlement of **Basarkechar District**, the following servicemen on extended active military service of military unit **"N"** of the **Ministry of Defence**, who were serving at combat position **KS-15** in the territory of **Zeylik village**, **Kalbajar District**, sustained injuries: Junior Sergeant **Rzayev Farhad Nazir oglu** — **"scratch of the neck area"**; Sergeant **Isgandarov Anar Ilham oglu** — **"scratch of the left ear"**; Soldier **Ahmadov Musa Azer oglu** — **"scratch of the left arm."** In addition, one **KamAZ** vehicle with military registration plate **C897-QQ** and one **UAZ** vehicle with military registration plate **C916 QQ** were damaged.

It appears from the certificate of the commander of military unit **"N"** that, on **2 September 2022**, at around **17:00**, when the incident occurred at combat position **"KS 16,"** located in the area called **Zeylik village** of **Kalbajar District**, it was not expedient to inspect the scene because that area was located on the contact line with servicemen of the **Armed Forces of Armenia**, was under their visual observation, the combat clash was continuing, and the area was mined.

Page 863

Pursuant to the decision dated **20 December 2022**, by being recognized as material evidence, the tunic and steel helmet that had been on **Rzayev Farhad Nazir oglu** at the time of the incident, and the sweater that had been on **Ahmadov Musa Azer oglu**, were kept in the storage room of the **Special Investigation Department of the Military Prosecutor's Office of the Republic of Azerbaijan**.

The military field-type trousers, tunic and short-sleeved shirt belonging to **Rahimov Ali Chingiz oglu** were recognized as material evidence in the case.

It was established during the court proceedings that on **14 September 2022**, at around **20:00**, in the territory of **Kalbajar District** called **"Alagollar,"** in front of the combat position conditionally named **"KA-3,"** while mines planted by Armenian armed detachments were being cleared, one of those mines suddenly exploded, and soldier **Maharramov Elnur Narbala oglu** sustained serious injuries; his leg was severed, and mine fragments also damaged both of his legs; he died on the way to the military hospital.

On **23 September 2022**, **Ramazanov Sanan Aslan oglu**, acting senior investigator of the **Gubadli Military Prosecutor's Office**, lieutenant of justice, inspected the items of clothing that had been on **R. R. Huseynli** at the time of the incident.

On **16 September 2022**, the body of injured person **Rashad Huseynli** was inspected.

Pursuant to the decision dated **23 December 2022** on recognition as material evidence, in the criminal case the long-sleeved upper jacket of a military field-type uniform set, a black short-sleeved undershirt, the trousers of a military field-type uniform set, grey underpants, one pair of long soldier's socks, one pair of long soldier's boots and one bullet part were recognized as material evidence and kept in the material-evidence storage room of the **Special Investigation Department**.

According to certificate No. **4025** dated **23 September 2022**, received from military unit **"N,"** since the service area of combat position No. **"K2"** of the 2nd battalion, located in the area of **Kalbajar District** called **Alagollar**, was a mined area, it was not possible to inspect the scene of the incident.

Pursuant to the decision dated **15 November 2022**, by being recognized as material evidence, the military trousers, military jacket, military shirt, military belt and one pair of boots that had been on **Aydin Alizade** were kept in the material-evidence room of the **Special Investigation Department of the Military Prosecutor's Office of the Republic of Azerbaijan**.

It was established during the court proceedings that on **23 September 2022**, from **19:30** to **23:40**, Armenian armed formations, from their positions in the direction of the **Upper Shorca** and **Jermuk** settlements of **Basarkechar District**, intensively fired with small arms of various calibres at servicemen of the Azerbaijani Army serving at positions located in the direction of the **Istisu** and **Zaylik** settlements of **Kalbajar District**, with the purpose of intentionally killing them; **Amanullayev Rashad Aghajan oglu**, **Rahimzade Ruhid Oktay oglu** and **Javadov Ravan Shamsaddin oglu** sustained injuries of various degrees.

It appears from the certificate received by the **Kalbajar Military Prosecutor's Office** from military unit **"N"** that, since the position where the servicemen were injured was located on the line of contact with Armenian armed formations, was visually observed by the latter, and was a mined area, it was not possible to inspect the scene of the incident.

Pursuant to the decision dated **23 December 2022**, the military tunic, military sweater and military neck warmer belonging to **Amanullayev Rashad Aghajan oglu**; the military trousers, long-sleeved shirt, military wool sweater, military underpants, military briefs, one pair of military boots, one pair of military socks, belt and military cap belonging to **Javadov Ravan Shamsaddin oglu**; and the military winter jacket, two military tunics, military wool sweater, military long-sleeved shirt and one pair of military boots belonging to **Rahimzade Ruhid Oktay oglu** were recognized as material evidence because they were of importance to the case, and the material evidence is currently kept in the **Special Investigation Department**.

It was established during the court proceedings that on **25 September 2022**, at around **11:00**, as a result of intensive fire from small arms from various directions by unidentified members of Armenian military formations at the combat position of military unit **"N"**, located in

Dashkasan District and conditionally called **"GC-4,"** the commander of the grenade-launcher squad of the anti-tank unit of that military unit, a serviceman on extended active military service,

Page 864

soldier **Namazaliyev Firuddin Rafayil oglu**, sustained injuries classified as minor harm to health and was evacuated to military hospital **"N."**

In addition, on **25 September 2022**, at around **11:00**, as a result of intensive fire opened from various directions with firearms by unknown members of Armenian armed formations at the combat position of military unit **"N"**, conventionally called **"GC-4,"** located in the territory of **Dashkasan District**, serviceman on extended active military service, Junior Sergeant **Aliyev Sabuhi Vahid oglu**, reconnaissance-medic of the 1st group of the 2nd company of the 1st battalion of military unit **"N,"** sustained injuries classified as minor harm to health and was evacuated to military hospital **"N."**

On **28 September 2022**, at around **18:00**, as a result of intensive fire opened with firearms by unidentified servicemen of Armenian armed formations, acting with national hatred and hostile intent, at the units of the Azerbaijani Army located in the direction of the area called **Alagollar** in **Kalbajar District**, serviceman on extended active military service, Junior Sergeant **Isgandarov Nicat Hidayat oglu**, mortar crew member of the 4th team of the 5th company of the 2nd operations battalion of military unit **"N"** of the **Ministry of Defence**, sustained injuries classified as serious harm to health, namely **"penetrating shrapnel wound of the right side of the chest, penetrating the thoracic cavity, grade I–II traumatic-hemorrhagic shock, open craniocerebral trauma, destruction of the right eyeball resulting in loss of vision in the right eye, crushing of the frontal lobe of the brain, comminuted open fractures of the lower wall of the main sinus, the frontal bone, the anterior and posterior walls of the frontal sinus, the right eyelid, the right upper jaw, the upper wall of the right orbit, the right cheekbone, the right maxillary sinus, the anterior and posterior walls, the lower jawbone, the right orbital prominence and the right temporal region, accompanied by damage to the lower edge of the right parotid salivary gland,"** and was evacuated to the military hospital.

On **28 September 2022**, at around **19:00**, information was received by the **Kalbajar Military Prosecutor's Office** from military unit **"N"** that, as a result of fire opened by units of Armenian military formations, serviceman on extended active military service, Junior Sergeant **Isgandarov Nicat Hidayat oglu** of military unit **"N"** had been wounded. On the basis of that information, the military unit was visited, the relevant documents were collected and the necessary measures were taken; however, it was not possible to inspect the scene because the incident area was located on the contact line with Armenian servicemen and because the area was mined.

The military winter jacket, military scarf, military cap, civilian cap, civilian trousers, one pair of civilian gloves and one pair of socks that **Isgandarov Nicat Hidayat** was wearing at the time of the incident were inspected on **12 October 2022**.

By decision dated **15 December 2022** of **Ibrahimov Azer Vagif oglu**, investigator for important cases of the **Special Investigation Department**, on recognition as material evidence, the military winter jacket, scarf, military cap, civilian cap, civilian trousers, one pair of civilian gloves and one pair of socks that **N. H. Isgandarov** was wearing were recognized as material evidence and handed over to the storage room of the **Special Investigation Department** for safekeeping.

Pursuant to Order No. **254** dated **31 August 2022** of the commander of military unit **"N"**, and in accordance with subparagraph **"a"** of Article **81.1** of the Regulation **"On Military Service"**, in connection with organizational-staffing changes, serviceman on extended active military service, Junior Sergeant **Isgandarov Nicat Hidayat oglu**, was released from his position as commander of the mortar battery of the 3rd motorized battalion and appointed to the position of mortar crew member of the 4th operations team of the 5th operations company of the 2nd operations battalion.

It was established by the court that, from **10 November 2020** to **22 April 2024**, the **Ministry of Defence of the Republic of Azerbaijan**, the **Mine Action Agency of the Republic of Azerbaijan**, the **Ministry of Emergency Situations**, the **State Border Service**, as well as the mine-clearance companies **"Alphademining," "Azerbaijan Demining," "Qaya Safety Solutions"** and **"Safe Point"**, in the territories liberated from occupation, discovered **9,222** anti-personnel mines, **6,112** anti-tank mines and **10,053** unexploded military munitions in the territory of **Aghdam District**; **4** anti-personnel mines and **38** anti-tank

mines, **932** unexploded military munitions; in the territory of **Jabrayil District**, **4,887** anti-personnel mines, **2,856** anti-tank mines and **10,259** unexploded military munitions; in the territory of **Fuzuli District**, **8,911** anti-personnel mines, **5,723** anti-tank mines and **21,234** unexploded military munitions; in the territory of **Gubadli District**, **835** anti-personnel mines, **1,504** anti-tank mines and **1,304** unexploded military munitions; in the territory of **Tartar District**, **2,409** anti-personnel mines, **1,507** anti-tank mines and **2,525** unexploded military munitions; in the territory of **Khankendi District**, **4,859** anti-personnel mines, **112** anti-tank mines and **172** unexploded military munitions; in the territory of **Khojaly District**, **72** anti-personnel mines, **1** anti-tank mine and **1,886** unexploded military munitions; in the territory of **Khojavand District**, **77** anti-personnel mines, **196** anti-tank mines and **7,528** unexploded military munitions; in the territory of **Zangilan District**, **925** anti-personnel mines, **510** anti-tank mines and **1,161** unexploded military munitions; and in the territory of **Tovuz District**, **2** anti-personnel mines were discovered and neutralized.

In the territory of **Kalbajar District**, a total of **1,434** high-explosive anti-personnel mines of the **PMN-2** and **PMN-E** models were discovered, of which **50** were manufactured in

Armenia in **2018**, **312** in Armenia in **2019**, and **740** in Armenia in **2021**; as well as **322** anti-tank mines of the **TM-57**, **TM-62P2** and **TM-62M** models, manufactured in Russia, with unknown dates of manufacture; and **2,131** unexploded military munitions.

In the territory of **Lachin District**, **2,113** high-explosive anti-personnel mines of the **PMN-2** and **PMN-E** models were discovered, of which **1** was manufactured in Armenia in **2012** and **2,021** were manufactured in Armenia in **2021**; as well as **43** anti-tank mines of the **TM-62P2** and **TM-62M** models, manufactured in Russia, with unknown dates of manufacture; and **162** unexploded military munitions.

In the territory of **Shusha District**, **116** high-explosive anti-personnel mines of the **PMN-E** model were discovered, of which **20** were manufactured in Armenia in **2021**; as well as **13** anti-tank mines of the **TM-62P2** model, manufactured in Russia, with unknown dates of manufacture; and **2,445** unexploded military munitions.

In the territory of **Dashkasan District**, a total of **796** anti-personnel mines were discovered, including **613** high-explosive **PMN-E** and **PMN-2** mines manufactured in Armenia in **2016**, and **5 OZM-72E** mines manufactured in Armenia with unknown dates of manufacture; as well as **4** anti-tank mines of the **TM-62M** model, manufactured in Russia, with unknown dates of manufacture.

Thus, in total, **31,964** anti-personnel mines, **19,110** anti-tank mines of the **TM-62M**, **TM-62P2**, **TM-57** and **TM-62R**models manufactured in Russia, and **67,204** unexploded military munitions were discovered and neutralized.

It was established by the court that, on **9 October 2022**, at around **12:00**, while conducting engineering reconnaissance at the **K1 combat position** located in the **Alagollar** direction of **Kalbajar District**, as a result of the explosion of a mine previously planted by unidentified members of Armenian armed formations with national hatred or hostile intent, **Namiq Abishov**, soldier and fortification specialist of the 1st section of the 1st platoon of the 1st engineering-fortification company of military unit **"N"** of the **Ministry of Defence**, sustained injuries classified as serious harm to health, namely **"traumatic-hemorrhagic shock of grade I-II; open, shrapnel, displaced fractures of the bases of the III-IV metatarsal bones, the V metatarsal bone, the body of the talus, the distal metaphysis of the tibia, the navicular and cuboid bones, accompanied by lacerated wounds of the sole region of the right foot and abrasions of the right hand."**

According to the report dated **9 October 2022**, because the scene of the incident was a mined area, it was not possible to inspect it.

One pair of military boots and one black sock recognized as material evidence were stored in the storage room of the **Special Investigation Department**.

On **27 December 2022**, **Vural Aghaali**, investigator of the **Gubadli Military Prosecutor's Office**, inspected the clothing items that had been on soldier **Nurullayev Nureli Yusif oglu** at the time of the incident.

The clothing items that had been on **Nurullayev Nureli Yusif oglu** at the time of the incident were recognized as material evidence.

It was established by the court that **Malikov Ismayil Shikhi oglu**, soldier and rifleman of the 3rd section of the 2nd platoon of the 1st company of the 1st battalion of military unit **"N"** of the **Ministry of Defence**, while at the combat position conventionally called **"KÇ-24,"** located in the territory of **Zar village**, **Kalbajar District**, where the military unit in which he served was stationed, on **10 October 2022**, at around **18:40**, by servicemen of the **Armed Forces of Armenia** whose identities and exact number were unknown,

acting with national hatred and hostile intent for the purpose of intentionally killing him, as a result of the explosion of an anti-personnel mine placed in the ground, he sustained injuries classified as serious harm to health, namely **"an open fracture of the heel bone of the right lower limb, rupture at the level of the lower one-third of the right lower limb accompanied by traumatic-hemorrhagic shock of grade II–III, traumatic amputation at the level of the lower one-third of the calf of the right lower limb, and crushing and tearing of the soft tissues of the middle one-third of the left calf."**

On **24 October 2022**, **Fuad Gasimzade**, investigator of the **Kalbajar Military Prosecutor's Office**, inspected the clothing items that had been on soldier **Malikov Ismayil Shikhi oglu** at the time of the incident.

It was established by the court that **Seyfullayev Ziyafat Farrukh oglu**, serviceman on extended active military service and aimer of the 2nd mortar battery of the mortar division of military unit **"N"** of the **State Border Service**, on **12 October 2022**, at around **14:00**, while participating in engineering-fortification works in the area of combat position No. **129**, conventionally called **"Sarıdağ,"** of the 7th Border Commandant's Office, located in the territory of **Rəzdərə village**, **Zangilan District**, stepped on an anti-personnel mine that had been buried in the ground by unidentified servicemen of Armenian military formations. As a result, he sustained injuries classified as minor harm to health, namely **"an open fracture of the left heel bone,"** and was evacuated to the medical station of that military unit.

According to the inquiry submitted by the **Gubadli Separate Border Division** to the **Gubadli Military Prosecutor's Office**, on **12 October 2022**, at around **14:00**, in the area of border-combat point No. **129** of the 7th Border Commandant's Office of the **Gubadli Separate Border Division**, when an anti-personnel mine exploded, the probability that the area had been mined by Armenian armed formations was high, and therefore it was considered inappropriate for employees of the military prosecutor's office to go to that area and inspect the scene.

It was established by the court that **Nabiyev Taleh Zakir oglu**, Chief Sergeant and serviceman of military unit **"N"** of the **Internal Troops of the Ministry of Internal Affairs**, and **Alikhanov Aydin Ashrafovich**, Captain and employee of the **Presidential Security**

Service, on **7 November 2022**, at around **07:20**, were, together, checking the area where a communication device called **"Vallon"** had stopped working, on the road leading to military unit **"N"** of the **Ministry of Defence**, in the territory of **Ashaghi Veysalli village**, **Fuzuli District**, using a mine-searching device. While checking the area where the communication device was located, Chief Sergeant **T. Z. Nabiyev** stepped on an anti-personnel mine placed in the ground by unidentified members of Armenian armed formations. As a result, Chief Sergeant **T. Z. Nabiyev**sustained injuries classified as serious harm to health, namely **"craniocerebral trauma, an open fracture of the left foot, traumatic amputation of the lower one-third of the right lower limb, and multiple shrapnel wounds to both lower limbs."** Captain **A. A. Alikhanov** sustained injuries classified as minor harm to health, namely **"reduction of the visual acuity of the left eye to 0.2–0.3; laceration, hematoma and contusion of the upper eyelid; a non-penetrating wound of the cornea; subconjunctival hemorrhage; and numerous wounds to the parietal region, the right auricle, the facial region, the right palm, and both calves."** They were evacuated from the scene.

By decision dated **16 January 2023** of **Ibrahimov Azer Vagif oglu**, investigator for important cases of the **Special Investigation Department of the Military Prosecutor's Office of the Republic of Azerbaijan**, on recognition as material evidence, camouflage-type field-uniform trousers, warm under-trousers, one pair of soldier's boots, one pair of socks that had been on **T. Z. Nabiyev**, and one metal object, thirteen metal objects and four pieces of paper that had been on **Captain A. A. Alikhanov**, were recognized as material evidence and handed over for storage in the storage room of the **Special Investigation Department**.

By Order No. **Ə635-387-22** dated **16 September 2022** of the commander of military unit **"N,"** Chief Sergeant **Nabiyev Taleh Zakir oglu** was released from the position of reconnaissance officer of the reconnaissance half-group of the special-purpose detachment and appointed to the position of chief reconnaissance officer and commander of the reconnaissance half-group of the special-purpose detachment.

It was established by the court that **Allahverdiyev**

Page 867

Siyasat Ziyadkhan oglu, while driving a tractor with state registration plate **10 AC 864** on a dirt road in the territory of **Chiragli village, Kalbajar District**, on **14 December 2022**, at around **17:00**, as a result of the tractor striking an anti-tank mine, **S. Z. Allahverdiyev** and **Panahov Rodik Shamshaddin oglu**, who was walking behind the tractor and worked at the same company as a cable worker-labourer, sustained injuries. Thereafter, servicemen of the Ministry of Defence and other employees of the company placed them in the cargo bed of a **QAZ** flatbed/tarpaulin-covered truck with state registration plate **99 JY 396**, belonging to the company, and, while moving approximately **15–20 metres** in the direction of **Kalbajar District**, the right front wheel of the vehicle struck another anti-tank mine, causing an explosion.

As a result of both explosions, **Hummatov Zohrab Mammad oglu**, a serviceman of military unit **"N"** of the Ministry of Defence holding the rank of warrant officer, sustained injuries amounting to serious harm to health and died at the scene. Servicemen on extended active military service — Junior Sergeant **Axundov Rza Yusif oglu**, Soldier **Shirinov Murad Isa oglu**, Soldier **Igbal Qabil Adalat oglu** — and company employees **Panahov Rodik Shamshaddin oglu**, **Allahverdiyev Siyasat Ziyadkhan oglu**, **Aliyarov Sadir Heydar oglu**, and **Balakishiyev Tofiq Hajimirza oglu**s ustained various injuries.

On **15 December 2022**, **Sabuh Zamanli**, prosecutor-criminalist of the Criminalistics and Information Technologies Department of the Military Prosecutor's Office of the Republic of Azerbaijan, inspected the incident scenes, and items found at the incident scenes were packed and removed.

Clothing items belonging to **Hummatov Zohrab Mammad oglu**, **Panahov Rodik Shamshaddin oglu**, **Allahverdiyev Siyasat Ziyadkhan oglu** and **Aliyarov Sadir Heydar oglu**, employees of **"Telecommunication Service" LLC**, as well as metal objects taken from the incident scene and from the body, and a mass of soil taken from the explosion crater, were recognized as material evidence.

According to Certificate No. **10** dated **15 March 2023** of **"Telecommunication Service" LLC**, as a result of damage to the vehicle and excavator during the incident, damage in the amount of **160,000 manats** was caused to the enterprise.

According to the certificate submitted by military unit **"N"**, on **14 July 2022**, while a **T-72** tank with turret marking **"256"**, belonging to the military unit, was carrying out mine-search and mine-clearance activities in the territory of **Nuzgar village, Jabrayil District**, it struck an anti-tank mine that had been planted in advance, as a result of which material damage in the amount of **723 manats** was caused to the military unit.

Alibayli Shahriyar Ramiz oglu, Chief Lieutenant and serviceman of group **"C"** of battalion **"N"** of military unit **"N"** of the Ministry of Defence, and **Huseynov Esgin Cemil oglu**, a serviceman on extended active military service and soldier of group **"E"** of battalion **"N"** of the same military unit, on **5 March 2023**, at around **11:00**, in the territory of **Shusha District**, while preventing a provocation by Armenian armed formations, were struck by fire opened from firearms by unidentified members of Armenian armed formations. As a result, **Sh. R. Alibayli** sustained injuries amounting to serious harm to health, namely **"multiple shrapnel wounds, one through-and-through firearm wound to the head,"** and **E. C. Huseynov** sustained injuries amounting to serious harm to health, namely **"one penetrating through-and-through firearm wound to the head,"** and died at the scene.

By decision dated **1 June 2023** of **Ibrahimov Azer Vagif oglu**, investigator for important cases of the Special Investigation Department of the Military Prosecutor's Office of the Republic of Azerbaijan, on recognition as material evidence, the following were recognized as material evidence: military field-type trousers, a military field-type long-sleeved shirt, warm lower trousers, one pair of socks, a belt, underpants and two belt accessories belonging

to **Alibayli Shahriyar Ramiz oglu**; a blue hoodie, military field-type trousers, black sports trousers, a military field-type long-sleeved shirt, a military field-type short-sleeved shirt, underpants, a cap, a neck warmer, one pair of socks, one pair of yellow gloves, one pair of black half-gloves and one pair of boots belonging to **Huseynov Esgin Cemil oglu**; and the bullet part of a cartridge. The said material evidence and the bullet part of the cartridge were handed over to the storage room of the Special Investigation Department for safekeeping.

Huseynov Kamran Namiz oglu, Chief Lieutenant and deputy commander of group **"E"** of battalion **"N"** of military unit **"N"**, and **Karimov Royal Bakhtiyar oglu**, warrant officer and reconnaissance-medic of the same group, on **4 March 2023**, at around **01:15**, in the territory of **Shusha District**

Page 868

while preventing an Armenian provocation, as a result of stepping on anti-personnel mines buried in the ground by unidentified members of Armenian armed formations, **K. N. Huseynov** died on the way while being evacuated to **Shusha city**, and **R. B. Karimov** sustained various bodily injuries.

According to the extract from Order No. **295** dated **18 October 2017** of the commander of military unit **"N," Huseynov Kamran Namiz oglu** was included in the personnel list of the military unit and in all types of supply. By Order No. **65**dated **4 March 2023**, he was removed from all types of supply as of **4 March 2023** due to his death in combat operations conducted after military operations.

By decision dated **5 June 2023** on recognition as material evidence, a jacket (**bushlat**), military field-type trousers, a military field-type tunic, a shirt, an undershirt, under-trousers, underpants, one sock and one pair of boots, as well as **two metal objects**, were recognized as material evidence and handed over to the storage room of the **Special Investigation Department** for safekeeping.

By decision dated **17 May 2023** on recognition as material evidence, a military bushlat, jacket, assault vest, **32 cartridge cases** and **one bullet part of a cartridge** were recognized as material evidence and handed over to the storage room of the investigation department.

It was established by the court that **Ahmadov Yusif Alasgar oglu**, a serviceman on extended active military service, Junior Sergeant, serving as reconnaissance medic of the 4th platoon of the 1st company of the 1st battalion of military unit **"N,"** on **31 March 2023**, at around **14:50**, while performing combat duty at the combat position conventionally called **"7,"** located in the territory of **Imamgulular village, Shusha District**, sustained an injury as a result of fire opened from firearms by unidentified members of Armenian armed formations, namely **"a bullet wound entering the posterior-lateral surface of the lower one-third of the left thigh and exiting from the anterior-lateral surface of the knee-joint area,"** and was evacuated to the military hospital.

Pursuant to the decision dated **13 April 2023** on recognition as material evidence, the military field-type trousers and warm under-trousers that had been worn by **Ahmadov Yusif Alasgar oglu** and recognized as material evidence were, after being returned from expert examination, handed over to military unit **"N"** for responsible storage. Since no signs of damage or blood-like stains were observed on the one pair of boots and one pair of black socks worn by **Ahmadov Yusif Alasgar oglu** at the time of the incident, they were returned to him.

It was established by the court that, on **11 April 2023**, at around **17:00**, while the personnel of military unit **"N"** of the **Ministry of Defence** were carrying out engineering-fortification works at the combat position of the 1st battalion located in **Zabukh village, Lachin District**, which had recently been liberated from the Armenians, as a result of fire opened from sniper rifles and automatic weapons by opposing Armenian military formations from positions located in the territory of **Tekh village, Gorus District**, servicemen of military unit **"N"** — Warrant Officer **Hasanov Elshad Gabil oglu**, Warrant Officer **Zalov Vidadi Nizami oglu**, and Soldier **Tagiyev Sabuhi Gunduz oglu** — sustained various injuries and died at the scene. Servicemen of the same military unit — Captain **Safarov Shahin Elsevar oglu**, Lieutenant **Hajiyev Murad Elshan oglu**, Soldier **Aliyev Basharaddin Kamil oglu**, Soldier **Rustamov Elmir Bashir oglu**, Soldier **Guliyev Mahammad Shafi oglu**, Soldier **Ibrahimov Nurlan Ibrahim oglu**, Soldier **Najafov Renat Zaur oglu**, and Soldier **Zamanov Ramish Yolchu oglu** — sustained bodily injuries of varying degrees.

It was established by the court that, during the armed attack that occurred on **11 April 2023**, as a result of damage to a **UAZ** vehicle with military registration plate **O-400-QQ** belonging to military unit **"N,"** and a **UAZ** vehicle with state registration plate **0-400-QQ** belonging to **Qartal Construction Firm**, material damage in the amount of **350 manats** was caused to the military unit, and material damage in the amount of **2,119.46 manats** was caused to **Qartal Construction Firm**.

On **12 April 2023**, an inspection was carried out, and it was established that the scene of the incident was an expanded area located in front of the combat position conventionally called **"H 5,"** situated on the line of direct contact with Armenian servicemen of the 1st battalion of military unit **"N"** of the **Ministry of Defence**, in **Zabukh village, Lachin District**, recently liberated from the Armenians. The nearest residential settlement to that area is **Zabukh village, Lachin District**. In that area, there is a combat position conventionally called **"H 5,"** located on the line of direct contact with Armenian servicemen. Before reaching that position, when moving **100 metres** along a dirt road, both on the right

direction as well as in the left direction, Armenian combat positions are observed. To the north of the scene lies **Lachin city**; to the north-east, **Zabukh village of Lachin District**; to the south, **Tekh (Dığ) village of Gorus District of the Republic of Armenia**; and to the west, **Caghazur village of Lachin District**. The scene is located at an altitude of **1,300 metres** above sea level. According to the terrain relief, the scene consists of mountainous,

forested land, while part of it is relatively flat terrain. Opposite the scene, in the area of **Tekh (Dığ) village of Gorus District**, the combat positions of Armenian military formations are located.

The combat position conventionally called **"H 5"** is surrounded on three sides by the combat positions of the Armenian military formations, and the position itself is encircled by an earthen embankment. On the earthen embankment surrounding the position, the **tricolour state flag of the Republic of Azerbaijan** is flying in a form attached to a metal pole driven into the ground. The place where the incident directly occurred is located on the expanded area opposite the combat position conventionally called **"H 5."** That area is part of the territory of the Republic of Azerbaijan. Part of the area is surrounded by an earthen embankment. The expanded area surrounded by the earthen embankment measures **35 x 20 metres**. Subsequently, in that area, an inspection was carried out of the **O 400QQ** military-registration vehicle belonging to the commander of the military unit.

During the inspection, it was established that there were traces of damage characteristic of shots fired from firearms: one trace in the upper-right part of the front windshield of the vehicle; one trace in the middle part of the opening-and-closing glass of the rear passenger door on the right side of the vehicle; one trace in the upper-left part of the glass located to the left of that door; two traces on the roof of the vehicle, including one in the upper part of the rear passenger door and two on the glass of that door; one trace on the rear of the vehicle, on the glass of the luggage door next to the handle used to open the door; one trace on the glass of the luggage door; and one trace in the upper-right part of the left front door of the vehicle. In total, there were **two** such traces on the left side of the vehicle, namely one on the roof above the front door and one on the glass located to the right of the rear passenger door. In addition, there was one such trace in the middle-left part of that glass and two such traces on the roof of the vehicle in the upper-left part of that glass. In total, there were **four** traces characteristic of damage caused by shots fired from firearms. The glass of the rear passenger door on the left side of the vehicle had completely shattered and fallen to the ground as a result of shots fired from a firearm. Characteristic crack traces caused by the impact of bullets were also present on the glass through which the shots were fired.

On **14 June 2023**, an inspection was carried out and photographs were taken of a **silver Mitsubishi L200** vehicle with state registration plate **50-AA-743**, belonging to **Qartal Construction Firm**.

By decision dated **3 August 2023** on recognition as material evidence, the following were recognized as material evidence in the criminal case and kept in the material evidence storage room of the **Special Investigation Department**:

a military field-type bush jacket belonging to **E. Q. Hasanov**; a military field-type tunic; military field-type trousers; a military field-type sweater; a military scarf; a military short-sleeved shirt; a cap; thermal underwear; one pair of socks and one pair of military boots; a vest, trousers, sweater, military field-type long-sleeved shirt, undergarment, military cap, one pair of socks and one pair of military boots belonging to **S. G. Tagiyev**; a tunic, trousers,

sweater, military field-type long-sleeved shirt, undergarment, one pair of socks and one pair of military boots belonging to **V. N. Zalov**; a jacket, trousers, short-sleeved shirt, undergarment and one pair of socks belonging to **M. E. Haciyev**; a vest, trousers, sweater, long-sleeved shirt, undergarment and one pair of military boots belonging to **N. I. Ibrahimov**; as well as a wallet, an identity card found inside the wallet, two bank cards, a business card, one **LD** brand cigarette pack, trousers, warm under-trousers, cap, one pair of soldier's boots and a bulletproof vest belonging to **B. K. Aliyev**; a tunic, sweater, long-sleeved shirt and one pair of military boots belonging to **N. I. Ibrahimov**; and **37 cartridge cases** collected from the scene.

By decision dated **4 August 2023** on recognition as material evidence, a military field-type jacket and soil samples were recognized as material evidence and handed over for storage in the material evidence storage room of the **Special Investigation Department**.

By decision dated **29 August 2023** on recognition as material evidence, the following were recognized as material evidence: sports trousers, trousers, a wool sweater, a T-shirt, a black sweater, black trousers, a long-sleeved shirt, one pair of boots and one pair of socks belonging to **Novruzalizade Orkhan Elkhan oglu**; and a wool sweater, trousers, warm undershirt, short-sleeved shirt, black shirt, underwear and one pair

of socks; a jacket, trousers, short-sleeved shirt, gray T-shirt and one pair of socks belonging to **Maqsudlu Maqsud Valeh oglu**; trousers, a tunic, wool sweater, one pair of boots, an iron helmet and one pair of socks belonging to **Mahmudlu Muslim Vidadi oglu**; a wool sweater, trousers, warm under-trousers, warm undershirt, black T-shirt, warm underwear and a metal object belonging to **Mehraliyev Toghrul Fariz oglu** were recognized as material evidence and handed over to the storage room of the **Special Investigation Department** for safekeeping.

According to the inquiry of the chief of staff and deputy commander of military unit **"N,"** on **17 May 2023**, it was not possible to inspect the scene where Junior Sergeant **Aliyev Novruz Haqverdi oglu**, a serviceman on extended active military service and commander of the 1st warehouse of the 1st supply team of the 10th section of the 4th battalion of military unit **172**, was wounded at the combat position conventionally called **"K-22,"** because that position was located on the contact line with Armenian servicemen, was under visual observation by Armenian servicemen, the combat clash was continuing, and the area was under intensive fire from strike drones and artillery weapons by the Armenians.

Pursuant to the decision dated **5 October 2023** on recognition as material evidence, the military trousers with belt and one right-side boot worn by **Bakirov Ali Shukur oglu** were recognized as material evidence.

It was established by the court that, on **11 July 2023**, as a result of fire opened from firearms by unidentified members of Armenian armed formations, soldier **Abdullayev Huseyn Arif**

oglu, operator of the anti-tank guided-missile launcher of the 2nd anti-tank team of the anti-tank platoon of military unit **"N"** of the **Ministry of Defence**, sustained a firearm bullet injury, namely **"a blind penetrating wound of the soft tissues of the right scapular region and the upper one-third of the right upper arm."**

It was stated in the inquiry added to the criminal case that, because the area where the incident occurred was under observation from several Armenian posts, and because it was under intensive fire, the employees of the military prosecutor's office could not go to that area, as doing so was dangerous to life and health; therefore, it was not possible to inspect the scene.

The military tunic and beige short-sleeved shirt recognized as material evidence were stored in the storage room of the **Special Investigation Department**.

Three metal objects recognized as material evidence were stored in the storage room of the **Special Investigation Department**.

It was established by the court that, on **21 August 2023**, at around **10:00**, as a result of fire opened from the combat positions of the **Armed Forces of Armenia**, located in **Ashaghi Shorja settlement, Basarkechar District**, by unidentified servicemen of the Armenian armed forces, at the combat position conventionally called **"K-48"** of the 1st battalion, 3rd company, of military unit **172** of the **Ministry of Defence**, located in the territory of **Zar village, Kalbajar District**, in the direction of the conditional state border between Azerbaijan and Armenia, ensign **Nazarov Ramiz Ismet oglu**, commander of the 2nd sniper team of the sniper platoon of military unit **"N,"** who was serving at that position, sustained injuries amounting to minor harm to health, namely **"blind wounds of the right cheek area penetrating into the oral cavity, accompanied by damage to the right frontal bone; multiple metallic foreign bodies in the soft tissues; a blind wound of the left forearm area; and a superficial wound of the nasal area."**

According to the inquiry added to the criminal case, it was not possible to go on **21 August 2023** to the combat position **K-48** of the 1st battalion, 1st company of military unit **"N,"** where ensign **Nazarov Ramiz Ismet oglu** had been wounded as a result of fire opened by Armenian servicemen, because the exchange of fire was continuing on that day.

The trousers, short-sleeved undershirt and one pair of military boots recognized as material evidence were stored in the storage room of the **Special Investigation Department**.

One **Truvelo** sniper rifle, No. **3432**, was returned to military unit **"N"** of the **Ministry of Defence**.

Page 871

It was established by the court that, on **31 August 2023**, at around **07:00**, as a result of fire opened from small arms and artillery weapons by unknown servicemen of Armenian armed formations, acting with national hatred and hostile intent, at the combat position

conventionally called **"K-8,"** located on the conditional Azerbaijan-Armenia state border in the territory of **Damirchidam village, Kalbajar District**, where the Azerbaijani Army was stationed, servicemen of military unit **"N"** of the **Ministry of Defence of the Republic of Azerbaijan**, Warrant Officer **Tagiyev Mahammad Ramiz oglu**and Junior Sergeant **Mammadli Sadiq Saday oglu**, sustained injuries.

In addition, on **1 September 2023**, beginning at around **07:00**, as a result of fire opened from small arms and artillery weapons by unknown servicemen of Armenian armed formations, acting with national hatred and hostile intent, at the combat positions conventionally called **"K-7"** and **"K-8,"** located on the conditional Azerbaijan-Armenia state border in the territory of **Damirchidam village, Kalbajar District**, where the Azerbaijani Army was stationed, at around **09:00**servicemen of military unit **"N"** of the **Ministry of Defence** — Sergeant **Aliyev Ulfat Novruz oglu**, **Eyvazov Maharram Jeyhun oglu**, and **Alisoy Mammad Gapay oglu** — sustained injuries.

In addition, on **1 September 2023**, at around **12:00**, as a result of fire opened from small arms and artillery weapons by unknown servicemen of Armenian armed formations, acting with national hatred and hostile intent, at the combat position conventionally called **"K-20,"** located on the conditional Azerbaijan-Armenia state border in the territory of **Yellice village, Kalbajar District**, where the Azerbaijani Army was stationed, serviceman of military unit **"N,"** Chief Lieutenant **Ahmadov Mehdi Huseyn oglu**, and serviceman of military unit **"N,"** soldier **Gasimov Gunduz Intizam oglu**, sustained injuries.

Pursuant to the decision dated **31 October 2023** on recognition as material evidence, in the criminal case, a long-sleeved shirt and jacket belonging to **U. N. Aliyev** and trousers belonging to **M. R. Tagiyev** were recognized as material evidence and kept in the storage room of the **Special Investigation Department**.

On **7 September 2023**, at around **07:20**, **Ismayilov Yunis Panah oglu**, Sergeant, serviceman on extended active military service, reconnaissance-sapper of the 1st group of the 4th platoon of the 1st company of the 1st battalion of military unit **"N,"** while carrying out engineering-fortification works at the combat position conventionally called **"KQ-13"** of the 2nd battalion of military unit **"N,"** located in the direction of **Marcimak village, Kalbajar District**, as a result of the explosion of one of the mines that had been deliberately buried in the ground by unknown servicemen of Armenian armed formations, acting with national hatred and hostile intent, for the purpose of intentional killing, while he was neutralizing mines, sustained injuries diagnosed as **"moderate post-hemorrhagic anemia with fasciotomy; traumatic rupture of the right lower limb at the level of the lower one-third of the calf; traumatic shock of grade II-III accompanied by traumatic rupture of the right lower limb at the level of the middle one-third of the calf; right-sided pneumothorax; loss of the 1st and 4th fingers of the right hand; contusion of the left knee-joint area; wounds and subcutaneous hemorrhage,"** and was evacuated to hospital.

In his report dated **7 September 2023**, **Fuad Gasimzade**, investigator and Lieutenant of Justice of the **Kalbajar Military Prosecutor's Office**, stated that information had been

received that **Ismayilov Yunis Panah oglu**, Sergeant and serviceman of military unit **"N,"** had sustained injuries as a result of the explosion of a mine previously planted by Armenian armed formations and had been evacuated to a military hospital; on the basis of that information, the military unit was visited and relevant documents were collected, and necessary measures were taken, but because the scene of the incident was a mined area, it was not possible to inspect it.

Pursuant to the decision dated **31 October 2023** on recognition as material evidence, a long-sleeved shirt, jacket, warm jacket, lower underwear, trousers and the left half-pair of a boot belonging to **Y. P. Ismayilov** were recognized as material evidence and kept in the storage room of the **Special Investigation Department**.

It was established by the court that **Eminov Khayyam Mahal oglu**, Chief of Staff of military unit **"N"** of the Ministry of Defence and deputy commander of the military unit, Lieutenant Colonel, while in the area of deployment of the military unit A-11, in the direction of Qaralar village of Aghdam district, in order to perform his service duties, on **10 September 2023**, at **13:14**, was at the combat

while observing the area between his own position and the positions of the Armenian armed formations located in the said area, as a result of stepping on a mine buried in the ground by unidentified servicemen of those formations with the intent of intentional killing motivated by national hatred and hostility, he sustained injuries diagnosed as **"subtotal detachment of the left foot at the level of the open ankle joint, with extensive soft-tissue defect; lacerated wound of the sole of the right foot; open displaced fractures of the lower one-third of the tibial bones and of the metatarsal bones; closed displaced fractures of the 1st and 5th toes of the right foot; multiple blind shrapnel wounds to various parts of the body; blind shrapnel wounds to both periorbital regions; traumatic keratopathy of the left eye; traumatic-hemorrhagic shock of the 2nd–3rd degree,"** and was evacuated to a military hospital.

The certificate submitted by military unit **"N"** to the **Aghdam Military Prosecutor's Office** stated that the scene of the incident, which occurred on the right flank of the combat position of the **2nd squad of the 3rd platoon of the 5th company of the 2nd battalion** of military unit **"N,"** was fully observable from the positions of the Armenian armed formations, and since the area was mined and inspection of the area was dangerous to life and health, it was not possible to conduct an inspection.

Pursuant to the decision dated **14 November 2023** on recognition as material evidence, a T-shirt, trousers, one sock, a rope and one pair of boots belonging to **Eminov Khayyam Mahal oglu** were recognized as material evidence and handed over for storage to the storage room of the **Special Investigation Department**.

According to the protocol dated **22 September 2023** on the inspection of body parts presumed to belong to servicemen of a military unit of the **Ministry of Defence** — **Khalilov Yusif Mammadrza oglu**, **Suleymanov Elshad Mammad oglu** and **Mammadov Samir Agil oglu** — the body parts were in a condition contaminated with soil and lubricating-oil materials.

For the purpose of conducting forensic genetic examination, the following were taken:

1. the articular head of the left femur;
2. the proximal articular head of the left humerus;
3. the distal articular head of the left femur;
4. the nail phalanx of the second toe of the left foot;
5. two bone fragments selected from among tissues inside the bag submitted together with the body.

According to the protocol dated **29 September 2023** on the inspection of the scene where servicemen of a military unit of the **Ministry of Defence** — **Khalilov Yusif Mammadrza oglu**, **Suleymanov Elshad Mammad oglu** and **Mammadov Samir Agil oglu** — were martyred, namely **Papravand village, Aghdam District**, it was established that a **T-72 tank No. 139** had been completely destroyed and its metal parts were scattered around.

During the inspection, numerous small bone fragments, presumed to belong to **Khalilov Yusif Mammadrza oglu**, as well as tooth and gum samples, were collected from the scene, packaged in the prescribed manner and taken for use in genetic-examination research.

According to the protocol dated **22 September 2023** on the inspection of the body of **Museyibli Isgandar Ganbar oglu**, a serviceman of a military unit of the **Ministry of Defence**, numerous injuries were found on the body.

It was established during the court proceedings that, in addition, on **28 May 2022**, at around **18:00**, in **Gorazilli village**, **Fuzuli District**, liberated from occupation, **Abdullayev Khayyal Bakhtiyar oglu**, born on **4 December 1999**, a resident of **Khojavand District**, while grazing small livestock belonging to **"KRAUN Co-R" LLC**, where he worked as a shepherd, sustained injuries as a result of a mine explosion.

It was further established that, on **7 December 2023**, at around **11:00**, as a result of the explosion, at the geographical coordinates **39°28'51.00"N, 47°13'22.93"E**, of one of the mines deliberately buried in advance in the territory of **Kurdlar village, Fuzuli District**, **Hatamli Zamin Zahir oglu**, born on **25 November 1994**, a resident of **Aghammadli village, Imishli District**, sustained bodily injuries.

In addition, a **New Holland TD 5.110** tractor with state registration plate **30-AB-320**, belonging to the **Imishli Service Center** of the **"Ganja Automobile Plant" Production Association** and operated by him on the basis of a lease agreement, was rendered unusable.

Thus, according to the service agreement dated **3 October 2023** concluded between the customer **"Agro Dairy" LLC**and the contractor **Muradov Sahran Alish oglu**, on the basis of the latter's assignment

Page 873

Hatamli Zamin Zahir oglu carried out the ploughing of the land at the time of the incident using the tractor that he had leased.

It was established during the court proceedings that, since **27 September 2020**, as a result of explosions of mines and other similar devices in the territory of **Jabrayil District**, a total of **3 persons** had been killed and **19 persons** had sustained bodily injuries of varying degrees.

In addition, it was established that **Abbaszade Elnur Raftar oglu**, born on **16 January 1997**, a resident of **Chobujuq settlement, Fuzuli District**, who worked as a labourer at **"Geotutul"**, a subsidiary of **"Kalyon" LLC**, which was carrying out road-construction works in the territories liberated from occupation, on **31 July 2021**, at around **15:00**, while waiting for his co-workers in the area of **Amirvarli village, Jabrayil District**, on the **Horadiz–Zangilan** motor road in connection with his service duties, sustained injuries to his foot area as a result of the explosion of an unexploded igniter of a hand grenade thrown by Armenian armed formations during the period of occupation.

It was established during the court proceedings that, since **27 September 2020**, as a result of explosions of mines and other similar devices in the territory of **Lachin District**, a total of **4 civilians** had been killed and **5 civilians** had sustained bodily injuries of varying degrees.

During the preliminary investigation, inspections were conducted at each of the scenes of the aforementioned incidents; medical examinations of the bodies of the deceased persons were carried out by a forensic medical expert; medical opinions regarding the injuries sustained by the injured persons were obtained and added to the case materials; the legal successors of the deceased victims were recognized and questioned; decisions were adopted recognizing the injured persons as victims, and they were questioned in the case; witnesses were questioned; and other investigative actions were carried out.

Thus, on **23 November 2020**, **Pasazade Cavid Vidadi oglu**, police senior lieutenant and district inspector of the **Gubadli District Police Department**, submitted a report to the **Fuzuli District Police Department**, stating that on **22 November 2020**, at around **18:00**, **Suleymanov Vusal Zeyni oglu** and **Karamov Ramil Karam oglu** had been found wounded in the territory of **Lachin District**. The said information was sent to the **Lachin District Prosecutor's Office** for investigation according to jurisdiction.

During the investigation, it was established that, beginning from **27 September 2020**, during the armed conflict caused by Armenian aggression, **Suleymanov Vusal Zeyni oglu**, **Karamov Ramil Karam oglu**, **Yaqubov Fakhraddin Yaqub oglu**, and **Gahramanov Uzeyir Khalil oglu**, who voluntarily assisted in the evacuation of martyred and wounded servicemen from occupied territories using an ambulance with state registration plate **99-TX-**

074, were in the area of **Gulabird village, Lachin District**, which had been liberated from occupation, on **22 November 2020**, when the vehicle they were driving struck a mine planted by Armenian servicemen. As a result, **Vusal Suleymanov** and **Ramil Karamov**sustained bodily injuries of varying degrees as a result of the mine explosion, while **Fakhraddin Yaqubov** and **Uzeyir Gahramanov** died at the scene from the injuries they had sustained.

It was established during the court proceedings that, while the Karabakh region of the Republic of Azerbaijan and the surrounding territories were being kept under occupation by members of Armenian military formations, on **6 October 2023**, at around **08:00**, one of the mines deliberately planted in advance by members of the said criminal association in the area of **Bezirxan plateau**, in **Yanshaq village, Kalbajar District**, exploded, as a result of which **Asgarov Gasim Sardar oglu**, born on **27 September 1987**, who had been internally displaced from **Mishni village, Kalbajar District**, and lived in **Sarkar village, Samukh District**, sustained injuries.

It was established during the court proceedings that, on **22 September 2023**, at around **12:00**, as a result of the explosion of one of the mines deliberately planted in advance by Armenian armed formations in the territory of **Khalfali village, Shusha District**, **Ibrahim Gormez Ali oglu**, born on **21 January 1965**, a citizen of the Republic of Türkiye, who at that time was performing his work duties there using a bulldozer belonging to **"Kolin İnşaat Turizm Sanayi ve Ticaret Anonim Şirketi,"** sustained bodily injuries of varying degrees, and material damage was caused to the bulldozer.

According to the protocol on inspection dated **22 September 2023**, drawn up by **Jafarov Farhad Goyush oglu**, investigator of the **Shusha District Police Department** and police lieutenant colonel, the scene of the mine explosion was located in **Shusha city**,

is the dirt road located approximately **2.5 kilometres** from the post of the Russian peacekeeping troops, in the direction of **Shusha city**, in **Khalfali village**, on the right side of the **Khalfali River**.

At the beginning of the road extending from the said road toward the forest massif, it can be seen that a **TM-62P3 anti-tank mine** was found in the right track of the bulldozer belonging to **"Kolin İnşaat Turizm Sanayi ve Ticaret Anonim Şirketi"**, driven by citizen of the Republic of Türkiye **Ibrahim Gormez Ali oglu**, and bearing state registration plate **90H435**.

As a result of the mine's effect, the part of the bulldozer's right side that was in contact with the ground was in a damaged condition.

During the inspection, **Ibrahim Gormez Ali oglu**, who participated in the investigative action, stated that on **22 September 2023**, at around **12:00**, while clearing the **Khalfali road** with the bulldozer, a mine planted by Armenian armed formations exploded, as a result of which the bulldozer was damaged and he sustained bodily injury when one of the fragments broke the cabin window and struck his eye.

According to information dated **14 November 2023** of the **Ministry of Internal Affairs**, the **8th Rifle Brigade** of the Ministry of Defence of the so-called **"gendarme regime"**, which was unlawfully operating in **Khankendi city**, was deployed there. That brigade had in its possession anti-aircraft missile systems, grenade launchers, cannons, weapons of various calibres, tanks, and anti-personnel and anti-tank mines.

On **19 September 2023**, **Shusha city** was fired upon from three directions with various-calibre weapons and grenade launchers by servicemen of the 8th Rifle Brigade. **Khalfali village** of Shusha city and the surrounding areas were also mined by servicemen of those unlawful armed formations with anti-tank and anti-personnel mines. The commander of the unlawful 8th Rifle Brigade was Colonel **Arsen Voskanyan**.

According to the letter dated **18 November 2023** of the **State Security Service** available in the case file, the location where the bulldozer belonging to **"Kolin İnşaat Turizm Sanayi ve Ticaret Anonim Şirketi"** struck an anti-tank mine is in **Khalfali village, Shusha District**; previously, that area had been under the control of unlawful Armenian armed formations, and during the local anti-terrorist operations carried out on **19–20 September 2023**, it was liberated from occupation and placed under the control of the **Armed Forces of Azerbaijan**.

The **garrison of the 8th Rifle Brigade** of the so-called regime had been deployed there before the anti-terrorist operations, and the brigade's headquarters had been located in **Khankendi city**. Information exists that the commander of the 62nd Separate Artillery Brigade was Colonel **Arayik Harutyunyan**.

It was established during the court proceedings that, from **27 September 2020**, as a result of explosions of mines and other similar devices in the territory of **Aghdam District**, a total of **8 civilians** were killed and **26 civilians** sustained bodily injuries of varying degrees.

During the preliminary investigation, each of the scenes of the noted incidents was inspected; forensic medical examinations of the bodies of deceased civilians were conducted by an expert; medical opinions regarding the injuries sustained by injured persons were obtained and added to the case materials; the legal successors of deceased victims were identified and questioned; decisions were adopted recognizing injured persons as victims in the criminal case, and those persons were questioned; witnesses were questioned; and other investigative actions were carried out.

On **3 March 2021**, in order to determine the location where **Azimzade Hafis Salim oglu** was injured, the road passing through the territory of **Novruzlu village, Aghdam District**, was inspected with the participation of **Suleymanov Vasif Salim oglu**, **Ismayilov Parviz Mubariz oglu**, **Babayev Elshan Ramiz oglu**, **Zulfuqarov Zulfuqar Tofig oglu**, and others.

It was established that Armenian armed forces had buried mines in **Novruzlu village, Aghdam District**, which they had kept under occupation from **23 July 1993** until **20 November 2020**.

There are ruins and unusable buildings around the area. The surface of the place consists of soil and grass cover.

During the inspection of the scene, **Zulfuqarov Zulfuqar Tofig oglu** indicated the location of the minefield, and **three unexploded PMN-E type high-explosive anti-personnel mines** were discovered using a mine-search device at a distance of **35 metres** from the place where the mine had exploded, at **11 metres** from the road. They were neutralized by removing the capsule detonators.

During the inspection of the scene, **Babayev Elshan Ramiz oglu** indicated the place where the mine that **Azimzade Hafis Salim oglu** had stepped on had exploded, and stated that on that day, that is, on **3 March 2021**, the head of the **Aghdam Mechanical Irrigation Department**, **Azimzade Hafis**

Page 875

Salim oglu, while moving on foot in order to inspect the water well located in the area, sustained injuries as a result of stepping on a mine, and was later removed from that area with their assistance.

At a distance of **32 metres** from the road, **one torn piece of footwear** was discovered; at a distance of **1.95 metres** from that piece of footwear, **one exploded PMN-E high-explosive anti-personnel mine** was discovered; and at a distance of **0.55 metres** from the said mine, blood-like stains were found on the surface of the soil.

On **3 April 2021**, an inspection was conducted, with the participation of **Suleymanov Vasif Salim oglu**, **Ibrahimov Rasim Imran oglu**, and **Shukurov Alovsat Mursal oglu**, of the bed of the **Khachinchay River** passing through the territory of **Garvand village**, **Aghdam District**.

It was established that at the scene there was a **Hova** truck with state registration plate **99-JT-474**. The vehicle was damaged from the front and right side.

During the inspection of the scene, **Shukurov Alovsat Mursal oglu**, who participated in the inspection, indicated the place where the mine he had stepped on had exploded and stated that on that day, namely on **3 April 2021**, while travelling in that vehicle, he had struck a mine; as a result of the explosion, the vehicle had been damaged and he himself had sustained injuries.

During measurement work, it was established that the place where the mine had exploded had a depth of **95 centimetres**and a diameter of **280 x 210 square centimetres**. Fragments were discovered at the place where the mine had exploded.

Ibrahimov Rasim Imran oglu, who participated in the inspection of the scene, stated, based on the dimensions of the place where the mine had exploded and the fragments discovered at the scene, that the exploded mine had been an anti-tank mine of the **TM-62M** type.

During the inspection of the scene, the discovered fragments were collected in the appropriate manner, packaged in envelopes, and sealed with the **"For Envelopes"** seal of the **Aghdam District Prosecutor's Office**.

It was established during the court proceedings that, on **26 December 2023**, at around **13:00**, as a result of the explosion of another **PMN001_E** type anti-personnel mine previously deliberately planted by Armenian military formations in the territory of **Sarijali village**, **Aghdam District**, **Mahmudov Zaur Eldar oglu**, born on **17 August 1982**, a specialist of the explosive ordnance group of the **Mine Action Agency of the Republic of Azerbaijan**, sustained an injury to his right leg.

In addition, it was established that, along with the deliberate prior planting of mines in the territory of **Sarijali village**, **Aghdam District**, one of the mine detonators thrown into the area and possessing explosive properties exploded on **6 April 2024**, at around **09:00**. As a result, **Piriyev Anar Murshud oglu**, born on **1 April 2000**, head of the 5th section of mine-clearance group No. 2 of mine-clearance detachment No. 2 of the **Mine Action Agency of the Republic of Azerbaijan**, sustained injuries.

Alakbarov Elgun Mahmud oglu, born on **21 December 1987**, a tractor driver of **MKT IK LLC**, who was driving a **JHON DEERE** tractor with state registration plate **90-775**, belonging to the **MKT-TARTAR** branch of that LLC, on **28 January 2021**, at around **13:00**, was ploughing a **110.0-hectare** cultivated field leased under contract by citizen **Mustafayev Parviz Yusif oglu** in the territory of **Giziloba village**, located in **Tartar District**, which was held in state ownership and situated **2 km** from the line of contact of the troops. At that time, the right front wheel of the tractor struck and detonated an anti-tank mine planted by unlawful Armenian armed formations. As a result, he sustained injuries classified as causing less serious harm to health due to long-term impairment of health, namely multiple shrapnel wounds to the forehead, face, nose, abdomen, chest and upper limb, a foreign body in the deep layers of the cornea of both eyes, and a non-penetrating shrapnel wound of the cornea of the left eye.

In addition, material damage in the amount of **115,048.39 manats** was caused to the **JHON DEERE** tractor with state registration plate **90-775**, belonging to the **MKT-TARTAR** branch of **MKT IK LLC**, and citizen **P. Y. Mustafayev**, due to the mine danger, was deprived of the ability to carry out crop cultivation and harvesting operations on the field he had leased.

It was established during the court proceedings that employees of Road Maintenance Department No. 42 of the **State Agency of Azerbaijan Automobile Roads** — **Safarov Alishan Sharif oglu**, born on **22 March 1963**, and **Safarov Faig Islam oglu**, born on **1 January 1965** — on **18 February 2022**, at around **11:00**, while carrying out repair and restoration work on the reserve part of the road at the **12th kilometre** of the **Tartar–Sugovushan** motor road in the territory of **Chayli village**, **Tartar District**

from a height of **1.80 metres** and fell onto the land plot, an anti-personnel mine buried there by unlawful Armenian formations exploded. As a result, **Alishan Safarov**, who was standing **4.5 metres** away from the explosion site, sustained injuries whose degree could not be determined because they did not cause harm to health, namely **incised wounds on the posterior surfaces of the distal phalanges of the second and third fingers of the left hand**. **Faiq Safarov** sustained injuries causing minor harm to health, namely **incised-lacerated wounds of the left heel, abrasions on the upper lip, and abrasions on the posterior surfaces of both hands**.

It was established during the court proceedings that, in the period after **5 December 2023**, as a result of the explosion of mines and other similar devices in the territory of **Aghdara District**, a total of **seven civilians** sustained bodily injuries.

Thus, as a result of the explosion, on **5 February 2024**, at around **11:00**, of mines deliberately placed in advance by members of Armenian military formations in the territory which they had kept under occupation in the direction of **Chilaburt village** of **Goyarkh village, Aghdara District**, **Mammadov Azer Ahmad oglu**, born on **28 December 1966**, resident of **Tartar city**, sustained injuries.

In addition, it was established that, as a result of the explosion, on **2 April 2024**, at around **15:00**, of one of the mines deliberately placed in advance by members of Armenian military formations in an area under the occupation and direct control of those formations in the direction of **Suqovushan village** of **Chayli village, Aghdara District**, the residents of **Tartar District** — **Elmirov Bahruz Elmin oglu**, born on **7 June 2006**, **Tagizade Arzuman Ahliman oglu**, born on **5 May 1992**, and **Ismayilov Polad Alish oglu**, born on **17 November 1969** — sustained injuries.

In addition, it was established that, as a result of the explosion, on **12 April 2024**, of two of the mines deliberately placed in advance by members of Armenian military formations in the area of **Sirxavand village**, Aghdara District, kept under occupation by them, residents of **Aghdam District** — **Teymurov Khagani Allahverdi oglu**, born on **30 October 1973**, and **Baghirov Mirfattah Baghir oglu**, born on **5 August 1965** — sustained bodily injuries.

It was established during the court proceedings that, on **21 April 2011**, at around **17:45**, while **Suleymanov Anar Ali oglu**, secret warrant officer and commander of the 2nd squad of the 2nd team of the 1st battalion of the **"N"** military unit of the **Ministry of Defence of the Republic of Azerbaijan**, was at the observation point of combat post No. **2**, located on the direct line of contact with Armenian armed formations, at the combat position of that military unit situated near **Shurabad village, Aghdam District**, a bullet opened in his direction by Armenian armed formations positioned on the opposing side, with the intent to kill him motivated by national hatred and hostility, struck the wall made of concrete pillars of the observation point of combat post No. **2**, ricocheted, struck secret warrant officer **Suleymanov Anar Ali oglu**in the chest area, penetrated the soft tissues of the left half of his chest, did not enter the chest cavity, and caused a firearm injury.

It was established during the court proceedings that, on **3 April 2021**, at around **11:00**, **Babayev Khalval Farman oglu**, junior sergeant and commander of the 3rd squad of the 1st team of the engineering-fortification battalion of military unit **"N"** of the Ministry of Defence; **Bayramov Ilkin Bayram oglu**, soldier and engineer-fortification specialist of that squad; **Rustamov Eldaniz Rustam oglu**, soldier and assistant gunner-grenadier of the 1st squad of the 2nd team of the 10th company of the 4th battalion of that military unit; and **Isayev Abil Ayaz oglu**, soldier and assistant gunner-grenadier of the 2nd squad of that team, began searching for weapons discarded during the Second Karabakh War around the footpath leading to combat position No. **5** of the 3rd battalion, located in **Sugovushan settlement, Tartar District**.

That day, at around **12:00**, while soldier **I. B. Bayramov** was trying to remove an anti-personnel mine that he had found on the side of the footpath and that had been buried in the ground by members of Armenian armed formations, it detonated. As a result of the explosion, he himself, junior sergeant **Kh. F. Babayev**, **A. A. Isayev** and **E. R. Rustamov**sustained injuries and were evacuated to a military hospital. On **16 April 2021**, soldier **I. B. Bayramov** died in hospital from the injuries he had sustained.

Page 877

It was established by the court that, on **2 August 2022**, at around **17:00**, the command of military unit **"N"** of the **Ministry of Defence** assigned a group of servicemen from the 2nd and 4th battalions to strengthen positions at the height conventionally called **"Sarıbaba"** in **Lachin District**. On the basis of that assignment, **Hasanov Yusif Arshad oglu**, soldier of the 1st squad of the 1st platoon of the 1st company of the 4th battalion of the 2nd battalion of that military unit, while moving toward an unnamed height in the area of **Kalfaliq village**, **Lachin District**, and **Aghayev Huseyn Fazil oglu**, soldier of the 2nd squad of the 1st platoon of the 6th company of the 4th battalion, while moving toward the combat position located in the area of **Xirmanlar village**, **Lachin District**, at the height conventionally called **"Sarıbaba,"**situated in the territory of the Republic of Azerbaijan where the Peacekeeping Contingent of the Russian Federation was temporarily deployed, came under fire opened by members of Armenian armed formations. As a result, **Y. A. Hasanov** sustained injuries that did not cause harm to health, namely **"a firearm wound of the lower one-third of the right shoulder and the anterior surface of the neck,"** while **H. F. Aghayev** sustained injuries classified as serious harm to health, namely **"post-traumatic neuropathy of the right femoral nerve and a through-and-through firearm wound of the anterior upper one-third of the right thigh and right hip, accompanied by a perforated fracture of the neck of the right femur,"** and they were evacuated to the military hospital.

The fire by members of the Armenian armed formations located in the territory of the Republic of Azerbaijan continued the following day. As a result, on **3 August 2022**, at around **08:00**, **Kazimov Anar Rustam oglu**, soldier of the 2nd squad of the 1st platoon of the 6th company of the 4th battalion of military unit **"N"** of the **Ministry of Defence**, while serving at the combat position conventionally called **"LM-21"** in the area of **Xirmanlar village**, **Lachin District**, sustained injuries classified as serious harm to health and died at the

scene: **"through-and-through firearm wound of the left thigh, comminuted open fractures of the left femur, injury to the femoral artery, one through-and-through firearm wound to the soft tissues of the right half of the chest and one to the soft tissues of the left half of the chest, one penetrating through-and-through firearm wound to the soft tissues of the left subscapular region, closed trauma of the chest, hemopneumothorax, injury to the left lung, displaced fractures along the line of the left second rib, and of the 4th, 5th, 6th and 7th ribs, the left lateral process of the 6th thoracic vertebra and the body of the 7th thoracic vertebra, spinal cord injury, acute blood loss, and traumatic-hemorrhagic shock."**

It was established by the court that, in the Karabakh region and surrounding areas, armed associations and groups not provided for by the legislation of the Republic of Azerbaijan had been created and operated, and members of the criminal association organized, administered and controlled by the **Armed Forces of the Republic of Armenia**, who were involved in their creation and activities, unlawfully acquired various types of firearms, their component parts, ammunition, explosives and devices, carried and stored them, and entered the surrounding areas of **Aghdam District** of the Republic of Azerbaijan. Being members of the unlawful armed formations and groups, armed with weapons of various calibres, including grenade launchers, they attacked enterprises, institutions, organizations and individuals, thereby committing terrorism, that is, explosions, arson and other terrorist acts creating a danger of death, harm to health, significant property damage or other socially dangerous consequences, with the aim of violating public security, spreading panic among the population, influencing decision-making by state authorities and international organizations, and exerting influence, contrary to domestic and international law, on the adoption of an unfounded and unlawful decision against the territorial integrity of the Republic of Azerbaijan.

For that purpose, on **19 September 2023**, at around **18:00–19:00**, they attacked **Hasanov Mehman Fikrat oglu**, born on **25 February 1992**, resident of **Bash Garvand village, Aghdam District**, who worked as an excavator operator in the Transport Department of **"Körpü-Bina-Tikinti" Limited Liability Company** and who was at that time in the area called **Molla village** of **Aghdam District**, by a generally dangerous method, motivated by national hostility

with the intent, in connection with terrorism, to kill intentionally, that is, to intentionally deprive a person of life, caused grave consequences by attempting to do so.

It appears from the inquiry related to the response letter received to the operational assignment dated **8 December 2023**, sent in the criminal case to the **Main Intelligence Directorate of the Ministry of Defence**, that information regarding the units, formations and their command of the **Armed Forces of the Republic of Armenia**, which were probably deployed on the ground in the territories of **Kalbajar**, **Dashkasan** and **Lachin** districts indicated in the operational assignment, is as follows:

In the direction of **Kalbajar District** — the **538th Separate Motor Rifle Brigade** of the **2nd Army Corps** of the Armed Forces of the Republic of Armenia, military unit No. **75937**, brigade commander Colonel **Artur Darpinyan**.

In the direction of **Dashkasan District** — the **549th Separate Motorized Regiment** of the **2nd Army Corps** of the Armed Forces of the Republic of Armenia, military unit No. **25836**, regiment commander Colonel **Harutyun Amirkhanyan**.

In the direction of **Lachin District** — the **105th Separate Destructive Regiment** of the **5th Army Corps** of the Armed Forces of the Republic of Armenia, military unit No. **52258**, brigade commander Colonel **Arman Movsesyan**.

According to Letter No. **11-7/2-1002/2024** dated **1 May 2024** of the **Mine Action Agency of the Republic of Azerbaijan**, and according to the information attached to that letter, after the **Tripartite Statement of 10 November 2020**, in the territories liberated from occupation, the **Ministry of Defence of the Republic of Azerbaijan**, the **Mine Action Agency of the Republic of Azerbaijan**, the **Ministry of Emergency Situations**, the **State Border Service**, as well as the mine-clearance companies **"Alphademining," "Azerbaijan Demining," "Qaya Safety Solutions"** and **"Safe Point"**, discovered and neutralized the following in the period up to **22 April 2024**:

in the territory of **Aghdam District** — **9,222** anti-personnel mines, **6,112** anti-tank mines and **10,053** unexploded military munitions;

in the territory of **Aghdara District** — **4** anti-personnel mines, **38** anti-tank mines and **932** unexploded military munitions;

in the territory of **Jabrayil District** — **4,887** anti-personnel mines, **2,856** anti-tank mines and **10,259** unexploded military munitions;

in the territory of **Fuzuli District** — **8,911** anti-personnel mines, **5,723** anti-tank mines and **21,234** unexploded military munitions;

in the territory of **Gubadli District** — **835** anti-personnel mines, **1,504** anti-tank mines and **1,304** unexploded military munitions;

in the territory of **Tartar District** — **2,409** anti-personnel mines, **1,507** anti-tank mines and **2,525** unexploded military munitions;

in the territory of **Khankendi District** — **4,859** anti-personnel mines, **112** anti-tank mines and **172** unexploded military munitions;

in the territory of **Khojaly District** — **72** anti-personnel mines, **1** anti-tank mine and **1,886** unexploded military munitions;

in the territory of **Khojavand District** — **77** anti-personnel mines, **196** anti-tank mines and **7,528** unexploded military munitions;

in the territory of **Zangilan District** — **925** anti-personnel mines, **510** anti-tank mines and **1,161** unexploded military munitions;

in the territory of **Tovuz District** — **2** anti-personnel mines.

In the territory of **Kalbajar District**, **1,434** high-explosive anti-personnel mines of the **PMN-2** and **PMN-E** models were discovered, of which **50** had been manufactured in the Republic of Armenia in **2018**, **312** in **2019**, and **740** in **2021**; **322**anti-tank mines of the **TM-57**, **TM-62P2** and **TM-62M** models, manufactured in the Russian Federation, with unknown dates of manufacture; and **2,131** unexploded military munitions.

In the territory of **Lachin District**, **2,113** high-explosive anti-personnel mines of the **PMN-2** and **PMN-E** models were discovered, of which **1** had been manufactured in the Republic of Armenia in **2012**, and **2,021** in **2021**; **43** anti-tank mines of the **TM-62P2** and **TM-62M** models, manufactured in the Russian Federation, with unknown dates of manufacture; and **162** unexploded military munitions.

In the territory of **Shusha District**, **116** high-explosive anti-personnel mines of the **PMN-E** model were discovered, of which **20** had been manufactured in the Republic of Armenia in **2021**; **13** anti-tank mines of the **TM-62P2** model, manufactured in the Russian Federation, with unknown dates of manufacture; and **2,445** unexploded military munitions.

In the territory of **Dashkasan District**, **796** anti-personnel mines were discovered, including **613** high-explosive anti-personnel mines of the **PMN-E** and **PMN-2** models manufactured in the Republic of Armenia in **2016**, and **5 OZM-72E**mines manufactured in the Republic of Armenia with unknown dates of manufacture; and anti-tank mines of the **TM-62M**

Page 879

4 anti-tank mines; in total, **31,964** anti-personnel mines, **19,110** anti-tank mines of the **TM-62M**, **TM-62P2**, **TM-57** and **TM-62R** models, manufactured in the Russian Federation with unknown dates of manufacture, and **67,204** unexploded military munitions were discovered and neutralized.

According to the inquiry sent to the **Administration of Caucasian Muslims** on **13 November 2023**, the response letter No. **450** dated **21 November 2023** prepared by that administration, and the attached schedules, although the administration did not have information as to the amount of material damage caused to religious monuments, mosques and other buildings located in the territories liberated from occupation, it was established on the basis of the schedules that, in the territories occupied by the **Armed Forces of Armenia**, there had been:

in **Aghdam District** — **5** mosques, **12** tombs, **5** Albanian temples;

in **Jabrayil District** — **5** mosques, **3** tombs;

in **Fuzuli District** — **19** mosques, **6** tombs;

in **Kalbajar District** — **2** mosques, **26** Albanian temples, **3** non-Albanian temples;

in **Lachin District** — **3** mosques, **10** tombs, **14** Albanian temples;

in **Gubadli District** — **8** mosques, **6** tombs, **4** Albanian temples;

in **Shusha District** — **18** mosques, **3** Albanian temples, **1** non-Albanian temple, **3** tombs;

in **Tartar District** — **5** Albanian temples, **1** non-Albanian temple;

in **Khojaly District** — **13** Albanian temples, **1** tomb;

in **Khojavand District** — **56** Albanian temples, **5** non-Albanian temples, **1** Orthodox church, **1** mosque, **4** tombs;

in **Zangilan District** — **6** mosques, **3** tombs, **2** Albanian temples;

in total, **67** mosques, **48** tombs, and **139** temples and churches, of which **128** are presumed to belong to the Albanian church, **1** to the Russian Orthodox Church, and **10** to the Armenian-Gregorian Church.

According to the inquiry sent to the head of the **Fuzuli District Executive Authority** on **4 October 2023**, the response letter No. **5-43/2-2391/2023** dated **11 October 2023** prepared by the head of that executive authority, and the documents attached thereto, it was established that, from **27 September 2020** to **11 November 2020**, **12** private residential houses in the district were completely destroyed and **331** houses were damaged. The owner of the property damaged in the district was compensated for the damage in cash. Pursuant to Order No. **702s** of the **Cabinet of Ministers of the Republic of Azerbaijan** dated **17 December 2020**, **494,500 manats** were allocated to the **Fuzuli District Executive Authority** to remedy the damage, and the allocated funds were transferred to the card accounts of **343** owners of civil property. Documents relating to the exact amount of material damage caused to civil infrastructure in the district executive authority, funds spent on remedying the damage, summarized information, as well as photographs, video recordings, and materials relating to the situation before and after restoration, are not available.

According to the inquiry sent to the head of the **Aghdam District Executive Authority** on **4 October 2023**, and the response letter No. **5-31/2-956/2023** dated **12 October 2023** prepared by the head of that executive authority, it was established that, in **Aghdam District**, a total of **2,140,500 manats** had been allocated to the **Aghdam District Executive Authority** for payment of damage to **1,759** families, and that those funds had been paid to citizens by means of plastic cards. Since funds were not allocated to the Aghdam District Executive Authority for repair and restoration of damaged facilities, information as to the amount of damage was not available.

According to the inquiry sent to the head of the **Beylagan District Executive Authority** on **4 October 2023**, and the response letter No. **5-37-1/2-675/2023** dated **23 October 2023** prepared by the head of that executive authority, it was established that, for the purpose of paying material assistance to owners of civil property in connection with damage caused to their property, the working group established pursuant to Order No. **612s** of the **Cabinet of Ministers of the Republic of Azerbaijan** dated **11 November 2020** initially transferred **124,000 manats** to citizens' card accounts in accordance with the list submitted.

According to the inquiry sent to the head of the **Goranboy District Executive Authority** on **4 October 2023**, and the response letter No. **5-45/2-970/2023** dated **24 October 2023** prepared by the head of that executive authority, it was established that the working group established had inspected **431** residential houses in the district. At that time, it was determined that material damage had been caused to a total of **371** residential houses. Of the noted residential houses, **5**were completely destroyed and **366** were partially damaged. For the purpose of paying compensation for damage caused to residential houses and household items, **6,000 manats** for each of **5** families in connection with damage to household items, and **1,500 manats** for each family, in total **55,500 manats**, as well as **1,000 manats** for each of **366** families whose residential houses had otherwise been damaged...

Page 880

366,000 manats, and a total of **421,500 manats** was transferred to the card accounts of the individuals.

According to the inquiry sent on **4 October 2023** to the head of the **Mingachevir City Executive Authority**, and according to response letter No. **5-3/2-254/2023** dated **20 October 2023** prepared by the head of that executive authority, it was established that, as a result of an inspection conducted by the working group that had been created, damage of various extent was identified to household property belonging to **2 families**, to **43 family-owned individual houses**, and to **3 vehicles**.

Pursuant to Order No. **702b** dated **17 December 2020** of the **Cabinet of Ministers of the Republic of Azerbaijan**, **67,000 manats** were allocated to the **Mingachevir City Executive Authority**; of that amount, **56,500 manats** were transferred to citizens' card accounts. In connection with damage caused to household property in residential houses, **6,000 manats** was transferred to **1 family**; in connection with damage caused to personal property, **1,500 manats** was transferred to each family member, for a total of **13,500 manats**; and in connection with damage caused to other residential houses, **1,000 manats** was transferred to each of **43 family members**, for a total of **43,000 manats**, to the individuals' card accounts.

According to the inquiry sent on **4 October 2023** to the head of the **Aghjabadi District Executive Authority**, and according to response letter No. **5-30/2-2/436/2023** dated **13 October 2023** prepared by the head of that executive authority, it was established that, following an inspection conducted by the working group that had been created, **512 individual residential houses** and **16 non-residential facilities** were documented. The

collected documents were sent, according to their relevance, to the **State Urban Planning and Architecture Committee of the Republic of Azerbaijan**.

According to the inquiry sent on **4 October 2023** to the head of the **Tartar District Executive Authority**, and according to response letter No. **5-78/2-1178/2023** dated **6 November 2023** prepared by the head of that executive authority, it was established that **2,268,500 manats** was allocated for **Tartar District** at the first stage and **3,912,500 manats** at the second stage, for a total of **6,181,000 manats**, and that those funds were paid to homeowners through the relevant bank.

According to the inquiry sent on **4 October 2023** to the head of the **Barda District Executive Authority**, and according to response letter No. **5-38/2/389** dated **30 October 2023** prepared by the head of that executive authority, it was established that, beginning on **27 September 2020**, as a result of the aggression of the **Armed Forces of the Republic of Armenia** against the territory of the **Republic of Azerbaijan**, **60,000 manats** was paid to citizens for completely destroyed houses, and **173,000 manats** was paid for partially destroyed houses, for a total of **233,000 manats**.

In response to the confidential inquiry sent on **4 October 2023** by the **Prosecutor General's Office of the Republic of Azerbaijan** to the **Ministry of Defence of the Republic of Azerbaijan**, an extract from the confidential response dated **18 October 2023** was added to the case file.

It appears from those documents that, on **4 October 2020**, former Minister of Defence of the Republic of Armenia **Davit Tonoyan**, in order to create agitation among the civilian population of Azerbaijan, gave a military target-assignment order concerning the shelling of the city of **Ganja** and military facilities there. In order to prevent the Republic of Armenia from being subjected to international condemnation, and on **D. Tonoyan's** recommendation, the president of the separatist **"Nagorno-Karabakh Republic," Arayik Harutyunyan**, made a statement that **Ganja** had allegedly been struck not from the territory of the Republic of Armenia, but from the territory of Karabakh, by his own order. The said statement was also posted and shared on the **YouTube** social network.

Page 881

Arayik Harutyunyan, on **16 February 2021**, during a meeting with representatives of the **Russian Peacekeeping Contingent** temporarily operating in the **Karabakh economic region**, stated mockingly that, on **17 February**, the bodies of approximately **13–18 Azerbaijanis** would be handed over to the Republic of Azerbaijan, and that **"the failure to hand those bodies over to the Republic of Azerbaijan would be an injustice to Azerbaijan after the Khojaly genocide."**

In addition, **A. Harutyunyan** expressed an opinion concerning Azerbaijani special-purpose police officers who, in **February–March 1992**, had been lined up against a wall and shot by the Armenian side.

The information that, on **5 August 2022**, in the territory of **Sarıbaba village, Lachin District**, **Xudiyev Samir Samad oglu** and **Aliyev Tahir Chingiz oglu**, active-duty servicemen of the Armed Forces of the Republic of Azerbaijan who had been killed, were struck by a piece of rock deliberately rolled down by the Armenian side, was also confirmed.

In addition, regarding the structure of the separatist **"Nagorno-Karabakh Republic,"** it was noted that, under the constitution of the fictitious entity, state power was divided into three branches which were separate from one another but functioned in mutual interaction: executive, legislative and judicial.

The executive power consisted of the **"president"** and the **"government."** The structure of the **"government"** consisted of the following bodies:

1. **"Minister of State";**
2. **"Ministry of Internal Affairs";**
3. **"Ministry of Foreign Affairs";**
4. **"Defense Army";**
5. **"Ministry of Urban Development";**
6. **"Ministry of Health";**
7. **"Ministry of Education, Science, Culture and Sports";**
8. **"Ministry of Agriculture";**
9. **"Ministry of Social Development and Migration";**
10. **"Ministry of Territorial Administration and Infrastructure";**
11. **"Ministry of Finance and Economy";**
12. **"Ministry of Justice";**
13. **"National Security Service";**
14. **"Prosecutor's Office";**
15. **"State Oversight Service";**
16. **"Committee for Management of the Cadastre and State Property";**
17. **"State Revenue Committee";**
18. **"Water Committee";**
19. **"Committee for Management of State Inspections";**
20. **"Committee on Material Reserves."**

During the **44-day military operations**, as well as thereafter, the heads of the above-listed **"principal bodies"** were the following persons:

1. as **"minister of state," Grigori Martirosyan** and **Artak Arutyunyan**, respectively;
2. as **"minister of foreign affairs," Masis Mailyan** and **Sergey Ghazaryan**, respectively;
3. as **"commander of the defense army," Jalal Arutyunyan** and **Kamo Vardanyan**, respectively;
4. as **"director of the national security service," Kamo Aghajanyan** and **Ararat Melkumyan**, respectively;
5. as **"prosecutor," Mher Aghajanyan** and **Karen Gabrielyan**, respectively.

The **“legislative authority”** consisted of a **“parliament”** of **33 persons**. During the **44-day military operations**, the **“speaker of parliament”** was **Artur Tovmasyan**, and the last **“speaker of parliament”** was **David Ishkhanyan**.

The **“judicial authority”** consisted of the **“Supreme Court,”** the **“Court of Appeal,”** and the **“Court of First Instance of General Jurisdiction.”**

Page 882

It was also established that the financing of the separatist entity was carried out by the **Republic of Armenia**.

In connection with the inquiry submitted on **27 October 2023** to the **Ministry of Ecology and Natural Resources of the Republic of Azerbaijan**, response letter No. **3-14/2-3591-D-01-14/2023** dated **20 November 2023**, prepared by that Ministry, stated that, pursuant to the Decree of the President of the Republic of Azerbaijan dated **29 October 2020 “On the Organization of Temporary Special Administration in the Liberated Territories of the Republic of Azerbaijan,”** employees of the Ministry of Ecology and Natural Resources of the Republic of Azerbaijan were represented, by the relevant orders of the Ministry, in the temporary commandant’s offices for special administration created in the liberated territories.

As a result of regular monitoring conducted together with the monitoring groups established under the commandant’s offices, inspections were carried out of forest fund areas and mineral deposits — ore, non-ore, fresh water, thermal and mineral water — in **Fuzuli, Aghdam, Jabrayil, Zangilan, Gubadli, Khojavand, Khojaly and Tartar Districts**.

During the monitoring, relevant acts were drawn up in the prescribed manner, photographs and video recordings were made, and certain existing trees and natural objects were inspected directly on site. For other parts, assessments were carried out on the basis of photographic images submitted by **Azercosmos LLC**, and the amount of damage caused was calculated.

The results of monitoring by individual administrative districts were as follows:

Shusha District: of the **8,526 hectares** of forest fund area that existed in the district, **2,972.8 hectares** covered by forest were destroyed. Of the **8 mineral raw material deposits** registered in the state and sectoral balance sheets in the 1990s — **3 non-ore, 2 fresh-water and 3 mineral-water deposits** — **4** were exploited: **1 non-ore, 2 fresh-water and 1 mineral-water deposit**.

Aghdam District: of the **4,743 hectares** of forest fund area in the district, **1,248.0 hectares** covered by forest were destroyed. Of the **15 mineral raw material deposits** registered in the state and sectoral balance sheets in the 1990s — **13 non-ore and 2 fresh-water deposits** — **8** were exploited: **6 non-ore and 2 fresh-water deposits**.

Tartar District: of the **33,324 hectares** of forest fund area in the district, **1,799 hectares** covered by forest were destroyed. Of the **10 mineral raw material deposits** registered in the

state and sectoral balance sheets in the 1990s — **7 non-ore, 1 ore and 2 fresh-water deposits** — **3** were exploited: **2 non-ore and 1 fresh-water deposit**. In addition, **2 non-ore mineral raw material deposits** whose dates of non-ore production were unknown were exploited.

Fuzuli District: of the **124 hectares** of forest fund area in the district, **2.0 hectares** covered by forest were destroyed. Of the **6 mineral raw material deposits** registered in the state and sectoral balance sheets in the 1990s — **5 non-ore and 1 fresh-water deposit** — **3** were exploited: **2 non-ore and 1 fresh-water deposit**.

Khojavand District: of the **4,228.0 hectares** of forest fund area in the district, **2,319.7 hectares** covered by forest were destroyed. Of the **26 mineral raw material deposits** registered in the state and sectoral balance sheets in the 1990s — **19 non-ore and 7 fresh-water deposits** — **13** were exploited: **6 non-ore and 7 fresh-water deposits**.

Zangilan District: of the **13,486 hectares** of forest fund area in the district, **5,458.7 hectares** covered by forest were destroyed. Of the mineral raw material deposits registered in the state and sectoral balance sheets in the 1990s — **1 ore, 8 non-ore and 2 fresh-water deposits** — **6** were exploited: **1 ore, 3 non-ore and 2 fresh-water deposits**.

Gubadli District: of the **13,994 hectares** of forest fund area in the district, **6,240.2 hectares** covered by forest were destroyed.

Lachin District: of the **32,096 hectares** of forest fund area in the district, **9,565.0 hectares** covered by forest were destroyed. Of the **40** mineral raw material deposits registered in the state and sectoral balance sheets in the 1990s

of **40 mineral raw material deposits** (**3 ore, 36 non-ore and 1 mineral-water deposit**), **3** were exploited (**2 non-ore and 1 mineral-water deposit**).

Kalbajar District: of the **80,019 hectares** of forest fund area in the district, **16,524 hectares** covered by forest were destroyed. Of the **34 mineral raw material deposits** registered in the state and sectoral balance sheets in the 1990s (**8 ore, 19 non-ore and 7 thermal-mineral-water deposits**), **11** were exploited (**6 ore, 2 non-ore, 2 thermal-mineral-water deposits and 4 non-ore technological deposits**).

As a result of the monitoring carried out, the damage caused during the occupation period to natural objects in the liberated territories was calculated, and the supporting materials collected for each administrative district — acts, photographs, satellite images, expenses and damage calculations — were sent, in electronic and paper form, to the **Prosecutor General's Office of the Republic of Azerbaijan** for legal assessment by letters No. **4/3598-01-14** dated **20 December 2021** and No. **3-14/2-3324-D-03-14/2023** dated **25 October 2023**.

On the basis of the table prepared according to the information provided by the **Ministry of Ecology and Natural Resources of the Republic of Azerbaijan** regarding the damage caused to destroyed natural objects in the liberated territories, it was established that, according to preliminary calculations, material damage in the total amount of **16,200,059,474.80 manats** had been caused. The table prepared in this regard was attached to the case materials.

According to the inquiry sent on **4 October 2023** to **"Azerigaz" Production Association**, and the response letter No. **14-2-2/2-5717/2023** dated **7 November 2023** prepared by that association, it was stated that, during the period from **27 September 2020** to **10 November 2020**, as a result of shelling from missile and artillery weapons by the **Republic of Armenia**, its armed forces, and criminal associations, damage was caused to property and other infrastructure facilities on the balance sheets of the **Ganja** and **Tartar Regional Gas Operation Departments** of **"Azerigaz" Production Association** as follows:

- **Ganja Regional Gas Operation Department** — for gas lines in **Ganja city**, **Goranboy District** and **Goygol District**: **15,230.96 manats**;
- **Tartar Regional Gas Operation Department** — **25,591.82 manats** for **Tartar District**, **5,363.6 manats** for **Aghdam District**, **1,881 manats** for **Fuzuli District**, and **274.46 manats** for **Aghjabadi District**; in total **35,583.88 manats**.

Overall, material damage in the amount of **50,814.84 manats** was caused to the **Ganja** and **Tartar Regional Gas Operation Departments**.

According to the inquiry sent on **13 November 2023** to the **State Committee of the Republic of Azerbaijan for Work with Religious Organizations**, the response letter No. **3-32/2-1922/2023** dated **20 November 2023** prepared by that committee, and the schedules attached thereto, it was established that the committee had no information on the amount of material damage caused to religious monuments, mosques and other buildings located in the liberated territories. However, based on the schedules, it was determined that, before the military aggression of the **Republic of Armenia** against our country, and particularly during the Soviet period, with the exception of the **"Juma" Mosque in Aghdam** and the **"Yukhari Govhar Agha" Mosque in Shusha**, other religious-purpose facilities did not operate according to their intended purpose.

It was established that, in the territories occupied by the **Armed Forces of the Republic of Armenia**, there had been:

in **Aghdam District** — **5** mosques, **12** tombs, **5** Albanian temples;

in **Jabrayil District** — **5** mosques, **3** tombs;

in **Fuzuli District** — **19** mosques, **6** tombs;

in **Kalbajar District** — **2** mosques, **26** Albanian temples and **3** non-Albanian temples;

in **Lachin District** — **3** mosques, **10** tombs and **14** Albanian temples;

in **Gubadli District** — **8** mosques, **6** tombs and **4** Albanian temples;

in **Shusha District** — **18** mosques, **3** Albanian temples, **1** non-Albanian temple and **3** tombs;

in **Tartar District** — **5** Albanian temples and **1** non-Albanian temple;

in **Khojaly District** — **13** Albanian temples and **1** tomb;

in **Khojavand District** — **56** Albanian temples, **5** non-Albanian temples, **1** Orthodox church, **1** mosque and **4** tombs;

in **Zangilan District** — **6** mosques, **3** tombs and **2** Albanian temples.

In total, there were **67** mosques, **48** tombs, and **139** temples and churches, of which **128** are presumed to belong to the Albanian church, **1** to the Russian Orthodox church, and **10** to the Armenian-Gregorian church.

According to the inquiry sent on **13 November 2023** to the **Ministry of Ecology and Natural Resources of the Republic of Azerbaijan**, the response letter No. **3-14/2-3675-D-03-14/2023** dated **24 November 2023** prepared by that Ministry, and the documents attached thereto, it was stated that information had been collected and submitted to the investigation regarding the location, dimensions, current condition, as well as the damage caused during the occupation period, of existing buildings and installations that had been destroyed in the territories of the **Karabakh** and **East Zangezur** economic regions.

Page 884

According to the said documents, it was established that an act dated **October 2021**, prepared by the **Search Group of the National Geological Exploration Service** of the **Ministry of Ecology and Natural Resources of the Republic of Azerbaijan**, stated that, during the inventory carried out pursuant to Order No. **334/ü** dated **29 September 2021** of the National Geological Exploration Service, it was established that immovable property that had remained under occupation had been listed in previous years' inventory tables, accounting records and reports, and that permanent search activities for those remaining immovable properties had been carried out. After liberation, the said immovable properties that had remained under occupation were inspected on site by the Service, and during the inspection it was found that the immovable properties in question no longer existed.

Thereafter, the **Geological Exploration Agency** prepared the **"List of Immovable Properties Destroyed in the Liberated Territories of the Geological Exploration Agency"**, which was added to the schedule.

Such information and photographs were recorded district by district.

Thus, the destruction and looting during the occupation of buildings and facilities that had belonged to the Republic of Azerbaijan and its citizens before the occupation was once again reflected.

In response to the inquiry sent on **30 October 2023** to the **State Security Service of the Republic of Azerbaijan**, response letter No. **3-39/2-24/2-4364/2023** dated **23 November 2023**, prepared by that Service, reflected intelligence information concerning seven accused persons — **A. Gukasyan**, **B. Sahakyan**, **A. Harutyunyan**, **L. Mnatsakanyan**, **D. Babayan**, **D. Ishkhanyan**, and **D. Manukyan** — namely their biographical data, education, positions held in the separatist entity, their role in the unlawful activities of the regime from the early 1990s, their participation in the **April 2016 battles**, the **44-day Patriotic War**, and other information.

The images and information contained in that letter were added to the case file in photographic format.

In response to the inquiry sent on **30 October 2023** to the **Ministry of Defence of the Republic of Azerbaijan**, response letter No. **3-25/2-882/2023** dated **22 November 2023**, prepared by that Ministry, reflected intelligence information concerning the accused persons **A. Gukasyan**, **B. Sahakyan**, **A. Harutyunyan**, **L. Mnatsakanyan**, **D. Babayan**, **D. Ishkhanyan**, and **D. Manukyan** — namely their biographical data, education, positions held in the separatist entity, their role in the unlawful activities of the regime from the early 1990s, their participation in the **April 2016 battles**, the **44-day Patriotic War**, and other information.

The images and information contained in that letter were added to the case file in photographic format.

In response to the inquiry sent on **30 October 2023** to the **Ministry of Internal Affairs of the Republic of Azerbaijan** by letter No. **2-2-030/2-029640/2023**, the Ministry's response letter No. **313/2-92701/2023** dated **5 December 2023**contained, in addition to information on other accused persons, information obtained from social networks regarding **Arayik Harutyunyan**; however, because that information had appeared in previous documents and had been reviewed, it was not repeated.

In response to the inquiry sent on **30 October 2023** to the **State Security Service of the Republic of Azerbaijan** by letter No. **2-2-030/2-029670/2023**, response letter No. **3-39/2-24/2-4466/2023** dated **30 November 2023**, prepared by that Service, stated that detailed biographical information, information on family composition and other detailed information had been recorded concerning **L. Balayan**, **D. Allahverdiyan**, **Q. Stepanyan**, **M. Pashinyan**, **Q. Martirosyan**, **A. Isayan**, **V. Beglaryan**, and **E. Qazaryan**.

In response to the inquiry sent on **13 November 2023** to **"Azerenergy" OJSC** of the Republic of Azerbaijan by letter No. **2-2-030/2-032877/2023**, response letter No. **13-9/2-2576/18/23** dated **30 November 2023**, prepared by that company, stated that, before the

occupation, in the territory of **Karabakh** and the surrounding districts there had been **one** hydroelectric power station with a capacity of **50 MW** (**Sarsang HPP**), **one 330 kV** overhead line, **20 110 kV** lines in the territory of **Aghdam District**, **41 35 kV** substations, **54** transformer points, **2,435** complete transformer substations, **16,448 km** of electric transmission lines of various voltages, and **428,690**

various-voltage electricity poles, administrative buildings and garages of **8** regional electric network subdivisions, and **85** units of various special-purpose machinery. After the territories were liberated from occupation, monitoring carried out in those areas established that the infrastructure that had existed before the occupation had been destroyed by the enemy, useful equipment had been dismantled and carried away, and parts that could not be transported had been burned and destroyed. It was further established that the only facility used by the enemy was the **50 MW Sarsang Hydroelectric Power Station**, and that, due to long-term negligent operation, it required substantial reconstruction.

The above-noted information was described in detail in the schedules attached to the letter.

In response to the inquiry sent on **13 November 2023** to the **Ministry of Justice of the Republic of Azerbaijan** by letter No. **2-2-030/2-032639/2023**, response letter No. **3-16/2-24300/2023** dated **29 November 2023**, prepared by that Ministry, stated that, together with information regarding the administrative buildings of court and justice bodies that had operated in the liberated districts of the Republic of Azerbaijan before the occupation, it was also noted that there had been:

in **Shusha city** — **1 court**, **1 district registration department**, **1 notary office**, **1 prison** (**Shusha prison**);

in **Kalbajar District** — **1 court**, **1 district registration department**, **1 notary office**;

in **Lachin District** — **1 court**, **1 district registration department**, **1 notary office**;

in **Jabrayil District** — **1 court**, **1 district registration department**, **1 notary office**;

in **Fuzuli District** — **1 court**, **1 district registration department**, **1 notary office**;

in **Zangilan District** — **1 court**, **1 district registration department**, **1 notary office**;

in **Gubadli District** — **1 court**, **1 district registration department**, **1 notary office**;

in **Aghdam District** — **1 court**, **1 district registration department**, **1 notary office**;

in **Aghdam District**, **UA38/1**, a general-regime penal institution;

in **Aghdam District**, penal institution No. **8** (**İGM-38/8**) with a strict regime;

settlement-type penal institution No. **2** in **Aghdam District**;

settlement-type penal institution No. **3** in **Aghdam District**;

settlement-type penal institution No. **7** in **Aghdam District**;

and in **Khojavand District** — **1 court**, **1 district registration department**, **1 notary office**, and in **Hadrut settlement**— **1 court** and **1 district registration department**.

The said institutions had operated, but after liberation from occupation, it was established that, in total, **10 courts**, **10 district registration departments**, **9 notary offices** and **6 penal institutions** were either unusable or had been demolished.

In response to the inquiry sent on **13 November 2023** to the **State Statistics Committee of the Republic of Azerbaijan** by letter No. **2-2-030/2-032644/2023**, response letter No. **3-34/2-39/02-1/2023** dated **29 November 2023**, prepared by that Committee, stated that the administrative buildings listed on the balance sheet of the State Statistics Committee of the Republic of Azerbaijan in the districts liberated from occupation, according to information from the district statistics departments, were as follows:

The **Gubadli District Statistics Department** had, until **1993**, a two-storey administrative building with **12 rooms** and a total area of **240 square metres**, located in **Gubadli city**, on **Gara Ilyasov Street**, next to the building of the District Executive Authority. During the occupation period, that building was destroyed and rendered unusable by Armenian aggressors.

The **Khojaly District Statistics Department** did not have any immovable property on its balance sheet before the occupation.

The administrative building of the **Shusha District Statistics Department** was located on the central street of Shusha city — former **M. A. Rasulzade Street** — behind the **Yukhari Govhar Agha Mosque**. It also had a courtyard area and one garage. During the occupation period, that building was destroyed by Armenian aggressors and rendered unusable.

The **Jabrayil District Statistics Department** had a three-storey administrative building with a basement in the centre of **Jabrayil city**. During the occupation period, that building was completely destroyed by Armenian aggressors.

Before the occupation, the **Aghdam District Statistics Department** was located in a two-storey administrative building on **Tofig Ismayilov Avenue** — former **28 April Avenue** — next to the old bus station. During the occupation period, that building was completely destroyed by Armenian aggressors.

Before the occupation, the **Kalbajar District Statistics Department** had an administrative building under construction consisting of **14–15 rooms**; due to the occupation of the district, it remained unfinished.

The **Lachin District Statistics Department** did not have an administrative building on its balance sheet.

The **Zangilan District Statistics Department** had a one-storey brick administrative building with a land plot of **2 dunams 12 sot**. The building had a basement and **12 rooms**. During the occupation period, that building was completely destroyed by Armenian aggressors.

The administrative building of the **Khojavand District Statistics Department** consisted of **2 floors** and **8 rooms**. During the occupation period, that building was destroyed by Armenian aggressors and rendered unusable.

The **Fuzuli District Statistics Department** had a **3-storey** administrative building with a basement in the centre of **Fuzuli city**. During the occupation period, that building was destroyed by Armenian aggressors and rendered unusable.

In addition, attached to the letter were tables regarding housing stock, the number of enterprises and other information for the districts that had existed in the occupied territories during **1988–1994**.

In addition, tables were attached **"based on the data of the population census of 12 January 1989"** concerning the number and ethnic composition of the population by settlements in the former **Nagorno-Karabakh Autonomous Region** and the surrounding occupied districts.

According to the inquiry sent by the **State Committee on Urban Planning and Architecture of the Republic of Azerbaijan** by letter No. **2-2-030/2-030590/2023** dated **2 November 2023**, and according to response letter No. **3-35/2-8240/2023** dated **30 November 2023** prepared by that Committee, the Committee was provided with initial inspection reports relating to **13,297** damaged property objects.

Beginning from **27 September 2020**, as a result of the aggression of the Armed Forces of the Republic of Armenia against the territory of the Republic of Azerbaijan, **11 districts and cities** — **Aghjabadi, Goranboy, Beylagan, Fuzuli, Barda, Mingachevir, Aghdam, Jabrayil, Naftalan, Ganja and Tartar** — suffered damage to civilian population, state property, and private business entities. The total number of damaged objects was **12,902**, and a total of **102,424,259.77 manats** was spent on their restoration, including VAT.

In addition, for the design and estimate documentation for **39** objects whose restoration was completed, **5,610,388.00 manats**, including VAT, was spent. Apart from the above, including the preparation of project estimates, expert examination costs and bank expenses, a total of **114,962,347.43 manats**, including VAT, was spent on **12,941** objects.

It further appears from the said summary table that, across **11 districts and cities** — **Aghjabadi, Goranboy, Beylagan, Fuzuli, Barda, Mingachevir, Aghdam, Jabrayil,**

Naftalan, Ganja and Tartar — the total number of destroyed buildings was **55**, the total number of damaged individual residential houses was **213**, the total number of damaged non-residential facilities was **20**, and the number of damaged residential settlements was **154**.

According to the inquiry sent to the **National Archive Department of the Republic of Azerbaijan** by letter No. **2-2-030/2-036791/2023** dated **29 November 2023**, and the response letter No. **3-48-1/4/2-2575/2023** dated **8 December 2023**, prepared by that Department and attached tables, it was established that, according to accounting documents for **1988** and **1992**, in the large state organizations and institutions located in the territories liberated from occupation, a total of more than **401,000** storage units of documents of the **National Archive Fund of the Republic of Azerbaijan** were preserved, and that that movable property remained under occupation.

Only the buildings of the **Fuzuli** and **Aghdam** branches of **ARDA** were on the balance sheet of the **Main Archive Department** — now the **National Archive Department** — and the balance value of those immovable properties as of **1 January 2018** amounted to **3,855.77 manats**.

According to the inquiry sent to **Azerbaijan Railways Closed Joint Stock Company** by letter No. **2-2-030/2-036582/2023** dated **29 November 2023**, and according to the response letter No. **94** dated **14 December 2023** and the attached schedules prepared by the company, it was established that, with respect to the number of buildings, structures, installations and equipment in the occupied territories belonging to **Azerbaijan Railways CJSC**, there were, under the **Protection Department**, **25** buildings and structures — a motor-pump room, transformer, **UD-25**, air conditioners and other items; under the **Freight Transportation Department**, and with respect to the main facilities and service points of the **Wagon Service Department**, **one** technical service point (**Minjivan**), **three** inspection points (**Marjanli, Khankendi and Aghdam**), **60**

freight wagons, **13** passenger wagons, **one** hospital building of the **Minjivan Railway** and **8** vehicles (**UAZ**, **GAZ**) on the balance sheet of that hospital; **325.831 km** of railway tracks belonging to the Road Facilities of the Infrastructure Department; **340** artificial structures; **596** other structures; **24** stations under the station management service of the Freight Transportation Department; and numerous other assets.

According to the inquiry sent on **13 November 2023** to the **Ministry of Digital Development and Transport of the Republic of Azerbaijan** by letter No. **2-2-030/2-036670/2023**, and according to the tables attached to response letter No. **3-272-1155** dated **14 December 2023**, prepared by that Ministry, it was established that, during the period of occupation, material damage was caused to the Ministry's subordinate entities — **"Aztelekom" LLC**, **"Azerpost" LLC**, the **Radio-Television Broadcasting and Satellite Communications Production Association**, and **"Azercell Telecom" LLC** — in the amount of **26,688,020 Azerbaijani manats** and **USD 14,884,132.00**; to the **Radio-Television**

Broadcasting and Satellite Communications Production Association in the amount of **28,974,307 manats**; and to the **Azerbaijan Land Transport Agency** in the amount of **43,418,100 manats**, for a total material damage amount of **113,966,559 manats**.

According to the inquiry sent on **13 November 2023** to the **Azerbaijan State Water Resources Agency** by letter No. **2-2-030/2-032637/2023**, and according to the tables attached to response letter No. **3-4/2-193/2023** dated **14 December 2023**, prepared by **Azerbaijan Amelioration and Water Management Open Joint Stock Company**, it was established that, with respect to amelioration and water management facilities, during the period of occupation the following remained under occupation:

in **Aghdam District** — **16** buildings or warehouses;
in **Jabrayil District** — **17** buildings or warehouses;
in **Zangilan District** — **27** buildings or warehouses;
in **Gubadli District** — **30** buildings or warehouses;
in **Tartar District** — **1** building or warehouse;
in **Kalbajar District** — **19** buildings or warehouses;
in **Khojavand District** — **32** buildings or warehouses;
in **Fuzuli District** — **67** buildings or warehouses;
in **Gubadli District** — **20** buildings or warehouses;
in **Lachin District** — **4** buildings or warehouses;
in **Tartar District** — **12** buildings or warehouses.

In addition, telephone lines remained under occupation: **9 km** in **Fuzuli District** and **18 km** in **Tartar District**; as well as service roads: **62 km** in **Aghdam District**, **70 km** in **Gubadli District**, **3 km** in **Fuzuli District**, **1.5 km** in **Tartar District**, **1.5 km** in **Lachin District**, and **1 km** in **Tartar District**. Overall, material damage in the amount of **1,135,274,000 manats** was caused.

In addition, the following irrigation networks remained under occupation: **1,743 km** in **Aghdam District**, **715 km** in **Jabrayil District**, **642 km** in **Zangilan District**, **1,188 km** in **Fuzuli District**, **998 km** in **Gubadli District**, **91 km** in **Kalbajar District**, and **105 km** along the **Tartar River**.

Also remaining under occupation were: water pipelines of **47 km** in **Aghdam District**, **48 km** in **Jabrayil District**, **57 km** in **Zangilan District**, and **178 km** in **Fuzuli District**; pumping stations — **5** in **Kalbajar District**, **4** in **Aghdam District**, **6** in **Jabrayil District**, **17** in **Fuzuli District**, **22** in **Gubadli District**, **20** in **Gubadli District**, **5** in **Kalbajar District**, and **2** along the **Tartar River**; sub-artesian wells — **682** in **Aghdam District**, **112** in **Jabrayil District**, **8** in **Zangilan District**, **281** in **Fuzuli District**, and **10** in **Gubadli District**; and water reservoirs — **17** in **Fuzuli District**, **2** in **Gubadli District**, **2** along the **Tartar River**, **1** along the **Tartar River**, **5** in **Zangilan District**, **2** in **Lachin District**, and **7** in **Kalbajar District**.

According to the inquiry sent on **13 November 2023** to the **Ministry of Health of the Republic of Azerbaijan** by letter No. **2-2-030/2-032671/2023**, and according to the tables attached to response letter No. **5-40/2-78/2023** dated **12 December 2023**, prepared by that Ministry, it was established that, based on the total assessment for the **22-year period**from **1993 to 2014** allocated by geographic districts by the working group on initial and urgent matters under the **State Committee of the Republic of Azerbaijan for Refugees and Internally Displaced Persons**, the amount of damage caused under the decision was **5,346,654,240 manats** in total.

In addition, the letter stated that, with respect to the damage caused during the occupation period in **Jabrayil District**, the necessary documents had been collected and submitted to the **State Service for Property Issues under the Ministry of Justice of the Republic of Azerbaijan**; an assessment had been carried out by that latter body, but they did not have information regarding the results of that assessment.

Page 888

According to the inquiry sent on **13 November 2023** to the **State Agency of Azerbaijan Automobile Roads** by letter No. **2-2-030/2-032634/2023**, and according to the tables attached to response letter No. **11-1/2-10032-8/2023** dated **15 December 2023**, prepared by that Agency, it was established that, as a result of the military aggression of the **Armed Forces of Armenia** against the Republic of Azerbaijan, material damage was caused in the occupied territories of **Shusha city**, and **Gubadli, Fuzuli, Aghdam, Jabrayil, Kalbajar and Zangilan Districts**, to **13 administrative buildings**, **10 residential houses**, **12 asphalt-concrete plants**, **12 quarry-crushing plants**, **14 automobile garages**, **14 machinery and equipment workshops**, **2,661 kilometres of national and local motor roads**, **160 bridges**, **62 other auxiliary buildings**, **238 units of machinery and mechanisms**, and various special-purpose motor vehicles.

According to the inquiry sent on **13 November 2023** by letter No. **2-2-030/2-032624/2023** to the head of the **Khojavand District Executive Authority**, and according to the tables attached to response letter No. **5-52/2-1024/2023** dated **15 December 2023**, prepared by the head of that District Executive Authority, it was established that, as a result of the occupation by the **Armed Forces of Armenia**, the average annual amount of damage caused to **Khojavand District**, mainly to the **10 villages** of the district inhabited by Azerbaijanis, amounted in total to **734,532,214 manats**; and the amount of damage calculated for **22 years** amounted in total to **1,139,496,110 manats**, taking into account natural increases.

According to the inquiry sent on **29 November 2023** by letter No. **2-2-030/2-036788/2023** to the **Azerbaijan Trade Unions Confederation**, and according to response letter No. **16-1/2-615/15/2023** dated **19 December 2023**, prepared by that Confederation, and the table attached thereto, it was established that, apart from the territories liberated from occupation, other properties recorded on the balance sheet of organizations that are members of and subordinate to the **Azerbaijan Trade Unions Confederation** also existed in the territories occupied by the Republic of Armenia.

Thus, on the balance sheet of **"Kurort" QSC**, there was the **"Istisu" sanatorium** in **Kalbajar District** and a building in **Shusha city** belonging to the **"Shusha" sanatorium-resort association** and its auxiliary buildings; there were tourist bases in **Shusha** and **Aghdam Districts** under the **Tourism and Excursion Directorate**; the **"Gulabli" sanatorium** of the **"Azerbkolkhozlararasisaglamliq" Republican Association** in **Aghdam**; a boarding house and auxiliary farm in **Gubadli District**; sports stadiums belonging to sports organizations subordinate to the **Azerbaijan Trade Unions Confederation** in **Aghdam, Gubadli, Kalbajar and Khankendi**; their related sports facilities; a **Chess Club** and other sports facilities in **Lachin District**; and the **"Labour Palace"** of the **"Kand-Gida-Ish" Trade Union Federation**.

According to the inquiry sent on **31 October 2023** by letter No. **2-2-030/2-029707/2023** to the **State Commission of the Republic of Azerbaijan on Prisoners of War, Hostages and Missing Citizens**, and according to response letter No. **542**dated **5 December 2023**, prepared by that Commission, and the table attached thereto, it was established that the number of persons registered by the State Commission as missing persons in connection with the First Karabakh War was **3,890**persons: **3,171** servicemen and **719** civilians, including **71 children**, **267 women** and **326 elderly persons; 3,623** men and **267** women.

It was established that **872** of the registered missing persons — **605** servicemen and **267** civilians, including **29 children**, **98 women** and **112 elderly persons; 774** men and **98** women — were persons regarding whom there was information that they had been taken prisoner or hostage.

The number of persons released from captivity and hostage-taking was **1,480**, including **378** servicemen and **1,102** civilians, including **224 children**, **357 women** and **225 elderly persons; 1,123** men and **357** women.

According to the inquiry sent on **17 November 2023** by letter No. **2-2-030/2-033874/2023** to the **State Security Service of the Republic of Azerbaijan**, and according to response letter No. **3-39/2-24/2-4772/2023** dated **20 December 2023**, prepared by that Service and examined in court, it was established that, as a result of measures carried out by the **State Security Service of the Republic of Azerbaijan**, the following information had been obtained:

Beginning in **1988**, on the territories of the former **Karabakh economic region** inhabited by Armenians, local detachments and, later, regular armed formations called **"volunteer self-defence detachments"** began to be created illegally. In **1991**, the separatists, calling themselves the **"people of Nagorno-Karabakh,"** announced their secession from the **Soviet Union** and declared independence, and proclaimed the creation of the **"Nagorno-Karabakh Republic."**On **10 December 1991**, a so-called **"independence referendum"** was held by the regime, and it was announced that **82%** of the so-called voters had participated and that **99%** of them had voted for independence.

At the beginning of **1992**, more than **10 "volunteer detachments"** were operating in **Khankendi city**. Later, pursuant to Order No. **013** dated **29 August 1992** of the regime's **"Defence Committee"**, entitled **"On the Transition to a New Structure for the Organization of the Self-Defence Forces of the Nagorno-Karabakh Republic,"** various motor-rifle platoons and groups were created on the basis of the **1st, 4th and 6th companies**.

According to the available information, representatives of the unlawful regime formed in territories of the Republic of Azerbaijan that had remained under occupation for many years committed environmental crimes by unlawfully exploiting the natural resources of the Karabakh region. Thus, mineral resources extracted from the **"Gulyatag" copper mine**, with a total area of **498.5 hectares** (**4.98 km²**), located in the territory of **Aghdara District**, were looted by Armenians and transported to the Republic of Armenia.

After the Patriotic War, every day in the morning hours, trucks departing from **Goris District** of the Republic of Armenia passed through the **"Lachin corridor"** and arrived at the said mine, and in the afternoon hours returned loaded with the residue obtained as a result of ore processing.

In camera footage installed along the **"Lachin corridor,"** it was established that the tent sections of those trucks were closed while they were returning, and that they were accompanied by soldiers of the **Russian Peacekeeping Contingent**. In addition, during the filming of the territory by an unmanned aerial vehicle, it was established that there were structure-type sleeping facilities near the mine for workers to stay overnight, and that the flag of the so-called regime was flying there.

In addition, as a result of comparative analysis of video footage taken with an unmanned aerial vehicle, it was established that the looting of the **"Gulyatag"** copper mine by Armenians had been further accelerated through the efforts of **Ruben Vardanyan**, who had been the so-called entity's **"state minister,"** and that an agreement had been reached with the command of the **Russian Peacekeeping Contingent** so that cargo vehicles would not be inspected. It was established that, during the mining operations conducted in the summer months of **2022**, the radius of the excavations had expanded many times over and that a large amount of new equipment had been brought into the area.

In the territories under occupation, there were in total **155** deposits of various types of minerals, including three major gold deposits: **"Zod"** in **Kalbajar District**, **"Vejnali"** in **Zangilan District**, and **"Gizilbulag"** in **Aghdara District**. The **"Zod"** gold deposit, which was actively exploited during the occupation period, is located in the territory of **Soyudlu**, **Kalbajar District**, and gold production was carried out there as well.

It was established that the company **"Vallex Group,"** operating on the basis of the former USSR **"Hydrocolourmet" Institute's** branch in **Yerevan**, was engaged in the exploitation of ore deposits in **Drombon settlement, Aghdara District**. The extracted ore and other raw materials were processed preliminarily and transported to a plant located in **Alaverdi city**, Republic of Armenia. In addition, in **November 2015**, in connection with the beginning of

exploitation of the **"Kashen"** copper-molybdenum deposit located in the territory of **Aghdara District**, a new plant was opened in that area.

The company **"Base Metals,"** belonging to the Russian Federation and founded by **Valeri Mejlumian** in **2002**, has operated as a mining enterprise since **2003**. According to the information, the principal reason for the establishment of the company was the discovery and exploitation of the copper and gold deposit **"Drombon,"** located near **Heyvali village** of **Kalbajar District**, which had been under occupation. According to the company's director, **Artur Mkrumyan**, out of **3.2 million tons** of ore discovered in **Drombon**, nearly **2.8 million tons** had been exploited. The amount of investment made by the company amounted to **USD 10 million**. Operational information was also obtained that the company had carried out mining works at the **"Gizilbulag"** gold-copper mine located in the occupied territory of **Aghdara District**.

The company **"Sterlite Gold" Ltd**, belonging to India, had operated since **1998** in the **Soyudlu** area of **Kalbajar District**, which was under occupation, and at the **Zod** gold mine of the Republic of Armenia.

Page 890

The international metals and mining company **"GeoProMining Gold,"** belonging to the Russian Federation, was established in **2001** by **"Stanton Equities Corporation."** It operates in the **Russian Federation** and the **Republic of Armenia**. According to information, it was involved in gold-mining operations in **Kalbajar** and **Aghdara** Districts, and its headquarters is located in **Cyprus**.

"Gold Star" CJSC, belonging to the Russian Federation, was engaged in the unlawful exploitation of the gold deposit located in **Vejnali village, Zangilan District**.

The Bulgarian company **"Sofmar"** was founded in **1978** and received international status on **15 October 2012**. The company, whose head office is located in **Great Britain**, in addition to transporting large volumes of cargo to **Europe** and **Asia**, transported the extracted raw materials of the gold mines in occupied **Kalbajar District** from the territory of the Republic of Armenia to foreign markets through the **Batumi port** in Georgia.

Harutyunyan Arayik Vladimiri studied in **1990–1994** at the **Yerevan Institute of National Economy**; in **1994–1998** at **Artsakh State University**; and in **2013** obtained the academic degree of Candidate of Technical Sciences at **"Artsakh State University"**, in the field of water problems and hydrotechnics.

In **1995–1997**, he was **"assistant to the minister of economy and finance"** of the so-called entity; in **1997–1999**, he was head of the **Askeran** and **Khankendi** branches of **ArmAgroBank**; in **1999–2004**, head of the **Khankendi** branch; in **2005–2007**, he was a **"member of parliament"** of the so-called entity, and at the same time head of the **"Motherland"** faction and **"chairman of the finance, budget matters and economic management commission."**

Since **2006**, he has been head of the **"Free Homeland"** party. In **2006–2007**, he was executive director of **"Karabakh Gold" CJSC**. In **2007** and **2012**, he was appointed **"prime minister"** of the so-called entity. On **31 March 2020**, in the **4th "presidential elections"** held in the so-called entity, he was elected **"leader"** of the separatist regime, began exercising the **"position"** on **21 May 2020**, and resigned on **1 September** of the current year.

Babayan David Klimi finished secondary school No. **8** in **Khankendi city** in **1989**; in **1994** graduated from the department of regulation of the state economy of the **Armenian State University of Economics**; in **1997** from the political science faculty of the **American University of Armenia**; and in **1998** from the international relations faculty of the **Central European University**. He is a Doctor of Historical Sciences. He was a member of the **"security council"** of the so-called entity.

In **1998–1999**, he was **"second secretary"** of the political department of the so-called entity's **"ministry of foreign affairs"**; in **2000–2001**, he was **"head of the political programming unit of the political department"**; beginning in **2001**, he was **"head of the political department"**; in **2001–2005**, **"employee of the programming group under the president"** of the so-called entity; in **2005–2007**, **"assistant to the president"**; in **2007**, **"head of the main information department of the presidential apparatus"**; in **2013**, **"deputy head of the presidential apparatus and head of the main information department"**; in **2020**, **"presidential adviser"**; in **2021**, **"minister of foreign affairs"**; and in **2023**, **"adviser to the president and special representative of the president for special assignments."**

Ghukasyan Arkadi Arshaviri, in **1992**, was **"adviser on political matters to the state defence committee"** of the so-called entity; in **1993**, **"member of the security council"**; in **1993–1997**, **"minister of foreign affairs"**; in **1997–2007**, he served as **"president."** Since **2017**, he has been retired.

During the investigation, it was established that, in **1997–2007**, while the territory of the Republic of Azerbaijan was kept under occupation by the Republic of Armenia, Ghukasyan issued orders in the form of **"instructions," "decrees,"** and other **"normative acts"** concerning the structure of the enemy's armed formations, the division of duties within the leadership, the existing legal framework, the acts of leadership personnel, and the activities of the enemy's armed formations.

It appears from operational information received that, after working for some time at the **"Soviet Karabakh"** newspaper, **A. Ghukasyan** took part physically in meetings held through the mediation of the **Minsk Group**, in **Moscow, Rome, Madrid** and other cities, and also in the signing of the **Bishkek Protocol** in **1994**, after he had been appointed **"minister of foreign affairs"** on the recommendation of **Robert Kocharyan**, the leader of the so-called entity's **"state defence committee"** during the **First Karabakh War**.

In **2020**, during the **Patriotic War**, **A. Ghukasyan** gave his political support to the then leadership of the so-called entity and regularly held consultations with them. In **October 2020**, he met with the Prime Minister of the Republic of Armenia, **Nikol Pashinyan**.

It was established that, in interviews posted on the **YouTube** internet channel of Russia's **Channel One**, as well as on other channels, he openly called for the forced alteration of the constitutional order of the Republic of Azerbaijan and/or the fragmentation of its territorial integrity, stating that the existence of the so-called entity within the Republic of Azerbaijan was impossible.

Bako Sahaki Sahakyan, beginning in **1991**, joined unlawful armed formations created by residents of Armenian origin living in the Karabakh region of the Republic of Azerbaijan; actively participated in organizing and managing the activities of those groups, in matters of their supply, as well as in the occupation and seizure of **Shusha**, **Khankendi** and other districts, and in processes encroaching upon the territorial integrity of Azerbaijan.

After the occupation process was completed, he held various **"leadership"** positions in the unlawful armed groupings of the so-called entity created in those territories by persons of Armenian origin. Thereafter, under the titles of **"minister of internal affairs," "director of the national security service,"** and, in **2007–2020**, **"president"** of the so-called entity, he carried out unlawful activities.

During that period, he organized the creation and management of armed formations not provided for by law in Karabakh and the surrounding districts, their supply with firearms, ammunition and technical equipment, the recruitment of various individuals into those formations, their financing, and the conduct of armed training for them. He made separatist calls for those territories to be separated from the Republic of Azerbaijan and declared an independent state, and subsequently annexed to the Republic of Armenia. In order to secure the adoption by state authorities of the Republic of Azerbaijan of decisions of such nature, he exerted political pressure by means of the aforementioned unlawful armed formations, by organizing terrorist acts against civilians and our servicemen, and also organized the mining of our territories.

As a result of **B. Sahakyan's** acts, in **1991–2020**, numerous civilians and servicemen were killed, sustained serious injuries, and had their property destroyed.

His son, **Tigran Bakoyi Sahakyan**, was born on **16 August 1997** in **Khankendi city**. He served in the **"MTC"** of the so-called entity.

David Rubeni Ishkhanyan graduated from secondary school in **1985** and from the history-law faculty of the **Khankendi Pedagogical Institute** in **1992**. In **1987–1989**, he served in the Soviet Army. He was an active participant in the **"Artsakh liberation struggle and volunteer movement"** and the **"student movement."**

In **1991**, he was elected **"deputy"** of the first convocation of the so-called entity's **"parliament."** In **1992–1995**, he served in the **"defence army,"** was **"commander"** of the

28th battalion in **Khojavand District**, and participated in battles in the territories of **Aghdara**, **Kalbajar**, **Asgaran** and **Khojavand Districts**. He was later appointed deputy chief of staff.

In **1995–2000**, he worked as director of **Ashan village secondary school** in **Khojavand District**, and also as head of the **Ashan community**. Since **1989**, he has been a member of the **Dashnaktsutyun** party. Since **2015**, he was elected **"deputy"** from that party. In **2015–2020**, he was a member of the **"standing committee on budget, finance and economic management"**. In **2015–2017**, he was leader of the **"Dashnaktsutyun"** parliamentary faction. He is a member of the **"Armenian Revolutionary Federation"** party.

From **2020** until **7 August** of the current year, he was **"deputy"** of the so-called entity, a member of the standing committee of the **"national assembly"** on defence, security and lawfulness, and a member of the standing commission. From **7 August 2023** to **1 September 2023**, he was **"chairman of parliament"** of the so-called entity, and from **1 September 2023** to **9 September 2023**, he was the **"acting president."**

During the periods when he was a **"deputy"** of the so-called entity, he took part in the adoption of draft laws on improving social-security issues of the so-called **"Artsakh self-defence army,"** on making military service compulsory for students, and on calling students up for military service.

In **2020**, during the **44-day Patriotic War**, he conducted propaganda among Armenian soldiers serving in military units located in **Khojavand**, **Aghdara** and **Asgaran Districts**, and encouraged them to fight against the Azerbaijani Army.

In **2020**, he nominated himself as a **"presidential candidate"** of the so-called entity in the Karabakh region on behalf of the **Dashnaktsutyun** party; in connection with this, on **YouTube**

a documentary film entitled **"Fedayis. Ishkhanyan Davit"**, containing video and photographic materials reflecting his participation in battles during the **First Karabakh War**, was posted on an internet portal.

Manukyan David Azati performed military service in **1990–1991**. After graduating in **1993** from the **Tree-Planting Technical School**, he joined the ranks of the so-called entity's **"defence army"** as an ordinary soldier. During the **First Karabakh War**, he actively participated in battles; in **1994**, in the summer, he was awarded the military rank of lieutenant. In **1994–1998**, he served as squad commander, platoon commander and chief of staff in military unit No. **37043**, deployed in the area of **Sirkhavend village, Aghdara District**. In **1998–2001**, he studied at the **Frunze Military Academy** of the **Russian Federation**.

Since **2001**, holding the military rank of **"lieutenant colonel,"** he served as chief of staff of the 5th defence line in the territory of **Aghdara District** — military unit No. **49971**. In **2005–2010**, he served as commander of the 7th defence line — military unit No. **38862**, in **Muradlı village, Khojavand District**. In **2010–2015**, he served as chief of staff of the 10th division — military unit No. **32964**, in the unlawful armed formations of the so-called entity.

In **2015**, he was appointed head of the personnel department of the General Staff of the **Ministry of Defence of the Republic of Armenia**. In **2016–2020**, he was appointed commander of the 2nd Army Corps of the Ministry of Defence of the Republic of Armenia — military unit No. **28233**.

Since **2020**, holding the military rank of **"major general,"** he acted as **"deputy commander of the defence army for combat readiness"** of the so-called entity. During the Patriotic War, he commanded the Armenian armed forces that fought against the Azerbaijani Army in the directions of **Aghdara** and **Khojavand Districts**, and carried out the orders of the commander of the so-called entity's **"defence army"** in the Karabakh region. In **January 2022**, because his contract had expired, he was transferred to the reserve.

During the years of **"service,"** he was awarded the **"Combat Cross, 2nd Degree,"** the **"Vardan Mamikonyan"** order and various jubilee medals.

It appears from the operational information received that, beginning in **1993**, **D. Manukyan** participated in battles against the Republic of Azerbaijan as part of the so-called entity's **"defence army."** In **January 1994**, during fierce battles in the direction of the **"Chichekli" height** in **Yanshaq village, Kalbajar District**, he personally killed several Azerbaijani soldiers.

In addition, it was established that **D. Manukyan** actively participated in the establishment, formation and activities of unlawful Armenian armed formations in the Karabakh region; and, for the purpose of ensuring that members of those unlawful armed formations received military training, he arranged for them to be sent on courses to various military educational institutions of the Republic of Armenia, as well as to the reconnaissance academy of the Russian Federation located in **Moscow** and **Saint Petersburg**.

After being transferred to the reserve, **D. Manukyan** met with **Ruben Karleni Vardanyan** and stated that he felt concern about the future of the so-called entity; that, in the territory of **Khankendi**, an association called **"What should we do?"** would be created; that the purpose of that association was to improve the situation in **"Artsakh"**, prevent the population from dispersing, and gather the population together so that it could live for many years as a state. Representatives of the associations created by **R. Vardanyan**, including representatives of the **"Justice"**, **"Dashnaktsutyun"**, **"Free Homeland"**and **"Democratic Kharabakh"** parties, also participated in that association.

Allahverdiyan David Nelsoni studied in secondary school in **Yemishcan village** in **1995–2005**. In **2005**, he entered the Faculty of Finance of **Khankendi "State University."** In

2006–2008, he performed military service in military unit No. **34153**, located in the direction of **Aghdam**. He worked as a lecturer at the **"university"** where he had studied, as well as adviser to **Georgi Haranyan**, the so-called entity's **"minister of agriculture."**

On **20 September 2023**, in **Yemishcan village**, he approached a post belonging to the Armed Forces of the Republic of Azerbaijan and voluntarily surrendered, handing over a **Kalashnikov-type automatic rifle**. He stated that the firearm had been given to him by **Eduard Roberti Musayan**, a citizen of the Republic of Armenia with the rank of major and representative of **Yemishcan village**, in a compulsory manner and by frightening him into doing the work, and that he had been told he was entrusted with protecting their village.

He served as an ordinary soldier in the rear during the **April battles** and the **Second Karabakh War** in the **Aghdam** direction.

Page 893

Pashayan Melikset Vladimiri studied at the secondary school in **Yemishcan village** from **1978 to 1988**, and continued his education at a technical school from **1988 to 1989**. In **1989–1991**, he performed active military service in the **Amur region of the Russian Federation**, and after completing it returned to **Yerevan city**. In **1992**, when the **First Karabakh War** began, he was involved in military operations and served as an ordinary soldier in the **31st battalion** in the **Aghdam** direction.

According to his statements, on **21 September 2023**, he approached a post belonging to the **Armed Forces of the Republic of Azerbaijan** located on a height in **Khachmach village, Khojaly District**, and voluntarily surrendered. He stated that, until the day he was taken prisoner, he had worked as a labourer at various facilities in **Khankendi city** and had not participated in the **Second Karabakh War**.

Martirosyan Garik Grigori studied veterinary medicine at the **Yerevan Veterinary Institute** from **1988 to 1993**. In **1993–1994**, he performed active military service in military unit No. **34153**, deployed in the territory of **Aghdam District**. He worked for a period as a foreman at various construction sites, and later as a zoology teacher at the secondary school located in the area where he lived. Due to his poor financial situation, from **January 2023**, on the instructions of the commander of posts Nos. **301–311**, **Musayelyan David**, located approximately **1 kilometre** from the village where he lived, he began serving as a serviceman in the position of rifleman at the said posts in exchange for a monthly payment of **132,000 drams** (**560 manats**), and had participated in the battles of the **First Karabakh War**.

Balayan Levon Romiki lived until **1988** in the area of the **"Keshla Bazaar"** in **Narimanov District, Baku city**, where he received his primary education. In **1988**, he moved to **Khankendi city**, where he completed his secondary education. According to the information, he did not participate in the **First** or **Second Karabakh Wars**, nor in the **April battles**. He worked in various construction facilities in the territory of **Khankendi**. On **20 September 2023**, while serving at a post near the area where the **Russian Peacekeeping Contingent** was

stationed, on the **Khankendi–Shusha** road, he was detained by servicemen of the Republic of Azerbaijan.

Stepanyan Gurgen Homeri studied at the secondary school located in **Jermuk city**, Republic of Armenia, from **1993 to 2002**. In **2002**, he moved to **Khankendi city** with his family. In **2005–2007**, he performed active military service in **Hadrut settlement**; after completing it, he worked as a foreman in **Khankendi city**. He stated that from **2022** he served on a rotational basis at the post located in the territory of **Aghdara District**, and that after the local anti-terrorist measures, on **20 September 2023**, while moving in the direction of **Khankendi**, he was detained by servicemen of the Republic of Azerbaijan. He stated that, at the time of detention, there were other persons with him and that they had been issued military uniforms of the Republic of Armenia and **Kalashnikov-type** automatic rifles.

Isanyan Aren Arai studied at secondary school No. **2** in **Khankendi city** from **2009 to 2018**. In **2018–2022**, he worked as a master in **plastic-door-and-window** production. From **2022**, he performed active military service for a period of **6 months** in military unit No. **8** located in **Khankendi city**, and continued military service under contract for a monthly payment of **320,000 drams** (**1,361 manats**). During the anti-terrorist measures carried out on **19 October 2023**, he was wounded at the post where he served, which was under the control of the enemy, and the next day, on **20 October 2023**, in the morning hours, he was detained by servicemen of the Republic of Azerbaijan. At the time of detention, he handed over to servicemen of the Republic of Azerbaijan the military uniform belonging to the Republic of Armenia that he had been wearing and a **Kalashnikov-type** automatic rifle.

Beglaryan Vasili Ivani studied at the secondary school located in **Hadrut settlement** from **2001 to 2010**. In **2011–2013**, he performed active military service in the territory of **Aghdara District**; after completing it, he worked as a labourer in **Khankendi city** and is married. In **2019**, he moved together with his family to **Yerevan city**, Republic of Armenia. In **2021**, he returned to **Kalbajar District** and, in exchange for payment, stood guard at the post located there. During the anti-terrorist measures, after the post where he served came under artillery fire, he left it and was detained by the Azerbaijani side while moving in the direction of **Maraga village, Aghdara District**. At the time of detention

he handed over to the servicemen of the Republic of Azerbaijan the military uniform belonging to the Republic of Armenia and the **Kalashnikov-type** automatic rifle that he had with him.

Qazaryan Erik Roberti performed fixed-term military service in **2003–2005** in a military unit located in **Vayk city**, Republic of Armenia. In **2006–2008**, he studied at the **Physical Education University** located in **Yerevan city**, specializing as a physical education teacher.

In **2021–2023**, he served as a contract serviceman in the position of **rifleman** in military unit No. **17997**, deployed in the area of **Hasanriz village**, **Kalbajar District**, for a monthly payment of **620,000 drams** (**2,600 manats**).

During the anti-terrorist measures of the **Armed Forces of the Republic of Azerbaijan**, he left the military unit and began fleeing in the direction of **Khankendi city**. Two days later, he voluntarily surrendered to servicemen of the Republic of Azerbaijan.

At the time of his arrest, he had on him **one Kalashnikov-type automatic rifle** and **three additional cartridge magazines**.

In response to the inquiry sent on **13 November 2023** to **"Azerishiq" Open Joint Stock Company** by letter No. **2-2-030/2-032635/2023**, the response letter dated **11-12.2023,** No: **13-13/2-1/04-11920/2023** prepared by that company stated that there were no construction or installation facilities belonging to **"Azerishiq" OJSC** in the liberated territories.

Thus, the electric networks that existed in those territories before the occupation belonged to **"Azerenergy" OJSC**. A large part of the power-transmission lines and equipment belonging to the energy system in the territories liberated from occupation was destroyed by Armenian occupiers or taken to the territory of the Republic of Armenia. Since the administrative buildings were destroyed, no documents concerning the electricity network remained.

In response to the inquiry sent on **13 November 2023** to **"Azerigaz" Production Association**, the response letter No. **14-2-2/2-6471/2023** dated **14 December 2023** prepared by that Association stated that, during **1988–1994**, as a result of military operations by the **Armed Forces of the Republic of Armenia**, damage in the balance value of **4,834,223.78 manats** was caused to the natural gas supply system in the occupied territories of the Republic of Azerbaijan.

In response to the inquiry sent on **13 November 2023** to the head of the **Shusha District Executive Authority** by letter No. **2-2-030/2-32622/2023**, the response letter No. **5-77/2-502/5/2023** dated **19 December 2023** prepared by the head of that Executive Authority stated that, according to information on movable and immovable property that had existed before the occupation in the liberated territories of **Shusha District**, there were in total **6,431** items of private property belonging to the population of Shusha District, individual residential houses with their main and auxiliary buildings, **144**main and auxiliary buildings belonging to communal enterprises, and **1,449** buildings and structures in the administrative, industrial, commercial, public-catering and other categories — in total **8,121** buildings and structures.

In response to the inquiry sent on **13 November 2023** to the head of the **Tartar District Executive Authority** by letter No. **2-2-030/2-32789/2023**, the response letter No. **5-78/2-1324/2023** dated **12 December 2023** prepared by the head of that Executive Authority stated that:

according to the schedule submitted by the representation for the **Umudlu village administrative territorial district**, the damage caused to partially unusable houses in the village amounted to **48,000,000 manats**;

according to the schedule submitted by the representation for the **Ortakend village administrative territorial district**, the damage caused to houses in the village that had become completely unusable amounted to **72,500,000 manats**;

according to the schedule submitted by the representation for the **Canyataq village administrative territorial district**, the damage caused to all unusable houses and to individual houses amounted to **335,000 manats**;

according to the schedule submitted by the representation for the **Aghabeyali village administrative territorial district**, the damage caused to completely unusable houses amounted to **9,127,568 manats**;

according to the schedule submitted by the representation for the **Ulu Garabey village administrative territorial district**, the damage caused to completely unusable houses amounted to **20,000,000 manats**;

according to the schedule submitted by the representation for the **Chayli village administrative territorial district**, the damage caused to completely unusable houses amounted to **60,919,343 manats**;

according to the schedule submitted by the representation for the **Talysh village administrative territorial district**, the damage caused to completely unusable houses amounted to **34,765,123 manats**;

according to the schedule submitted by the representation for the **Giziloba village administrative territorial district**, the damage caused to unusable houses amounted to **15,440,000 manats**;

according to the schedule submitted by the representation for the **Shikharkh village administrative territorial district**, the damage caused to completely unusable houses amounted to **33,935,000 manats**;

according to the schedule submitted by the representation for the **Kichik Garabey village administrative territorial district**, the damage caused to completely unusable houses amounted to **14,788,000 manats**;

according to the schedule submitted by the representation for the **Hasangaya administrative territorial district**, the damage caused to unusable houses amounted to **16,398,147 manats**;

according to the schedule submitted by the representation for the **Aghdara city administrative territorial district**, partially

the damage caused to unusable houses amounted to **39,813,000 manats**, and according to the table provided by the representation for the **Chardaqlı administrative territorial district**, the damage caused to completely unusable houses amounted to **363,000,000 manats**.
According to the inquiry sent on **13 November 2023** to the **Ministry of Internal Affairs of the Republic of Azerbaijan** by letter No. **2-2-030/2-032615/2023**, and according to response letter No. **3-13/2-99030/2023** dated **25 December 2023**prepared by that Ministry, the condition after liberation from occupation of the buildings and structures of the territorial police bodies of the **Ministry of Internal Affairs of the Republic of Azerbaijan** located in the liberated districts of the Republic of Azerbaijan was as follows:
Aghdam District Police Department: The district police department had at its disposal a two-storey administrative building with a total area of **1,200 square metres**, a temporary detention facility with an area of **200 square metres**, a canteen building with an area of **200 square metres**, as well as engineering and communications installations located on the territory. These were destroyed during the occupation period, and according to calculations, the damage caused amounted to **2,735,000 manats** at current prices.
Fuzuli District Police Department: The district police department had at its disposal a two-storey administrative building with a total area of **1,200 square metres**, a temporary detention facility with an area of **200 square metres**, a canteen building with an area of **200 square metres**, as well as engineering and communications installations located on the territory. These were destroyed during the occupation period, and according to calculations, the damage caused amounted to **2,735,000 manats** at current prices.
Jabrayil District Police Department: The Department's three-storey administrative building with a basement, measuring **15.4 x 36.4 metres** according to the plan, with a height of **11.5 metres** and a total area of **1,682 square metres**, was rendered completely unusable during the occupation period, and there were no conditions for carrying out service. After liberation from occupation, repair and restoration works were carried out in the said administrative building, and the personnel are currently temporarily operating in that building. According to calculations, the damage caused amounted to **949,000 manats**.
Gubadli District Police Department: The police body had at its disposal **two** service buildings. The main service building of the police department measured **25 x 20 metres**, was two-storey and consisted of **24** service rooms; the other auxiliary service building measured **15 x 10 metres**, was two-storey and consisted of **8** service rooms. Both buildings were completely destroyed by the **Armed Forces of the Republic of Armenia**, and according to calculations, the damage caused amounted to **1,225,000 manats**.
Lachin District Police Department: On the Department's territory, there was an administrative building with an area of **380 square metres**, a temporary detention facility of **50 square metres**, and a canteen building of **70 square metres**. These structures were completely destroyed during the occupation period, and according to calculations, the damage caused amounted to **1,290,000 manats**.
Kalbajar District Police Department: The Department's territory covered **600 square metres** (**24.50 x 24.50 metres**). The administrative building had a total area of **960 square metres**, was two-storey and consisted of **13** rooms. During the occupation period, the said

structure was completely destroyed, and according to calculations, the damage caused amounted to **1,334,000 manats**.

Shusha District Police Department: The administrative building was two-storey and consisted of **300 square metres**. It was completely destroyed during the occupation period, and according to calculations, the damage caused amounted to **[amount not specified in the text] manats**.

Khojaly District Police Department: The administrative building was two-storey and consisted of **32** service rooms and **6** cells in the temporary detention facility. There was also a five-storey residential building consisting of **40 apartments**, two floors of which had been constructed and which remained in an unfinished condition. During the occupation period, it was completely destroyed, and according to calculations, the damage caused amounted to **7,318,000 manats**.

Zangilan District Police Department: On the Department's **1-hectare** territory, there was a two-storey administrative building consisting of **40** service rooms, with a total area of **1,150 square metres**, garages for **8** service vehicles, and auxiliary buildings on the territory. At the same time, there were **10** cottage-type residential houses on a separate plot of land allocated for police officers. In addition, on the **0.30-hectare** land plot of the **Sharikan police division**, there was a one-storey administrative building with **8** rooms and an area of **120 square metres**. Each of the aforementioned buildings, during the occupation period

were completely destroyed. According to the calculations carried out, the damage caused amounted to **296,750 manats**.

As a result of the calculations, material damage in the total amount of **21,023,500 manats** was caused to the buildings and facilities of the territorial police bodies of the **Ministry of Internal Affairs of the Republic of Azerbaijan** located in the districts liberated from occupation.

In the territories of the Republic of Azerbaijan liberated from occupation, before the occupation period, by order of the **Ministry of Internal Affairs**, construction works had been carried out in **Khankendi**, **Khojaly** and **Zangilan** cities for service residential buildings for police officers, as well as in **Khojaly** and **Jabrayil** cities for administrative buildings for district police departments; for known reasons, the construction works were stopped at various stages. The total value of the completed structures, based on the estimated prices of **1991**, amounted, in manat equivalent, to **296,402.11 manats**. According to their post-occupation condition, only the administrative building constructed in **Jabrayil** city existed; the others had been destroyed.

According to the inquiry sent on **13 November 2023** to the **Ministry of Agriculture of the Republic of Azerbaijan** by letter No. **2-2-030/2-032645/2023**, and according to response letter No. **3-22/2-3732/2023** dated **20 December 2023** prepared by that Ministry, it was noted that, in addition to the damage caused as a result of the destruction of infrastructure and the base of means of production in the agricultural sector — buildings and facilities, movable and

immovable property, machinery and equipment that had been on the balance sheets of administrations, enterprises and organizations — archive information was submitted concerning the situation up to **January 1990** for assessing the economic opportunities lost in those territories during the occupation period in the field of agricultural production.

According to the inquiry sent on **13 November 2023** to the **Ministry of Health of the Republic of Azerbaijan** by letter No. **2-2-030/2-032627/2023**, and according to response letter No. **3-28/2-8967/2023** dated **15 December 2023** prepared by that Ministry, it was noted that material damage had been caused as follows:

in **Aghdam District**, **14 hospitals** and **72 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **55,193.6 thousand manats**;

in **Jabrayil District**, **8 hospitals** and **61 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **11,230.2 thousand manats**;

in **Fuzuli District**, **9 hospitals** and **43 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **3,935.9 thousand manats**;

in **Kalbajar District**, **9 hospitals** and **105 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **11,282,000 manats**;

in **Gubadli District**, **4 hospitals** and **601 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **109,115,000 manats**;

in **Lachin District**, **8 hospitals** and **105 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **67,533,000 manats**;

in **Zangilan District**, **5 hospitals** and **45 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **72,922,000 manats**;

in **Khojaly District**, **1 hospital** and **13 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **925.0 thousand manats**;

in **Khojavand District**, **4 hospitals** and **6 polyclinics, dispensaries, doctor's stations, medical stations and other institutions** — in total, **573,968,000 manats**;

in **Shusha city**, **3 hospitals** and **32 polyclinics, dispensaries, doctor's stations, medical stations and other institutions**— in total, **30,681.6 US dollars**.

Overall, material damage in the amount of **217,084.12 thousand manats** was caused.

According to the inquiry sent on **29 November 2023** to **Azerbaijan Airlines CJSC** by letter No. **2-2-030/2-036693/2023**, and according to response letter No. **13-2/2-11/7427/2023** dated **28 December 2023** prepared by that company and the schedule attached thereto, it was established that movable and immovable property belonging to **Azerbaijan Airlines CJSC** existed in the territories liberated from occupation.

Thus, a number of movable and immovable properties in **Aghdam District** had been damaged, and the total depreciated amount was **12,510.50 manats**; for **Khojaly city**, the total depreciated amount was **16,976.89 manats**; for **Kalbajar District**, depreciation

the depreciated amount was **1,176.00 manats**. It was also stated in the letter that the airport was located **1 km south of Khojaly city**. It had an asphalt-concrete runway measuring **1,600 x 35 m**. The airport received **Yak-40, An-24, An-26 and An-2** type aircraft. To ensure flight safety, Soviet-manufactured radio-light systems of the **PAR-10s, ARP-7s, DPRM, BPRM (OSP-7-u-1), OPRS and ARP-80** types had been installed. The capacity of the airport terminal building existing at the airport was **25 passengers per hour**, and the area of the building was **90 m²**. A dispatch point and service areas existed at the airport. A transformer substation and other auxiliary buildings and installations existed on the airport territory.

Aghdam airport was located **9 kilometres east of Aghdam city**. It had an asphalt-concrete runway measuring **1,400 x 35 m**. The airport received **Yak-40, An-26, An-24 and An-2** type aircraft. To ensure flight safety, Soviet-manufactured radio-light systems of the **O-MVL-5** and **ARP-7c** types had been installed. The capacity of the airport terminal building existing at the airport was **25 passengers per hour**, and the area of the building was **210 m²**. A dispatch point with an area of **20 m²** and service areas with an area of **30 m²** existed at the airport. A transformer substation and other auxiliary buildings and installations existed on the airport territory.

According to the inquiry sent on **13 November 2023** to the **Ministry of Culture of the Republic of Azerbaijan** by letter No. **2-2-030/2-032630/2023**, and according to response letter No. **3-24/2-230/07-04/2024** dated **23 January 2024**, prepared by that Ministry, it was noted that initial monitoring had been carried out by representatives of the **Ministry of Culture** in the territories of **Shusha, Jabrayil, Fuzuli, Zangilan, Khojavand, Gubadli, Aghdam and Kalbajar Districts** liberated from occupation, and **864** institutions had been identified. Along with those districts, monuments placed under state protection in **Lachin District** were inspected. Information about the identified institutions and monuments, and their coordinates, were entered into the **"Karabakh Digital Geoinformation System."** After the anti-terrorist operation, institutions and monuments in **Khankendi, Khojaly, Khojavand and Aghdara Districts** were inspected by the monitoring group of the **Ministry of Culture**, and the relevant information was systematized. In **2020–2023**, in total, monitoring of **901** institutions was carried out, and **539** of **705** monuments placed under state protection were inspected.

Based on the notes made in the received documents:

Monitorings:

For the purpose of implementing paragraph **7.8** of the Decree, initial monitorings were carried out in the territories of **Shusha, Jabrayil, Fuzuli, Zangilan, Khojavand, Gubadli,**

Aghdam and Kalbajar Districts liberated from occupation by representatives of the **Ministry of Culture** represented in the operational headquarters under the temporary commandant's offices (attached):

During the monitoring, **864** of **933** institutions were identified: **462** libraries, **348** club institutions, **20** museums, **26**schools, **1** cinema, **2** theatres, **2** galleries and **3** cinema clubs. Of those institutions, **858** were in an unusable condition.

Of the **933** institutions examined, it was not possible to determine the location of **69** in total, consisting of **28** libraries, **23**club institutions, **1** school, **1** theatre and **16** cinemas.

In **November–December 2023**, monitoring was carried out in the territories of **Khankendi, Khojavand, Khojaly, Asgaran and Aghdara**. As a result of the monitoring, **29** buildings and **37** institutions were inspected. Precise information regarding the construction date of those buildings was not obtained (attached). Thus, the total number of institutions monitored was **901** (**864 + 37**).

Level of monitoring carried out: In **Fuzuli, Zangilan and Gubadli Districts**, the initial monitoring of institutions was fully completed. It was not possible to inspect **136** cultural institutions in **81** residential settlements in total, including **10**in **6** residential settlements in **Jabrayil District**, **33** in **18** residential settlements in **Aghdam District**, **7** in **4** residential settlements in **Kalbajar District**, **45** in **34** residential settlements in **Khojavand District**, and **41** in **19** residential settlements in **Shusha District**.

An application was addressed to the **National Archive Administration of the Republic of Azerbaijan** in order for information about historical and cultural objects — monuments and institutions — that existed before the occupation to be submitted to the **Ministry of Culture of the Republic of Azerbaijan**. The Archive

Administration sent information and photographs concerning only **12 cultural institutions** to the Ministry. The obtained information and photographs were used in the work process according to their relevance.

Libraries:

For the purpose of determining the damage caused to libraries as a result of the aggression of the **Armed Forces of the Republic of Armenia** against the **Republic of Azerbaijan**, an inquiry was addressed to the **National Archive Administration of the Republic of Azerbaijan** by request No. **04/04-453/2022** dated **28 February 2022**. Copies of the documents obtained as a result of the research carried out in the archive, according to response letter No. **1/542** dated **30 March 2022** of the Archive Administration, were submitted to the Ministry. However, the obtained documents did not fully reflect the statistics regarding libraries in the liberated territories, and it was not possible to obtain concrete information.

According to response letter No. **09/1-5** dated **16 March 2022** of the **State Statistics Committee of the Republic of Azerbaijan** — in response to request No. **04/04-452/2022** dated **2 February 2022** of the **Ministry of Culture** — **10 centralized library systems** were destroyed, together with their central libraries and city, settlement and village library branches: the **Shusha, Fuzuli, Jabrayil, Lachin, Kalbajar, Aghdam, Zangilan, Gubadli, Khojaly and Khojavand District centralized library systems**.

In general, in the occupied territories, regardless of profile and subordination, the infrastructure, library collections, and relevant documents relating to the accounting of printed works and other materials held in the collections of **927 libraries**considered the property of the **Republic of Azerbaijan** were destroyed.

The formation of the centralized library systems was carried out during the **USSR** period. When libraries were united into a single structure, the territorial unit was taken as the main factor. Because libraries also performed the function of centres implementing party ideology. Therefore, libraries were created even in the most remote villages. After the **Republic of Azerbaijan** gained independence, those libraries became state property.

The information provided by employees of those centralized library systems and the division of territorial units by the said districts confirm that the operation of **927** libraries out of **938** territorial units arose from the requirements of the USSR period. Alongside branches of the centralized library systems in those territorial units, school libraries also operated.

There were approximately **4.6 million** book copies in the library collections of the **927** destroyed libraries. During the USSR period, the collections of centralized libraries were formed with approximately the same content and literature. Based on this factor, it may be noted that, in the **Aghdash District Centralized Library System**, across **74 libraries** — currently there are **70 libraries** across **74 territorial units**, as **4 libraries** were merged with other libraries due to building conditions — there was a collection of **295,000** books; while in the **Fuzuli District Centralized Library System**, with **77 territorial units**, there was a library collection of approximately more than **300,000** books. An analysis by the same analogy of the other centralized library systems, and taking into account the book collections of school libraries as well, provided grounds to conclude that a collection of **4.6 million** books across the **927** destroyed libraries had been destroyed.

Museums: In the territories of the **Republic of Azerbaijan** liberated from occupation, thousands of material and cultural examples of fine craftsmanship had come under Armenian vandalism during the occupation period. The activities of more than **22** museums that existed there were terminated; thousands of exhibits preserved in museum collections were destroyed or looted. In order to obtain information concerning those museums, museum specialists applied by letter No. **02/04-762/261** dated **27 April 2021** to the **National Archive Administration of the Republic of Azerbaijan**, so that extensive research would be carried out in archives.

As a result of the research carried out in the **Azerbaijan State Archive of Literature and Art**, it was established that there had been **history and local-lore museums** in **Aghdam, Fuzuli, Jabrayil, Kalbajar, Lachin, Gubadli and Zangilan Districts**, and their branches, as well as the **Aghdam Bread Museum**, the **Historical Museum of Shusha City**, **Uzeyir Hajibeyov's House-Museum in Shusha**, **Bulbul's House-Museum in Shusha**, and the **Shusha Branch of the Azerbaijan National Carpet Museum**,

Page 899

statistical information was obtained only regarding the area of the museum and the number of exhibits for the period before the occupation. However, no document was submitted regarding the content and value of the exhibits.

Since it had not been possible during the occupation to evacuate the accounting-and-protection books of the museum funds — the documents reflecting the basic information about each museum item and collection included in the museum funds — the possibilities for determining the damage caused to the funds of those museums have at present been limited. The information on the area of the museum buildings, however, made it possible, on the basis of the relevant criteria, only to determine the damage caused to museum property.

The funds of the **14 museums** for which information relating to the pre-occupation period was obtained in the archives consisted in a total of **95,435 exhibits**, and the total area of those museum buildings was **4,723.7 square metres**.

Historical and cultural monuments: In the territories liberated from occupation, **705 historical and cultural monuments** have been placed under state registration. In addition, as a result of analyses carried out by the **State Service for the Protection, Development and Restoration of Cultural Heritage under the Ministry of Culture**, it was determined that there were more monuments located in the territories of the districts liberated from occupation. Thus, in the said territories there are also numerous immovable cultural heritage objects of historical, archaeological and architectural importance that have not been entered into state registration.

Inventory work was begun in **2020**, after the end of the **44-day war**, and the work is still continuing. Although it has still not been possible to inspect all territories and objects — mined territories and areas — many facts and items of information have been collected regarding the damage inflicted on cultural heritage during the occupation period.

During the inventory work, it was discovered that:

A number of monuments, including Christian religious places of worship, had been used by the occupying forces as military positions; Islamic religious monuments had been subjected to vandalism, desecrated, and used by the occupying forces as stables.

Words and expressions in the Armenian language had been written on the walls of a number of monuments, and fire had been opened on inscriptions and architectural elements.

During the occupation period, unlawful archaeological excavation works had been carried out on the territories of monuments.

During the occupation period, unlawful restoration-conservation works had been carried out at a number of monuments.

Islamic monuments had either been completely destroyed or desecrated. Muslim religious places of worship, especially mosques and mausoleums, were particularly subjected to destruction. **10 mosques** were completely destroyed, **14 mosques** were used as stables, and the purpose of **5 mosques** was changed and falsified. In the territories liberated from occupation, **7 mausoleums** were completely destroyed.

Alongside Islamic religious monuments, Christian religious monuments also became victims of vandalism. The interiors of **2 temples** in **Khojavand District** were used by the occupying forces as combat positions. The writing of various words and expressions in Cyrillic and Armenian script on the walls of **3 Christian religious monuments** is a manifestation of the negligent attitude toward Christian religious monuments. The feeding troughs prepared for animals, and the remains of hay and manure found inside **2 temples**, constituted proof that the occupiers had used those monuments too for purposes other than their religious and cultural purpose.

During the inventory, the fact that mines had been placed around and inside cemeteries and **1 mausoleum** was recorded.

During the work carried out in stages to date and still ongoing, it was determined that **47 monuments** included in the list of monuments under state protection had been completely destroyed during the occupation period. **125 historical and cultural monuments** had been partially destroyed or had fallen into an emergency condition. Because of neglect, restoration-conservation works must be carried out urgently on **59 monuments** that had fallen into an emergency condition, and on **90 monuments** within the shortest possible time.

By the **Azerbaijan Scientific-Research Design Institute** of the **State Service for the Protection, Development and Restoration of Cultural Heritage under the Ministry of Culture**, in **Aghdam** (**25 monuments**), **Jabrayil** (**15 monuments**), **Fuzuli** (**41 monuments**), **Kalbajar** (**7 monuments**), **Lachin** (**39 monuments**), **Gubadli** (**25 monuments**), **Tartar**

(**4 monuments**), **Khojaly** (**3 monuments**), **Khojavand** (**46 monuments**) and **Zangilan** (**9 monuments**) Districts, the amount of damage caused to **214 architectural monuments** located in those districts was calculated. In total, the damage caused to **214 monuments** amounted to **351,309,600 manats**.

For **Aghdam, Jabrayil, Fuzuli, Kalbajar, Lachin, Gubadli, Tartar, Khojaly, Khojavand and Zangilan Districts**, the amount of material damage caused to **214 monuments** was

calculated on the basis of experience obtained from restoration works carried out in previous periods and the norms used during restoration.

The amount of damage caused to **214 monuments** was also calculated and compared in accordance with the formula **D = Db (1 + Σ Ki) - A**, given in the book **"Methodology for the Assessment, in Accordance with International Standards, of Historical and Cultural Monuments in the Occupied Territories of Azerbaijan."**

Db — the restoration value of the historical-cultural heritage object;
Ki — the coefficient determining the value of the historical-cultural heritage object;
A — the wear and tear of the object.

Thus, the amount of material damage caused to the **11-arch Khudafarin Bridge** located in **Jabrayil District**, calculated on the basis of experience, was determined as **4,100,000** (**four million one hundred thousand**) manats, while the amount of material and moral damage calculated on the basis of the formula given in the aforementioned book was determined as **65,520,000** (**sixty-five million five hundred twenty thousand**) manats.

It should be noted that, on our part, only the amount required for restoration of the monument in order to return it to its previous condition was determined.

In the initially submitted certificate, information was provided regarding **79 monuments** located in the territories liberated from occupation.

The collection included photographs reflecting the current condition of each monument, archive materials, geographic coordinates, and brief historical and descriptive information about the monument. In addition, changes that had occurred to the monuments by period were analysed comparatively by means of satellite images. Extracts from satellite images relating to various years (**Hexagon imagery**, the **1970s–1980s**, **Google Earth**, **2001–2020**) were provided, and notes were written regarding the destruction that had occurred during those periods.

For **Aghdam, Jabrayil, Fuzuli, Kalbajar, Lachin, Gubadli, Khojavand and Zangilan Districts**, the amount required for restoration of **64** of the **79 monuments** that had suffered material damage, in order to return them to their previous condition, was calculated as **85,766,000 manats**. The amount of damage caused to **7 monuments** was not determined.

In **5** of the remaining **8 monuments**, repair-restoration and reconstruction works in the amount of **12,218,755 manats** were carried out by the **Heydar Aliyev Foundation**. For **3 monuments** where works were continuing, funds in the amount of **13,093,000 manats** were envisaged.

Note: Of the **17 objects** on the list submitted by the Foundation, **7** are not included in the list of **79 monuments** whose information was processed. Of the **79 monuments**, **16** are located in **Shusha city**.

Taking into account that **196 monuments** are located in **Shusha city**, that the names of **2** of them are repeated in the list, that **2** of them are busts, and that **1** is the **Fortress Walls**, calculations were carried out with respect to **191 monuments**. Taking into account that the parts of the **Fortress Walls** damaged in the war have also been restored, the final total damage caused may be estimated at approximately **372 million manats**.

In the certificate, passports and drawings from the Soviet period available in the archive of the **Azerbarpa Scientific-Research Design Institute**, as well as archive materials available in various scientific literature and internet resources, were used.

General statistical information regarding institutions in the territories liberated from occupation under the **Ministry of Culture**:

Statistical information on institutions inspected in the territories liberated from occupation:

In summary, **69 institutions** were not identified: **28 libraries** (**2** in Jabrayil District, **2** in Zangilan District, **19** in Khojavand District, **5** in Aghdam District), **4 houses of culture** (**3** in Khojavand District, **1** in Aghdam District), **19 clubs**(**15** in Khojavand District, **4** in Aghdam District), **1 school** in Fuzuli District, **1 theatre** in Fuzuli District, and **16 cinemas**(**2** in Aghdam District, **2** in Jabrayil District, **2** in Fuzuli District, **1** in Kalbajar District, **1** in Gubadli District, **3** in Shusha city, **4** in Zangilan District, **1** in Khojavand District).

Information on cultural institutions identified during the initial monitoring:

For **Shusha District**:

Total of 15 institutions identified	**Of them**
	4 libraries (**1** is not in the list)
	1 house of culture
	2 schools
	6 museums
	1 gallery
	1 theatre

For **Jabrayil District**:

Page 904

For Jabrayil District:

A total of 122 institutions were identified	**of them:**
	69 libraries
	13 houses of culture
	35 clubs
	3 schools
	2 museums

For Fuzuli District:

A total of 125 institutions were identified	**of them:**
	61 libraries (**1** is not in the list)
	27 houses of culture (**1** is not in the list)
	28 clubs
	5 schools
	2 museums
	1 printing-house building (**not in the list**)
	1 club called a summer hall (**not in the list**)

For Zangilan District:

A total of 131 institutions were identified	**of them:**
	1 Cultural Centre (**not in the list**)
	68 libraries
	9 houses of culture
	43 clubs
	4 schools
	3 museums
	3 cinema clubs (**not in the list**)

For Khojavand District:

A total of 27 institutions were identified	**of them:**
	7 libraries (**2** are not in the list)
	5 houses of culture (**2** are not in the list)
	11 clubs (**6** are not in the list)
	2 schools
	2 museums (**1** is not in the list)

For Gubadli District:

A total of 144 institutions were identified	of them:
	84 libraries
	12 houses of culture
	44 clubs
	2 schools
	1 museum
	1 cinema

For Aghdam District:

A total of 104 institutions were identified	of them:
	53 libraries
	15 houses of culture
	24 clubs
	7 schools
	3 museums
	1 gallery

Page 905

1 theatre.

For Kalbajar District:

A total of 196 institutions were identified	**of them:**
	115 libraries
	39 houses of culture
	40 clubs
	1 school
	1 museum

According to the inquiry sent on **8 January 2024** to the head of the **Gazakh District Executive Authority** by letter No. **2-2-03/2-09/2024**, and according to response letter No. **5-58-1-5/2-16/2024** dated **26 January 2024**, prepared by the head of that Executive Authority, it was noted that, in **Gazakh District**, **442** persons from **Baganis Ayrim village** (**90**individual residential houses) became internally displaced on **24 March 1990**; **220** persons from **Kheyrimli village** (**44**individual residential houses) on **12 March 1992**; **544** persons from **Yukhari Askipara village** (**145** individual residential houses) on **8 June 1992**; **1,107** persons from **Ashaghi Askipara village** (**249** individual residential houses) on **12 March 1992**; **266** persons from **Gizilhajili village** (**54** individual residential houses) on **11 May 1992**; **390** persons from **Barkhudarlı village** (**82** individual residential houses) on **27 April 1992**; and **190** persons from **Sofulu village** (**45**individual residential houses) on **27 April 1992**.

According to the inquiry sent on **8 January 2024** to the head of the **Sadarak District Executive Authority** by letter No. **2-2-030/2-000819/2024**, and according to response letter No. **5-26/2-72/2024** dated **6 February 2024**, prepared by the head of that Executive Authority, it was noted that, according to information obtained on the basis of an oral survey conducted among citizens from **Karki village**, **Sadarak District**, in **Karki village** of **Sadarak District**, which is under occupation, there had been **1** canteen, **1** shop, **2** village secondary schools, **1** motor mill, **1** doctor's outpatient point, **1**library and **1** club. Also, according to the **"Household-by-Household"** book compiled in **1983–1985**, there had been **67**heads of household and **355** persons in total. That is, those **355** persons were forcibly expelled from the village where they lived on **15 January 1990**.

According to the inquiry sent on **21 February 2024** to the head of the **Tartar District Executive Authority** by letter No. **2-2-030/2-011972/2024**, and according to response letter No. **5-78/2-202/2024** dated **23 February 2024**, prepared by the head of that Executive Authority, it was noted that, although in **1992 26** residential settlements from the territory of

Aghdara District had been transferred to the territory of **Tartar District**, the population of the **Republic of Azerbaijan**lived in only **two** of them — **Aghdara city** and **Umudlu village**. It was also noted that **Aghdara city** was occupied by Armenian armed detachments on **2 February 1988**, and **Umudlu village** on **28 February 1992**; at that time, **393** persons from **50** families in **Aghdara city**, and **763** persons from **167** families in **Umudlu village**, were displaced.

According to the inquiry sent on **21 February 2024** to the head of the **Gubadli District Executive Authority** by letter No. **2-2-030/2-011968/2024**, and according to response letter No. **5-62/2-72/2024** dated **28 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **29,094** persons from **7,813** households/families were displaced; of them, **54** persons were killed, **39** persons were injured, **21** persons were taken prisoner, and **62** persons went missing.

According to the inquiry sent on **21 February 2024** to the head of the **Kalbajar District Executive Authority** by letter No. **2-2-030/2-011964/2024**, and according to response letter No. **5-55/2-106/2024** dated **28 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **49,067** persons from **12,005** households/families were displaced; of them, **155** persons were killed, **51** persons were injured, **96** persons were taken prisoner, and **79** persons went missing.

According to the inquiry sent on **21 February 2024** to the head of the **Zangilan District Executive Authority** by letter No. **2-2-030/2-011978/2024**, and according to response letter No. **5-83/2-137/2024** dated **28 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **32,781** persons from **8,199** households/families were displaced,

of them, **47** persons were killed, **14** persons were injured, **11** persons were taken prisoner and **10** persons went missing.

According to the inquiry sent on **21 February 2024** to the head of the **Shusha District Executive Authority** by letter No. **2-2-030/2-011970/2024**, and according to response letter No. **5-77/2-80/5/2024** dated **29 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **21,996** persons were displaced; of them, **97** persons were killed, **163** persons were injured, **7** persons were taken prisoner and **21** persons went missing.

According to the inquiry sent on **21 February 2024** to the head of the **Gazakh District Executive Authority** by letter No. **2-2-030/2-011967/2024**, and according to response letter No. **5-58-1-5/2-41/2024** dated **23 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **3,159**persons, consisting of **725** households/families, were displaced; of them, **23** persons were killed, **26** persons were injured, and **5** persons were taken prisoner.

According to the inquiry sent on **21 February 2024** to the head of the **Fuzuli District Executive Authority** by letter No. **2-2-030/2-011963/2024**, and according to response letter No. **5-43/2-282/2024** dated **26 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **64,586** persons, consisting of **18,740** households/families, were displaced; of them, **132** persons were killed, **47** persons were injured, **45**persons were taken prisoner and **54** persons went missing.

According to the inquiry sent on **21 February 2024** to the head of the **Khojavand District Executive Authority** by letter No. **2-2-030/2-011976/2024**, and according to response letter No. **5-52/2-167/2024** dated **28 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **7,461** persons, consisting of **1,346** households/families, were displaced; of them, **104** persons were killed, **62** persons were injured, and **66** persons were taken prisoner.

According to the inquiry sent on **21 February 2024** to the head of the **Khojaly District Executive Authority** by letter No. **2-2-030/2-011973/2024**, and according to response letter No. **5-51/2-1486** dated **4 March 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **8,487** persons, consisting of **2,056** households/families, were displaced; of them, **323** persons were killed, **134** persons were injured, and **406** persons were taken prisoner.

According to the inquiry sent on **21 February 2024** to the head of the **Lachin District Executive Authority** by letter No. **2-2-030/2-011965/2024**, and according to response letter No. **5-64/2-65/2024** dated **6 March 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **57,047** persons, consisting of **13,352** households/families, were displaced; of them, **91** persons were killed, **22** persons were injured, **30**persons were taken prisoner and **38** persons went missing.

According to the inquiry sent on **21 February 2024** to the head of the **Sadarak District Executive Authority** by letter No. **2-2-030/2-011969/2024**, and according to response letter No. **5-26/2-110/2024** dated **28 February 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in **Karki village** of the district, in total, **369** persons, consisting of **67** households/families, were displaced; of them, **1** person was injured.

According to the inquiry sent on **21 February 2024** to the head of the **Jabrayil District Executive Authority** by letter No. **2-2-030/2-011961/2024**, and according to response letter No. **5-40/2-148/2024** dated **5 March 2024**, prepared by the head of that Executive Authority, it was noted that, during the occupation period, in the district overall, **52,887** persons, consisting of **12,867** households/families, were displaced; of them, **48** persons were killed, **2** persons were injured, **28**persons were taken prisoner and **53** persons went missing.

According to the inquiry sent on **4 October 2023** to the **State Agency of Azerbaijan Automobile Roads**, and according to response letter No. **11-1/2-8431-8/2023** dated **24 October 2023**, prepared by that Agency, and the schedule attached thereto, it was established

that, during the **44-day Patriotic War**, material damage was caused to motor roads located in the territories of **Dashkasan, Tartar, Aghdam, Beylagan** and **Naftalan city**. By Order No. **2522** dated **26 February 2021** of the President of the Republic of Azerbaijan, **14,754.2 thousand manats** were allocated from the budget for repairs; the funds were fully spent, and the movement of transport was restored.

The expenditure of those costs is also seen from the schedule confirming the stated fact. That schedule was added to the case materials.

Page 907

According to the inquiry made on **27 October 2023** to the **Ministry of Internal Affairs of the Republic of Azerbaijan**, and according to response letter No. **3-13/2-86242/2023** dated **13 November 2023**, prepared by that Ministry, and the nominal schedule attached thereto, it was established that, according to the submitted nominal list, **452** police officers had been killed in the struggle for the freedom, sovereignty and territorial integrity of the Republic of Azerbaijan, had gone missing in connection with military operations, or had been deemed dead in accordance with the procedure established by law; **660** servicemen of the **Internal Troops**, up to **2 August 1997**, had been killed in the struggle for the freedom, sovereignty and territorial integrity of the Republic of Azerbaijan, had gone missing in connection with military operations, or had been deemed dead in accordance with the procedure established by law; **47** police officers, from **1 January 1988** to **18 October 1991**, had been wounded in combat operations conducted for the territorial integrity of the Republic of Azerbaijan; **861** police officers, from **19 October 1991** to **2 August 1997**, had been wounded in combat operations conducted for the territorial integrity of the Republic of Azerbaijan; **1,179** servicemen of the **Internal Troops**, from **1991** to **2 August 1997**, had been wounded in combat operations conducted for the territorial integrity of the Republic of Azerbaijan; **66** servicemen of the **Internal Troops** had become martyrs during the **44-day Patriotic War**; **346** servicemen of the **Internal Troops** had sustained injuries during the **44-day Patriotic War**; **8** police officers (**Rapid Police Regiment**) had become martyrs during the anti-terror measures carried out in **September 2023**; **12** servicemen of the **Internal Troops** had become martyrs during the anti-terror measures carried out in **September 2023**; **19** police officers (**Rapid Police Regiment**) had been wounded during the anti-terror measures carried out in **September 2023**; and **24** servicemen of the **Internal Troops** had been wounded during the anti-terror measures carried out in **September 2023**. The questionnaire information regarding the persons whose numbers are indicated was shown in the schedules added to the case materials.

As can be seen, to date, together with police officers of the **Ministry of Internal Affairs** and servicemen of the **Internal Troops**, in total **1,198** persons had died for the territorial integrity of the Republic of Azerbaijan (**112** of them had been deemed dead or missing), and **2,130** persons had been wounded, having sustained bodily injuries of various degrees.

According to the inquiry made on **31 October 2023** to **"Azerbaijan Television and Radio Broadcasting" Closed Joint Stock Company**, and according to response letter No. **13-6/2-**

04/1-577/2023 dated **21 November 2023**, prepared by that company, and during the inspection carried out on **20 November 2023** of the video disc attached thereto, it was established that the video tape entitled **"Video Materials"** was in **mp4** format, had a size of **7.33 GB**, and lasted **1:41:49**. The said tape was played.

It appears from the video footage that several male persons, neatly dressed in jackets, ties and similar clothing, are speaking, but the conversation is not heard and no sound is produced. Thereafter, the frame changes, and numerous persons, including children, women and men, are moving in snowy weather in mountainous areas. At that time, the announcer speaks in Russian; at times the announcer's voice is not heard, and after a while it is restored again; in this form the sound is heard intermittently and in parts, and during translation the semantic links between the sentences are broken.

While the said video disc was being listened to, the voice of the announcer heard there was translated and transcribed. Those statements were as follows:

"Within **3 days**, **200,000** people were deported; how defenceless people died and froze on snowy mountain passes and in forests... We will not speak much about the genocide committed against the Azerbaijani population. Although, from the point of view of international law, everything that happened in **November 1988** related to crimes against children. We will not inflame emotions; simply remember when the word refugee was said. In the third year of perestroika, unexpectedly, it acquired a new definition for itself. Soviet... According to information provided by the Moscow correspondent, the militants went to the destroyed wine factory for wine; it became clear that they were marking it. Then who were the militants defending the territory of the Republic of Armenia, and in the end whoever attacked whom, it means they are washing it. A year, or once there was a factory... those places are Azerbaijani land, its village, Azerbaijani from ancient times... what are the difficult, unresolved problems... how many shells were fired, how many thousands of bullets were fired; on the subject, who first appeared under the curtain of darkness? Then who remained unpunished? And clearly...

Page 908

...in one day, with a weapon in his hand and a cross around his neck... the border war is becoming increasingly more brutal; we say in a certain customary way that innocent people, including women, the elderly and children, are dying in our interethnic relations, while the servicemen who die today are dying in other places. What is their guilt?... Their existence at one time became an obstacle on the path to creating a **Great Armenia from sea to sea** in a small Soviet Republic... You are supporters of independence for the purpose of self-determination for some indefinite, but great idea; however, all of this has a very specific name — sabotage, and it must be regarded both as an act of intimidation and as the first main link in the chain. Destroying roads on our railway lines, ... and then, when communications are paralysed, ... the shouts of discussion and the lawyers have their own logic... The village of **Akvashet** of the **Republic of Armenia**, bordering the **Republic of Azerbaijan**, is large and well-kept; apparently it has strong, hardworking owners; it seems they live by

principles... Some families remaining in **Spitak** are driven out of their homes; **36** persons die because they cannot endure the torture; **70** young children are packed into a pipe in front of their parents' eyes and welded shut... A bus travelling on the **Tbilisi–Baku** route is blown up: **5** persons are killed and **25** persons are injured. On **18 February 1990**, at the **105th kilometre** of the **Yevlakh–Lachin** road, a **Baku** bus travelling on the **Shusha–Baku** route is blown up; there are many human casualties... On **10 August 1990**, a bus travelling on the **Tbilisi–Aghdam** route is blown up; **20** persons are killed and **30** persons are seriously wounded... During the blowing up of the **Moscow–Baku** passenger train, **11**persons are killed and **22** persons are wounded. On **20 November 1991**, as a result of the firing upon an **Mi-8** helicopter near **Garakend village, Khojavand District**, the helicopter explodes and **19** persons are killed together with the crew and passengers... An **Mi-8** helicopter flying on the **Aghdam–Shusha** route is blown up by Armenian terrorists near **Shusha city**, as a result of which **44** persons, including numerous women and children, are killed... In **January 1992**, Armenian terrorist detachments kill **80** persons in **Gargichahan settlement**; in **February 1992**, they shoot **80** of the **117**persons taken hostage from **Garadaghly village, Khojavand District**, and burn **10** persons alive. On **19 March 1994**, as a result of an explosion committed at the **20 January** metro station of the **Baku Metro**, **14** persons were killed and **49**persons were wounded...

The person filming with the camera, running after a person in military uniform speaking Azerbaijani and saying **"come here, come here,"** goes somewhere in a mountainous area, while on the side a helicopter waiting for them, in which the bodies are being gathered, is seen. At that time, he says, **"hey, help, hey, open her face,"** and the corpse of a dead woman is seen on the ground, while the soldiers speaking Azerbaijani are crying. A little away from that body, many more human corpses are seen lying on the ground. On the basis of the injuries on all the bodies, it is observed that the persons were killed brutally and with torture. Numerous bodies are seen scattered on the ground across the whole mountainous area, and later the bodies are carried to helicopters..."

Thereafter, while the video disc was being viewed, the main images were described.

Certain fragments from the actions described were as follows: "Then the frame changes again, and an environment resembling displaced life appears; women move while holding their children in their arms. Various injured persons are seen; at that time, although they are saying something, because there is no sound effect in the frames, no sound is heard. The population's clothing, bedding, various furniture are seen scattered in empty areas and mountainous parts. Injured and dead persons are unloaded from a helicopter; scenes of women crying are seen. Thereafter, mountainous areas, and some settlement located in a valley between mountains, are recorded from the sky by helicopter; the frames also change, destroyed structures are seen; then various battle scenes, armed persons and destroyed ruins are seen. Then, in the frames, a red bus with the word **"Baku"** written on it appears; scenes are seen of it in a destroyed and crushed condition, and of the body of some person lying on the ground. Thereafter, it is seen that several vehicles appear to have been destroyed by striking mines and broken into pieces; numerous bodies are seen spread over the ground and

the road. Bodies frozen in the snow are carried on the ground by other persons. A number of buses and trains are shown in the aftermath of explosions... The tape shows the burned bodies of the passengers of the helicopter that was blown up as a result of the firing upon the **Mi-8** helicopter near **Garakend village, Khojavand District**, on **20 November 1991**... Thereafter, it is seen that in **1992**, countless barefoot women, children and elderly persons, without warm clothing, displaced from **Khojaly** and other territories, are moving in snowy weather; at that time the bodies of some persons are seen, and then

Page 909

many soldiers speaking Armenian are dancing; many soldiers speaking Armenian, armed, are moving in formation through mountain forests; thereafter, persons in military uniform speaking Armenian are seen taking servicemen speaking Azerbaijani prisoner, subjecting them to various tortures, making them lick their clothes, and making them sing the Azerbaijani march; at that time, various injuries are visible on the faces of the soldiers marching in place; ... thereafter, the sound of several vehicles is heard, the date **17 May 1992** is shown on the screen, several corpses are seen lying in various positions on a motor road, and heavy vehicles carrying servicemen speaking Armenian move past them; the area resembles a mountainous village road with mountainous terrain..."

During the inspection of the video disc, the recording was paused and, selectively, photographs were taken from several scenes and attached to the protocol. Those photographs likewise reflected numerous atrocities, massacres, deportations and acts of terror committed by Armenians against Azerbaijanis at various times.

According to the inquiry sent on **30 October 2023** to the **Ministry of Emergency Situations of the Republic of Azerbaijan**, and according to response letter No. **3-18/2-5432/2023** dated **20 November 2023**, prepared by that Ministry, and the documents attached thereto, it was established that the Ministry's **Special Risk Rescue Service** had collected and removed the below-mentioned weapons and ammunition from the areas located in **Aghdara District**: **"Entrance Post 1," "Aghdara Post 2," "Aghdara Post 3," "Kangarli Post," "Canyataq Post," "Gulyataq Post," "Zavod Post," "Sırxavand Post," "Charakbar Post,"** and **"Sırxavand village"**; the letter did not state where the weapons and ammunition were stored.

1. **Fagot anti-tank** — **2** units
2. **AQS-22 automatic grenade launcher** with **KPVT mount** — **1** unit
3. **PK** — **1** unit
4. **RPG-7V projectile** — **30** units
5. **OG-7V projectile** — **12** units
6. **RKG-3 grenade** — **1** unit
7. **60 mm mortar shell** — **48** units
8. **F-1 grenade** — **23** units
9. **RG-42 grenade** — **38** units
10. **7.62 mm cartridges** — **5 boxes** and **1 zinc**
11. **5.45 mm cartridges** — **1 box**

12. **12.7 mm DShK/KPVT cartridges** — **2 boxes** and **1 zinc**
13. **PG-7AD grenade** — **1** unit
14. **SPŞA pistol** — **1** unit and cartridges

Letter No. **3-18-21/2-3651/23** dated **16 November 2023** was also attached to the aforementioned letter. That letter stated that, from **2020** to the present, in the territories liberated from occupation, employees of the **State Fire Protection Service** had discovered, in the territory of **Khojavand District**, **1** grenade launcher, **2** Russian-manufactured Kalashnikov automatic rifles and **2** hunting rifles; and, in the territory of the **Fire Protection Unit** located in **Khankendi city**, **1**Russian-manufactured Kalashnikov automatic rifle. The weapons were taken by employees of the **Ministry of Internal Affairs**.

According to the inquiry sent on **4 October 2023** to the **Ministry of Emergency Situations of the Republic of Azerbaijan**, and according to response letter No. **3-18/2-5210/2023** dated **6 November 2023**, prepared by that Ministry, it was noted that, for the purpose of assessing the damage caused, a working group had been established by Order No. **612S**dated **11 November 2020** of the **Cabinet of Ministers of the Republic of Azerbaijan**; inspection acts had been drawn up by the members of the group; those acts had been submitted to the **Cabinet of Ministers of the Republic of Azerbaijan**; and copies had been submitted to the **State Urban Planning and Architecture Committee of the Republic of Azerbaijan** for the purpose of having the property assessed.

In the response letter dated November 6, 2023 (No. 3-35/2-7607/2023), prepared by the State Committee for Urban Planning and Architecture of the Republic of Azerbaijan regarding the inquiry submitted to it on October 4, 2023, it was noted that

according to Order No. **25s** dated **14 January 2021** of the **Prime Minister of the Republic of Azerbaijan**, initial inspection acts concerning a total of **13,297 construction objects** were submitted to the **State Committee**; with respect to destroyed and emergency-condition buildings belonging to the civilian population, state property, as well as business entities, monetary funds in the total amount of **114,533,631.52 manats**, including VAT and bank services, were spent. The stated facts are reflected more clearly in the tables attached to the case materials.

According to the inquiry sent on **4 October 2023** to the **Ministry of Finance of the Republic of Azerbaijan**, response letter No. **3-23/2-6192/2023** dated **26 October 2023**, prepared by that Ministry, stated that, as a result of the aforementioned military aggression, for the elimination of damage caused to the civilian population, state property, including infrastructure facilities, as well as business entities, and for the provision of material assistance, in **2020–2022** a total of **162,144,628 manats** was allocated from the state budget

and transferred by the **Ministry of Finance**, for use according to its intended purpose, to the treasury accounts of the bodies designated as executors for the said works.

In the **2023** state budget, under various expenditure items, **22.97 million manats** was provided for the continuation of the said measures, and, on the basis of orders from the executing bodies, financing of **19,060,000 manats** of that amount was ensured. The stated facts are reflected more clearly in the tables attached to the case materials.

According to the inquiry sent on **4 October 2023** to the **Ministry of Economy of the Republic of Azerbaijan**, response letter No. **3-21/2-10980/2023** dated **7 November 2023**, prepared by that Ministry, stated that, in order to ensure the execution of Order No. **2292** dated **6 November 2020** of the **President of the Republic of Azerbaijan**, working groups for the relevant districts were established by Appendix No. **3** to Order No. **612s** dated **11 November 2020** of the **Cabinet of Ministers**.

By the working groups headed by representatives of the **Ministry of Economy**, for the purpose of compensating, beginning from **27 September 2020**, damage caused as a result of the aggression of the **Armed Forces of the Republic of Armenia** against the territory of the **Republic of Azerbaijan** to the working capital of business entities whose immovable property had been destroyed or rendered emergency-condition, and to the means necessary for carrying out business activity — **equipment, tools and inventory** — monetary funds in the total amount of **1,963,372.77 manats were** transferred to the accounts of business entities, and this was carried out by the relevant payment orders. Copies of the said payment orders were added to the case materials.

According to the inquiry sent on **27 October 2023** to the **State Committee of the Republic of Azerbaijan for Refugees and Internally Displaced Persons**, and according to response letter No. **3-36/2-3659/2023** dated **4 November 2023**, prepared by that Committee, and the tables attached thereto, it was established that the current number of citizens of the Republic of Azerbaijan who became internally displaced as a result of the Armenian occupation is **635,646** persons. The said list reflects, for each internally displaced person, surname, name, patronymic, date of birth, place of birth, place of registration, place of temporary settlement, actual residential address, FIN code of identity card, sex, family relationship, contact number for some of them, and other personal information.

According to the inquiry sent on **30 October 2023** to the **State Security Service of the Republic of Azerbaijan** by letter No. **2-2-03/2-5729/2023**, it appears from the inspection of **17 non-confidential sheets** and **6 CD discs** attached to confidential letter No. **3/2986-28.11.23** dated **24 November 2023**, prepared by that Service, that the members of the so-called entity **"Artsakh"** and of unlawfully created armed formations were supplied and equipped with various types of weapons; that weapons and ammunition, in particular, had been brought to that territory from the territory of the **Republic of Armenia**; and, since the production dates on a number of mines and other devices indicated **2020**, it was once again confirmed that those mines, in addition to earlier periods, had also been transported and

brought to those territories during the **44-day Patriotic War** and in subsequent periods, and that the territories had also been mined during and after that period.

It also appears from **2 documents written in Russian** and attached to the confidential letter as non-confidential materials that the **Republic of Armenia**, on **5 July 2019**, under No. **148-10765**, and

Page 911

under contracts No. **P/2005106120468** dated **26 June 2020**, **2 anti-tank missiles** were purchased from the **Russian Federation**. Although the said missiles were purchased under contracts concluded with the **Republic of Armenia**, the discovery of those devices in the territory of the so-called regime once again confirms that the weapons were brought directly from that country.

In addition, after the occupied lands were liberated from occupation, numerous weapons, ammunition and other devices were discovered in those territories. Among those weapons, along with large-calibre weapons, tanks, artillery pieces and other such combat-purpose equipment were also discovered, which once again confirms that the unlawfully created armed formation had indeed been supplied with various types of weapons and that they had been used against the **Republic of Azerbaijan**, its citizens and its territorial integrity. The devices neutralized in the territories liberated from occupation likewise confirm this once again.

During the inspection, it was established that, beginning from **19 September 2023**, in total **499** vehicles (**Komatsu, UAZ, KamAZ, Ural**, etc.) and **10** trailers; as a result of the local anti-terror measures, **522** vehicles (**passenger, cargo, special-purpose**); as a result of the local anti-terror measures, in total **160** units of various types of armoured vehicles (**1 T-90S**, **71 T-72 tanks**, **22 BMP-2**, **19 MT-LB ZQ-20/3 Zastava**, **1 BTR**, **1 MBR-1**, **1 BRDM-2**, **3 TOR-2M**, **12 SHTURM-S**, etc.); **15,425** firearms (**automatic rifles, pistols, sniper rifles, machine guns**, etc.); **230** mortars; **137** anti-tank weapons; **162** artillery pieces; **1,419** various types of optical devices; **1,540** bulletproof vests; **5,320** items of military-technical property; **16,790,478** rounds of ammunition for various types of firearms; **35,621** rounds of mortar ammunition; **3,994**rounds of artillery ammunition; **9,353** explosive devices; **41,522** various types of hand grenades; and **221** anti-tank guided missiles were taken as trophies.

According to the inquiry sent on **27 October 2023** to the **Ministry of Defence of the Republic of Azerbaijan** by letter No. **2-2-03/2-5742/2023**, and according to the inspection of **1 CD disc** attached to letter No. **3-25-14/2-5961/23** dated **27 November 2023**, prepared by that service, the number of persons who were killed, died, were deemed dead because they went missing, and were granted martyr status in military operations conducted for the territorial integrity of the **Republic of Azerbaijan** was **26,380** servicemen from **January 1990** to **1 January 2022**; **313** servicemen from **1 January 2022**through **November 2023**; and, in total, **26,693** servicemen from **January 1990** through **November 2023**.

The **26,380** servicemen were classified by district departments as follows:

District department	Number	District department	Number
Absheron	193 persons	Nizami (G)	163 persons
Aghjabadi	224 persons	Oghuz	93 persons
Aghdam	663 persons	Garadagh	238 persons
Aghdash	182 persons	Gakh	163 persons
Aghstafa	196 persons	Gazakh	227 persons
Aghsu	144 persons	Gabala	160 persons
Astara	124 persons	Gobustan	66 persons
Balakan	185 persons	Guba	283 persons
Barda	309 persons	Gubadli	102 persons
Beylagan	304 persons	Gusar	88 persons
Bilasuvar	200 persons	Saatli	145 persons
Binagadi	261 persons	Sabirabad	249 persons
Jabrayil	228 persons	Shabran	118 persons
Jalilabad	248 persons	Sabunchu	296 persons

According to the inquiry sent on **2 November 2023** to the **State Committee for Urban Planning and Architecture of the Republic of Azerbaijan** by letter No. **2-2-030/2-030590/2023**, and according to the table and memory device attached to letter No. **3-35/2-8240/2023** dated **30 November 2023**, prepared by that Committee, it was established that, pursuant to Order No. **25s** dated **14 January 2021** of the **Prime Minister of the Republic of Azerbaijan**, initial inspection acts concerning a total of **13,297** damaged construction objects were submitted to the Committee by the State Commission.

According to the **"Information on destroyed and emergency-condition buildings belonging to the civilian population, state property, as well as business entities, as a result of the aggression of the Armed Forces of the Republic of Armenia against the territory of the Republic of Azerbaijan beginning on 27 September 2020,"**attached to the letter, it was established that, across **11 districts and cities** — **Aghjabadi, Goranboy, Beylagan, Fuzuli, Barda, Mingachevir, Aghdam, Jabrayil, Naftalan, Ganja and Tartar** — the total number of damaged objects was **12,902**, and, in total, **102,424,259.77 manats** were spent on them, including **VAT**. As for citizens, **5,610,388.00 manats were** spent on **39 objects**, including **VAT**. Apart from the aforementioned, including the preparation of design estimates, expert-examination costs and bank expenses, in total, **114,962,347.43 manats** were spent on **12,941 objects**, including **VAT**.

According to the inquiry sent on **30 October 2023** to the **Ministry of Internal Affairs of the Republic of Azerbaijan** by letter No. **2-2-030/2-029555/2023**, letter No. **3-13/2-92198/2023** dated **30 November 2023**, prepared by that Ministry, stated that, during the **44-day Patriotic War** and in the subsequent period, from strategic positions in the territories of **Fuzuli, Jabrayil, Zangilan, Gubadli, Aghdam, Kalbajar, Shusha, Lachin and Khojavand (Hadrut)** city-districts liberated from occupation, **1** tank, **2** unmanned aerial vehicles (**UAVs**), **1 "BM-21" Grad**, **14** artillery pieces, **2,727** weapons of various calibres, **560,976** rounds of ammunition, and **13** military-purpose vehicles were discovered and handed over to the **Ministry of Defence of the Republic of Azerbaijan**.

In addition, as a result of the local anti-terrorist operations, an additional **20** tanks, **13** infantry fighting vehicles (**IFVs**), **2**anti-tank missiles, **3 "D-30" artillery pieces**, **8** grenade launchers, **2** mortars, **131** hand grenades, **4** machine guns, **2**automatic rifles, **1,059** anti-personnel and anti-tank mines, **1,243** shells, **15** grenade-launcher fuzes, **37,356** cartridges, **518** cartridge boxes, 3 "Ural" military vehicles, **7** excavators and

Page 913

bulldozers were handed over to the **Ministry of Defence of the Republic of Azerbaijan**, and **28** anti-tank and anti-personnel mines were handed over to the **Mine Action Agency of the Republic of Azerbaijan**.

According to the inquiry sent on **1 November 2023** to the **Ministry of Economy of the Republic of Azerbaijan** by letter No. **2-2-030/2-030571/2023**, and according to response letter No. **3-21/2-11764/2023** dated **30 November 2023**, prepared by that Ministry, it was noted that, in connection with the taking of appropriate measures for the calculation of damage caused in the territories of the **Republic of Azerbaijan** liberated from occupation for the purpose of filing a compensation claim, additional necessary measures had been carried out by the **State Service for Property Issues** under the **Ministry of Economy**, with the participation of representatives of the relevant central and local executive authorities, state enterprises, institutions and organizations.

In that direction, on the basis of topographic maps and satellite images for the years **1983–1987** for **Aghdam, Tartar, Fuzuli, Khojaly, Khojavand, Shusha, Jabrayil, Zangilan, Gubadli, Kalbajar and Lachin Districts**, as well as **Khankendi city**, **164,825** immovable properties — buildings, facilities and so forth — that had remained in the occupied territories during the occupation period were digitized in vector form and included in the **Karabakh Digital Geoinformation System** — hereinafter, **KDGIS**.

Of these, for administrative territorial districts — the **Karkijahan settlement** of **Khankendi city**, whose population consisted of Azerbaijanis; **22** in **Zangilan District**; **31** in **Gubadli District**; **10** in **Khojavand District**; **8** in **Tartar District**; **4** in **Khojaly District**; **21** in **Fuzuli District**; **46** in **Kalbajar District**; **23** in **Jabrayil District**; **49** in **Lachin District**; **26** in **Aghdam District**; and **12** in **Shusha District** — with the exception of **Shusha city**, as a result of studies conducted through the **Karabakh Digital Geoinformation System**, with the participation of representatives of local and central executive authorities, state enterprises, institutions and organizations, as well as municipal representatives who knew the territory well, **145,517** mostly destroyed immovable properties and their central locations were identified.

Of the **145,517** identified immovable properties, **1,225** were multi-storey residential buildings, **124,192** were individual residential houses, and **20,100** were non-residential buildings.

According to the inquiry sent on **30 October 2023** to the **Mine Action Agency of the Republic of Azerbaijan** by letter No. **2-2-030/2-029566/2023**, and according to response letter No. **11-7/2-2715/2023** dated **7 December 2023**, prepared by that Agency, it was noted that, during the war period, a total of **11,505** weapons and ammunition of various names — **AK-74, RPK-74, M-75, F-1, AKM, RQ-42, pistol, mortar device, PK, SVD, RPG-7V2, AKS-74U** and others — and **306,604** cartridges — **7.62 mm, 5.45 mm, 9.19 mm, 16 mm, 12 mm, 9 mm** and others — had been collected by police officers and stored.

When reviewing the PDF files contained in the memory device attached to the letter, including the file marked **"No. 12"**under the selection procedure, no act on the handover of weapons and ammunition was found, and, in that act, no information was found regarding the make, name, type or quantity of the weapon.

According to the inquiry sent on **13 November 2023** to the **Ministry of Youth and Sports of the Republic of Azerbaijan** by letter No. **2-2-030/2-032631/2023**, and according to response letter No. **3-19/2-8601-R/2023** dated **8 December 2023**, prepared by that Ministry, and the tables attached thereto, it was established that, in the territories liberated from occupation, sports facilities that had once existed and had been destroyed or damaged as a result of the occupation were as follows: **26** in **Fuzuli District**, **6** in **Aghdam District**, **17** in **Jabrayil District**, **15** in **Zangilan District**, **50** in **Lachin District**, **18** in **Gubadli District**, **4** in **Tartar District**, and **23** in **Shusha District** — in total **159**stadiums, sports schools, sports halls, simple football fields, simple volleyball courts and others were destroyed and damaged.

According to the repeated inquiry sent on **28 November 2023** to the **State Service for Mobilization and Conscription of the Republic of Azerbaijan** by letter No. **2-2-03/2-6107/2023**, and according to response letter No. **3-43-90/2-331/2023** dated **8 December 2023**, prepared by that Service, in the table attached to the memory device enclosed with the response letter, the number of servicemen who, in connection with the struggle for the territorial integrity of the **Republic of Azerbaijan**, as well as with the performance of combat missions or tasks related to combat support — from **January 1990** through **2023**, inclusive — were killed, went missing and, for that reason, were declared dead, and were granted martyr status, was stated to be **15,726** persons.

Page 914

It was indicated. The said table contains information concerning 15,726 persons, including their names and surnames, the dates and places where they died, were killed, or went missing, the military units to which they belonged, their ranks, and other information.

In response to the inquiry sent to the Foreign Intelligence Service of the Republic of Azerbaijan by letter No. 2-2-030/2-029672/2023 dated 30 October 2023, the reply letter prepared by that Service, No. 3-40/2-14/5/3930/2023 dated 9 December 2023, stated that Arkadi Qukasyan Arshaviri was born on 22 June 1957 in the city of Khankendi. He is registered at 1q Vazgen Sarkisyan Street, Khankendi. He is a citizen of the Republic of Armenia. In 1979, he graduated from the Faculty of Russian Language and Literature of

Yerevan State University and served as an officer in the army of the former USSR. In 1980–1981, he worked as a correspondent for the newspaper *Sovet Qarabağı*; from 1981 onward, he worked as deputy editor-in-chief of that newspaper. From 1988, he was an active participant in the "Karabakh movement." In 1991, he was elected as a "deputy" of the "parliament" of the separatist regime. In 1992–1993, he served as adviser on political affairs to the chairman of the "State Defense Committee" of the so-called Nagorno-Karabakh Republic. In 1993–1997, he was the separatist regime's first "minister of foreign affairs," and in 1997–2007, its "president." A. Qukasyan's brother, Areq Qukasyan, who was born on 27 January 1956 in Khankendi, was a deputy of the Parliament of the Republic of Armenia in 2003–2007 and is a member of the "Republican Party of Armenia." Arkadi Qukasyan's son, Tigran Qukasyan, was born on 23 October 1999 in Yerevan. He is registered at 1q Vazgen Sarkisyan Street, Khankendi.

Bako Sahakyan Sahaki was born on 30 August 1960 in Khankendi. He is registered at 7 Kharkovyan Street, Khankendi. He is a citizen of the Republic of Armenia. In 1977, he graduated from Secondary School No. 1 in Khankendi. In 1978–1980, he performed military service in the army of the former USSR. In 1981–1982, he worked as a mechanic-locksmith at Production and Mechanization Combine No. 9 in Khankendi; in 1982–1983, as a worker at the Khankendi Construction Materials Plant; in 1983–1987, as a master at the Khankendi branch of the scientific institution for the restoration of historical monuments; and in 1987–1990, as a supply officer in the supply department of the autonomous region. From 1988, he was one of the activists of the "Karabakh movement." In 1990, he joined the "self-defense forces" of the so-called entity. In 1992–1993, he served as "deputy head of the committee of the self-defense forces for rear services"; in 1993–1995, as "chief of staff for rear services"; in 1995–1996, as "deputy commander of the defense army for external affairs"; in 1996–1997, as "deputy commander for rear services of the 10th mountain-rifle division of the defense army"; in 1997–1999, as assistant to the Minister of Internal Affairs and National Security of the Republic of Armenia; in 1999–2001, as "minister of internal affairs" of the so-called entity; in 2001–2007, as "minister of national security" of the so-called entity; and in 2007–2020, as "president" of the separatist regime. His military rank is colonel-general. Among his close relatives, his wife, Sahakyan Anahit Bagrati, was born on 18 January 1967 in the city of Aghdara. She is registered at 3 Kharkovyan Street, Khankendi. His son, Tigran Sahakyan, was born on 16 August 1997 in Moscow, Russian Federation, and holds passport series [redacted] He is registered at 3 Kharkovyan Street, Khankendi.

Davit Babayan Klimi was born on 5 April 1973 in Khankendi. He is registered at 2A Bagramyan Street, apartment 5, Khankendi. He is a citizen of the Republic of Armenia. In 1989, he graduated from Russian Secondary School No. 8 in Khankendi. In 1989–1994, he studied at the Yerevan Institute of National Economy, now the Armenian State University of Economics, specializing in "state regulation of the economy." In 1997, he graduated from the Faculty of Political Science of the American University of Armenia, and in 1998, from the Faculty of International Relations of the Central European University in Budapest. In 2005, after defending his candidate dissertation at the Institute of Oriental Studies of the Academy of Sciences of the Republic of Armenia, he received the degree of Candidate of Historical Sciences; in 2013, he received the academic title of associate professor; and in 2018, after

defending his doctoral dissertation at the Institute of Oriental Studies of the Academy of Sciences of the Republic of Armenia, he received the degree of Doctor of Historical Sciences.

Page 915

D. Babayan served in 1998–1999 as “second secretary of the political department of the ministry of foreign affairs” of the separatist regime; in 2000–2001, as “head of the political programming department” of that “department”; from May to December 2001, as “head of the political department of the ministry of foreign affairs”; in 2001–2005, as “staff member of the planning group under the president” of the separatist regime; in 2005–2007, as “assistant to the president” of the so-called entity; in 2007–2013, as “head of the main information department of the presidential administration”; and from 2013 onward, as “deputy head of the presidential administration” of the so-called entity. In 2019, he founded the “Conservative Party of Artsakh” and was elected its chairman. In 2020, he was appointed “adviser to the president on foreign relations” of the so-called entity; in 2021, “minister of foreign affairs”; and in 2023, “representative of the president for special assignments.” It should be noted that document No. 3-40/2-14/5/3730/2023 dated 17 November 2023, previously prepared by us concerning D. Babayan, was sent to your address. Among his close relatives, his son Tigran Babayan was born on 5 July 2002, and his daughter Tatev Babayan was born on 5 July 2005, both in Khankendi. Both are registered at 2A Bagramyan Street, apartment 5, Khankendi.

Davit Ishkhanyan Rubeni was born on 27 December 1968 in the village of Heshan, Khojavend District, and is registered in that village. He is a citizen of the Republic of Armenia. In 1985, he graduated from the Heshan village secondary school. In 1987–1988, he performed military service in the army of the former USSR, and in 1992, he graduated from the Faculty of History and Law of the Khankendi Pedagogical Institute. D. Ishkhanyan supported the “Karabakh movement”; in 1989, he joined the “Dashnaksutyun” party; and in 1991, he was elected as a “deputy” of the “parliament” of the separatist regime. During the First Karabakh War, he “served” in the “defense army” of the so-called entity and was commander of the 28th battalion of Aghdara District. After being discharged from the “army” in 1995, he worked until 2000 as director of the Heshan village secondary school. In 2000–2005, he was head of the Heshan village community; in 2007–2021, he was “representative” of “Dashnaksutyun” in “Nagorno-Karabakh.” In 2015, he was elected a “deputy” of the “parliament” and for two years headed the “Dashnaksutyun” faction in the “parliament.” In 2020, he was again elected a “deputy” of the “parliament,” and on 7 August 2023, he became “speaker of parliament.”

It should be noted that after D. Ishkhanyan was elected “speaker of parliament,” he made a number of statements against the territorial integrity of our country. On 7 August, during an interview with the “1in TV” YouTube channel, he expressed the following views: “We will continue the struggle at any cost to protect and strengthen ‘Artsakh statehood’”; “All our efforts will be directed toward the realization of our strategic goal, which was formed in the first days of the national liberation struggle in 1988”; “The parliament is the body entitled to speak on behalf of the people, and it is no coincidence that the main objective of internal and external forces is to destroy this institution. This intention became even more evident after the 44-day war. It is necessary to assess the efforts made by the president of the enemy state toward destroying the main pillars of ‘statehood’ through this prism.”

On 22 August of the current year, D. Ishkhanyan's appeal was circulated on social media resources. In that appeal, D. Ishkhanyan stated that, "as a citizen of the 'Republic of Artsakh' and 'speaker of parliament,' I have always fought for the establishment and strengthening of the institutions representing the 'president of Artsakh,' the 'parliament,' and other government structures."

During a press conference held on 30 August, he stated that discussions in international organizations and the media provided an opportunity to strengthen the "right of subjectivity/legal personality" of the so-called "Nagorno-Karabakh Republic." He emphasized that discussion of the situation in the so-called "Nagorno-Karabakh Republic" at meetings of the UN Security Council and other organizations would contribute in the future to determining the "republic's" status. D. Ishkhanyan said that the "people of Artsakh" had allegedly been engaged in a struggle since their forced incorporation into the Azerbaijan SSR, and that this struggle was still continuing. In addition, he expressed an opinion regarding the non-admission of humanitarian aid sent by the Republic of Azerbaijan to Khankendi via the Aghdam–Khankendi road. In this regard, D. Ishkhanyan stated that the leadership of the separatist regime had adopted a decision that the Aghdam–Khankendi road should remain closed and not be used, and that only the use of the "Lachin corridor" was possible.

Page 916

On 5 September, D. Ishkhanyan sent an open letter to the heads of the parliaments of Russia, Iran, France, the United States, and European countries, calling on them to exert pressure on the Republic of Azerbaijan. The main theses of the letter were as follows: "Today, despite the constant threat posed by Azerbaijan's 'cruel regime,' we have built a democratic society to which many aspire. After the military provocation that took place on 15 June of this year on the Hakari bridge, the Republic of Azerbaijan, through the border checkpoint it unlawfully established, imposed a ban in both directions on all types of humanitarian transportation, including the movement of people and cargo."

Among his close relatives, his son Farmen Ishkhanyan was born on 20 August 1993, his daughter Lilit Ishkhanyan on 23 April 1995, and his other son Mher Ishkhanyan on 15 January 2002. They are registered in the village of Heshan, Khojavend District. In addition, D. Ishkhanyan's brother, Grigor Ishkhanyan, was born on 5 September 1961.

Davit Manukyan Azati was born on 15 October 1971 in the city of Jermuk, Vayots Dzor Province, Republic of Armenia. He is registered at [redacted] Martuni [redacted] Street, Martuni, Gegharkunik Province. He is a citizen of the Republic of Armenia. He served as "deputy commander" of the so-called "defense army," and in 2021 he discontinued "military service" and retired. In 2020, he received the rank of major general. Among his close relatives, his brother Gegam Manukyan, born on 9 February 1970, is a member of the opposition "Armenia" faction in the Parliament of the Republic of Armenia. His other brother, Mkhitar Manukyan, was born on 10 September 1974 in the city of Jermuk. He is registered at [redacted] Martuni [redacted] Street, Martuni, Gegharkunik Province.

Araik Harutyunyan Vladimiri was born on 14 December 1973 in the city of Khankendi. He is registered at 33 Leonid Huruntsi Street, Khankendi. He is a citizen of the Republic of Armenia. In 1990, A. Harutyunyan graduated from the Khankendi Physics and Mathematics School and, that same year, was admitted to the Yerevan Institute of National Economy, now the Armenian State University of Economics. In 1992, he joined the ranks of the so-called

entity's "self-defense detachments" and participated in military operations. In 1995–1997, he worked in the separatist regime as "assistant to the minister of economy and finance"; in 1997–2004, he headed the Askeran and Khankendi branches of "Armagrobank." He was chairman of the separatist entity's "Free Homeland" party. In 2005–2007, he was elected a "deputy" of the so-called "parliament" and served as chairman of the "Vatan" faction. In 2007–2009, after assuming the position of "prime minister" of the so-called entity, he suspended his activity as a "deputy" and left the post of party chairman. In 2009, he was again elected chairman of the "Free Homeland" party. In 2012–2017, A. Harutyunyan again held the post of "prime minister"; in 2017–2018, he was appointed "state minister" of the separatist regime; in 2018, he was appointed "adviser on special assignments" to Bako Sahakyan; and in 2020–2023, he was "president" of the so-called entity.

At the same time, the following operational information concerning A. Harutyunyan's activities against our country is presented for your attention: on 4 October 2020, Minister of Defense of the Republic of Armenia David Tonoyan adopted a decision to shell civilian and military facilities in Ganja with the purpose of creating panic among the civilian population of the Republic of Azerbaijan. According to an excerpt obtained from the investigation of the criminal case being conducted by the Investigative Committee of the Republic of Armenia, D. Tonoyan and the "president" of the separatist "Nagorno-Karabakh Republic," Araik Harutyunyan, allegedly issued a statement that Ganja had been struck not from the territory of the Republic of Armenia, but from the territory of Karabakh on his order.

On 16 February 2021, during a meeting in Khojaly District with representatives of the Russian Peacekeeping Contingent temporarily operating in the Karabakh Economic Region, A. Harutyunyan stated that on 17 February the bodies of approximately 13–18 Azerbaijanis would be handed over to the Armenian side, and, mockingly, that "after those bodies are handed over to the Azerbaijani side, it will become known that they are citizens of Azerbaijan." In addition, A. Harutyunyan noted that in February–March 1992 the Armenian side had lined up Azerbaijani special-purpose police officers against a wall and shot them.

On 5 August 2022, A. Harutyunyan had information that, in the area of Saribaba village of Lachin District, which was then under the temporary control of the Armed Forces of the Republic of Armenia, Armenian military servicemen had deliberately rolled a piece of rock onto active-duty servicemen of the Armed Forces of the Republic of Azerbaijan, soldiers Samir Samed oglu Khudiyev and Tahir Chingiz oglu Aliyev.

Page 917

It should be noted that document No. 3-40/2-14/5/3750/2023, prepared by us earlier concerning A. Harutyunyan, was sent to your address on 20 November 2023. Among his close relatives, his spouse Kristina Vladimiri Harutyunyan was born on 13 June 1978 in the city of Khankendi; his daughter Mariam Harutyunyan was born on 9 June 2007; and his other daughter Ani Harutyunyan was born on 10 October 2016. They are registered at 33 Leonid Huruntsi Street, Khankendi.

Levon Mnatsakanyan Genrikhi was born on 14 September 1965 in the city of Khankendi. He is registered at 70 Vagarsyan Street, apartment 56, Khankendi. He is a citizen of the Republic of Armenia. In 1983–1985, he performed military service in the army of the former USSR. In 1989, he graduated from the Yerevan Polytechnic Institute, now the National Polytechnic University of Armenia. In 1992–1994, he participated in military operations and held

command positions in various armed formations of the so-called entity. In 2005, he graduated from the Military Academy of the General Staff of the Armed Forces of Russia. In 2005–2007, he was “deputy commander of the defense army”; in 2007–2012, “chief of staff of the defense army”; in 2012–2015, deputy chief of the General Staff of the Armed Forces of the Republic of Armenia; in 2015–2018, “commander of the defense army” of the separatist regime; and in 2018, he held the “positions” of “director of the state emergency service” of the so-called entity. He holds the military rank of lieutenant general. Among his close relatives, his son Sergey Mnatsakanyan was born on 24 June 1997, and his other son Marat Mnatsakanyan was born on 16 June 2006.

In response to the inquiry sent to the Ministry of Labour and Social Protection of the Population of the Republic of Azerbaijan by letter No. 2-2-030/2-029046/2023 dated 27 October 2023, based on the reply letter No. 3-17/2-12011/2023 dated 12 December 2023, prepared by that Ministry, and the certificate and memory device attached to it, it was determined that, as of the date of the reply submitted by the Ministry of Labour and Social Protection of the Population of the Republic of Azerbaijan, the Presidential pension assigned to persons with martyr status was being paid to 11,988 persons, and the Presidential pension assigned to the family members of martyrs was being paid to 18,683 persons.

Of the martyrs, 10,109 were military servicemen and 1,879 were civilians. Among those persons, 11,900 were men and 88 were women. A total of 8,653 persons had been granted martyr status up to 27 September 2020, and 3,335 persons after 27 September 2020. Among those granted martyr status after 27 September 2020, 3,307 were men and 28 were women. Of those persons, 3,236 were military servicemen and 99 were civilians. Among those granted martyr status after 27 September 2020, 3,040 died in the Patriotic War, 80 during the border clashes of 12–14 September, 200 during the local anti-terror measures of 19–20 September 2023, and 15 in other incidents.

The number of persons for whom war-related disability had been established and to whom the Presidential pension of the Republic of Azerbaijan had been assigned by the Ministry of Labour and Social Protection of the Population of the Republic of Azerbaijan was 23,183. Of them, 23,063 were men and 120 were women. A total of 19,158 persons had their disability determined up to 27 September 2020, and 4,025 persons after 27 September 2020.

In response to the inquiry sent to the Ministry of Culture of the Republic of Azerbaijan by letter No. 2-2-030/2-5747/2023 dated 27 October 2023, based on the reply letter No. 3-24-1/2-01-1283/2023 dated 14 December 2023, prepared by the State Service for the Protection, Development, and Restoration of Cultural Heritage under the Ministry of Culture, and on a review of the tables attached to it, it was determined that in Aghdam District, a total of 35,577 manats had been allocated for 25 monuments; in Jabrayil District, a total of 449,350 manats for 15 monuments; in Fuzuli District, a total of 916,940 manats for 41 monuments; in Kalbajar District, a total of 262,200 manats for 7 monuments; in Lachin District, a total of 948,290 manats for 39 monuments; in Gubadli District, a total of 494,950 manats for 25 monuments; in Tartar District, a total of 152,000 manats for 4 monuments; in Khojaly District, a total of 110,200 manats for 3 monuments; and in Khojavend District, a total of 1,501,000 manats for 46 monuments,

For Zangilan District, damage was caused to a total of 9 monuments in the amount of 248,900 manats. Thus, across 10 districts, damage was caused to 214 monuments in the total amount of 5,119,407 manats.

During the review of a video recording posted on Internet social networks, namely the video available at "https://www.youtube.com/watch?v=NR6ltrurjyk" under the title "18 + 1 ci Qarabağ döyüşü. Erməni çəkilişi!" it was once again confirmed that, in the 1990s, Armenian armed detachments treated Azerbaijani prisoners cruelly, degrading their honor and dignity, subjecting them to various forms of torture, and grossly violating the requirements of the relevant Convention concerning the treatment of prisoners.

Thus, it is seen from the video recording that the combat scenes were recorded in real conditions. In the footage, people in military clothing, using various armored vehicles and weapons, open fire in different directions. In the following frames, several people of Azerbaijani ethnicity in military clothing are seen to have been killed, with lifeless bodies remaining on the ground.

Later, at minute 12:05 of the footage, one Azerbaijani serviceman is seen being held prisoner by an Armenian armed detachment. The parties are speaking in Russian. At that moment, the Azerbaijani serviceman, in a frightened state, says that he did not kill Armenians during the fighting and tries to convince the Armenians around him by swearing an oath. The armed men around him mock him and insult him in various ways. They then ask the prisoner which brigade he fought in, who his commander was, and other information. During the questioning, they grab the Azerbaijani serviceman in military uniform by the collar, use force against him, throw him to the ground, and subject him to various forms of violence. The serviceman's groaning can be heard. They then lift him from the ground and continue questioning him. At that time, blood is seen flowing from the right side of the prisoner's face. Afterward, while insulting him, they force him to clean the clothing of a member of the Armenian armed detachment by licking it with his tongue. This footage continues until 14:00. In subsequent frames, at 14:39, Armenian armed detachments are seen engaged in looting in a devastated area. At 17:40, many Azerbaijani soldiers fall prisoner to the Armenians. This time, the Armenians line them up and force them to perform the "Azerbaijan march," while insulting them and mocking their dignity. Various injuries are also clearly visible on the prisoners' faces.

In response to the inquiry sent to the State Border Service of the Republic of Azerbaijan by letter No. 2-2-030/2-029559/2023 dated 30 October 2023, the reply letter prepared by the Service, No. 3-38/2-K/5/1771 dated 26 December 2023, stated that weapons, ammunition, military equipment, and other equipment seized during military operations had been documented by the relevant commission of the State Border Service of the Republic of Azerbaijan and, after being assigned to military units, were used in tactical exercises. It was also stated that from 27 September 2020 to 1 December 2023, in the areas where combat operations had been conducted, 605 firearms of 5.45 mm, 7.62 mm, and other calibers; 150 different optical devices; 5,435,137 items of various types of ammunition, rockets, and shells; and 5 pieces of military equipment — BMP-1, T-72M1 tank, and MT-LB armored vehicles — had been collected.

In response to the inquiry sent to the State Border Service of the Republic of Azerbaijan by letter No. 2-2-030/2-029631/2023 dated 27 October 2023, and based on the reply letter prepared by that Service, No. 3-38-16/2-12873/23 dated 25 December 2023, and the table attached to it, it was determined that during the Patriotic War, 1,198 servicemen of the State Border Service of the Republic of Azerbaijan were wounded. During combat operations on 13–14 September 2022, 36 servicemen of the State Border Service of the Republic of Azerbaijan were wounded. During the Patriotic War, 47 servicemen of the State Border Service of the Republic of Azerbaijan became martyrs. On 12–13 September 2022, while countering a provocation by the opposing side, 9 servicemen of the State Border Service of the Republic of Azerbaijan became martyrs. While performing their official duties, as a result of provocation by the Armed Forces of the Republic of Armenia, 5 servicemen of the State Border Service of the Republic of Azerbaijan became martyrs.
